BULBS, PLANTS, ROSES, SHRUBS ETC.

EVERYTHING FOR THE GARDEN.

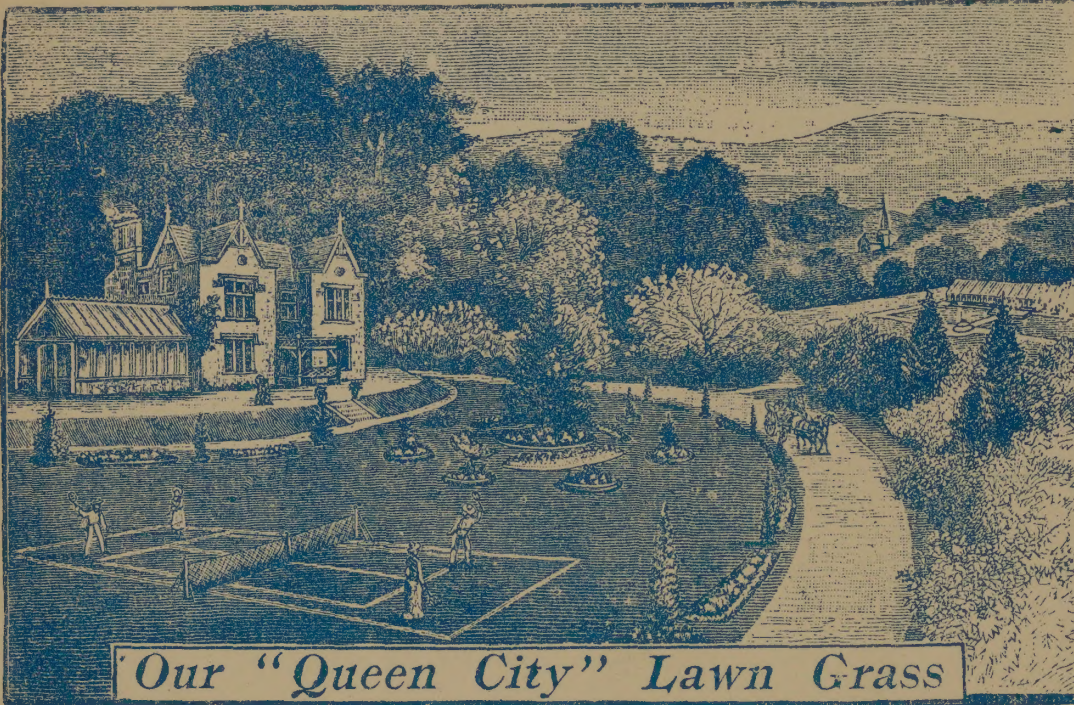

SOW OUR "QUEEN CITY" LAWN GRASS SEED

AND

QUICKLY SECURE A PERMANENT, RICH, GREEN, GRASSY CARPET

THE BEST LAWNS IN CANADA TO-DAY ARE FROM THIS MIXTURE

That our "Queen City" is the finest mixture of Lawn Grass Seed ever offered, the immense quantity we annually sell is the best proof we can offer. It is the best Lawn Seed for our Canadian climate, and is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained. Our mixture is the result of several years' careful experimenting, and as we now offer it, it is unequalled. The quantity required for making a handsome lawn is 80 to 100 lbs. per acre, or for renovating old lawns, 15 to 25 lbs. For a plot 20 x 20, or 400 square feet, 1 lb. is required for new lawn, or about half a pound for renovation. Per lb., 25c.; post-paid, 30c.

Our "Queen City" Lawn Grass

"SHADY NOOK" ... LAWN GRASS

Many lawns have bare and unsightly spots under trees and shaded places, which have been seeded, sodded, and every possible attention given to secure grass, but without success. There are but few grasses which will grow and thrive in such situations. Our "Shady Nook" mixture is a combination of dwarf-growing evergreen varieties, which, in their natural state, are to be found growing in woods and shady places, and will form a fine green sward. Ground that has been densely shaded by trees often becomes "sour," and if not properly drained is apt to be covered with a coating of moss. In such cases a light application of land plaster or wood ashes is most excellent, but the moss should be first removed by the use of a sharp rake. This should be done in the autumn and seeded with "Shady Nook" mixture the following spring. Per lb., 35c.; post-paid, 40c.

FANCY WHITE DUTCH CLOVER

Most valuable for Lawns sown with Grass Seed. Per lb., 25c.; by mail post-paid, 30c.

LAWN MOWERS

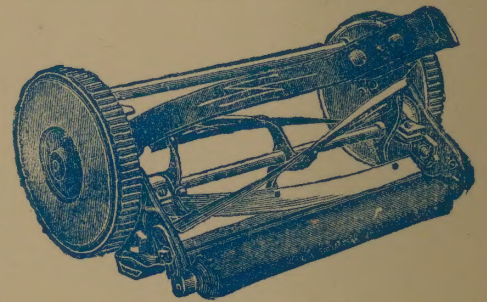

"PENNSYLVANIA"

Points of merit: Most perfectly constructed machine made; strong, durable, easily adjusted, has a rear cut, runs easily, almost noiseless, will cut long grass, leaves surface perfectly smooth; knife works from either wheel, few repairs, the favorite machine, and receives highest awards everywhere. If requiring a Lawn Mower select a "Pennsylvania." Note prices.

THE NEW "BALL RATCHET"

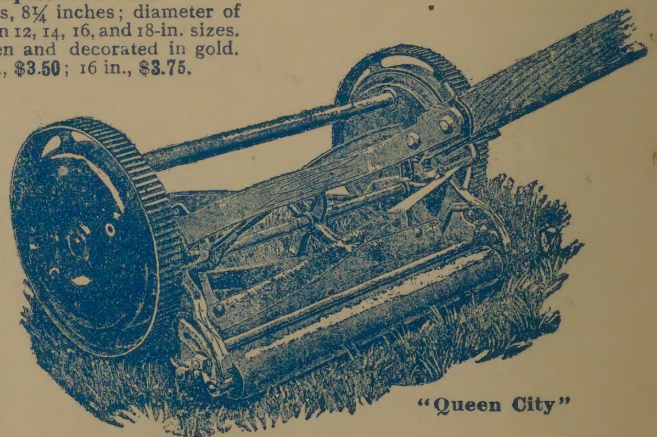

The greatest virtue any mechanical device may possess is effectiveness for the purpose it is intended, combined with simplicity of construction. This mower possesses both these advantages. Its work is always smooth and clean, its operation easy, and its construction so simple that a novice easily comprehends it at a glance. We guarantee that this mower will do satisfactory work. It is made of good material, and its workmanship, finish, construction, adjustment, everything about the mower, in fact, is of first quality. All parts are interchangeable and in case of wear or breakage can be duplicated. Diameter of Traction Wheels, 8 1/4 inches; diameter of Reel, 5 1/2 inches. Made in 12, 14, 16, and 18-in. sizes. Painted in red and green and decorated in gold. Price, 12-in., \$3.25; 14-in., \$3.50; 16 in., \$3.75.

"New Ball Ratchet"

"QUEEN CITY"

For the benefit of those of our customers who wish a really good medium price mower we offer the "Queen City." We can recommend this as being the best machine for the money ever put before the Canadian public. The bearings are brass; driving wheels 10 inches high, and the cutter knives and blade are made of the finest steel obtainable. Price, 14-in., \$6.50; 16-in., \$6.75; 18 in., \$7.25.

"Queen City"

"CONTINENTAL"

This is one of the best high-grade Mowers. It is made of best material and workmanship. We can recommend it. Drive Wheels, 8 inches high. Price, 14-inch cut, \$11; 16-inch, \$12.50; 18-inch, \$14.

The Pennsylvania and Continental Mowers are the finest constructed machines upon the market.

VEGETABLE AND FIELD SEEDS, SEED GRAINS, ETC.

Please note that we pay postage at packet, ounce and pound prices on all Vegetable and Flower Seeds, except Beans, Corn and Peas at pound prices. Any orders for such, or for Field Root Seeds, and Farm Seeds, must have four cents per pound remitted for payment of postage.

All Seed Grains, Clover, Timothy, and any Seeds sold at bushel, peck or hundred pound rates, are only delivered at Railway, Boat or Express Office at Toronto; the purchaser must pay carriage on arrival of goods.

FOR REMARKS

Do not mix up the order with questions requiring answers, as it often causes trouble and sometimes mistakes or omissions. Please write in this space any remarks.

SPECIAL NOTICE.—We shall appreciate it as a special favor if our friends and customers will write in the blank below the names of some of their acquaintances who will be in need of Seeds.

Hearty Greeting and Good Wishes
are hereby extended to our

Friends and Customers

Throughout this vast Dominion, for a
Happy and Prosperous New Year.

We thank you for your kind orders in the past, which have in so great a measure assisted in the enormous growth of our establishment. We take pleasure in submitting our 1899 Catalogue, and ask you to look carefully through it. "The wise gardener has the harvest in view when he selects his seedsman." It is our earnest effort to supply the best Seeds that grow. The many orders received year after year from our old customers proves they realize that our business methods are correct, and that the seed buyers will stand by a firm that not only take as their motto "QUALITY FIRST," but act up to it.

Please Read Suggestions to Buyers

WHEN TO ORDER.—The planting season is short; the rush for seeds in the spring is very great; the mails are heavily taxed to carry the enormous quantities annually supplied by post. It is an advantage to place orders early, saves possible errors in the hurry and ensures readiness in having the seeds when the weather becomes suitable for planting. Often a few days delay in planting the garden in the spring through oversight in ordering early, causes disappointment; this may be avoided by ordering early. "Prompt to action is the leading road to success."

HOW TO ORDER.—For convenience we herewith send an order sheet and addressed envelope—**be careful and sign your name, post office and Province.** Write each item on a separate line, and carry out the prices. Keep a copy of the order, and "check off" the items when received, that you may know everything has been sent you. We seldom make errors, but when they happen we wish to be notified immediately, that corrections may be made.

CASH WITH ORDER.—The multitude of orders daily received during the rush of business from January till June makes it necessary that each order must be accompanied with the cash. We send no goods C.O.D. (collect on delivery), nor do we give credit. We are an established business house, and guarantee safe arrival. Your money is safe to send with the order.

HOW TO SEND MONEY.—We assume the risk when sent by postal note or express order, which are the safest and cheapest ways, or for amounts of five dollars and less, by registered letter. Amounts under one dollar can be sent in postage stamps. Letters containing money, when sent without being registered, are at the risk of the sender. Use our addressed envelope, otherwise address THE STEELE, BRIGGS SEED CO., Toronto, Ont.

LOW, EXPRESS RATES.—We have arranged for a special rate for carriage with the express companies of **Twenty per cent.** less than their regular merchandise tariff, on seeds and plants when packed and sent in closed cases or baskets—to all points, but no less charge than **Twenty-five cents on the parcel.** This exceedingly favorable rate will enable customers to have their seeds and plants, such as are only sent at purchaser's expense for carriage, go by express, and while the cost may be a little greater than the ordinary freight rate, it will be much quicker and safer. When ordering please state if we shall ship by express or freight.

SENDING PLANTS.—All orders for plants and bulbs which are liable to damage from frost will be held until about the end of April or first of May, when we begin shipping, and continue as fast as the weather will permit until all are sent out. Hardy plants and vines which remain in the ground over winter, will be forwarded as soon as they can be lifted in the spring. Should these seeds be sent and not the plants and bulbs, do not be impatient, as they are held for your protection against loss, and will be forwarded when the weather will permit of our assuming the risk.

WE GUARANTEE SAFE ARRIVAL of all Seeds, Bulbs and Plants, in good condition, when sent by mail. If a package fails to reach a customer, we will send again as soon as informed of the fact; or if any part is injured or lost, we will replace it. We do not consider ourselves held by this guarantee unless complaints are made within ten days after receipt. Sometimes it happens that orders never reach us, and many orders, with cash, reach us without a post office address, and often without the name of the sender. When customers do not receive their Seeds, Bulbs or Plants within a reasonable time after ordering, they should inform us, and at the same time send a copy of their order, stating the amount of money and in what manner sent.

CORRECTION OF ERRORS.—We take the utmost care in filling orders, always striving to please our customers. In case an error is made, we desire to be informed of the fact, and promise to make such corrections as will be perfectly satisfactory. Should it happen, towards the end of the season, that any particular named plant or bulb is sold out, and unable to supply, we will send another of similar or better description, unless instructed to the contrary; and should we not have something equal or better, the money sent will be refunded. As our supply is considered ample for any demand, we do not anticipate such to happen; but should we send some other variety our customers will understand the cause. Correct names are always attached.

TESTING SEEDS.—A sample of every lot of seeds, whether grown by ourselves or grown upon contract for us, is thoroughly tested in our greenhouses, and only those of satisfactory germinating power are sold, and not only are our growing crops carefully rogued while growing, but their product and new varieties from all parts of the world are annually tested by careful field trials upon our own grounds, that we may be sure the varieties we offer are the best grown, which is protection to our customers.

CONDITIONS OF SALE. We give no warranty, express or implied, as to description, purity, productiveness or any other matter connected with any seeds we send out, and will not in any way be responsible for the crop. All seeds ordered from us, or which we send out, are supplied only on these conditions.

SEEDS NOT PRICED, such as Clover, Timothy, Seed Grains, etc., are subject to market changes in prices, and upon them we cannot give standing prices. We shall be pleased to quote prices on any such Seeds, when desired. Letter or telegraph quotations are always for immediate acceptance and orders.

EVERY FARMER IN CANADA should have our **Special Fall Wheat Circular.** Write for one. They will be issued in August

WHOLESALE CATALOGUES sent to dealers on application.

BULB CATALOGUES.—In September we publish a Catalogue containing a list of Bulbs for Autumn planting, and for Winter flowering in the house, which will be forwarded to those of our customers who purchased Bulbs or Seeds the past year.

CORRESPONDENCE.—We are always glad to hear from our customers, answer enquiries and aid them in any way we can.

Greenhouses and TRIAL GROUNDS

We cordially invite you to visit our Greenhouses and Trial Grounds, which are among the most complete on the American Continent. They are situated at 1514 Queen Street East; Street Cars stop at the entrance; only a fifteen minutes ride from the St. Lawrence Market. We test and grow both old and new varieties, and note and record their good or bad points, thus we are enabled to select and offer you only such varieties as we find to be thoroughly satisfactory and adapted to our Canadian climate. Call at Exhibition time or at any time during the summer and see for yourself the great care we take to maintain the high standard of quality for which our seeds are noted.

NEW GIANT COMET ASTERS

21 It would seem as if the highest possible perfection had been attained in these truly grand Asters. They win enthusiastic admiration from all who see them. The flowers are of immense size, often 6 inches across, composed of long, wavy, twisted petals, gracefully formed into loose, yet densely double, half-globes, resembling some of the finer Japanese Chrysanthemums. These giant varieties differ from the older, well known Comet Asters, not only in bearing much larger flowers, but the petals are longer and broader. The plants are of luxuriant growth, attaining a height of 15 inches, each plant bearing from 20 to 30 of these magnificent flowers on long stems, which gives them an added value for cutting for vases. (See cut). Per pkt., 15c.

NEW SINGLE ASTERS

New Feathered Cyclamen

"Bush Hill Pioneer"

602 Diploma d'Honneur, Brussels, 1897. First-class Certificate, Ghent, 1897. First-class Certificate, Paris, 1897. Cyclamen are among the most beautiful winter and spring flowering plants for the window and greenhouse. Not only are the flowers of striking beauty, but the foliage is also highly ornamental. This splendid new variety is pure white and quite distinct, with singular flowers; from the exterior of each petal is produced a fan-like crest, as shown in the accompanying illustration. Price, per pkt., 65c.; 2 for \$1.25.

NEW GIANT COMET ASTERS.

"BUSH HILL" PIONEER CYCLAMEN

GIANT FLOWERING MARGUERITE CARNATIONS

22 The flowers often measure three inches across, and are usually as double as double can be; most of them have beautifully fringed petals, and are delightfully fragrant. One great merit of these Carnations is that they commence to flower in about twelve weeks' time from seed. Seed sown in the spring will produce luxuriant plants that will be continually full of bloom from August until killed by severe frosts. If desired, the plants can be potted in the autumn, and they will continue to bloom profusely in the house through the winter, or seeds may be sown during the summer for the best winter-flowering plants. These Giant Marguerite Carnations are the best garden types grown; the plants are sturdy, branching and erect; the flowers are well supported on strong long stems, and although the flowers are immense, yet they seldom burst the calyx. Too much cannot be said in praise of these magnificent Carnations. They were originally produced by crossing the large flowering annual garden Pinks with the Carnation proper, retaining the characteristic flowers, clove fragrance and foliage of the latter with the desirable merits of blooming quickly and profusely from seed, and the bushy, luxuriant growth of the former. Per pkt., 15c.

SINGLE FLOWERING ASTERS

23 It is a well known fact that single flowers have more brilliant and purer colors than double ones, and it is not surprising that the taste for them has been steadily increasing. The single flowering Asters are a valuable addition to the list. They form globular plants and carry on long stout stalks a mass of star-shaped flowers which appear early and continue late into the autumn. Very effective in beds or borders, and offer a pleasing change to the innumerable double sorts.

Mixed Colors. 10c. per pkt.; 3 pkts. for 25c.

MIGNONETTE

New Defiance

90 This magnificent variety, when grown under favorable conditions and with proper care, will produce spikes of remarkable size—from 12 to 15 inches long, and of the most delicious fragrance, more so than any other variety. The individual florets are also of immense size, forming a graceful as well as compact spike. It is an extraordinary keeper, having retained its beauty and fragrance for three weeks after being cut. Per pkt., 10c.

DEFIANCE MIGNONETTE

GIANT FLOWERING MARGUERITE CARNATION

See our fine assortment of Gladioli, page 41.

AFRICAN HORNED CUCUMBER

African Horned, or Climbing CUCUMBER

133 A remarkable, curious, beautiful and delicious Cucumber raised from seeds sent from West Central Africa by a medical missionary. May be allowed to trail over the ground, or it given a trellis will make an immense amount of ornamental vine and dense shade. The fruit is one of the most curious and ornamental objects imaginable. It is oblong in form, somewhat three-sided, and covered with strong protruding points or horns. When the fruits ripen they turn a brilliant orange and yellow, in speckled and clouded effects, and keep sound and perfect for weeks. The Africans eat only the pulp of the ripe fruit, which is sub-acid and very refreshing in hot weather. The vines grow luxuriantly and fruit profusely all summer long after other Cucumbers have died out, and nothing seems to trouble it, either bug, worm, or blight. It cannot be too highly commended and everybody should grow it. Fowls eat the ripe fruits greedily. Seeds, per pkt., 10c.; 3 pkts. for 25c

GIANT EMPEROR SALPIGLOSSIS

134 The Salpiglossis is one of the greatest favorites amongst annuals, partly because of its easy culture, but principally on account of its beautiful orchid-like flowers which it produces from early summer until late fall. This new variety forms only one leading stem and bears on its summit a veritable bouquet of the most beautiful flowers, each one richly veined with gold, and much larger than the finest of the "Grandiflora" type. The throat is short and the edge of the flower not so deeply incurved as in the old type, giving it a more rounded form and displaying the rich colors to the best advantage. Per pkt., 10c.

GIANT EMPEROR SALPIGLOSSIS

PRIMULA OBCONICA FIMBRIATA

Primula Obconica Fimbriata

135 A profuse blooming fringed variety of the well known large flowering Primula Obconica. The flowers are as finely fringed as the Chinese Primrose, and are delightfully fragrant. It thrives well with ordinary house culture, and will grow in favor with those who wish easily grown plants. Most useful for cutting. Per pkt., 25c.

Beautiful New Giant-Flowered Nasturtium, "Sunlight"

224 This beautiful new Nasturtium has handsome light-green foliage lit up by myriads of clear, rich golden-yellow flowers, borne so profusely as to almost conceal the foliage. The petals are large and round, measuring more than 1 1/2 inches across, and are daintily crinkled, which gives a very pretty effect. The two upper petals have a few delicate brown lines at their base, and the three lower ones are more distinctly bearded or fringed at the throat than is usual. The flowers measure nearly 3 inches across. It is a splendid climber, and its glowing color makes it wonderfully effective. Per pkt., 10c.

PANSY—STEELE-BRIGGS' GIANT SHOW MIXTURE

PANSY, Steele-Briggs' Giant Show Mixture

The largest and most Beautiful Pansies grown.

412 This strain comprises a beautiful collection of colors and markings, and we are confident it will prove satisfactory for perfection of form, firmness of texture, freedom of bloom and elegance of coloring. The result of many years' careful selection and hybridization; embraces all the attractive features that tend to make the Pansy the people's flower. Per pkt., 50c.

"SUNLIGHT" NASTURTIUM—NATURAL SIZE FLOWER

NASTURTIIUM "HYBRIDS OF MADAME GUNTHER"

New Climbing Nasturtiums "HYBRIDS OF MADAME GUNTHER"

900 These new HYBRIDS OF MADAME GUNTHER make a strong growth, climbing from 5 to 6 feet high, and are covered from spring till fall with large substantial flowers of the most brilliant shades. They are remarkable for their wide range of colors; embracing rose, pink, salmon, purple, velvety dark maroon, light yellow, and deep orange in self colors, as well as striped and blotched in the most fanciful manner. So ornamental is this new strain that it deserves a place in every garden, either for climbing or trailing from vases, or over the ground. Per pkt., 10c.; oz., 25c.

NEW BLACK FOLIAGE HELIOTROPES *Midnight and Egypt*

296 These grand new varieties are most appropriately named; the stems are black, and the foliage a beautiful bronze green, so dark as to be almost black. *Midnight* has a fine tree-like habit, while *Egypt* is round and bushy, with lustrous foliage resembling thick crepe. The flowers of both are beautiful shades of bluish purple, variegated with white and lighter purple. Both are extremely handsome, and come true from seed. We offer these two varieties in mixture. Per pkt., 15c.

The Large Flowering Fancy Dianthus "ORIENTAL BEAUTIES" *From South Japan*

297 A magnificent strain of new large flowering Dianthus, which I have thoroughly tested, and can recommend as a novelty of sterling merit. These flowers measure from 3 to 4 inches across with petals measuring $1\frac{1}{2}$ inches in diameter. They are most exquisitely formed, the petals being full, overlapping, crinkled and laciniated. The flowers possess that peculiar and artistic charm so noticeable in all plants from the Flowery Kingdom. They range in color from pure white through shades of pink and crimson, the coloring and marking is rich beyond description. They are perfectly hardy, are perpetual bloomers, needing only to be cut back every few weeks to bring on a new crop of flowers. Per pkt., 10c.

BLACK FOLIAGE HELIOTROPE

Sutton's Flower Seeds

By special arrangement with Messrs. Sutton and Sons, of Reading, Eng., we are enabled to offer a few of their specialties in Flower Seeds to those who wish to grow for exhibition purposes. Florists, private gardeners and amateurs who know the high standing of that well known house, need no introduction. The varieties offered will be supplied in their original papers. Prices are net. No smaller quantity can be made.

ASTER.—(Sutton's Mammoth White). Said to be the largest Aster in existence. The flowers resemble massive white Chrysanthemums, and are borne on long, stiff stems, which enhance their value for cutting. Height, 30 inches. Per pkt., 40c.

BEGONIA (Sutton's Prize Single Tuberous-Rooted). Saved from the richest and most varied flowers. All shades of color are included, from the deepest crimson to the lightest pink, as well as orange, yellow and white. Per pkt., 55c.

CINERARIA (Sutton's Superb Single.) Their immense blooms, splendor and variety of coloring, symmetrical form and profusion of flowers produced will astonish and delight all who try this superb mixed strain. Per pkt., 70c.

CYCLAMEN (Sutton's Prize Strain), Flowers of great size. Pkt., 70c.

DELPHINIUM (Sutton's Improved Hybridum). A very beautiful strain, with large handsome flower spikes, including the best of the new double and single varieties, charming colors, ranging through shades of blue from delicate porcelain and white to dark violet. Mixed colors. Per pkt., 25c.

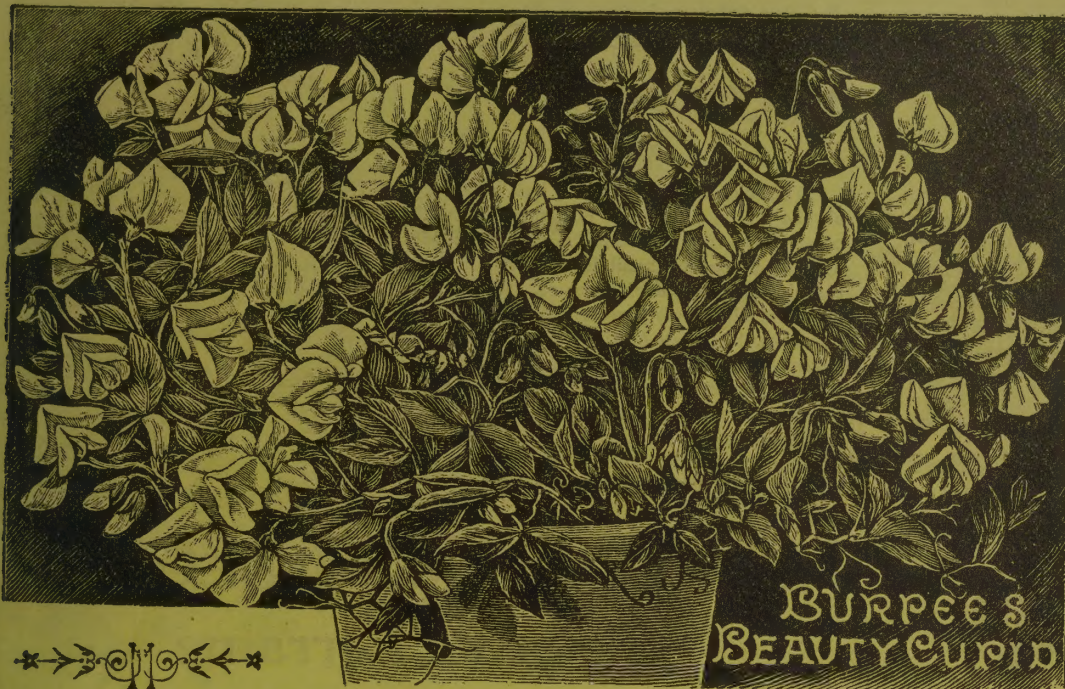

NEMESIA STRUMOSA SUTTONI. Few annuals afford as many distinct colors, including white, pale yellow, crimson, and an almost endless diversity of intermediate shades, and the flowers crowded into fine heads, make a bright and attractive display. Mixed colors. Per pkt., 25c.

MIGNONETTE—Sutton's Tom Thumb. A remarkably dwarf, unique strain of this most popular garden favorite. For borders and edgings of flower beds it is a gem. Per pkt., 15c.

PRIMULA—Sutton's Special Hybrid. A combination of the finest single Primulas, large blooms. Make grand plants, and yield immense trusses of exquisite beauty. Per pkt., 70c.

DIANTHUS "ORIENTAL BEAUTIES."

SWEET PEAS

BURPEE'S BEAUTY CUPID,

700 Of the true Cupid type—growing only six to seven inches high with deep emerald-green foliage—bears flowers fully equal in size, form and substance to the best of the new tall Sweet Peas. The keel is heavily curved, holding the wings well up under the standard; wings quite broad, well expanded, with slightly recurved edges. The standard is a delicate and yet decided rose color, lightening to nearly white at the edges, and slightly striped with carmine at the base. The wings are suffused rosy-carmine, deepening at the edges. A vigorous grower, it is a wonderfully free bloomer, and besides its beauty in the garden promises to be of real value as a commercial flower in greenhouses. Sold only in original sealed packets. Large size, 25c.; small size, 15c.

PRIMROSE CUPID.

701 Like all the other Cupids, this is very free-flowering, and the dwarf plants, only 6 to 7 ins. high, have that distinct emerald-green foliage which is peculiar to this new race. This is identical with the original white Cupid in all respects except coloring. Flowers are of a rich creamy tint, identical with that of the tall Primrose. The standard is rather short, but stiffly erect, very broad and well expanded; wings wide and well expanded. The seed we offer is all hand-picked, and therefore, although white-seeded, will grow nearly as vigorously as the hardier black-seeded varieties. Large size packets, 25c.; small size, 15c.

ALICE ECKFORD CUPID.

702 The blooms, while only medium size, are of fine, erect form, borne in close clusters of three on stiff stems, displaying most attractively the charming, blended coloring. The standards are a rich creamy-white, suffused or blended with a delicate shading of soft flesh-pink; the wings are silvery-white with a faint pink flush in the central portion. The coloring of the entire flower becomes rather deeper, instead of fading, when well opened. The flower is identical in size, form and color with that of the tall Alice Eckford, which, while not of the largest size, has been admired so greatly on account of the delicate and harmonious shadings of softly blended tints. It is a black-seeded variety of strong vitality. Large size pkts., 25c.; small size, 15c.

ECKFORD'S Advance Set of Novelties in SWEET PEAS

PRINCE OF WALES. 703 Award of Merit, Royal Horticultural Society, 1897. A bright rose-self of intense color and fine bold form, also a grand substance, bearing three and frequently four flowers well placed on long stout stems; a most desirable addition, being extremely free-flowering and quite unique in color; has received much admiration during the past summer. Per pkt., 20c.

LADY MARY CURRIE. 704 Award of Merit, Royal Horticultural Society, 1897. First-class Certificates at Trentham, Leicester, Wolverhampton, and Edinburgh, 1897. A deep orange-pink, delicately shaded rosy-lilac, a most charming flower of exquisite brilliancy; it has been much admired wherever shown and is likely to become one of the greatest favorites. Per pkt., 20c.

CHANCELLOR. 705 First-class Certificates Scottish Horticultural Association, Edinburgh, Wolverhampton, and Trentham, 1897. Standards bright orange, wings bright orange-pink, a shade lighter than the standards; it is really a self-colored flower of intense glowing color, grand form, good substance, large size, usually three-flowered, well placed on long stout stems. Per pkt., 20c.

COLONIST. 706 First-class Certificates, Wolverhampton and Leicester, 1897. This is a lovely flower of fine form and substance, usually three-flowered, nicely arranged on long stout stems; the growth is extremely vigorous, very free-flowering, the rows being literally covered with bloom of the most beautiful soft lilac, overlaid with the brightest rose. Per pkt., 20c.

DUCHESS OF SUTHERLAND. 707 A pearl-white, delicately suffused with light pink, bright and charming, fine form and good substance; the flowers being well placed on the stem make it a decided and desirable acquisition. Per pkt., 15c.

DUKE OF SUTHERLAND. 708 First-class Certificate, Edinburgh, 1897. Deep claret with a deeper flush of maroon on the back of the standard; wings are of a bright indigo-blue throughout. With age the whole flower becomes the same rich and bright indigo-blue as the wings; a very effective color, and quite distinct. Per pkt., 15c.

BLACK KNIGHT. 709 This is one of the finest flowers, the color being a deep maroon self, clear and shining, the standard bearing a bright metallic polish, flowers well expanded, also well placed on the long stout stem; the plants are of vigorous growth and very free-flowering. Per pkt., 20c.

SPECIAL OFFER—Set of seven Eckford's Novelties for \$1.00.

ASPARAGUS SPRENGERI

A most desirable new species, especially useful to grow as a pot plant for decorative purposes or for planting in suspended baskets; the fronds are frequently 4 ft. long, are of a rich shade of green and most useful for cutting, retaining their freshness after being cut for weeks. It will make an excellent house plant, as it withstands dry atmosphere and will succeed in almost any position. No introduction of recent years has made such a favorable impression as this graceful Asparagus. We have a large stock of it and offer good strong plants at 20c.

NEW DOUBLE RUDBECKIA

"GOLDEN GLOW"

The new, large, double-flowering, golden yellow Rudbeckia is of fine habit, vigorous growth, with early, continuous and immense blooming qualities; more elegant and beautiful than the double flowering "Helianthus Multiflorus"; grows 6 ft. or more in height, much branched, erect and exceedingly attractive in the garden. The most distinct and handsome large flowering perennial that has been introduced for years. Plants 10c. each

RUDBECKIA "GOLDEN GLOW"

ASPARAGUS SPRENGERI

BEGONIA GLOIRE DE LORRAINE

Begonia Countess Louise Erdody

This variety is sometimes called "Snail Begonia" on account of the peculiar formation of the leaves. The form is exceedingly odd and unique. The striking peculiarity which distinguishes it from all other Begonias consists in the fact that the two lobes at the base of the leaf do not grow side by side, but one of them winds in a spiral-like way until in a full grown leaf there are four of these twists lying on top of the leaf nearly 2 inches high. The leaf has a metallic lustre, dark silvery in the centre, shading into coppery rose toward the margin, which is broadly and evenly edged with the same hue, but darker and more brilliant. An exceedingly curious and interesting variety. 20c. each.

MADAME BRUANT GERANIUM

A grand variety wholly distinct from any other in cultivation. White, veined with carmine lake, florets regularly bordered with bright solferino; the arrangement of color is exquisite, often intermingling and producing a striped effect; the trusses are large and beautifully formed; the plant is a good healthy grower and very free flowering. Everything considered, this is the most distinct and wonderfully colored variety ever sent out. Each, 15c.

AGERATUM PRINCESS PAULINE

A novel variety of dwarf, compact habit, rarely exceeding 5 inches in height. Its peculiarity consists of both blue and white being combined in the same flower, the body of the flower being white while the stamens, forming an outer ring, are sky-blue, giving the flower a pretty variegated appearance; one of the most distinct new bedding plants of the year. Each, 15c.

AGERATUM PRINCESS PAULINE

Lotus Pelyorensis

CORAL GEM

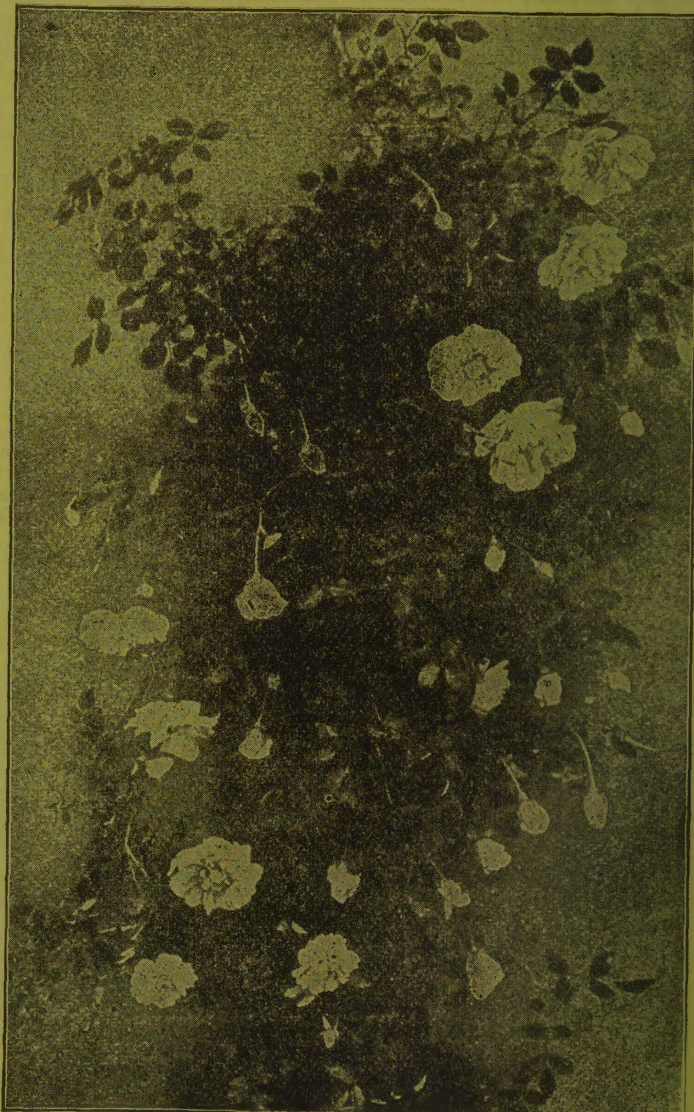

This charming plant is so well thought of abroad that a prominent horticultural journal color-plated it. The Garden says of it: "Its cylinder branching habit is most striking, and the silvery foliage even more so. Without its flowers it might almost be described as a 'Silvery Asparagus.' But the bright coral-red flowers, measuring two inches in length, are really beautiful, greatly reminding one of a rare and beautiful Clanthus, so difficult to grow, while the Gem is of the easiest possible management. Its drooping habit also makes it useful for hanging baskets. It is nearly hardy." Each, 20c

LOTUS PELYOIRENSIS (CORAL GEM)

NEW FLOWERING BEGONIA Gloire de Lorraine

This is undoubtedly the greatest gem in winter-flowering Begonias yet introduced, and is now offered for the first time. A few plants exhibited during the past winter attracted much attention, and it is certain to become a popular favorite. It grows from 10 to 12 inches high, forming naturally graceful, bushy specimens which from October to April are completely hidden in soft, rosy pink flowers. (See cut.) Young plants, each, 20c.

NEW EVERGREEN ROSES

NEW Evergreen Roses

This new and distinct type of hardy roses is one of the greatest advances made in the horticultural world for a large number of years. The foliage is of a leathery texture, shiny and evergreen, that is, keeping the foliage all winter, a character in Roses never before obtained. The flowers are produced most profusely, are very fragrant and can be used for cut flowers when in bud; the use of these roses will be unlimited; for trailing or covering ground, roots, stumps, and stems of trees, walls, trellises, etc., they are unsurpassed. The flowers are very fragrant and range in color from white to the prettiest shades of pink. Some are single and others double and semi-double. We offer these in 4 varieties, strong 2-year plants, at 35c. each, postpaid.

You are cordially invited to visit our Greenhouses and Trial Grounds, 1514 Queen St. East.

New Weeping Lantana

This is one of the most beautiful of flowering plants for baskets, vases and pots ever grown. It also grows to perfection in open ground during summer. The plant has a most graceful drooping habit, grows with wonderful rapidity and blooms persistently winter and summer, producing a cluster of flowers at each leaf. Color delicate, clear lilac-pink. Very distinct and pretty. We make the price low for strong plants in order that everyone may have a few plants of this superb Lantana. Price, 15c. each.

WEeping LANTANA

GYNURA AURANTIACA (VELVET PLANT)

CUCUMBER Steele-Briggs' Evergreen

A remarkably fine strain of Cucumber, which is especially recommended for market, table or pickling purposes, differing from the ordinary and popular White Spine in color; it retains a deep green color in all stages of its growth; produces extra long smooth shaped fruit; very prolific and very white in flesh, tender and crisp. Per lb., 50c.; $\frac{1}{4}$ lb., 20c.; oz., 10c.; pkt., 5c. (See cover.)

MAMMOTH WHALE SQUASH.

GYNURA AURANTIACA Velvet Plant

This is one of the rarest and most beautiful foliage plants in cultivation. It is of exceedingly robust and branching growth, yet remains dwarf and compact. The leaves and stems are entirely covered with minute hairs, shining, glistening, reflecting many delightfully new colors, such as peculiar and beautiful shades of orange, crimson, purple, blue, green—a veritable kaleidoscope. Any change of position appears to alter the color of the foliage, which appears thick and long lasting. An ordinary observer would pronounce the plants artificial, so unlike nature do they appear. In fact, it is so beautiful that flowers seem superfluous, yet they are produced in brilliant orange clusters. Moreover, where a Geranium will languish this will thrive. 25c. each.

PEAS—DWARF EXCELSIOR

This is an extra early dwarf wrinkled Pea, usually ready for table in 40 to 45 days from planting, only a few days later than the early round sorts. It grows about 14 inches high, or about half as tall again as the American Wonder. It is of vigorous constitution and wonderfully productive, in which respect it excels such rivals as American Wonder. The even regular habit of the plant is also a great advantage, particularly to market growers. We believe that Dwarf Excelsior has not only "come to stay," but that it will eventually supersede many sorts of like character. (See cover.) Per peck, \$1.10; quart, 18c.; pint, 10c.; pkt., 5c.

ADMIRAL PEA

There have been so many new varieties of Peas offered in the last few years that we think it well to draw especial attention to this splendid variety. It has given the greatest satisfaction wherever grown, and we recommend it to our customers as one of the best second early peas ever introduced. The vines are vigorous, pods large, usually borne in clusters, and filled with from six to eight large peas of the finest quality and color. (See cut.) Per peck, 90c.; quart, 17c.; pint, 10c.; pkt., 5c.

If you want Peas by mail add 5c. per pint, 10c. per quart, for postage.

Mammoth Whale Squash

This new Squash produces the most magnificent Mammoth Squashes we have ever seen. They are often 3 feet long, of a dark rich color, and sometimes weigh over one hundred pounds. Its greatest diameter is near the blossom end, and tapers from there to each end; this peculiar form, together with its immense size, doubtless suggested the name Mammoth Whale. It is very prolific; the vines are robust and hardy. The flesh is solid, of a beautiful orange-yellow color and of excellent quality. It is a good winter keeper. Per pkt., 10c.

Admiral Pea...

See page 43 for our Superb Collection of Large Flowering Cannas.

Steele-Briggs' Select

Yellow Globe Danvers Onion

This is a specially selected strain of our famous Yellow Globe Danvers Onion. It is of good size and fine globular form, with small necks, and immensely productive; it is the best market onion grown, and will command five to ten cents per bushel more than any other variety we know of. Its quality is excellent, being of a mild flavor and exceedingly fine grained; as a keeper it is unexcelled. Per lb., \$2.50; ¼ lb., 70c.; oz., 25c.; pkt., 5c.

Chester King Cabbage

This grand Cabbage is remarkable for sureness of heading and regularity in growth; the heads form early and continue to grow till time to pit. It is all head and always sure to head, even when other varieties fail. Heads are medium size, solid, round and as hard as they can be, and of a bluish-green color. It is a low-growing variety with few outer leaves. The quality is fine and flavor excellent; it ordinarily weighs from 10 to 15 pounds each, heads when opened being crisp and white. It is very sweet flavored, keeps well, is good for shipping, and is just the variety and quality to suit market gardeners, farmers, and all lovers of good cabbage. Price, per pkt., 5c.; oz., 30c.

EXQUISITE MUSK MELON

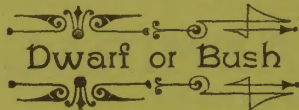

STEELE-BRIGGS'

Exquisite Musk Melon

A red fleshed variety of most dainty and delicate flavor

This grand new melon is somewhat globular in shape; the skin is a peculiar grayish green until ripe, when it changes to a bright yellow. The ribs are wide and covered thickly with prominent netting. The melons average about six inches in diameter, have a very small seed cavity, and are exceedingly solid and heavy for their size. The flesh is a deep, rich, orange-yellow color, and is of very fine grain, without the slightest stringiness, and of delicate and delightful flavor: Not as musky as the green-fleshed melons, yet more highly prized on that account by many epicures. This variety produces melons of uniformly high quality, and is likely to displace all other red or yellow fleshed sorts. It is a strong, hardy grower and very prolific. We can recommend it either to the market gardener or the amateur. Price, per pkt., 5c.; oz., 10c.

BEANS

Dwarf or Bush

Mammoth Wax

BRIGGS' NEW EXTRA EARLY BEET

The pods frequently attain a length of ten to fourteen inches, with the thickness of a man's finger, and are nearly all solid pulp, the seeds being very small when the pods are fit for use. The pods are a rich golden color, and are absolutely stringless, cooking tender and delicious. This is the coming Wax Bean for family or market purposes. It is enormously productive, as many as 50 of its monster pods having been counted on one bush. The plant is so large and vigorous, and the pods are so solid and

pulpy, that they require a great deal of light and air to perfect them. We would again call attention to the necessity of planting this grand variety nearly twice as wide apart as ordinary bush beans. Peck, \$1.60; quart, 30c. pint, 15c.; pkt., 5c. (add 5c. per pint, 10c. per quart, if wanted by mail).

Briggs' New Extra Early Beet

An extra early variety with slender stems, small dark leaves and smooth skin. Color of the flesh is a rich dark crimson with very faint rings. The flesh is crisp and sweet and entirely free from earthy flavor, which is a great drawback to many varieties. It proved itself to be fully as early as the Crosby, regular in character and free from coarse roots. It is flattish round in shape like an orange, and has a firm tap root. (See cut). Price per packet, 5c.; oz., 15c.; ¼ lb., 35c.

Steele-Briggs' Earliest of All Tomato

This Tomato has fully sustained its claim for extra earliness, being the earliest out of 70 varieties grown on our trial grounds last year, and we consider it the earliest Tomato in cultivation. The tomatoes are of a rich, dark red color; it is entirely free from core. The vines are most profusely loaded with fruit, and continue to bear throughout the season. Price, ¼ lb., 70c.; oz., 25c.; pkt., 5c.

THREE POINTERS

1st. Procure good honest seed. 2nd. Have your soil deep, rich and well drained. 3rd. Secure your seeds early, and be prepared to plant as soon as the season will permit.

GENERAL LIST OF FLOWER SEEDS

**GIVEN FREE
WITH EVERY ORDER**

Customers may select the following values in extras when ordering Flower and Vegetable Seeds at packet and ounce prices and remitting the following amounts:

When sending \$1 00, may select \$0 20 extra.				
"	"	2 00,	"	0 45 "
"	"	3 00,	"	0 75 "
"	"	4 00,	"	1 00 "

It must be understood that these EXTRAS are only allowed on seeds at packet and ounce prices, and not on collections, special offers, bulbs, plants or seeds at 1-4 or pound prices, nor can we send the value of extras in other than seeds at packet and ounce rates.

For the convenience of customers when ordering, we use a system of numbering, and only the number corresponding to the variety desired need be given, with the price, thus saving the necessity of writing hard names.

All Flower Seeds sent free by mail on receipt of Price.

ABRONIA UMBELLATA

Charming annual trailers for vases, rock-work, etc., succeeding well in the garden border; bearing large trusses of fragrant rosy pink flowers. *Half-hardy annual.*

- 1 *Abronia Umbellata*, $\frac{3}{4}$ foot 5
 Abutilon. (See Greenhouse Assortment)

ACONITUM (MONK'S HOOD, WOLFSBANE)

A showy, free-blooming plant, which thrives well under trees, shrubs, and in other shaded situations. *Hardy perennial.*

- 2 *Aconitum Nepullus*, mixed, blue and white 5

ACROCLINIUM (EVERLASTING FLOWER)

One of the best, producing a great number of beautiful rose, pink and white flowers, with yellow centre. *Half-hardy annual.*

- 3 *Acroclinium Album*, white 5
 4 *—Roseum*, bright rose 5

ADONIS (PHEASANT'S EYE, FLOS ADONIS)

The dark green foliage is finely cut and very pretty; the flowers are brilliant, remaining for a long time in bloom. They will do well in a partially shaded situation, and may be used to advantage in any retired corner of the garden. *Hardy annual.*

- 6 *Adonis Aestivalis* (Flos Adonis). Deep crimson, 1 ft. 5
 7 *—Autumnalis* (Pheasant's Eye). Intense blood red, with black centre; 1 ft. 5

AGERATUM

Valuable for bedding plants or for cut flowers; free-bloomers and of long duration. When lifted and potted in the fall, and placed in the parlor, will keep up a succession of beautiful flowers all winter. *Half-hardy annual.*

- 8 *Ageratum Mexicanum*, blue, $1\frac{1}{2}$ ft. 5
 9 *—Album*, white, $1\frac{1}{2}$ ft. 5
 10 *—Imperial*, dwarf, blue, $\frac{3}{4}$ ft. 5

ADONIS

- 5 *—Acroclinium*, Mixed, fine colors. 5

AGROSTEMMA

(JOVE'S FLOWER)

The Agrostemmas are free bloomers, make attractive beds, and are useful for cutting. They present a beautiful appearance when grown in masses, or as a border for tall plants like the Gladiolus. *Hardy annual.*

- 14 *Agrostemma coeli-rosea* (Rose of Heaven), deep rose, fringed, 1 ft. 5

AMMOBIUM

- 15 *Ammobium, Alatum Grandiflorum*. Everlasting flower; white; annual; $1\frac{1}{2}$ ft. 5

AGERATUM

AMPELOPSIS VEITCHII ("BOSTON" OR JAPAN IVY)

- 16 *Ampelopsis Veitchii*. Valuable hardy perennial climber; clinging to walls of wood, brick or stone; foliage dense, of glossy green, changing to red and yellow in autumn, 30 ft. 10

See Plant List for plants.

ALYSSUM

Very hardy, free-blooming, dwarf plants, growing readily in common garden soil. The pretty, fragrant flowers are much prized for bouquets; excellent for the summer garden and for blooming in the conservatory in winter.

- 17 *Alyssum*, sweet, flowers small and sweet, in clusters; 1 ft. *Hardy annual.* 5
 1 oz., 50c
 18 *—Benthami compactum* is a new, dwarf, compact variety, not over 6 inches in height, bearing its pure white, fragrant flowers in greatest profusion. *Hardy annual* 10
 19 *—Golden Saxatile*, flowers brilliant golden yellow, completely hiding the foliage. Plants about 1 ft. high; desirable for rockwork, and quite showy in masses. *Hardy perennial* 5

AGATHEA (MARGUERITE)

The flowers are the very counterpart of the Paris Daisy, except color, which is a sky blue with a yellow disk; it is of easy growth and produces flowers all the year; 2 ft. *Hardy annual.*

- 20 *Agathea, Coelestis* (Blue Marguerite), celestial blue. 10

AGATHEA (MARGUERITE)

ANTIRRHINUM

(SNAPDRAGON)

One of the very best of our perennials. Spring sown seedlings will bloom in beds or borders the first season. By removing a portion of the flower stem in the summer, the plants will throw up young shoots for autumn, making plants that will endure almost any winter. The seed we offer is from one of the finest collections. *Hardy perennials.*

- 24 *Antirrhinum major*, choice colors, mixed, 2 ft. 5
 25 —*Tom Thumb*, mixed colors, ½ ft. 5
 26 —*Queen of the North*, elegant habit, and densely covered with large white flowers. Most beautiful Snapdragon; each plant will occupy a foot to 18 inches. 10

ANAGALLIS

Lovely dwarf plants, very effective as edgings, beautiful as pot plants, and valuable for rock works. *Half-hardy annuals.*

- 27 *Anagallis*, finest mixed. 5

ALONSOA

Very pretty, bright little annuals of fine habit. Sow in slight heat and plant out early in May; easily grown; height, one-and-a-half feet.

- 28 *Alonsoa*, finest mixed, choice varieties. 5

ANTIRRHINUM

AMARANTHUS

The *Amaranthus* family embraces numerous plants, valuable for the beauty of their foliage; many of the varieties have handsomely formed and highly colored leaves. They are very effective for autumn decorations, and are seldom equalled by any similar class of plants. *Half-hardy annuals.*

- 29 *Amaranthus splendens*, or *Rainbow Plant*. The finest of its class, with leaves of the most brilliant colors. The plant grows upright, the inner foliage is of a dark blackish bronze tipped with green, while the color of the outer foliage is of a bright scarlet and gold, very showy and distinct. 10
 30 —*caudatus* (Love-Lies-Bleeding), long, drooping sprays of flowers, 3 ft. 5
 31 —*melancholicus ruber*, compact, rich blood red foliage, 2 ft. 5
 32 —*tricolor* (Joseph's Coat), leaves scarlet, yellow and green, 1½ ft. 5

AQUILEGIA

ARISTOLOCHIA

(DUTCHMAN'S PIPE)

A vigorous and rapid growing twiner, bearing singular brownish-colored flowers, resembling in shape a Dutchman's pipe. Its flowers, however, are of little value beside its fine light green leaves, which are of very large size, and retain their color from early spring to late fall. The plants grow very quickly and soon make a dense shade. It readily attains a height of 20 feet, and is perfectly hardy. Start seed under glass, cover thinly, and transplant when weather becomes warm. *Hardy perennial.*

- 33 *Aristolochia siphon* 10

AURICULA

A dwarf growing plant bearing umbels of fragrant flowers of many rich and beautiful colors. A great favorite in Britain, where flower shows are held of this plant alone. *Hardy perennial.* ½ ft.

- 34 *Auricula*, extra choice mixed. From a prize collection. 25

ANCHUSA CAPENSIS

A hardy annual of more than ordinary beauty. It grows about two feet high, branching freely and bearing a profusion of the most lovely flowers, similar in all respects to the Forget-me-not, though the blooms are much larger and of finer color. It is always taken for a beautiful, large-flowering *Myosotis*, and for bouquets and cut flowers it is indeed superior to it. Its color is a deep, clear, brilliant blue, with a pure white eye; one of the rarest and most lovely shades of that color. It blooms early, and continues all summer.

- 35 *Anchusa Capensis* 10

AZALEA

See Greenhouse Varieties.

ARABIS

ARABIS

(ROCK CRESS)

Charming white spring flower; very early; perfectly hardy; dwarf, trailing habit; *perennial.*

- 36 *Arabis alpina* 5

AQUILEGIA

(COLUMBINE)

The odd and peculiar formation of the flowers of the new and double sorts renders them well worthy of cultivation. They embrace a great variety of colors, exceedingly showy, and rank among the best plants for early summer blooming. Can be increased by a division of the roots. *Hardy perennial.*

- 37 *Aquilegia*, choice mixed, double varieties, 2 ft. 5
 38 —*Chrysantha*, canary colored, extra. 10
 39 —*Grandiflora Alba*, white; extra ... 10

ASPERULA

A most profuse bloomer, and of dwarf habit. The flowers are very sweet-scented, and last a long time in perfection; for making up small bouquets it is all that can be desired. *Hardy annual.*

- 40 *Asperula azurea setosa*, light blue, 1 ft. 5

AURICULA

ANCHUSA
CAPENSIS.

THREE POINTERS : 1st. Procure good honest seed. 2nd. Have your soil deep, rich and well drained. 3rd. Do not plant your seeds before the ground and weather have become thoroughly warm

The Seed we offer has been saved from the very best double Flowers only

COMET ASTERS

These very beautiful Asters have flowers of immense size, often 6 inches across, composed of long, wavy, and twisted petals, formed into a loose yet dense half-globe, resembling the Japanese Chrysanthemums; see cut.

41 New Rose	10
42 New White Giant	10
43 Crimson	10
44 Light Blue	10
45 New Giant Sulphur Yellow. This beautiful, early, new class of the ever popular Aster is quite distinct from all other sorts. Grows from 12 to 15 inches high, and covered with large double Sulphur Yellow flowers	15
46 Mixed Colors	10

DWARF CHRYSANTHEMUM FLOWERED ASTERS

Of very compact growth; flowers from 3 to 4 inches in diameter, and very abundant; later than other varieties; therefore valuable for succession; 1 foot.

47 Snow White	10
48 Brilliant Rose	10
49 Light Blue	10
50 Many Colors, choice mixed	10

VARIOUS ASTERS

51 Mignon. Similar in habit to Victoria, but flowers are smaller, beautifully imbricated; pure white, and a very perfect form; one of the finest white Asters for cutting	10
52 Dwarf Pyramidal Bouquet. Pretty class; very profuse, producing 20 to 50 heads of bloom; grows 1 ft. high. Mixed colors	10
53 New Crown or Cocardeau. Many colors, mixed	10
54 Harlequin. Striped, double flowers; finest colors; mixed	10
55 Lady in White. Semi-globular, fine for bedding (new)	10
56 Dwarf Queen. A superior variety for pot culture; mixed	10
57 New Yellow Aster, splendid globular form	10
58 Snowball, or Princess. Excellent for bedding	10
59 Queen of the Earlies. This is the earliest of all; pure white, quite double flowers	10
60 Washington. One of the largest and finest varieties in cultivation; well grown flowers have measured 5 inches in diameter. Many colors, mixed	10
61 Betteridge's Improved Quilled. Perfectly double, large, showy Aster; flowers somewhat stiff in appearance; 1½ ft.; mixed	5

"JAPANESE TASSEL" ASTER

62 Japanese Tassel. A new strain with flowers curled and crested after the style of the Japanese Chrysanthemums; colors chiefly white, rose and flesh color; this superb variety is very tall and flowers later than the German Asters, bearing its beautiful, large double flowers on long stems	10
---	----

Perfection Asters (Continued)

70 White, with dark rose	10
71 Brilliant Rose	10
72 Crimson Ball	10
73 Light Blue	10
74 Dark Blue	10
75 Brilliant Scarlet	10
76 Mixed Colors, extra choice	10
Collection of 8 separate Colors	40

IMPROVED VICTORIA

IMPROVED VICTORIA ASTERS

Improved Victoria. Undoubtedly the handsomest Aster in cultivation, of which we have an excellent strain. Flowers very large and perfectly double, of globular shape; fine pyramidal form; 1¾ ft.

77 Pure White	10
78 Crimson and White	10
79 White Tinted Pink	10
80 Appleblossom	10
81 Light Blue	10
82 Crimson	10
83 Dark Blue	10
84 Rose	10
85 White turning to Azure Blue	10
86 Bright Rose tinged White	10
87 Light Blue and White	10
88 Indigo Blue on White Ground	10
89 Many Colors, finest mixed	10
Collection of 12 separate Colors	60

SEMPLER'S BRANCHING ASTER

SEMPLER'S LATE-FLOWERING BRANCHING ASTERS

Superior to any other class of late-flowering Branching Aster, lengthening the Aster season until frost. The flowers are large, 4 inches across, very double, of purest colors, and borne on long stems. Plants strong growers, 18 inches to 2 feet high.

63 Semple's White	10
64 " Lavender	10
65 " Crimson	10
66 " Shell Pink	10
Collection of above 4 sorts	30
67 Semple's Asters, Mixed Colors	10

TRUFFAUT'S PÆONY FLOWERED PERFECTION ASTERS

Large and remarkably fine flowers, with long, beautifully incurved petals, resembling those of the Pæony. One of the finest Asters cultivated; 2 ft.

68 Pure White	10
69 Gravlotte, deep blood red	10

 A Collection containing the above Five Illustrated Varieties, 25c.

BALSAM

CALENDULA

The old pot "Marigold" has been greatly improved. The "Oriole" and "Trainon" just introduced are really novelties of remarkable beauty, deserving a place in every garden.

- 108 **Calendula "Trainon," the Royal Marigold.** The fine double flowers are very showy, of a bright sulphur-yellow, with very dark brown, nearly black centre. Both the Royal Marigold and the Oriole are borne upon long stems..... 5
- 109 **Meteor.** Perfectly double and beautifully striped, cream color, edged with orange. Per oz., 20c..... 5
- 110 **Oriole, or Large-Flowering Bright Yellow.** This is surpassingly grand and brilliant, far eclipsing any Calendula hitherto known. The extra large double flowers are indescribably rich and glowing in tone, and of an intensely bright golden yellow 10

CACTUS SEED

Growing Cactus from seed affords untold interest and pleasure. Sow under glass in light sandy soil. We offer two separate sorts and a grand mixture.

- 111 **Cactus, Opuntia Lurida (Candle Cactus).** grows very fast from seed..... 20
- 112 **Cereus Giganteus, the Giant Cactus** 25
- 113 **Mixed Seed, fine varieties**..... 20

CALANDRINIA

BALSAM

(LADY'S SLIPPER)

An old and favorite garden flower, producing its gorgeous masses of beautiful, brilliant-colored double flowers in the greatest profusion; of easy culture; succeeds in a good, rich soil. *Tender annuals.*

- 91 **Balsam, La Malmaison.** Magnificent, large double blush pink flowers, the exact fac-simile in color of the famous Malmaison rose, and with a satiny sheen in the sunlight as if sprinkled with diamond dust 15
- 92 **"Queen's White."** The finest double white Balsam ever offered. It comes uniformly double, very white and exceedingly firm, with a slight pink tinge on the back. The stem is firm, and thoroughly joined to the flower, so it can be easily and securely stemmed. This is a great advantage for florists' use. ¼ oz., 50c.; pkt. 10
- 93 **Maiden's Blush.** A very charming and delicate shade of rosy pink, several shades lighter than the apple blossom 10
- 94 **Apple Blossom.** One of the most charming of all Balsams; large, double, deep, rosy pink shade 10
- 95 **Crimson Spotted, very handsome** 10
- 96 **Scarlet Spotted.** These are very fine 10
- 97 **Rose flowered, double, choicest mixed** 5
- 98 **Camellia flowered, double, choicest mixed** 10
- 99 **Our Invincible Balsam Mixture, embracing all the above shades and colors, per pkt.**..... 15

BEETS, ORNAMENTAL

In Europe the foliage beets are among the most effective bedding plants, producing immense leaves, often two feet long and eight or nine inches broad, beautifully colored and crinkled. Planted in a bed together, one foot apart each way, they are grand. One great feature is the fact that the frost does not kill them, but only colors their leaves all the brighter, and until they are covered with snow they are objects of great beauty.

- | | | |
|--|-------------------------------------|--|
| 100 Beets, ornamental, Scarlet 10 | 102 Silver 10 | 105 Mixed colors 10 |
| 101 Crimson 10 | 103 Yellow 10 | 106 Dracena leaved, dark red lustrous leaves 10 |
| | 104 1 pkt. each color for 25 | |

BIGNONIA RADICANS (TRUMPET CREEPER)

- 107 A splendid climbing plant, suitable for covering dead trees, fences, etc., with large clusters of trumpet-shaped orange-red flowers; blooms in August; about three inches long, handsome in bud as well as in flower. The foliage is also very beautiful, a collection of small leaflets arranged upon a single stem, beautiful for vase and flower work..... 10

CACALIA

(TASSEL FLOWER)

A neat half-hardy annual of easy culture, with tassel-shaped flowers; blooms from July to September in clusters; fine for borders. Golden yellow and scarlet; 1½ feet.

- 115 **Cacalia, Mixed** 5

CATCHFLY

An early flowering plant, with small flowers, white, red and pink. A moisture forms on the stalks, which sometimes entraps flies, hence the name "Catchfly." *Hardy annual.*

- 116 **Catchfly, mixed colors, 1½ ft.**..... 5

CALENDULA

CALANDRINIA

Very beautiful creeping plants, admirably adapted for planting in rock-work, where they will produce flowers in profusion. The engraving shows the habit of the plant, which does best in light sandy soil. *Hardy annual.*

- 114 **Calandrinia Grandiflora, mixed** 5

BRACHYCOME

The Brachycome, or Swan River Daisy, is a charming flower, which is offered in white and blue varieties, the blue being the original color, or that of the wild plants, while the white has been produced under cultivation. The plants grow about eight inches in height and bloom freely. The seeds can be sown in the house early in the spring, and the plants afterwards set out in the ground where they are to bloom, or the seeds can be sown in the ground after the fine weather in spring has come. This flower is an original, simple beauty, and needs no art to heighten its charms. Flowers fine for cutting. Give it a chance and you will be delighted with it. *Annual.*

- 117 **Brachycome iberidifolia (Swan River Daisy), blue and white, mixed**... 5

CARAGANA (OR SIBERIAN PEA) This is the plant of all others suited for our North-West, where it will stand the climate well. It is a tall-growing shrub, say four to five feet, somewhat like the Laburnum in appearance, being profusely covered with pea-shaped yellow flowers in May. We feel quite confident it will please all who try it.

- 118 **Caragana Arborescens.** (See Shrubs) 10

BRACHYCOME

FRENCH CANNAS

This new and entirely distinct class of Cannas is of dwarf, compact habit, producing flowers similar to those of the Gladiolus, but excelling them in brilliancy, marking and variety of colors, embracing all shades from light lemon to the deepest orange and red, to cherry and the deepest magenta, many being beautifully marked, streaked, mottled and flamed. They are equally valuable for groups, solitary plants and for house decorations. Crack the seeds before planting. Sow early in a hot bed, then transplant into not too rich soil; the plants will bloom from July or August until cut down by severe frost. The roots can be wintered in a dry cellar like Dahlias, or may be potted and kept in bloom the greater part of the winter. See bulb list.

COSMOS

- 119 **Canna, Crozy's Large Flowering Dwarf French, Finest Mixed.** Comprising all the newest and most beautiful varieties 10
 120 **—Indian Shot.** Finest mixed varieties 5

CALLIOPSIS, or COREOPSIS

The genus Calliopsis embraces a number of useful and brilliant hardy annuals. The plants are usually 2 or 3 feet high, of slender habit and rapid growth. The flowers are of various shades of yellow, orange and rich reddish brown, and make brilliant groups or low screens. Seeds grow very readily, and may be sown where plants are to flower. They usually grow 3 feet in height, and should be given plenty of room to spread.

- 121 **Coreopsis Lanceolata Grandiflora, Harvest Moon.** This beautiful new introduction is a very much improved form over the popular C. Lanceolata. It is of very strong growth and compact habit; bears sprays of large, beautiful flowers of a rich golden yellow in greater profusion than the old variety, and should find a place in every collection whether large or small. 10
 122 **—Golden Wave.** In the annual section of the Coreopsis family this is perhaps the most effective and beautiful. A mass of golden yellow all summer..... 10
 123 **—Mixed Colors, 2 ft.**..... 5
 124 **Lanceolata Grandiflora, "California Sunbeams."** These lovely improved varieties, seedlings of "Golden Glory," are much larger and more beautiful than any heretofore offered; the flowers are exquisitely formed, some saucer-shaped, others cupped, delicately incurved, while some are quite flat, others like great buttercups. The petals are broad, with plain round edges in some flowers, in others they are pinked, toothed or irregularly fringed; some are semi-double; in many the petals are daintily curled. They vary in color from pale light yellow to orange yellow, some of them being darker in shade around the eye. The stems are long and the flowers keep fresh in water for a week or ten days..... 10

CAMPANULA (CANTERBURY BELL)

- 125 **Campanula, "Cup and Saucer."** A new and beautiful variety; a most desirable and attractive addition to this class of old garden favorites. The bell or trumpet is nearly 4 inches in diameter, presenting the form of a saucer, as shown in illustration. The plant

CAMPANULA

is of strong growth, quite hardy and floriferous, and is very elegant and handsome when in flower, the blossoms literally hiding the plant; it is highly ornamental in the flower border or potted for conservatory decoration. Perennial 10

- 126 **—Media (Canterbury Bell).** Large flowers, single varieties, mixed; 2 ft. Perennial 5
 127 **—Double, mixed.** Perennial 5

COSMOS

Handsome, tall growing plants, covered in the autumn with single Anemone-like flowers, which range through all shades of rose, purple and white. Excellent for cutting. Hardy annual. 5 ft.

- 128 **Cosmos, large flowering, mixed.**..... 5
 129 **—Pearl, beautiful snow white.**..... 10
 130 **—Dawn, dwarf early, large flowering.** The Cosmos is now one of our most popular flowers. This new variety comes into full flower in July and continues a mass of bloom until cut down by severe frost. It is of dwarf, compact growth, growing about 4½ feet high. The flowers are large; the color is a beautiful white, relieved by a delicate tint of rose at the base of the petals, altogether the finest novelty introduced in many years 10
 131 **—New Marguerite, mixed.** One of the prettiest and daintiest varieties imaginable; the flowers measure from 2¾ to 3 in. across, the petals are deeply and irregularly lacinated or fringed, the flowers resemble marguerites, but are much more æsthetic and beautiful..... 10

CENTRANTHUS

These form beautiful masses or borders, and for bouquets or other floral work are excellent. The flowers are small, borne in clusters on light green, almost transparent stems. Hardy annual.

- 132 **Centranthus, rose and white mixed, 1 ft.** 5

French Canna

See page 42 for Canna Roots

CENTROSEMA

CLEOME PUNGENS

CLEOME PUNGENS

Seed sown in the open ground in May commences blooming July 1st, and continues in the greatest profusion until frost, attaining a height of five or six feet, with great panicles of deep purplish-pink bloom, as large as a Hydrangea. After it commences to bloom this plant is never out of flower while it lives. Wind or rain does not injure it. It is exceedingly showy, and for a situation where a tall plant is desirable, no annual can surpass it.

142 Cleome Pungens 10

COBÆA

COBÆA

they will thrive and flower during the winter. For covering verandahs and fences, nothing surpasses the Cobæa, and when planted in a row 2 ft. apart, and supported with brush, it makes an elegant screen. *Half-hardy annual.*

143 Cobæa Scandens, blue 10
144 " " white..... 10

CLARKIA

CENTROSEMA GRANDIFLORA

AN ENTIRELY NEW CLIMBER

We quote from the description of the introducer: "I have carefully watched its growth and development, and consider it a perfectly hardy vine of rare and exquisite beauty, which from seed sown in April, even in the poorest soil, will thrive from early June until cut down by frost, and produce in the greatest profusion large clusters of inverted pea-shaped flowers, delightfully fragrant, one-and-a-half to two-and-a-half inches in diameter, and ranging in color from rosy-violet to reddish-purple, with bright feathered markings through the centre. The large buds and back of flower are pure white, making it appear as if one plant bore many different colored blossoms. It is well adapted for every purpose desired for a climber, running six to eight feet in one season." As the seed germinates slowly, we advise soaking it in warm water over night before planting.

136 Centrosema Grandiflora 10

CHRYSANTHEMUM

The annual varieties of Chrysanthemums are exceedingly pretty. Set one foot apart. *Hardy annuals.*

- 137 Chrysanthemum Eclipse. Of all our new annual Chrysanthemums, none are more beautiful than the "Eclipse." Flowers $2\frac{1}{2}$ to 3 ins. in diameter 5
- 138 —Tricolor, various shades of colors; 1 ft. 5
- 139 —Burridgeanum, various shades and colors, mixed, 1 ft..... 5
- 140 —Paris Daisy or Marguerite, large white star-shaped flowers, $2\frac{1}{2}$ ft. 10
- 141 —Inodorum double white, a perennial sort, flowering the first season from seed and producing fine double-white flowers, excellent for bouquets..... 10

(For Chinese and Japanese varieties, see Greenhouse)

CYPERUS

(UMBRELLA PLANT)

A strikingly handsome foliage plant, equally well adapted for the greenhouse or open ground. The leaves are striped with white, giving the plant a distinct and fine appearance. Sow early. It is of easy culture. *Half-hardy perennial.*

145 Cyperus alternifolius 10

CYNOGLOSSUM

(VENUS NAVEL WORT)

A fine hardy annual, growing over a foot high, with long, loose sprays of beautiful white flowers, which look very graceful and pretty. Though not a new plant in Europe, we have seldom seen it in cultivation in this country, which is a wonder, for it is a charming thing. It is especially valuable for cutting for bouquets, etc. It is a great honey-producing flower, and bees just revel in it. It blooms very quickly from seed; in fact we know of no annual which can beat it in this respect.

146 Cynoglossum, Linifolium, very fine ... 5

COWSLIP

The well known favorite English Cowslip, flowering early in the spring.

147 Cowslip, yellow, $\frac{3}{4}$ ft..... 5
148 —Mixed Colors 5

CLARKIA

These are very effective border plants, showy and profuse bloomers, well adapted to cool or shaded locations. *Hardy annuals.*

149 Clarkia elegans, finest double varieties, mixed; $1\frac{1}{2}$ ft..... 5

CONVOLVULUS or MORN- ING GLORY

A well known climber, free flowering, succeeds well in almost any situation. Height, 15 feet. *Hardy annual.*

- 150 Morning Glories, New Imperial Japanese. (Ipomœa Imperialis.) The flowers of this charming, hardy climbing annual are of gigantic size, exquisite variety of colors and with magnificent marbled foliage. The flowers measure from four to six inches across, and being of good substance, they remain much longer open than the ordinary Morning Glories; the colors are limitless in variety and very beautiful. The Imperial Japanese Morning Glories are of the easiest culture, and if sown early in any warm, sunny position and given plenty of water, will produce magnificent results. Choicest mixed. Pkt..... 10
- 151 Morning Glory, new Double-Flowered. (Ipomœa Purpurea Flore Pleno.) This first double-flowered Morning Glory ever introduced, is of rapid growth and produces its flowers very freely. They are white with a slight spot of red or blue at the base of the larger petals. About 80 per cent. true from seed. Pkt... .. 10
- 152 —Tall Morning Glory (Convolvulus major), mixed colors, per oz., 20c 5
- 153 —Minor, many varieties, mixed, oz., 25c..... 5

ANNUAL CHRYSANTHEMUM

UMBRELLA PLANT

JAPANESE MORNING GLORY

CARNATIONS

These well known charming plants are highly prized for the delicious perfume of their flowers. They are invaluable for pot culture or bedding out in summer. *Half hardy perennial.*

- 197 **Carnation, New Marguerite.** This grand new class excels in all respects; it is the most profuse bloomer of any of the "Pinks." Exquisite in color, showing beautiful shades in white, red, pink, variegated, etc. It is large in size, perfect in form, of dwarf habit, compact and very robust. This variety should be cultivated by all lovers of this most beautiful family of Pinks. Mixed 10
- 198 —**Marguerite, "Snowflake."** Very early, clear white, and of delicious fragrance. 20
- 199 —**Germania.** Yellow, splendid 25
- 200 —**Double Grenadin.** A splendid variety for florists, very early, charming double scarlet flowers. 15
- 201 —**Perpetual, or Tree,** saved from the choicest double flowers; 1½ ft 25
- 202 —**Double Mixed,** producing many double flowers of all shades and colors. 10
- 203 —**Vienna Dwarf,** the best garden sort, which produces a large percentage of double, very sweet-scented flowers in the largest variety of colors. With a light protection of straw they will stand our winter 15

COCKSCOMBS

The Cockscomb (*Celosia*) is quite easily grown from seed, and is certainly one of the most showy and brilliant of annuals. The combs of the best varieties often grow a foot or more across the top.

- 204 **Cockscomb, Dwarf, Finest Mixed** 5
- 205 —**Glasgow Prize.** Dwarf, with dark leaves and large, crimson combs. 10
- 206 —**Variegated.** Variegated yellow and scarlet 5
- 207 —**Ostrich Plume.** A most attractive strain with very fine long-plumed or feathered flower-sprays. Mixed colors 10

CERASTIUM

(SNOW IN SUMMER)

One of the prettiest hardy perennial plants for bedding out or ribboning ever known, being of dwarf growth, densely branching, with leaves covered with a cottony down of snowy whiteness, and producing a profusion of elegant white flowers.

- 208 **Cerastium biebersteini,** 6 in. high 10

CLEMATIS

Rapid growing climbers, fine for arbors and verandas. The flowers are very handsome, and are continually in bloom. *Hardy perennial*; 15 ft.

- 209 **Clematis Flamula** (Virgin's Bow-er). Producing beautiful clusters of small white fragrant flowers ... 10
- 210 —**Large Flowering, mixed** (Jack-man's.) Flowers three to four inches across, of charming shades of blue, white, purple, etc. 25

CARNATION MARGUERITE

CANDYTUFT

One of the oldest, most popular and useful border annuals.

- 211 **Candytuft** (*Iberis*), fragrant, pure white; 1 ft. 5
- 212 —**Empress.** White; large and showy spikes; fine 10
- 213 —**Crimson,** very beautiful; 1 ft 5
- 214 —**Rocket,** pure white, large truss; 1 ft. 5
- 215 —**New Carmine,** produces a mass of brilliant carmine bloom 10
- 216 —**Mixed Colors,** fine dwarf hybrids 5
- 217 —**Sempervirens.** Handsome, compact-growing hardy perennial plants, admirably adapted for permanent front rows of borders, or for low clumps or beds; very valuable for early decoration; white; 1 ft. 10
- 218 —**Dobbie's White Spiral.** Distinct, beautiful; 1 ft. 10

CATANANCHE (EVERLASTING)

- 219 **Catananche.** Flowers white with violet centre, and blue with purple centre, quite double, somewhat resembling a pink, extremely showy. *Hardy perennial*; one and a half to two feet high. *Perennial* 5

CENTAUREA (CORN BOTTLE)

The Blue Bottle or Bachelor's Button, is one of the most attractive of all hardy annuals, the graceful beauty of its old-fashioned flowers being universally admired. A hardy annual of the easiest growth, and flowers freely and continuously; height 2 to 3 feet; flowers excellent for cutting.

- 220 **Centaurea Cyanus** (Corn Flower), mixed, valuable for cutting. 5
- 221 —**New Double.** So perfect that fully 80 per cent. of the flowers are double and semi-double; they are also increased in size and present many bright colors and distinct markings hitherto unknown ... 10
- 222 —**Margarita.** Distinct from all other Centaureas, and undoubtedly the most beautiful variety known. The large flowers are of purest white, deliciously scented, and freely produced on long stems, Pkt. 10
- Centaurea Muschata.** (See Sweet Sultan, also Green-house Seeds.)

CARDUUS

(HOLY THISTLE)

A very ornamental foliage plant; its large shining leaves are marked with white veins; grows freely. *Hardy annual*; 3 ft.

- 223 **Carduus Benedictus** 5

CANDYTUFT

CENTAUREA MARGARITA

DIANTHUS OR PINKS

DATURA

Strong growing ornamental annuals, with large showy flowers, making handsome plants, 2 to 3 feet high, for flower beds or borders.

- 235 **Datura Cornucopia.** A magnificent variety; stems dark purplish maroon; flowers average 8 ins. long by 5 ins. across the mouth, the interiors being glistening French white, with purple exteriors. Delightfully fragrant. Seeds started early in the house will produce plants that will flower from early summer until frost. Often from 200 to 300 flowers are borne in a season. (See cut) 10
- 236 **Golden Queen.** Large double golden yellow flowers; very fragrant..... 10
- 237 **Fastuosa Huberiana.** Flowers large and double, inside white, outside generally colored, 3 feet..... 5

SINGLE DAHLIAS.

DIGITALIS
(FOXGLOVE)

Ornamental plants of much beauty, producing dense spikes of flowers on stems 3 to 5 feet high. The blossoms are thimble-shaped, purple, white and spotted, and very striking. Seed can be sown in spring or autumn, and large roots can be divided. Flowers the second season. *Hardy biennial.*

- 238 **Digitalis; Fine Mixed Colors** 5

A Visit

to our Greenhouses and Trial Grounds during the summer months will convince anyone that we are in a position to supply the

Best Seeds that Grow

DIANTHUS OR PINKS

A magnificent genus, embracing some of the most popular flowers in cultivation, producing a great variety of brilliant colors and profusion of bloom. The hardy biennials, or Chinese and Japanese varieties, bloom the first season, the same as hardy annuals; height, 1 foot. The hardy perennial varieties are very fragrant and of easy culture for the garden or greenhouse.

Double Annual Varieties

- 225 **Dianthus Chinensis** (China or Indian Pink). Dbl., mixed..... 5
- 226 **Heddewigi Diadematus** (Double Diadem Japan Pink). Beautiful double flowers; mixed, of varied tints of lilac, crimson, purple, to very dark purple; with the outer edges fringed and nearly white..... 5
- 227 **Imperialis** (Double Imperial Pink). Double variegated, mixed colors..... 5
- 228 **Mourning Cloak.** The most striking of all the Pinks. The large double, almost black, flowers have a clear fringed edge of white which is unusually distinct and charming..... 10
- 229 **Eastern Queen.** Beautifully marbled; the broad bands of reddish lake upon the paler surface of the petals is very striking and pretty. One of the most valuable of late introductions..... 10
- 230 **Crimson Belle.** As its name implies, is a rich crimson color, flowers of a very large size and substance, evenly and finely laciniate..... 10

Single Annual Varieties

- 231 **Dianthus Heddewigi.** Finest selected single flowered, mixed..... 5
- 232 **Laciniatus.** A beautiful fringed variety; various colors..... 5

Hardy Perennial Varieties

- 233 **Dianthus Plumarius Fl. Pl.** Double and semi-double in beautiful colors..... 10
- 234 **Plumarius Albus Fl. Pl.** Pure white, double, very fine..... 10

DAHLIAS (from seed)

Every one knows and admires the double Dahlia, but comparatively few are aware that it can be grown so easily from seed, and flower so beautifully the first season. We offer the choicest seed, that, if sown in the spring, will give a magnificent display of the brightest colors by August.

- 239 **Dahlias, New Striped Single.** The extra large single flowers, quite 4 ins. in diameter, comprise a wonderful variety of colors, beautifully striped, flaked, mottled and dotted in a grotesque and charming manner..... 15
- 240 **Single, mixed.** Finest strain in cultivation. Great variety in color and form..... 10
- 241 **Double, mixed.** Extra fine, saved from choicest double flowers..... 15

See Our Superb Collection of Dahlia Bulbs.

DOLICHOS (HYACINTH BEAN)

A splendid rapid-growing climber; flowers profusely and in clusters of white, purple and lilac flower spikes, which are followed by exceedingly ornamental seed-pods. Plant the seed where they are desired to flower, and in as warm and dry a situation as possible. Give support for vines to run upon. Grows from 8 to 20 ft. *Half-hardy annual.*

- 242 **Dolichos Lablab mxd. colors** 5

DOUBLE DAHLIAS

ESCHSCHOLTZIA, "GOLDEN WEST"

- 252 —**Californica Alba Plena.** Produces a large percentage of double white flowers of great beauty 5
- 253 —**Mandarin.** A new and very beautiful variety. The outer side of the petal is a brilliant scarlet, the inner side rich orange..... 5
- 254 —**Rose Cardinal.** The flowers are of a rich rose-colored hue, most effective and beautiful ... 5
- 255 —**New Giant Flowered Hunnemanian.** A lovely new plant that will please everyone. It has the beautiful foliage of the Eschscholtzia, enlarged, and develops into an herbaceous shrub 2½ feet high, adorned with large jonquil-yellow flowers on stems 12 inches long. These blossoms are cup-shaped, with broad overlapping crinkled petals. The bright orange stamens are in fine contrast with the clear yellow flower 10
- 256 —**Golden West.** Exactly the same as the beautiful Eschscholtzia Maritima, excepting in increased size of flowers, which, when well grown, measure from four to six inches across. Light canary yellow, with an orange blotch at the base of each petal..... 10

GODETIA (SATIN FLOWER)

A handsome flower, and particularly useful because it will grow in shady places, where so few really fine flowers can be grown. They bloom a long time, and so profusely that the foliage is almost hidden by the many large, wide open flowers, of shining satin texture, and of the most delicate and lovely colors. This flower grows more popular each year, and it well deserves the partiality shown it.

- 257 **Godetia, Duchess of Albany.** Flowers glossy satin white, produced in great profusion. 12 inches 5
- 258 —**Lady Albemarle.** Flowers large, of carmine crimson shade; the edges of the petals suffused with pale lilac; dwarf..... 5
- 259 —**Lady Satin Rose.** A most magnificent sort, unequalled for brilliancy and richness of color. The flowers are of a brilliant deep rosy pink, the surface shining like satin..... 5
- 260 —**Extra Choice Dwarf, Mixed** 5

**DAISY (BELLIS PERENNIS)**

Low-growing plants, producing in early spring their handsome double flowers. They grow best in rich, loamy soil and rather cool situations. *Hardy Perennial.*

- 243 **Daisy, Snowball.** Of all the Daisies grown from seed this is decidedly the best. It is an unusually large type; the flowers are perfectly double and of purest white, having stiff, long stems; it is most valuable for cutting for bouquets 10
- 244 —**Longfellow.** This variety produces dark pink flowers, usually large and double, very long and stiff flower spikes; valuable for bouquets 10
- 245 —**Double quilled, mixed.** Flowers are composed of petals as round as a knitting needle; very pretty and curious 10
- 246 —**Double,** finest of double varieties, mixed, 2½ ft. 5

DELPHINIUM (PERENNIAL LARKSPUR)

A class of hardy perennials, remarkable for their great beauty and highly decorative qualities. The principal color is light blue, shading to the darkest purple, also scarlet and white.

- 247 **Delphinium Cashmerianum.** Dark blue Monk's Hoodlike flowers, very fine..... 10
- 248 —**Zalil (Hardy Yellow Larkspur).** Pure sulphur yellow, a lovely and delicate shade; plant of branching habit, 3½ to 4½ ft. high, bearing spikes of 40 to 50 blossoms, each 1 inch in diameter, and lasting in flower from June till August 10
- 249 —**Grandiflorum, dbl.** This, we think, is the finest strain grown of this indispensable hardy garden favorite; flowers in long spikes, very double, and of rare beauty for cutting for vases. Charming colors, ranging through shades of blue from delicate porcelain and white to dark violet..... 10
- 250 —**Finest mixed, perennial sorts.** Saved from a choice collection of double flowered varieties..... 5
- Annual Delphinium, see Larkspur.

ESCHSCHOLTZIA (CALIFORNIA POPPY)

An exceedingly showy class of plants, bearing a profusion of richly colored flowers. Sow the seed where the plants are wanted to bloom, as they do not stand transplanting; they are perfectly hardy and will grow in every soil and bloom profusely all summer; thin to 6 inches apart.

- 251 **Eschscholtzia Californica.** Special mixture of California Poppies; includes all the best varieties 5

SNOWBALL DAISY

GILIA

Very pretty; the flowers are borne in great abundance, and make up splendidly in bouquets. Showy for masses in the border; *hardy annual.*

- 261 **Gilia, mixed colors,** blue, white and red 5

EDELWEISS

The true and famous Edelweiss of the Alps. The flowers are of downy texture, pure silver white, and star-shaped. Succeeds well in almost any soil, not too rich, with full exposure to the sun.

- 262 **Edelweiss (Gnaphalium Leontopodium)** 10

GLADIOLUS

Grand summer and autumn flowering plants, producing long spikes of large flowers of hundreds of shades of colors; marked, striped, blotched, tinted, etc., in the loveliest manner.

- 263 **Gladiolus, Finest Hybrids, mixed.** Includes many sorts, 2 to 4 feet..... 10
- See Bulb List.

- 276 —**New Perennial** (Hybrida Grandiflora). A lovely colored flower, perfectly distinct from any other, and for all decoration quite charming feature; perfectly hardy, producing abundance of flowers all the summer. For cut flowers one of the most useful plants of the garden. Mixed colors. 1½ ft. 10
- 277 —**Lorenziana, or Double Flowering.** Large round heads, composed of 30 to 50 flowers, of orange, claret, amaranth, sulphur, etc. Hardy annual 5
- 278 —**Aristata Grandiflora: Mixed colors.** Hardy annual 5

GYPSOPHILA (Infant's Breath)

Graceful, free-flowering plant, forming a symmetrical bush, covered with loose panicles of flowers; excellent for cutting.

- 279 **Gypsophila Elegans.** White. Hardy annual. 1½ ft. 5
- 280 —**Paniculata.** White, free bloomer; excellent. Hardy perennial. 2 ft. 5

HIBISCUS

A showy and ornamental class of plants, with large and beautiful colored flowers, growing freely in common garden soil. Hardy annual.

- 281 **Hibiscus Africanus.** Buff, with maroon centre; 2 ft. 5
- 282 —**Crimson Eye.** A robust grower, with dark red stems and foliage. The flowers are 6 to 7 inches across, of purest white, with a large spot of deep velvety crimson in the centre of each flower. A well-developed plant will produce several hundred flowers in a season 10

HELICHRYSUM

Handsome, everlasting flowers, blooming freely till late in the season; extensively used in winter bouquets of dried flowers, for which purpose they should be gathered before being fully open. Hardy annual.

- 283 **Helichrysum, double, finest mixed.** Large flowered, rich and showy colors. 2 ft. 5

HELIPTERUM (Everlasting)

A distinct dwarf with small foliage and large globular clusters of rich yellow star-shaped flowers. Hardy annual.

- 284 **Helipterum Sanfordi,** 1 ft. 10

HOLLYHOCK

HONEYSUCKLE

An exceedingly showy border plant, and well adapted for large rock-work; produces its peculiar formed, very fragrant red and white flowers in abundance. Flowers the first season. Half-hardy biennial.

- 285 **Honeysuckle, French,** red and white, mixed; 2 ft. 10
- See Plant List.

HOLLYHOCK

Our Double Hollyhocks are grand, perfectly double, colors brilliant, embracing yellow, lemon, white, black, rose, pink, deep red, variegated, etc. Seed can be sown in open ground at any time from May to September.

- 286 **Hollyhock, Tokio.** A most beautiful and characteristic Japanese variety, of healthy and luxuriant growth; attaining a height of about 5 feet, bearing an unusually large number of large double flowers of distinct and picturesque beauty; the petals are beautifully frilled, of rich wine maroon at the base, shading to cherry red and edged white. Its striking effect attracts the most uninterested. 15
- 287 —**Blood Red.** 10
- 288 —**Canary** 10
- 289 —**Crimson** 10
- 290 —**Pale Yellow** 10
- 291 —**Purple and White** 10
- 292 —**Rose** 10
- 293 —**White** 10
- 294 —**Double, very fine mixed** 10
- 295 —**Collection of eight distinct colors** 70
- See Plant List.

GOURDS

Quick-growing vines, desirable for covering arbors, walls, etc., and producing useful and ornamental fruit in great variety of shapes and colors. Hardy annual.

- 284 **Gourds, Coccinea,** beautiful foliage, scarlet fruit. 10
- 285 —**Cucumis Ardea,** green fruit, yellow stripe. 5
- 286 —**Cucumis Flexuosus,** fruit resembling a long green snake 5
- 287 —**Echinocystis lobata** ("Climbing Wild Cucumber"). Rapid, luxuriant-growing 5
- 288 —**Orange,** very like an orange 5
- 289 —**Hercules' Club,** large, club-shape 5
- 290 —**Sugar Trough** 5
- 291 —**Serpent Gourd** 5
- 292 —**Many sorts, mixed** 5
- 293 —**Collection of 8 distinct sorts** 30

GLOBE AMARANTHUS

(Gomphrena)

Showy, everlasting flowers, extensively used in winter decorations. Seed should be started in gentle heat, as they are slow to germinate outside. Tender annual. 1½ ft.

- 274 **Gomphrena.** Finest mixed 5

GAILLARDIA

Beautiful showy plants, giving a profusion of brilliant flowers during the summer and autumn; fine for cutting. Hardy annuals and perennials.

- 275 **Gaillardia, James Kelway.** The most beautiful variety grown; immense flowers, often 5½ inches across, of dazzling crimson scarlet with narrow gold edge; it is a hardy perennial variety, flowering abundantly until frost. A grand garden plant, 2 ft. high by 2 ft. through. Hardy perennial 15

HIBISCUS, "CRIMSON EYE"

HELIANTHUS or SUNFLOWER

The Helianthus, or Sunflower, is an old and well known flower. Many of the new and best double varieties are attractive and produce a fine effect among shrubbery, or when used as screens, growing from 4 to 6 ft. in height. *Hardy annual.*

- 300 **Helianthus, Californicus, fl. pl.**
Extra large and very double flowers... 5
- 301 —**Globe of Gold.** Flowers immense, from 12 to 15 in. in diameter, globular and extremely double, the most effective of all annual Sunflowers 10
- 302 —**Silver Queen.** The whole plant, which grows to 6 feet in height, is covered with a dense silky silver white felt; the flowers are very numerous, single, with a jet-black centre..... 10
- 303 —**Cucumerifolius "Stella."** A splendid and valuable addition to the long-stemmed flowers for cutting. Grows from 3 to 4 feet high, and differs from the Miniature Sunflower by its larger and better formed flowers of the purest golden yellow with black disc. The flowers measure from 2½ to 3 inches across, are borne on long stems, and rise well above the lively green, small foliage. If sown in a sunny spot in April, flowers may be cut daily from the end of June until frost kills the plants. Its regular growth and free-blooming habit also make it valuable for large groups or single specimens 10
- 304 —**Macrophyllus Giganteus.** Grows from 3 to 4 feet high, each stalk producing a single flower 18 in. in diameter. 5
- 305 —**Mammoth Russian.** As the name implies, of gigantic dimensions, both of flower and stalk; seeds are largely for chicken feed. Per lb., 25c.; ¼ lb., 10c. 5
- 306 —**Mixture of Many Varieties,** per oz., 15c.; pkt. 5
- 307 —**Collection of 6 different sorts...** 30

MACROPHYLLUS GIGANTEUS

GLOBE OF GOLD

"STELLA"

KAULFUSSIA

Pretty free-flowering little plants, compact in growth, having most intense colored flowers, somewhat resembling the single Aster. A good plant for mixed beds and borders. *Hardy annual.*

- 308 **Kaulfussia**, mixed colors; ½ ft. 5

IPOMEAS

These beautiful climbers are exceedingly attractive and useful, and deserving of cultivation. Start seed in hotbed or greenhouse, and plant out when weather has become warm. *Tender annuals.*

- 309 **Ipomea, Bona Nox** (Evening Glory, or Good Night). Flowers expand in the evening, are large, white and fragrant; 10 ft. 5
- 310 —**New Cross-bred Moonflower.** Is of a luxuriant growth, an abundant bloomer, and will flower from 4 to 5 weeks before the white seeded varieties, which renders it a most valuable sort for growing in the north. The flowers are pure white, very large and delightfully fragrant 10
- 311 —**Setosa** (Brazilian Morning Glory). Grows with the greatest vigor and luxuriance, branching and climbing in all directions. We know of nothing so good for quickly covering a piazza, arbor or tree, and where a dense shade is required it has no equal. The flowers are a beautiful rose color and borne in large clusters..... 10

VARIEGATED IPOMEA

- 312 —**Hederacea** (variegated leaved Morning Glory). Ivy-like foliage, very showy, mixed colors; 8 ft. 5
- 313 —**Quamoclit** (Cypress Vine), a favorite well-known climbing vine, with graceful, airy foliage and handsome flowers; scarlet and white 5
- 314 —**Northern Light.** A large and handsome variety, flowering very early in the season; flowers about 2 in. diameter, of a pinkish lavender color 10
- 315 —**Heavenly Blue.** Flowers, which are borne in large clusters, are of a beautiful blue color with yellow throat, and of immense size, plant being literally covered with bloom..... 10

HUMULUS JAPONICUS

The annual Japanese Hop, as shown in the illustration, is a most valuable and rapid-growing climber. It can be sown in the open ground in spring and will attain enormous dimensions in a very short time; never suffers from the heat, and retains its color until late in autumn.

- 316 **Humulus Japonicus** (Japanese Hop). Highly recommended for the Northwest ... 10
- 317 —**Variegatus.** New variety, with handsome variegated foliage..... 10

IMPATIENS SULTANI

A perennial Balsam from Africa, of compact growth, and produces an abundance of gorgeously-colored rosy carmine flowers. One of the most distinct and beautiful plants for window culture in winter: of easy growth.

- 318 **Impatiens Sultani** (Zanzibar Balsam)..... 20

IMPATIENS

SULTANI

JAPANESE HOP (Humulus)

LATHYRUS LATIFOLIUS.

LATHYRUS LATIFOLIUS

(PERENNIAL PEA)

Handsone, free-flowering, hardy perennial climber of great beauty, with clusters of elegant, sweet-pea-like flowers in great profusion; 6 ft.

- 325 **Lathyrus, Finest Mixed** 5
 326 —**Albus**. Pure white, elegant..... 10
 327 —**Splendens**. Rich scarlet... .. 5
Odoratus. (See Sweet Peas).....

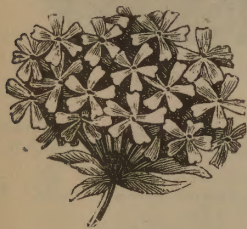

MALOPE

Very showy plants, suitable for large beds and mixed flower and shrubbery borders. *Hardy annual.*

- 328 **Malope**, white and rose, mixed ... 5

LYCHNIS

There are few plants more charming or brilliant; the flowers are produced in clusters, and are constantly coming out during the summer. To obtain good flowers the first season start seed under glass and transplant.

LYCHNIS

- 329 **Lychnis chalcidonica**, scarlet, 2 ft. 5

LOPHOSPERMUM

An exceedingly ornamental greenhouse climber, bearing numerous, large, rosy-purple, Gloxinia-like flowers. It is also adapted for the open air. It delights in a warm, airy position, with rich earth to grow in. Sow seed in March, in a box, and prick the young plants out in pots. *Half-hardy annual.*

LOPHOSPERMUM

- 330 **Lophospermum, Scandens** Rose, 10 ft. 10

LUPINUS

The Lupinus are all handsome and graceful, with spikes of pea-shaped blossoms of various colors. They look well as a back-ground to other low growing annuals. The prevailing colors are blue, though there are white and yellow varieties, and seed must be sown where intended to remain. *Hardy annuals and perennials.*

- 331 **Lupinus, mixed varieties**. *Hardy annual* 5
 332 —**Mixed varieties**. *Hardy perennial* 5

MARTYNIA

Exceedingly pretty, free-flowering plants with large flowers of great beauty, and producing a fine effect when planted in open borders; quite a curiosity. *Half-hardy annual.*

- 333 **Martynia fragrans**, fragrant, crimson-purple; 1½ ft. 5

LARKSPUR

This is one of the best known of English garden flowers. A vast improvement has been effected, by careful selection and attentive cultivation, in the size and color of the blossoms, and the general habit of the plant. For large gardens, shrubberies, etc., the branching varieties will be found peculiarly well fitted.

- 320 **Larkspur, Double Dwarf Rocket**, various colors; 1 ft.; oz., 40c 5
 321 —**Double Tall Rocket**, various colors; 1½ ft. 5
 322 —**Emperor, Branching**, double, mixed, brilliant colors, very fine variety; 1½ ft 5

LINUM OR FLAX

A genus of most beautiful free-flowering plants; their brilliancy of color and long duration of bloom being surpassed by none. Seeds germinate best in the hot bed, but will do well if sown in a warm bed of light soil. *Hardy annuals.*

- 323 **Linum grandiflorum rubrum**, scarlet 5
 324 —**Flavum**. Golden yellow perennial 10

BRANCHING LARKSPUR.

LARKSPUR

LAVATERA

Exceedingly valuable for distinct effect in masses, and for borders. The dark, green leaves are irregularly marked with greenish grey and pure white, which give the plant a distinct and handsome appearance. The plants in the early stage of growth do not show much variegation, but they are most marked and beautiful later on. *Hardy annual.*

- 343 **Lavatera trimestris**, rose and pink striped; 3 ft. 5
 344 —**Amborea variegata**, variegated foliage, handsome. *Perennial* 10

LOBELIA

LOBELIA

Gems of the flower garden. As an edging the Lobelia is unsurpassed, and no plant is more effective. Easily managed, and may be had in the greatest abundance from seed. *Half-hardy annuals.*

Compacta Varieties

Little, round, compact plants, 4 to 6 inches high, forming little mounds of bloom; splendid for edging, beds and ribbon gardening.

- 334 **Lobelia, Crystal Palace**. Deep blue, dark foliage; the best bedding sort. Grows only 6 inches high 10
 335 —**White Gem**. Best white sort for ribbon and carpet bedding 10
 336 —**Royal Purple**. In color this fine Lobelia is quite different from any other variety in commerce, being a very rich shade of violet purple without any trace of blue, as in all other sorts, and is very striking and effective, thus showing off its clear white eyes. The habit is semi-compact, not so much as the Crystal Palace, but not at all straggling 10
 337 —**Cobalt Blue**. The finest dwarf blue Lobelia 10

Erinus Varieties

Branching plants for hanging over vases and baskets; 6 to 9 inches.

- 338 **Lobelia, Speciosa Superba**, dark blue with large white eyes, very showy 10
 339 —**Gracilis**, a very fine variety for hanging baskets, vases, etc., trailing gracefully and bearing its beautiful blue flowers profusely 10
 340 —**Fine mixed trailing varieties** 5

Hardy Perennial Varieties

- 341 **Lobelia, Cardinalis**. A half-hardy herbaceous plant of very stately and handsome appearance, producing an abundance of large, intense scarlet flowers on a long and slender stem 10

MATRICARIA

(FEVERFEW)

Handsone, free-flowering plants, good for beds and pot culture, with double white flowers and pretty curled foliage like parsley. Height 8 in.

- 342 **Matricaria, Eximia**, fl. pl. 10

LAVATERA

FOR A BRILLIANT DISPLAY OF ANNUALS sown in the open border we would recommend Alyssum, Candytuft, Calliopsis, Chinese Pinks, Mignonette, Poppies, Phlox, Portulaca, Salpiglossis, Scabiosa.

MIGNONETTE

Mignonette does best in as cool a situation as possible. When exposed to the full force of summer heat it begins to form seeds, sometimes before the spikes are fully grown; even our new large flowering varieties under such conditions would not develop their marked improvements.

- 345 **Mignonette, Giant White Spiral.** This grand Mignonette grows perfectly erect. Its color is pure snow white, and the grand spikes of bloom can be seen for a long distance, and being so beautiful in form and color, attract the attention of everybody. Its fragrance is rich and powerful..... 10
- 346 **—Machet.** The finest Mignonette yet known. The plant is a strong bushy grower, bearing spikes of flowers in great number, which are of gigantic size and perfect pyramidal shape and of a brick red color. It is extremely beautiful and fragrant. Our stock is true and pure. Much inferior stock of this variety is being offered. Oz., 75c..... 10
- 347 **—Golden Queen.** Dense pyramidal habit, throwing up numerous flower stalks, bearing spikes of yellowish blossoms. Oz., 30c..... 10
- 348 **—Red Giant (Gabriel).** Each plant forms a bouquet of a beautiful pyramidal shape, the lateral branches being arranged around the main stem, which is slightly raised in the centre. The beauty of this charming variety is the brilliant color of the double, dark blood-red flowers. One of the best for florists' use. Oz., 75c..... 10
- 349 **—Golden Gem.** This novelty is offered as a companion to the well known "Red Giant" Mignonette, which is so well noted for its dwarf habit and its beautifully formed spikes of brilliant red flowers. The "Golden Gem" is of the same dwarf, compact, regular, pyramidal growth, but with flowers of a rich golden yellow, which would contrast well with the bright red of the "Red Giant." It is suitable for pot culture, groups and edgings..... 10
- 350 **—Mignonette (Sweet)** Oz., 15c..... 5
- A Special Offer—One collection of above six varieties for only 40c.

MESEMBRYANTHEMUM

(ICE OR DEW PLANT)

The Mesembryantheums are handsome and curious looking trailing plants. The most popular varieties are known as Ice Plant and Dew Plant; both are drooping in habit, and well adapted to hanging baskets, vases, rock work or edgings; the flowers are small and white. The Dew Plant has a smooth, light-green, dewy-looking leaf, and a very pretty pink flower. *Tender annuals.*

- 352 **Mesembryanthemum, Ice Plant.**
Singular ice-like foliage..... 5
- 353 **—Dew Plant.** Rose, purple centre..... 5

MATHIOLA

FRAGRANT EVENING STOCK.

A garden plant grown for its delicious perfume, which is emitted in the evening and morning, also after a shower. *Hardy annual.*

- 354 **Mathiola bicornis.** Pink and lilac flowers; 1 foot..... 5

MIGNONETTE

MESEMBRYANTHEMUM

MARIGOLD

Wherever a rich display of bloom is desired, the Marigold is almost indispensable. The African varieties are tall, growing usually two feet or more, while the French are more dwarf. Succeed well in ordinary garden soil. *Hardy annual.*

Marigold, Golden Ball. This is without doubt the finest double Marigold yet introduced; when grown to perfection the heads attain an enormous size, and are as globular and as dense as a knitted ball, 4 to 5 inches in diameter and beautifully finished. Awarded first class

Novelty

certificates by the Royal Horticultural Society, London, the Manchester Royal Botanical and Horticultural Society, and thousands of first prizes. A mass of these in a bed is as fine an object as one can wish in the garden during the autumn, and the length of time the plants continue to flower is much in their favor. We offer the Golden Ball in two separate colors and mixed.

- 355 **—Golden Ball, Deep Orange Yellow,** flowers of a perfectly globular formation. Pkt..... 15
- 356 **—Golden Ball, Clear Lemon-Yellow,** a remarkably fine variety, globular in form and beautifully finished. Pkt..... 15
- 357 **—Golden Ball, Mixed..... 10**
- 358 **—Dwarf French, Single, Purple and Gold (Legion of Honour) or Little Brownie**
—Grows quite regularly, and only about one foot high, and blooming in abundance from July until cut down by the frost. The single flowers are of a lovely golden yellow, with a broad velvety blotch on each petal; of easy culture, and absolute resistance against dryness and insects; a valuable plant for any place in the garden wherever a decorative effect is required..... 10
- 359 **—African Dwarf, mixed, finest double varieties..... 5**
- 360 **—French Tall Double, finest double varieties, mixed, 2 feet..... 5**
- 361 **—French Dwarf Double, finest double varieties, mixed, 1 foot..... 5**

MARIGOLD, GOLDEN BALL

GIVEN FREE WITH EVERY ORDER: SEE PAGE 9.

MYOSOTIS

MYOSOTIS (FORGET-ME-NOT)

The popular "Forget-Me-Nots" are perennials and hardy enough to remain in the open ground, excepting in very cold latitudes, where they should be well protected; but they are generally sown in the fall and wintered over in cold frames, when they will flower early in the spring; if sown early in the house they will flower the first season. *Half-hardy perennial.*

362 *Myosotis, Palustris* (Forget-Me-Not), white and blue 10

363 —**The Jewel.** The color is a remarkable sky-blue, which shines out in a most conspicuous manner when side by side with other Forget-Me-Nots, and constitutes the distinct feature of this plant..... 10

364 —**Victoria.** The flowers are large and of a bright azure-blue with yellow centres, borne in dense umbels. The plants grow about five to six inches high, forming neat globular bushes covered with flowers... 5

365 —**Alpestris.** Blue; 6 inches..... 10

366 —**Dissitiflora.** Large, sky-blue flowers; very early and free blooming. 6 to 12 inches 10

FOUR O'CLOCK

MIRABILIS (FOUR O'CLOCK)

Handsome border plants, with rich glossy leaves, profusion of bloom, and divers colors and foliage. The flowers open in the afternoon, hence the name Four o'clock. *Hardy annual.*

375 *Mirabilis* (Marvel of Peru). Mixed; 2 ft. 5

376 —**Variegated Leaved.** Flowers of a variety of colors; leaves light green, faintly marbled..... 5

NIGELLA

NIGELLA (LOVE-IN-A-MIST)

Fine border plants with pretty cut foliage and curiously formed flowers, which have procured for the name "Love-in-a-Mist."

377 *Nigella Damascena* (Love-in-a-Mist), double, mixed colors; 3 feet 5

NEMOPHILA

These charming and useful dwarf-growing hardy annuals have a neat, compact, uniform habit of growth, with shades and colors the most strikingly beautiful; arranged in any style which the fancy may suggest, the effect is pleasing and striking in the extreme.

378 *Nemophila*. Choicest mixed 5

MAURANDIA

Beautiful, rapid, slender-growing climbers, blooming profusely until late in the autumn, also fine for the conservatory or greenhouse. A half-hardy perennial, flowering the first season if sown early; 10 ft.

379 *Maurandia*, mixed 10

NICOTIANA

NEW GIANT EMPEROR MIMULUS

MIMULUS

Beautiful, singularly shaped and brilliantly colored flowers, with curious and various colored markings. In open ground, require a damp shady situation. *Perennial* for greenhouse, and *half-hardy annual* for out of doors.

367 *Mimulus Tigrinus* (Monkey Flower), double, tube-shaped flowers, beautifully spotted; 1 ft. 10

368 —**Giant Emperor.** Although Mimulus are admirable pot plants, they are equally adapted for beds in the garden, in semi-sunny positions. The flowers are of the "Hose in Hose" style, of great size, and of remarkably rich and varied colors, grotesquely mottled and figured 15

369 —**Musk Plant** (*Muschatas*), foliage emits a strong musky perfume; yellow, ½ ft. 10

NOLANA

MIMOSA (SENSITIVE PLANT)

Very interesting and curious. So sensitive is it that when touched the leaves instantly close and droop. Seed should be started under glass or in the house. *Tender annual.*

370 *Mimosa Pudica*. Pinkish-white; 2 ft. ... 5

NEMOPHILA

NOLANA

Nolanas are of a trailing habit, and admirably adapted for rockwork, hanging baskets, vases, etc. The flowers resemble the Morning Glory, brilliant, freely produced, of various colors. *Hardy annuals.*

371 *Nolana Atriplicifolia*. Mixed colors 5

NICOTIANA (TOBACCO PLANT)

372 *Nicotiana*, **Giant Red Flowering.** One of the most magnificent decorative plants for picturesque effect on the lawn or in the garden. The foliage is luxuriant and tropical in appearance, and when the stately plants are surmounted with the immense clusters of rich crimson flowers, the effect is beautiful in the extreme. They grow rapidly and attain a height of 5 feet and over..... 10

373 —**Colossea.** Amongst ornamental foliaged plants coming to perfection the first season from seed, this ranks foremost. It is an annual (perennial when grown under glass), attaining a height of 5 to 6 feet in the open ground. The leaves, of about 3 ft. in length by 18 to 20 inches in breadth, are erect at first, gracefully bending down successively. The plants being of branching habit and of robust growth, and the leaves being very tough, are never damaged by wind or rain. It is well adapted for sub-tropical gardening, either as single specimens or for groups, with other ornamental leaved plants 10

374 —**Affinis** (*Solanaceae*) Tobacco. Different, both in growth and flowers, to the ordinary kind; producing splendid pure white noble flowers on long terminal tubes, with a delicious scent. When its gigantic white Bouvardia-like flowers are fully expanded in the evening and early morning, it has a most striking effect, and perfumes the whole surrounding atmosphere. It is, beyond doubt, the greatest novelty of the garden. Very free; and only attaining the height of 2½ ft. in any ordinary soil..... 10

NASTURTITIUM TALL OR CLIMBING

- 380 Nasturtium, Scarlet and Gold. Yellow foliage; flowers dark crimson scarlet, strikingly effective; oz., 30c. 10
 381 —White Pearl. Oz., 15c. 5
 382 —Dunnett's Orange. Oz., 15c. 5
 383 —Scarlet. Oz., 15c. 5
 384 —Scarlet Striped. Oz., 15c. 5
 385 —Crimson. Oz., 15c. 5
 386 —Yellow. Oz., 15c. 5
 387 —Collection, containing above 7 separate sorts. 30
 388 —Mixed. Contains many beautiful sorts. Oz., 10c.; ¼ lb., 30c.; lb., \$1.00 5
 900 —Hybrids of Madame Gunther. See Novelties.

TOM THUMB OR DWARF NASTURTITIUMS

- 389 Nasturtium, Aurora. The flower is of a deep chrome yellow, the upper petals showing lighter reflexes, while the two lower petals are blotched with purplish carmine, and marked with bright carmine veining. The color is very pleasing and entirely distinct. Oz., 25c. 5
 390 —Lady Bird. A distinct sort. The ground color is a rich golden yellow, each petal barred with a broad vein of bright ruby crimson; charming. Oz., 25c. 5
 391 —Empress of India. Splendid new dwarf variety, with very dark leaves and crimson flowers. Oz., 25c. 5
 392 —King of Tom Thumbs. Intense scarlet flowers, dark foliage. Oz., 25c. 5
 393 —King Theodore. Bluish green foliage, flowers velvety crimson. Oz., 5c. 5
 400 —Cloth of Gold. This magnificent dwarf Nasturtium is in striking contrast to all other varieties; the foliage is a clear, bright yellow, and the deep scarlet flowers intermingle beautifully with the yellow leaves. Oz., 30c. 10
 401 —California "Giant Flowering." This mixture contains seed from the largest-flowering, most beautiful and varied collections ever sent out. The plants form mounds about 1 ft. high by 1 ft. across, fairly sheeted with bloom. Oz., 25c.; ¼ lb., 35c.; lb., \$1.25 10
 402 —Mixed. Many sorts. Oz., 15c.; ¼ lb., 35c.; lb., \$1.25 5
 403 —Collection containing above 13 separate varieties 60

PENTSTEMON

Among popular hardy plants few surpass Pentstemons for their usefulness and ornamental character. They bloom in June and continue until late in the fall. The flowers are half-pendant, bell-shaped, and marked and marbled in beautiful shades.

- 408 Pentstemon. Mixed hybrids ... 10

PICOTEE

Very much like the Carnation, as fine and more delicate in coloring. Seed sown in the open ground in May or June will flower well next season. *Hardy perennials.*

- 409 Picotee, fine double mixed ... 25

POLYANTHUS

Early blooming dwarf plant for spring flower beds or pot culture; the large round flowers are borne on stalks about 8 inches tall. Colors, yellow, maroon, crimson, etc.; beautifully veined, laced or blotched.

- 410 Polyanthus (*Primula elatior*), finest gold-laced varieties ... 19

PAEONY

These are among the noblest and most beautiful hardy flowers, and indispensable for the garden. The flowers are very large and of the most beautiful colors; they require the richest soil, and grow well in shady places. *Hardy perennial.*

- 411 Paeony, double mixed ... 10

DOUBLE PÆONY

PERILLA

These are useful plants either for back-ground or as single specimens in mixed borders, having fine, dark, ornamental, broad, serrated leaves of a purplish mulberry color. Start under glass. *Half-hardy annual.*

- 404 Perilla Nankinensis, 1½ ft. 5

CENOTHERA (EVENING PRIMROSE)

Charming, hardy plants, with large showy flowers; old favorites in the flower garden; they deserve to be more widely grown. The flowers open in the evening, in a sudden and curious manner.

- 405 *Cenothera biennis* (Evening Primrose), yellow; 1½ ft. *Half-hardy annual* ... 5
 406 —*Acaulis alba*, very dwarf, leaves lying close to the ground, pure white flowers; 1½ ft. *Hardy perennial* 10
 407 —*Rosea* (Mexican Primrose). A trailing plant admirably adapted for planting in vases and hanging baskets. The flowers are of a soft rosy pink, veined with red, shading lighter towards the edges. 19

PERILLA

PANSY

Our Pansy Seed has been most carefully selected, and will give greatest satisfaction. The best plants are obtained from seed sown in a seed bed in August and transplanted about the end of September to bed or border in which they are to bloom next spring; protect with a slight covering of straw or leaves during winter. Seed sown in boxes in March and transplanted early in spring will bloom freely during autumn. To ensure best results with Pansies, strong rich soil must be selected, the situation somewhat shaded and the plants not allowed to become too dry.

of Pansy is an object of admiration when in bloom; its flowers approach the Trimardeau in size, but with much more varied tones of color, and spots more apparent; the bloom is well held up by short, thick flower stalks and gives fine effect for borders or for use in baskets or window boxes

- | | | |
|---|--|----|
| 418 —Giant Black. | Immense jet-black flowers; velvety and of especially good substance | 15 |
| 419 —Giant Golden Yellow Stained. | Pure golden yellow, stained black at eye; an extra fine Pansy | 10 |
| 420 —Giant Blue (Emperor William). | Deep blue; a large black blotch on each of the three lower petals | 10 |
| 421 —Giant (Lord Beaconsfield). | Upper petals lavender; lower petals rich deep violet | 10 |
| 422 —Giant White. | White, a small violet blotch on each of the three lower petals; very large | 10 |
| 423 —Giant Yellow. | Upper petals bright yellow; each of the three lower petals has a dark eye | 10 |
| 424 —Giant Purple Gold Edged. | A grand variety, the combination of colors being very rich | 15 |
| 425 —Cardinal Red. | Flowers large size and perfect circular form; the lower petals are marked with a dark red blotch | 10 |
| 426 —Peacock. | This fine variety is a beautiful ultra-marine blue. The petals are edged with a thin white line within which is a space of purplish crimson, passing into a rich central blotch of deep blue, shading to black. The coloring is truly gorgeous | 10 |
| 427 —Victoria. | A very effective variety, with rich velvet-like petals of a bright claret color, the nearest approach to a scarlet in Pansies | 10 |
| 428 —Extra Choice Large Flowering Mixture, oz., \$2 | | 10 |
| 429 —Choice Mixed, oz., \$1 | | 5 |

POINSETTIA

- 433 **Poinsettia, Mexican Fire Plant.** Remarkable, showy, hardy annual, with orange, scarlet and crimson-tipped bracts. 4 ft. 10

PRIMROSE

(NEW ENGLISH)

The new English Primroses comprise the most enchanting shades, all of which are distinct and beautiful. They are of the easiest possible culture, growing readily and producing their flowers in the greatest profusion. Protect during winter. *Half-hardy annual.*

- 434 **Primrose, English, mixed.** 15
435 —English, yellow 10

PRIMROSE

PYRETHRUM, DOUBLE WHITE

PORTULACA

PORTULACA

Brilliant dwarf annuals, luxuriating in warm situations; blooming profusely from early summer to autumn. *Hardy annual.*

- 436 **Portulaca, double.** Large flowering varieties, mixed 10
437 —**Single.** Large flowering, all colors, mixed 5

PYRETHRUM

(FLOWERING SORTS)

Valuable varieties for cut flowers, with stems 2 ft. high and very numerous, each surmounted with handsome flowers in bright colors, remaining a long time in bloom. *Hardy perennial.*

- 438 **Pyrethrum Roseum.** Flowers large, yellow and rose colors 15
439 —**White, double.** As good as a double Chrysanthemum 10

YELLOW-LEAVED SORTS

Dwarf-growing plants, largely used for edgings and ribbon work. *Half-hardy perennial.* 3 ft.

- 440 —**Aureum** (Golden Feather). Yellow foliage 10
441 —**Selaginoides.** Handsome golden-yellow, fern-like foliage 10

Do not fail to order a few Gladiolus Bulbs, they will be sure to please you.

PETUNIAS

For out-door decorations, few plants are equal to this class. They commence flowering early, and continue a mass of bloom throughout the whole season, until killed by frost; easily cultivated, requiring a rich soil and a sunny situation. Of late years, the single-striped, mottled, and doubled varieties have been greatly improved. The strains we offer, we can safely say, without contradiction, are the best that can be procured either in this country or Europe.

Single Varieties

- 442 **Petunia. Dwarf Inimitable.** Each plant forms a complete bush, 5 to 8 ins. high, and is covered with brilliant cherry-red flowers, marked with a clear white star. It is invaluable for carpet bedding and pot culture..... 10
- 443 **—Blotched and striped.** Flowers with star-shaped blotches of symmetrical form; fine bedder..... 10
- 444 **—Good Mixed.** Many colors. Per $\frac{1}{4}$ oz., 25c..... 5

Large Flowering Single

- 445 **—Giants of California.** Flowers very large, in great variety of colorings and markings, with broad, deep, yellow throats, veined..... 25
- 446 **—New Emperor.** This truly grand strain of Petunias carries a large mass of bloom all summer, and many blossoms are 3 to 4 ins. across, and beautifully striped, blotched and spotted..... 25
- 447 **—Clematis—Flowered.** A distinct form of this popular flower, the rich purple-blue of one of the varieties bearing a striking resemblance to the Clematis Jackmanii..... 25
- 448 **—Fringed Mixed.** Beautifully fringed, with stained markings... 20
- 449 **—Grandiflora Superbissima.** Extra large flowers, with very deep and beautifully veined throats, mixed..... 35

Extra Large Flowering Double

- 450 **—Pure White. Double Fringed. "Lady of the Lake."** This is a superb selected strain of seed; large, double, white fringed flowers..... 50
- 451 **—Steele Briggs. Selected Double Fringed.** This is without doubt the finest strain of Double Petunia ever offered. Since our introducing this variety a few years since it has received the highest recommendations from florists and amateurs, with flattering testimonials for its immense size and exquisite colors, shades and markings. It produces from 30 to 50 per cent. of double flowers from seed..... 35

CALIFORNIA GIANT

RICINUS (Castor-Oil Plant)

The stately and imposing Ricinus, with its ornamental foliage and showy fruit, gives a sub-tropical effect on the lawns, or for centres of beds with foliage plants, or where planted thickly, will form a handsome screen or hedge.

- 452 **Ricinus. Queen of Cambodia.** The main stem and leaf stalks are shining ebony, leaves large, regularly divided and richly colored. The foliage assumes different shades as the plant increases in size, so that very striking effect may be obtained when planted in groups..... 10
- 453 **—Spectabilis.** A magnificent variety, tall growing, with immense light green leaves; very showy in contrast with the dark-leaved sorts..... 5
- 454 **—Gibsoni Coccineus.** The stalks and leaves are of a bright, metallic bronze color, often almost as red as fire. The large bunches of fruit are also of a burning crimson color..... 10
- 455 **—Borboniensis, large; handsome foliage; 6 ft..... 5**
- 456 **—Sanguineus, deep red stalks, scarlet fruit; 5 ft..... 5**
- 457 **—Braziliensis..... 5**
- 458 **—Zanzibarensis. Giant of Africa.** The enormous leaves are fully 2½ ft. broad, beautifully lobed; the whole plant has a distinct and novel appearance, enhanced in the sunshine by a bright metallic hue. They charm everyone at first sight, and their usefulness is very great indeed 10

RICINUS (QUEEN OF CAMBODIA)

STEELE, BRIGGS' SELECTED DOUBLE FRINGED PETUNIAS.

RHODANTHE (Everlasting)

A charming everlasting of great beauty, a very compact and ornamental plant, producing a beautiful effect in beds or ribbons; its silvery, rose-tinted flowers are in great demand for winter decorations. *Half-hardy annuals.*

- 459 **Rhodanthe, mixed..... 5**

ROCKET

A very interesting, useful and free-flowering plant. Blooms early; it remains beautiful for a long time in beds, ribbons, etc., and is much admired for the fragrance of its flowers. *Hardy perennial.*

- 460 **Rocket, Sweet..... 5**

Do not fail to examine the Novelty Pages for the many New Varieties we offer this season.

RHODANTHE

PHLOX DRUMMONDI

A very pretty hardy annual, invaluable for bedding, masses and cut flowers, from its bright colors, which vary from the purest snow white to the deepest blood red, and the unusual length of its blooming season. There is no annual which can compare for beauty, duration of bloom, brilliancy of colors and usefulness to the Phlox.

PHLOX DRUMMONDI GRANDIFLORA

The large flowering kinds are a decided improvement on the Drummondii, producing flowers twice the size of the latter, with the most brilliant colors.

- | | | |
|-----|---|----|
| 462 | Phlox Drummondii Grandiflora, Splendens , bright scarlet, with white eye, one of the finest, and quite constant | 10 |
| 463 | — Alba , white | 10 |
| 464 | — Coccinea , bright scarlet | 10 |
| 465 | — Elegans , margin from rose to crimson, with large white centre or eye | 10 |
| 466 | — Isabellina , pale yellow | 10 |
| 467 | — Mixed , finest colors, per $\frac{1}{4}$ oz., 30c. | 10 |
| 468 | Phlox Drummondii, Mixed , finest varieties, per $\frac{1}{4}$ oz., 25c | 5 |
| 469 | — Fringed . A valuable introduction, embracing two distinct and showy colors, purple-violet and carmine; these are rendered more effective by the beautiful fringed and toothed edges of the petals, having more or less a border of white | 10 |

OXALIS

- | | | |
|-----|--|----|
| 470 | Phlox. "Star of Quedlinburg." Flowers are of regular star-like form. Plant of compact habit, bearing large umbels of flowers. Novel and beautiful. Mixed colors. See centre cut above | 10 |
| 471 | — Double White . In this new variety we have the first Double Phlox yet introduced. It produces about 60 to 70 per cent. of perfectly double flowers of an exquisite pure white color and handsome shape | 10 |
| 472 | — Phlox Nana Compacta (Dwarf Sorts). A quite distinct strain of dwarf and compact growth; very desirable for pot culture and ribbon bedding, 9 in. Choice Mixture | 10 |
| 473 | — Hardy Perennial Phlox (Finest Dwarf Varieties). The varieties of the perennial phlox are among the choicest of our flowers for bedding and border plants. They are hardy and need no protection; will flourish in any soil, succeeding better, however, in deep, rich, rather moist ground. Mixed seeds saved from splendid sorts | 10 |

OXALIS

Exceedingly free-flowering little plants with lively foliage, and entirely covered with bright flowers from June to September. Very useful for edgings.

- | | | |
|-----|-----------------------------------|----|
| 474 | Oxalis, Choice mixed | 10 |
|-----|-----------------------------------|----|

POPPIES

Exceedingly showy plants, making a gorgeous display in the flower garden. The seeds must always be sown where the plants are to remain, as they will not bear transplanting.

Single Annual Poppies

- | | | |
|-----|--|----|
| 475 | Poppy, Glaucum (New Tulip Poppy). A glossy new annual poppy, twenty inches high with beautifully shaped large flowers, four inches across, of a most brilliant dark scarlet. The two outside petals are double the size of the inner ones, and each pair forms by itself a round cup of flower which nearly resembles a single tulip. Pkt. | 10 |
| 476 | — Shirley . The colors are mostly light, many having wide margins on the petals. The flowers are large, single, and extremely showy. It will give great satisfaction | 10 |

Double Poppy

- | | | |
|-----|--|----|
| 477 | — White Swan . Pure snow-white, extremely double flowers of perfect form, large size. | 10 |
| 478 | — Mikado . Long, feathery petals; white, fringed with crimson | 5 |
| 479 | — Fairy Blush . Immense globular flowers; are perfectly double, measure from ten to thirteen inches in circumference; very handsome | 10 |
| 480 | — Chinese . Double dwarf, magnificent flowers, mixed colors | 5 |
| 481 | — Carnation . Double, splendid, large flowers, mixed colors; 2 ft. | 5 |

Hardy Perennial Poppies

The fragrant, elegant, crushed satin-like flowers are produced in unceasing succession from June to Oct. The flowers last fully a week if cut soon as open.

| 485 | Orientele . (Single). Dark scarlet with purple spots; very handsome | 10 |

NEW TULIP POPPY

ICELAND POPPIES

RUDBECKIA

RUDBECKIA

(TEXAS CONE FLOWERS)

These robust-growing plants are now becoming very popular for border decoration. They are of the easiest possible culture and bear very showy flowers, with raised, cone-shaped centres, during summer and autumn. *Hardy annual.*

487 Rudbeckia Bicolor.

An attractive variety, 1½ feet high; immense flowers bright yellow with black purple centre 10

SEDUM

(STONE CROP)

A dwarf little plant, growing freely on rock-work, vases, old walls, etc.

488 Sedum Coeruleum,

blue, ½ ft. 10

489 —Acre, yellow, ½ ft. 5**SCHIZOPETALUM**

A curious little annual,

which germinates quickly and grows six to eight inches high, producing freely pretty snow-white laciniated flowers. It is also very sweet-scented. It grows freely, and is one of the many odd and unknown little flowers, which is sure to prove attractive.

490 Schizopetalum Walkerii. White, with fragrant-fringed flowers, ¾ ft. 5**SPRAGUAEA UMBELLATA**

This lovely garden annual grows freely, and seed can be sown in the open ground in May. It forms a compact mass of dark bronzy leaves, from among which stems rise to the height of eight or ten inches, bearing an umbel of curious wool-like crimson flowers. This bunch of curious bloom keeps perfect a long time before fading. Its beauty commends it to all lovers of flowers, as also does its odd and curious formation.

491 Spraguea Umbellata. 15**STATICE or ARMERIA**

A beautiful plant with tufted grass-like foliage, from which issues long stems terminating with large globular heads of pretty rose-pink flowers, sometimes called "Sea Pinks." Useful for cutting or for making borders and edgings. *Hardy perennial.*

492 Statice Maritima Ro-

sea. One foot 10

493 —Incana Hybrida.

When dried, these flowers work up with Everlastings to advantage 5

ROMNEYA COULTERI

ROMNEYA COULTERI

("GREAT WHITE CALIFORNIA POPPY").

Of stately beauty, flowering from July until November. The flowers are large (4 to 5 inches across), pure white, yellow stamens, and of delicate primrose-like perfume. Valuable for cutting, lasting well in water, 6 to 8 ft. high

497 Romneya Coulteri. Per pkt. 10**SALVIA (FLOWERING SAGE)**

One of our handsomest summer and autumn flowering plants, when they are literally ablaze with brilliant flowers; very effective for massing on the lawn or for ribbon beds. 3 feet. *Half-hardy perennial.*

498 Salvia Patens. The purest and brightest blue

of all blue flowers. Height, 2 feet. 20

499 —Splendens (Scarlet Sage). Scarlet. 10**500 —Coccinea.** Deep crimson, 8 ins. 5**SCHIZANTHUS (BUTTERFLY FLOWER)**

In this charming variety we have one of the finest annuals in cultivation. The flowers are as handsome as some Orchids. *Half-hardy annual.*

501 Schizanthus. Fine mixed. 5

SALPIGLOSSIS

SALPIGLOSSIS

(PAINTED TUBE TONGUE)

One of the most beautiful of flowering annuals, forming strong bushy plants about 18 inches high, and bearing throughout the season large flowers 3 to 4 inches across, of many beautiful colors, all exquisitely veined and laced. (See cut.) *Half-hardy annual.*

494 Salpiglossis, large flowering, mixed.. 5

495 —"Purple and Gold," the Orchid Salpiglossis. Rich velvety purple, exquisitely veined and feathered with yellow or gold. 10

STEVIA

Most desirable for the garden, for ribbon lines in summer bedding. Its foliage is variegated white and light green, but viewed from a little distance the effect is practically white. Owing to its bushy habit and small foliage, it is not ragged when trimmed. The flowers are small, pretty and white, though inconspicuous because of the white effect of the foliage.

496 Stevia Serrata. 10

NEWEST SWEET PEAS

Our Sweet Peas are unsurpassed, having been selected from the finest strains of American and English growers. They include all the improved large-flowering varieties of recent introduction

The seed should be sown as early as the ground can be worked in the spring, to enable the vines to get a good strong growth before the warm weather comes. Prepare the ground by thoroughly working in a large quantity of well-rotted manure. Make a trench 6 inches deep; in this sow the seed and cover 2 inches deep. As soon as the plants begin to show through fill in the trench. This will secure a deep planting without the bad effect of deep covering of the seed at first, and so enable the plant to bloom continuously through the heat of summer. As the flowers come into full bloom or fade they should be cut off, for if the pods are allowed to form the plants will stop blooming.

DOLLY VARDEN

754 This is the new Sweet Pea from California. On the fresh flower the wings are almost white, with a purple-magenta edging. The standard is bright purple-magenta, toward the midrib shading lighter, running to almost white on the sides and pencilled with heavy maroon at the base. It gives the general effect of a bluish-purple standard with white wings, a color which has long been sought. Pkt. 10c., 3 pkts. for 25c.

LOTTIE HUTCHINS

755 Lottie Hutchins is daintily flaked with pink in the same manner as Ramona, but on a cream ground instead of white, making a richer and even more lovely effect. The flowers are of well expanded grandiflora type, large in size and finely formed, borne on heavy, substantial stems. Pkt. 10c., 3 pkts. for 25c.

ORIENTAL

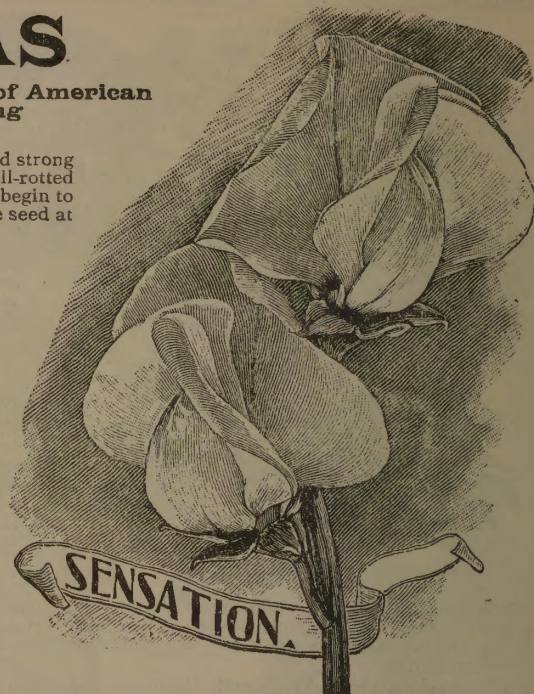

756 This is the notable variety of that rich orange cast. The long stems generally bear three flowers, all facing one way. The large, erect standard is slightly pointed, openly re-curved, heavily veined, and suffused with bright orange-salmon, fading to nearly white between the veinings when opened for some time under the hot sun; keel stiffly erect; wings very much recurved and standing erect, richly suffused with orange-salmon of rather a lighter shade than in the standards, and deepening to carmine-rose in the centre. Pkt. 10c., 3 for 25c.

SENSATION

757 The vines of this grand variety remain covered with flowers a long time, even under the hottest sun. The fine large standard is well expanded, slightly pointed and re-curved, of delicate silky texture suffused with a faint blush; the wings of heavier texture, broad, semi-erect, well recurved and more nearly white than the standard. In the strong sunlight the fully expanded flowers have the appearance of pure paper-white, but by reflected light or under close examination the flesh tinge is readily discernible. Pkt. 10c., 3 for 25c.

STELLA MORSE

758 The blossom opens with quite a suggestion of yellow, a most fascinating shade of deep cream, which becomes a little lighter as the flower grows older. About the third day it is a delicate primrose with a faint rose-pink on the edge, which casts a pleasing blush tint to a mass of the blooms, without destroying the creamy-yellow effect. It has the most perfect form, being of the largest grandiflora hooded type, and grows on long stems with three and four flowers each. Pkt. 10c., 3 for 25c.

DWARF SWEET PEA "CUPID"

759 The plant does not grow over 5 inches high, and never more than 12 to 15 inches in diameter. The stems are about 4 inches long, bearing two or three blossoms, all very near the end of the stem. It is a wonderfully free bloomer, and begins to flower as early as May and continues until November. The seed is white and of usual size. Per pkt., 10c.

"PINK CUPID"

760 The first colored to follow the famous white. The standard is a bright rose-pink while the wings are pure white on light pink. The wings are very large and finely formed; when pressed against the standard they extend fully a quarter of an inch beyond it. Per pkt., 10c.; 3 for 25c.

DWARF SWEET PEA "CUPID"

DOUBLE SWEET PEA "BRIDE OF NIAGARA"

761 This variety has banners of a beautiful clear pink and with wings and keel white. A large percentage of the flowers have two and three large banners. The great improvement which has taken place in Sweet Peas in recent years, consists mainly in an enlargement of the banner, thus making the flowers more showy. Nature is simply dividing the banner in two and three large handsome banners, giving a double appearance to the flower, and while all flowers are not double, a part are single with a good proportion double and showy. Pkt., 5c.; oz., 10c.

RED RIDING HOOD

762 This is an entirely new departure in form, and might be called the "freak" Sweet Pea. It is named appropriately "Red Riding Hood," for it is as close an imitation of a diminutive hood as could be made. The standard forms a perfect back, ruffled into the wings which form the sides, and between which peeps a bit of the white keel quite like a face. The standard and wings are a rosy-pink, shading to bluish white at the calyx. Pkt., 5c.; oz., 10c.

SWEET PEAS IN MIXTURES

763 Steele-Briggs' Gilt Edge Mixture contains the newest named varieties of the grandiflora type, and is undoubtedly the best mixture we ever offered; pkt. 10c., oz. 15c., 1 lb. 30c., lb. \$1.

764 Royal Prize Large Flowering Mixture; pkt. 5c., oz. 10c., 1 lb. 20c., lb. 60c.

765 Eckford's Superb Mixture; pkt. 5c., oz. 10c., 1 lb. 15c., lb. 40c.

766 Good Mixed; pkt. 5c., 1 lb. 10c., lb. 30c.

STANDARD SWEET PEAS

The varieties marked with an Asterisk (*) produce flowers of good substance and largest size, being of the true Grandiflora type.

Prices except where noted, $\frac{1}{4}$ lb., 20c.; oz., 10c.

- 767 Sweet Pea, America. Bright cardinal stripe on pure white ground, good size and open form 5
 768 *Apple Blossom. Standard shaded rose and pink, wings pale pink 5
 769 *Aurora. Flowers of great substance and gigantic form, standard and wings are white, flaked and striped with bright orange salmon 5
 770 *Blanche Burpee. Extra large, pure white and of good substance 5
 771 Blanche Ferry. Bright rose pink standards, wings pure white, very free bloomer..... 5
 772 Blanche Ferry. Extra early. A selection from the above, 10 days earlier; good..... 5
 773 Blushing Beauty. A very fine delicate pink with a hooded form 5
 774 Boreatton. A rich, velvety maroon, self color; good substance and fair size 5
 775 Bronze King. Standards terra-cotta; wings white; very profuse bloomer..... 5
 776 Butterfly. White ground delicately laced with lavender blue..... 5

777 *Brilliant. Flowers of good substance and large size, of a bright scarlet color, which does not burn; oz., 15c.; $\frac{1}{4}$ lb., 30c. 5

- 778 *Captivation. Light magenta or claret color, fine form and good substance 5
 779 *Coquette. The wings are of a clear primrose yellow, while the standard is shaded pale lavender on primrose ground. $\frac{1}{4}$ lb., 25c. 5
 780 *Countess of Radnor. Soft lavender, self color. 5
 781 *Countess of Aberdeen. Round hooded standard, wings pink turning lighter..... 5
 782 *Crown Jewel. Primrose ground, veined with violet rose 5
 783 Daybreak. Standard a very pretty watered red on white, wings white..... 5
 784 *Dorothy Tennant. Very large, round, shell-formed flowers of a deep rosy mauve 5
 785 *Duke of Clarence. A beautiful shade of rosy claret; very fine 5
 786 *Emily Eckford. Rosy mauve, changing to an almost true blue 5
 787 Emily Henderson. A clear white of heavy substance, very vigorous and prolific, blooming very early 5
 788 *Firefly. An intense glowing scarlet, large flower, profuse bloomer; oz., 15c. 5
 789 *Grey Friar. A large shell-shaped flower, watered purple on white ground 5
 790 Golden Gate. A freak in form, the wings stand upright and are curled in; color pinkish mauve and lavender; $\frac{1}{4}$ lb., 25c. 5
 791 *Her Majesty. Beautiful rose pink, self color; $\frac{1}{4}$ lb., 25c. 5
 792 Invincible Scarlet. A beautiful bright scarlet 5
 793 *Juanita, or Striped Celestial. White, striped red and lavender..... 5
 794 *Katherine Tracey. Light but brilliant vermilion rose, very large and of delicate coloring 5
 795 Lady Beaconsfield. Standard salmon pink; wings primrose yellow..... 5
 796 *Lady Penzance. Standards orange pink; wings pink 5
 797 Little Dorrit. Pink standard, white wings 5
 798 *Lottie Eckford. Standard white, shaded mauve; wings white, suffused with lavender..... 5
 799 *Lovely. A pleasing shade of pink; wings delicate pink, attractive; $\frac{1}{4}$ lb., 25c. 5
 800 *Maid of Honor. White edged with blue; very large and fine; $\frac{1}{4}$ lb., 25c. 5
 801 *Mars. A beautiful bright scarlet, deepening with age; $\frac{1}{4}$ lb., 25c. 5
 802 *Meteor. Standard orange salmon; wings veined pink; $\frac{1}{4}$ lb., 25c. 5
 803 *Monarch. Very large, round flower, of a deep purplish maroon color 5
 804 *Mrs. Eckford. Flowers of a charming primrose yellow, strong grower and a very profuse bloomer... 5
 805 *Mrs. Joseph Chamberlain. A round flower of fine form, white striped and shaded bright rose... 5
 806 *Mrs. Sankey. A large white, sometimes shaded with rose; seeds black... 5
 807 Novelty. Pale carmine, laced with rose 5
 808 *Ovid. Rose pink, margined with a deeper rose; very fine 5
 809 *Peach Blossom. Standards soft pink; wings of a deeper pink 5
 810 Primrose. Pale primrose yellow. Very fine 5
 811 Princess May. Light lavender; very delicate. $\frac{1}{4}$ lb., 30c. 5
 812 *Prima Donna. Lovely soft rose pink, of large size and fine form 5
 813 *Princess Victoria. Standard scarlet; wings crimson 5
 814 *Ramona. Flower creamy white, delicately striped and flaked with carmine 5
 815 *Royal Robe. An exquisite shade of deep rosy pink 5

- 816 *Royal Rose. Deep rosy pink of immense size and fine form. $\frac{1}{4}$ lb., 25c. 5
 817 *Senator. Creamy white, striped with maroon and chocolate 5
 818 *Splendor. A very bright rose, shaded crimson 5
 819 *Stanley. Very deep rich maroon, the darkest color 5
 820 *The Bride. A large pure white, very fine 5
 821 *Venus. Large salmon buff, shaded rosy pink 5
 822 Vesuvius. Carmine rose, shading to violet, with crimson spots 5

FOR a grand display of Sweet Peas we prepare and offer special collections of the finest large flowering sorts | 40 NAMED VARIETIES FOR \$1.50; 20 NAMED SELECT SORTS FOR 80c.

STOCK, TEN WEEKS

The stock is one of the most popular plants, either for bedding or pot culture; for brilliancy and diversity of color, or profusion and duration of bloom it is unsurpassed. Of delightful fragrance. For early flowering start the seed in a greenhouse or hot-bed, and transplant into the garden in May, after all danger of frost is over. *Half-hardy annual.*

Large Flowering Ten Weeks Stock

503	Stock, Blood Red	10
504	—Crimson	10
505	—Light Blue	10
506	—Purple	10
507	—Pure White	10
508	—Bright Pink	10
509	—Mixed: All choice double large flowering	10
510	—Dwarf German, Mixed Ten Week	5
511	—Snowflake Improved. A beautiful dwarf growing variety; very large double snow-white flowers. Our seed of this variety will produce a large percentage of double flowers	15

SWEET WILLIAM

- 512 **Stock. Princess Alice** (Cut and Come Again). A fine perpetual blooming Stock, growing about 2 ft. high. It throws out numerous side branches, bearing clusters of very double pure white fragrant blossoms, and is excellent for cutting

15

- 513 —**Mammoth White Column.** Of luxuriant growth, attaining in the open ground a height of 3 ft. and producing only a single, long, sturdy spike of bloom, closely furnished with enormous double flowers of the purest possible white

20

East Lothian or Autumnal

These are prized on account of their flowering late in autumn. Removed to the house blooms during the winter.

- 514 —White

10

- 515 —Finest Mixed

10

SWEET WILLIAM

A beautiful and favorite class of plants of extreme richness and diversity of color, very large and almost perfect in form with trusses of great size. *Hardy perennial.*

- 516 **Sweet William** (*Dianthus Barbatus*), finest mixed, 1½ ft.

5

- 517 —**Auricula-flowered**, flowers of great size, beautifully eyed, mixed colors, 1½ ft.

10

SWEET SULTAN

(CENTAUREA)

A free-flowering, very effective hardy border plant. The flowers have a delicate honey perfume, and are highly prized for bouquets. *Hardy annual.*

- 518 **Sweet Sultan**, mixed colors

5

SCABIOSA CAUCASICA.

THUNBERGIA

Free-flowering, handsome twiners of rapid growth; the beautiful foliage and showy flowers are both greatly admired. The colors are delicate and beautiful. *Half-hardy annual.*

- 519 **Thunbergia**, mixed colors

5

TROPÆOLUM (See also Nasturtium)

Splendid climbers for house and garden; bloom freely and are of easy cultivation.

- 520 **Tropæolum Canariense** or **Canary Bird Flower.** One of the most charming climbers, bearing an abundance of bright yellow fringed flowers. See cut, 10 ft.

5

- 521 —**Lobbianum**, much cultivated in the greenhouse; but when allowed to run on the ground and pegged down, they make a brilliant bed

5

STOCK, TEN WEEKS

SCABIOSA

(MOURNING BRIDE, OR SWEET SCABIOUS)

One of our handsomest summer border plants, producing in great profusion very double flowers in a variety of shades and colors; a splendid flower for table bouquets, etc. *Hardy annual.*

- 522 **Scabiosa, Candidissima Alba Pleno**, "Snowball." Double pure white flowers, excellent for florists' use; 2 ft.

10

- 523 —**New Large-Flowering.** The flowers are extremely large, averaging 3 ins. across and very double; one of the finest hardy annuals and valuable for bouquets. Finest mixed

10

- 524 —**Nana Fl. Pl.** Dwarf flowers, extremely double, valuable for bouquets. Height, 1 ft. Many colors mixed

5

- 525 —**Tall Mixed.** Double, all colors, 2 ft.

5

- 526 —**Caucasica, Perennial Scabious.** One of the handsomest of hardy perennials, forming a spreading and dense plant, 2 to 3 ft. high, thriving well in ordinary garden soil, and should be grown by everyone, if only for its flowers for cutting, as they last a long time in water, and their peculiar soft lilac blue shade is charming

10

CANARY BIRD FLOWER

THUNBERGIA

VERBENA

Verbenas in quantity are more easily obtained from seed than from cuttings, and the plants are more healthy and vigorous in growth, while they are also fragrant, particularly the white and light colored varieties. Sown in spring, they flower quite early in the season, and each plant, in good rich soil, will cover a space 3 to 4 ft. in diameter, producing, if the flowers are cut as soon as they begin to fade, a mass of bloom until killed by frost.

527 Verbena, Mammoth. This distinct and superb class of Verbenas, also offered as a "Grandiflora," is a remarkable improvement on the older varieties. It produces flowers of an enormous size, the florets being fully one inch in diameter, with clearly defined margins and white eyes, fine form and delicate shading, and is a magnificent flower. Our seed is saved from the finest flowers only, and will not fail to produce the best results ... 15

528 —New Golden-leaved. Flower same as the ordinary; colors ranging through various shades. The golden yellow foliage is very effective. Mixed colors 10

529 —Lemon-Scented. This flower always has been and always will be a great favorite with all. The delicious lemon fragrance of the leaves is very refreshing and pleasant. Plants live over from year to year. Sow early 10

530 —Sweet-scented. This lovely sweet-scented Verbena can be sown in the open ground early in the spring, and will in a few weeks be in bloom, and give great profusion of beautiful blossoms all summer. The blossoms, instead of being in clusters, like other sorts, run up into spikes, usually 3 or 4 inches long. It is very sweet-scented and the flowers are pure white. The plant is short-jointed and dwarf, not covering nearly as much ground as other sorts. Perfectly true from seed 10

531 —Venosa. A handsome, hardy perennial, producing purple flowers; remains in bloom for a long period. Height, 6 inches 10

532 —Cerulea. Large blue flowers 10
533 —Scarlet Defiance. True, brightest scarlet, intensely rich 10
534 —Pure White (Seafoam, or Candidissima). A fine strain of large flowering, pure white hybrid Verbena. $\frac{1}{4}$ oz., 75c. 10
535 —Extra Fine Mixed. From fine named sorts. $\frac{1}{4}$ oz., 25c. 10
536 —Choice Mixed Colors. $\frac{1}{4}$ oz., 20c. 5

DOUBLE WALL-FLOWER

WALLFLOWER

Highly prized for their long continuance in bloom, and the delicate odor of their flowers. Single and double varieties of the various shades of golden-yellow, red and dark bronze. *Half-hardy perennial.*

542 Wallflower, double German, extra fine mixed 10
543 —Double Dwarf, dark brown 15
544 —Harbinger, autumn and winter flowering Wallflower, extremely early flowering; great acquisition for the spring; flowers brown 5
545 —Single, splendid mixed; $1\frac{1}{2}$ feet 5

WHITLAVIA

A plant with delicate, handsome foliage, producing a constant succession of beautiful violet blue, bell shaped flowers, in drooping clusters half an inch in length. *Hardy annual.*

546 Whitlavia, fine mixed; 1 foot 5

XERANTHEMUM

Showy, everlasting flowers of the easiest culture, splendid in bouquets of dried flowers. Sow in the open border as soon as the ground gets warm. *Hardy annual.*

547 Xeranthemum, Mixed. Finest colors, $1\frac{1}{2}$ ft. 5

VERBENA

WAHLENBERGIA

A new hardy plant from Japan, producing all summer abundance of star-shaped flowers, 3 inches across, of beautiful blue and white colors. Hardy, lives and blooms for years, increasing in size and beauty yearly. Plants grow 3 feet high, and produce beautiful bloom. Blooms first summer from seed.

537 Wahlenbergia, Mixed 5

VIRGINIAN STOCK

Hardy, low-growing, profuse fragrant flowering annuals, for edges, small beds, or pot culture.

538 Virginian Stock. Red, white, mixed or separate 5

AFRICAN VIOLET

VIOLET

Well-known, free-flowering, hardy perennial, easily grown from seed. Succeeds best in a partially shaded, moist situation. Height, 6 inches.

539 Violet, Sweet Scented, flowers blue. 10
540 —White 10
541 —African (St. Paulia Ionanthal).

One of the most charming stove or house plants introduced of late years. It belongs to the family of the Gesneriaceas, and was recently discovered in East Africa. The tiny plants form a flat rosette of deep green, hairy leaves, which are similar in form to those of the Gloxinias, but smaller in all parts, and mostly reddish brown underneath. The flower stems, 2 to 4 inches in length, are crowned by beautiful deep blue flowers bearing a close resemblance, in form as well as in color, to those of our sweet scented Violet. Stamens deep golden-yellow. A well-established plant will bloom continually throughout the year 25

VIRGINIAN STOCK

XERANTHEMUM

We prepay postage, except where noted, to any address in Canada.

MAMMOTH ZINNIAS

ZINNIAS

For gorgeous summer and autumn display there is nothing that can equal in effectiveness the improved compact-growing, large-flowering Zinnias; growing only two feet high and bearing flowers of immense size, perfectly double, showing no centre, and as perfect in form as Dahlias.

- 548 **Zinnias, Mammoth Flowering.** This is by far the largest Zinnia in cultivation. The plant forms a handsome bush about three feet high, which is clothed with luxuriant foliage and blooms during a long period. The perfectly formed, very double flowers are of various striking colors, clear and vivid. It grows easily from seed sown in the open ground, and at least one packet should be included in every order. 10
- 549 **—Zebra.** A very pretty strain of striped flowers. As the colors vary on each plant, they present a curious as well as beautiful appearance. 10
- 550 **—Pure White.** With handsome white flowers. 5
- 551 **—Dwarf Scarlet.** Double fiery scarlet flowers. 5
- 552 **—Double Crimson.** Flowers very double. 5
- 553 **—Golden Yellow.** Flowers large and of perfect shape, and of a clear golden yellow. 5
- 554 **—Extra Choice Mixed.** Saved from selected double flowers. 5
- 555 **—Double Lilliput.** These make dwarf, compact bushes covered with flowers of refined form, smaller than those of the above Zinnias, in a wide range of colors. Flowers are borne on long and stiff stems, and are valuable for bouquets. 10
- 556 **—Curled and Crested.** A beautiful strain of this popular plant, the petals being twisted, curled and crested into the most fantastic and graceful forms. 10

OUR CHOICE WILD GARDEN SEED

To those who cannot bestow the necessary care required in a neatly laid out flower garden, the "Wild Garden" presents a substitute, which for its unusual and varied effect, for cheapness and small amount of labor necessary for its construction, has no rival. We have had many satisfactory evidences of the estimation in which the "Wild Garden" is held from those who used our seed during the past season.

- 558 **"Wild Garden Seeds"** are a mixture of over 100 varieties of hardy flower seeds mixed together, and wherever planted will insure something new almost every day. Per oz., 20 cents; per large packet. 5

COMPLETE FLOWER GARDEN FOR ONLY 50 CENTS

- 574 To meet the demands of those who wish a neat display of flowers at a small expenditure, we have selected 12 of the most beautiful and showy annuals that will blossom the first year, from which the effect shown in the above illustration can be produced. This flower seed collection, comprising 12 choice sorts, viz., *Portulaca*, *Sweet Alyssum*, *Verbena Hybrida* mixed, *Sweet Mignonette*, *Phlox Drummondii* *Grandiflora*, *Ten Weeks Stock*, *Petunia Hybrida*, *Zinnia* (choice mixed), *Aster* (German Perfection), *Balsam* (Camellia Flowered), *Salpiglossis* (best mixed), and *Sweet Peas* (choice mixed), will be mailed free to any address for 50 cents, or three collections for \$1.25. We are sure every purchaser of this collection will be delighted, as it embraces the easiest cultivated and most showy annuals in the list.

ZEA (MAIZE)

Plants with beautifully striped ornamental foliage. Hardy annual. 5 feet.

- 559 **Zea, Japonica Variegata.** Green and white striped. Oz., 15c. 5

ORNAMENTAL GRASSES

Attractive, easily grown and very interesting plants for borders and ornamental grounds.

- 560 **Ornamental Grasses, Agrostis Nebulosa.** A bed of it has a beautiful wavy appearance. 1½ ft. 5
- 561 **—Avena Sterilis** (Animated Oats). Ornamental, 4 feet. 5
- 562 **—Briza Maxima** (Large Quaking Grass). 1½ ft. 5
- 563 **—Bromus Brizaeformis.** 1 foot. 5
- 564 **—Croix Lachryma** (Job's Tears); tender. 2½ ft. 5
- 565 **—Erianthus Ravennæ.** Extremely graceful. 8 ft. 10
- 566 **—Lagurus Ovatus** (Hare's Tail Grass). 1½ ft. 5
- 567 **—Stipa Pennata** (Feather Grass). The white, wavy tops of this grass preserve their beauty a long time. 2 feet. 5
- 568 **—Collection of above 8 varieties for** 30

SPECIAL MIXTURES OF FLOWER SEEDS

Many persons derive pleasure from watching the growth of a varied bed of flowers, entirely out of the usual trim garden style, while others desire a much more extended collection than their means will permit. To both of these classes the following special mixtures will appeal.

- 568 **Æsthetic Mixture.** Æsthetic tastes are delighted with our new and unique collection of these charming flowers. The variety and richness of coloring is magnificent. 15
- 570 **Mixture of Everlasting Flowers.** These beautiful flowers bloom the first season, and if cut as soon as flowers are open and hung to dry, are useful for mixture with grasses, for winter decoration. 10
- 571 **Mixture of Fragrant Annuals.** Carefully made up from seeds of fragrant flowers only. Some of them are suitable for cutting. 10
- 572 **Mixture of Climbers.** This is a liberally filled packet of seed of many beautiful annual climbers. 10
- 573 **Mixture of Ornamental Grasses.** All annual varieties, many really handsome in growth, and all of them desirable for house decoration during the winter months. 10

UNDER this head are included tender annuals and perennials, or those requiring special care in sowing seed, and during growing of the plants. Many of them make useful decorative plants for conservatory and window, while others can be transplanted to the garden for summer bloom, or as decorative foliage plants for beds and borders.

To start seed use shallow boxes or pans, about two inches deep, in which place rich mellow soil mixed with about one-fourth sand; sow the seed upon the surface, but do not cover to more than a depth of four times the diameter of the seed sown, then press down gently and smoothly. Very fine seed should have no covering, only press the soil after sowing. Water gently with a spray, place the box or pan in the window, covering with glass. Judgment must be used in giving ventilation. Do not allow the soil to become too dry nor too wet, or they may damp off after starting. As soon as the plants are in second leaf, transplant to pots or boxes, and again into larger boxes soon as making further growth. When weather becomes warm they may be removed to the bed or border in open ground, but require protection from heat and cold until hardened to the outdoor atmosphere. Some of the varieties listed below will not stand outdoor weather, but must be kept indoors. Failure will at times attend the most experienced grower, while another planting with the same lot of seed will give excellent results; the seed must not, therefore, be considered faulty if a failure occasionally happens. With proper conditions of culture and care success is easy.

ABUTILON (FLOWERING MAPLE)

For early bloom the seed should be started in the house and the young plants set out in the garden when the weather is warm and settled. They also make splendid house plants, blooming freely in winter.

- 580 **Abutilon, prize mixed.** Embracing the most elegant colors, both self, and streaked and veined 10
See Plant List.

AZALEA

Shrubby plants for greenhouse; large heads of beautiful many colored flowers, borne in profusion during winter and spring. *Tender perennial.*

- 581 **Azalea Indica, finest mixed;** 1 to 4 ft. 25

BEGONIA

Magnificent flowering plants for pot culture. The "tuberous rooted" varieties are becoming deservedly popular for garden bedding, flowering in the greatest profusion all summer. The individual florets will average from 6 to 9 inches in circumference, and are of all colors. 1 foot.

- 582 **Begonia, Tuberous-rooted, single, mixed** 15
583 **—Tuberous-rooted, double, mixed.** 25
584 **—Rex.** Large ornamental leaves of dark green, bronze, gold, red, etc. 25
585 **—Vernon.** A grand variety 15
See Plant and Bulb List.

CALCEOLARIA

Gorgeous plants; the large pocket-shaped flowers are borne in the greatest profusion through spring and summer.

- 586 **Calceolaria, English.** Superb strain. This is unexcelled and may always be depended on to produce finest flowers 50
587 **—Hybrid, spotted and mottled.** Varieties mixed 35

CUPHEA (CIGAR PLANT)

- 588 **Cuphea Platycentra.** Large flowering variety, with countless bright blossoms 25

SUPERB ENGLISH CALCEOLARIA

CYCLAMEN

CENTAUREA

(WHITE LEAVED OR DUSTY MILLER VARIETIES)
Valuable plants for ribbon bedding, the silvery whiteness of the leaves being very effective with other colored leaved plants.

- 589 **Centaurea Gymnocarpa.** A graceful silver foliated variety. One of the best for bedding. 10
590 **—Candidissima.** A dwarf silvered leaved plant, extensively used for ribbon lines. 15

CINERARIA For a showy flower the Cineraria has few equals, bearing as it does, hundreds of large showy flowers of various colors and markings.

- 591 **Cineraria Hybrida.** A splendid strain of large flowering hybrids; dwarf, compact and bushy, mixed colors 50
592 **—Hybrids.** Large flowering, mixed colors. 25
593 **—Double, extra choice.** Mixed 35

COLEUS

Plants with rich foliage of assorted colors, veined and spotted in a beautiful manner. For groups on lawns and ribboning, are indispensable; 1 to 3 feet. *Tender perennial.*

- 594 **Coleus.** Mixed, the finest sorts. 25

CLIANTHUS (AUSTRALIAN GLORY PEA)

- 595 **Clanthus.** Magnificent summer-blooming plant with large, scarlet and black, pea-shaped flowers; greenhouse shrub. 4 feet. 10

- 596 **DRACÆNA INDIVISA** A foliage plant extensively used for the centres of vases and for pot culture; thin arching leaves, 2 to 3 ft. 10

CHRYSANTHEMUMS

- 597 **Chrysanthemum Indicum.** The varieties are numerous and are divided by florists into various classes, "Chinese," "Pompon," "Japanese," etc. Our strains are unexcelled. 25
598 **—Japonicum.** The Japanese long-petaled or fringed varieties, now so popular, double, mixed colors 20

CYCLAMEN

A most valuable winter blooming plant. Its finely colored flowers keep a long time. Its foliage is pretty.

- 599 **Cyclamen Persicum.** Best; colors mixed 10
600 **—Persicum. Covent Garden strain.** Extra choice mixed. 25
601 **—Giganteum.** Very large flowers; from prize collection; mixed colors. 50
602 **—Bush Hill Pioneer.** See Novelties. See Bulb List.

ECHEVERIA

Very desirable plants for bedding or for borders, blooming the second season. They can be wintered in a light cellar free from frost. *Tender perennial.*

- 603 **Echeveria Secunda Glauca,** or "Hen and Chickens." Small bluish white leaves; 2 to 4 inches 25

FERNS Graceful plants, giving a beautiful appearance to the conservatory or window; the hardy sorts, grown in rockeries, etc., are beautiful.

- 604 **Fern, Greenhouse varieties, Mixed** 15
605 **—Hardy varieties. Mixed.** 15

FUCHSIA (LADIES' EAR DROP)

Beautiful plants for pot culture; waxy, drooping flowers, 1 to 2 inches long, of exquisite colors. Red, white, pink, etc. *Tender perennial.*

- 606 **Fuchsia.** Mixed, single and double sorts; 1 to 2 feet 25
See Plant List.

CINERARIA, LARGE FLOWERING

GERANIUM

Gorgeous flowers, of numerous shades of color, borne continuously, render this the most popular plant grown, either for pot culture in winter, or for bedding out in summer.

- 612 **Geranium, large flowering, single, mixed,** from new varieties 10
 613 **—Double mixed,** includes many varieties ... 50
 614 **—Pelargonium, Mixed (Lady Washington).** From finest fancy and spotted large flowering. 35
 See Plant List.

GLOXINIA

Plants of great beauty, for conservatory or greenhouse; flowers 2 to 3 inches across, tinted, mottled and marked, delicate rich colors; 1 ft. *Tender perennials.*

- 615 **Gloxinia, Grandiflora Erecta,** of great beauty and diversity, mixed varieties, saved from the finest erect growing sorts 35
 616 **—Large flowering mixed.** Choice..... 25
 See Bulb List.

GREVILLEA (AUSTRALIAN SILK OAK)

Beautiful and graceful foliage, valued as a decorative plant for the table, and when large for tropical lawn effects; 3 to 5 ft. *Tender perennial.*

- 617 **Grevillea Robusta.** (See Plant List) 10

HELIOTROPE

Deliciously fragrant flowering plants; great favorites for pot culture in the winter or bedding out in summer; 1½ ft. *Tender perennial.*

- 618 **Heliotrope, large flowered.** Mixed shades 10
 619 **—King of the Blacks,** a deliciously fragrant-flowering variety; well adapted for pot culture or for bedding out in summer. (See Plant List) 10

ROSE "LITTLE MIDGET"

LANTANA

One of the most desirable half-hardy perennial greenhouse or bedding plants, constantly in bloom; Verbena-like heads and changing in hue; 2 to 5 ft.

- 607 **Lantana, mixed.** 10

KENILWORTH IVY

A charming, small, neat, hardy perennial trailing plant, suitable for baskets, vases, pots and rock work.

- 608 **Kenilworth Ivy, Linaria Cymbalaria,** lavender and purple 15

MUSA (ABYSSINIAN BANANA TREE)

Magnificent for greenhouse and sub-tropical massing, or as single specimens on the lawn they are strikingly effective. Seeds sown early will produce large plants first season; 6 to 10 ft. *Tender perennial.*

- 609 **Musa Ensete.** (See Plant List) 25

PASSION FLOWER

Handsome and rapid climbers for greenhouse decoration and sunny positions in the open ground in summer. Coerulea is sometimes hardy in a sheltered situation.

- 610 **Passion Flower, Passiflora Coerulea,** large flowers of violet and light blue, slightly fragrant. 10

PRIMULA OBCONICA

(JAPANESE PRIMROSE)

A profuse blooming Primrose, bearing on long stems heads containing from 10 to 15 flowers. It thrives in a cool house, and will grow in favor with those desiring plants that will grow easily. The flowers are pure white, shading occasionally to lilac, and have the true primrose fragrance. It is in all respects a lovely flower.

- 611 **Primula Obconica** 10
 See also Auricula, Cowslip and Polyanthus.

GLOXINIA

PASSION FLOWER

STREPTOCARPUS (CAPE PRIMROSE)

A dwarf greenhouse perennial. The flowers are borne in remarkable abundance for about four months in summer and autumn. The colors range through white, red violet, blue, rose, and are all blotched with purple and white, ⅔ ft.

- 620 **Streptocarpus, mixed** 20

ROSES

- 621 **Rose, "Little Midget."** These little roses belong to the Polyantha or Japanese many-flowered section. The roses are only about an inch across, usually very double, but occasionally semi-double and seldom single; they are borne in many-flowered clusters, and contain in all the tints of cultivated roses. What is most remarkable, these "Little Midget" Roses grow only 10 inches high, and commence blooming in a few weeks after the seed is sown. At first the flowers are isolated, but they group themselves as the plant advances, and continue to bloom year after year in uninterrupted profusion from May until frost 10

TORENIA

Beautiful trailing plants for vases, baskets, etc.; they bloom continually during summer, also in winter if in the greenhouse; flowers large.

- 622 **Torenia Fournieri,** an elegant border plant in moist, partially shaded situations; flowers porcelain blue and rich violet; 6 inches..... 15
 623 **—"White Wings."** The color is unusually attractive, being pure white with a slight flush of rose at the throat, and is a decided break from the color hitherto known in this genus ... 15

PRIMULA

PRIMULA (CHINESE PRIMROSE)

Charming, profuse-blooming plants, indispensable for winter and spring decoration in the house. Seed should be sown in February or March in a light sandy soil, but slightly covered and kept moist. Transplant as soon as the second leaves appear, and continue shifting the plants as they grow. Our seed is from the best European collections, and is in quality second to none.

- 624 **—Primula, "Chinese Standard."** A superior strain of Chinese Primrose, with large and beautifully fringed flowers standing on erect stems well above the foliage. They are constant bloomers and retain their magnificent appearance for a long period; foliage rich and dense; colors range through scarlet, white, blue, crimson and pink; mixed colors 50
 625 **—Holborn Blue** 50
 626 **—Chinensis White** 25
 627 **—Bright Red** 25
 628 **—Brilliant Crimson** 25
 629 **—Alba Magnifica.** The finest pure white variety grown; flowers 2¼ inches across, with large yellow eye 50
 630 **—Mixed, large flowering, fringed.** Including many sorts. 35
 631 **—Fern Leaved.** Mixed colors; foliage of this class long and fern-like 35
 632 **—Double mixed sorts.** 50

SOLANUM

(JERUSALEM CHERRY)

It is well adapted for garden or pot culture, bearing numerous littersed fruit, which remain on for a long time and look very ornamental.

- 633 **Solanum Capsicastrum,** 1½ ft. 10

SMILAX (MYRSIPHILUM)

Perennial tuberous-rooted climber, with dark glossy foliage and small white flowers; 6 to 10 ft.

- 634 **Smilax Asparagoides (Boston Smilax);** oz., \$1. 10
 See Plant List.

SOLANUM

LILIUM AURATUM VITTATUM RUBRUM

- 1006 **Lilium Auratum, the Golden Banded Queen of Lilies.** Ivory white ground, richly strewn with purple studs. The centre of each petal has a broad band of yellow extending from tip to base. We offer, this season, a large stock of this peerless variety, which beyond question is the grandest of all the Lily family. Fully expanded, the flowers measure nearly a foot across, are produced abundantly and possess a most delicious fragrance. Price, per doz., \$1.50; each, 15c.; extra large, per doz., \$2.00; each 20
- 1007 **—Auratum Rubrum Vittatum.** Flowers of enormous size, pure snow white, thickly spotted with crimson and with a wide dark blood-red band through the centre of each petal. Its great beauty is a marvel to all; each 75
- 1008 **—Batemanni.** A Japanese Lily, growing 3 to 4 feet high and producing bright apricot tinted flowers; each 15
- 1009 **—Candidum (White Garden Lily).** This Lily is the emblem of purity. The deep lemon anthers contrast beautifully with the wax-like petals. The fragrance is delicious and never oppressive. Hardy. 12 for \$1.00; each 10
- 1010 **—Columbianum.** A native northwestern variety. Splendid reddish orange, dotted with purple; 1½ to 2 feet; each 30
- 1011 **—Coral Lily of Siberia (Tenuifolium).** This superb Lily is entirely distinct from all others. Its spike of scarlet, flame-like flowers is held erect like a flambeau at night. The foliage is slender and graceful. It is a native of Siberia and very hardy. Blooms very early in May or June, and has frequently 27 blooms; 5 for \$1; each 25
- 1012 **—Elegans, Mixed.** Embracing beautiful and distinct new varieties, which, both for pot culture and for masses of color in the open garden, are unsurpassed. All are early flowering and sure to bloom in June or July. They are very hardy, and grow and thrive under almost any conditions. 3 for 50c.; 12 for \$1.75; each 20
- 1013 **—Wallacei.** Clear buff flowers spotted black, very distinct. 4 for 60c; each 20
- 1014 **—Washingtonianum.** The rare Pacific Slope Lily. Grows several feet high and has superb bloom. White, tinted purple and spotted black; each 30
- GAY QUEEN (OR QUEEN LILY)**
- 1015 **Gay Queen.** So called on account of the beauty of the flowers. This is a most desirable bulb called Phædrassa, which bears large umbels of showy flowers of a variety of colors. We have three sorts, viz., purplish rose, tipped with green; scarlet, yellow and green; green and yellow flowers. Fine bulbs. 3 for 35c.; each 15

FLOWERING LILIES

READ THIS

Our list includes the best varieties in cultivation. They are grown for us in large quantities, and sent out by us securely packed and in splendid condition. They are quickly grown, requiring little care and produce some of the most showy and beautiful of all summer and autumn flowers. We have priced them very low to bring them within the reach of all. Bulbs will not be forwarded until severe frosts are over, so that there will be no danger of injury on the way. When bulbs are ordered with seeds, the seeds will be forwarded at once, and **bulbs as soon as the weather permits.** Customers must not, therefore, feel disappointed if they do not find the bulbs in the first package. **All Bulbs and Flowering Plants, except where noted, sent by mail, post-paid, on receipt of price.**

LILIES

For grand distinctive flowers, yielding a liberal bloom, there is nothing so satisfactory and gratifying as a good assortment of Lilies.

All Lilies require deep planting and should not be disturbed for several years. In almost every case flowers will be obtained the first summer after planting, but it will be quite as well for the health of the plant if there is no bloom until the second season. In our northern climate it is well, before winter, to cover the ground over and around the bulbs with three or four inches of leaves or straw, or coarse manure, as a winter protection.

- 1000 **Lilium Humboldtii (Bloomerianum).** A remarkably fine variety attaining the height of from three to five feet, and producing freely large flowers of golden yellow color, spotted with purple. A native of California; each 25
- 1001 **—Krameri.** A rare Japanese Lily closely allied to Auratum. Growth slender, flowers very large, Auratum-shaped and of the most superb tint of color, being a delicate rosy pink, so soft, delicate and exquisite as to be utterly indescribable. No Lily superior to this; each 25
- 1002 **—Lancifolium Album.** The well known beautiful snow-white, fragrant, hardy garden Lily; flowers trumpet-shaped, 6 to 8 inches long. Height 4½ to 5 feet; in open ground blooms in June and July. Per doz., \$2; each 20
- 1003 **—Speciosum Monstrosus Rubrum.** White ground with band and spots of rose and crimson on each petal. One of the best Lilies. We have a splendid stock. Per doz., \$1.50; each 15
- 1004 **—Superbum.** Beautiful and rich as many of our native Lilies are, this far excels them all, bearing a pyramid of yellowish red flowers. Blooms early in July; 3 feet. 4 for 50c; each 15
- 1005 **—Tiger Lily, Double (Tigrinum Fl. Pl.).** A plant 4 to 6 feet high, with dark green foliage, double bright orange-red flower. 4 for 35c.; each 10

It pays to have the Best. Buy Our Famous Seeds.

AMARYLLIS, OR KNIGHTS' STAR LILY

An interesting class of plants, desirable for growing in pots, producing showy, lily-shaped flowers, which are very attractive and handsome. The bulbs should be potted in light, sandy loam, with good drainage. They are of vigorous growth and will repay the care required, being almost sure to bloom the first season. If planted outside after spring flowering, it makes a good growth and is ready for a second blooming in the fall. They require abundant moisture when growing, but at the season of rest water should be given sparingly. Our stock is very fine.

1016 Amaryllis, Crinum Kirkii. Magnificent flowers. Usually two flower stalks of dark purplish color are sent up at the same time, each bearing a large umbel composed of a dozen or more enormous lily-like flowers of the greatest beauty and fragrance. The petals are broad and pure white, with a deep reddish purple stripe through the centre. Free bloomer. Extra large bulbs, each, 50c.; large, 30c.

1017 —Johnsonii (Spice Scented). This magnificent bulbous plant throws up an 18-inch spike bearing from 2 to 6 flowers, averaging from 4 to 6 inches across, of a bright rich red color, with a white stripe down each petal; it also has a rich spicy fragrance. It is robust, luxuriant and the earliest Amaryllis; prolific bloomer; easy culture. Extra large, each, 50c.; large, 25c.; medium, 15c.

1018 —Treatea (Fair Lily of the South). A native of Florida. The flowers are pure white, sweet scented; bulbs quite small; 4 or 5 can be grown in a 5 or 6-inch pot. Per doz., 50c.; each, 5c.

1019 —Hybrids of Vittata. Beautiful large flowering new seedlings from choicest varieties, imported from the most celebrated Amaryllis grower in Europe; bulbs are of large size, and will produce something grand. Each, 50c.

1020 —Formosissima (Jacobean Lily). Intense and crimson flowers, with most charming and graceful appearance. The bulbs are dormant during the winter, and can be kept like Dahlias. Per doz., \$1; each, 10c.

1021 —Vallotta Purpurea. A beautiful pot plant, requiring similar treatment to the Gladiolus. It sends up a flower stem about 18 inches in height, bearing from four to eight handsome scarlet flowers. Very easy of cultivation. Each, 25c.

1022 —Belladonna Major (Belladonna Lily). A winter-blooming variety of extreme beauty and fragrance. The spikes grow from 2 to 3 feet high; each carrying from 6 to a dozen beautiful flowers "Sweet as Lilies," of silvery white, flushed and tipped with rose. Each, 25c.

1023 —Regina. A variety of great importance as it surpasses all others as a winter bloomer. The flowers are of fair size, beautiful shape, well open, and of a brilliant orange scarlet color, with a light centre. Price, each, 30c.

1024 —Collection, containing one each of the above eight for \$1.50

APIOS TUBEROSA (TUBEROUS-ROOTED WISTARIA)

1025 Apios Tuberosa. One of the grandest and most beautiful climbing vines in cultivation. It grows very quickly and attains a great height, making, with its dense foliage and beautiful flowers, a most attractive screen. In vine and foliage it resembles the common Wistaria. It blooms most profusely, bearing lovely clusters of rich, deep purple flowers possessing a strong, delicious violet fragrance. Plant the bulbs near a trellis, fence, tree, or wherever a rapid growing climber is desired. The bulbs are perfectly hardy and need not be taken up over winter. A vine so sure to grow and give satisfaction should be in every garden. Bulbs, per doz., 50c.; each, 5c.

AMARYLLIS

CAMASSIA ESCULENTA

(INDIAN HYACINTH)

1026 Camassia Esculenta. A lovely bulbous flower, which should have a place in every garden. It is as hardy and robust as a tulip, producing each spring tall graceful spikes of lovely blue flowers, resembling to some extent the Hyacinth, though more graceful. It increases rapidly, and soon forms a dense clump, which is, when in bloom, a beautiful sight. It is also a magnificent pot bulb for winter blooming. Per doz., 30c.; 3 for 10c.; each, 5c.

ATAMASCO LILIES

(ZEPHYRANTHES)

1027 Atamasco Lilies. These beautiful zephyr flowers, or "Fairy Lilies," are gems of rare beauty. Planted in pots or in the open ground, they produce very beautiful lily-like flowers all summer, and will be greatly admired by all who see them. They are easily grown and succeed everywhere. Bulbs, mixed colors, per doz., 50c.; each, 5c.

ALSTROMERIA

(THE PERUVIAN LILY)

Tuberous rooted plants with beautiful, large, lily-like flowers of great beauty, borne in clusters during the summer; they are splendid for cutting, being of great substance and lasting in perfection for a long time. In dry, well drained positions they form one of the most useful groups in cultivation; hardy when well established, and very varied in colors (orange, yellow, scarlet, pink, white and black, beautifully blended, many sorts being striped and blotched). Free bloomers. Plant the tuberous roots one foot deep. Splendid subjects for either pot culture or planting out in frame.

1028 Alstromeria. Mixed varieties, per doz., \$1; each, 10c.

AGAPANTHUS

(THE GREAT AFRICAN LILY)

This is a splendid ornamental plant, bearing clusters of bright blue or white flowers on long flower stalks and lasting a long time in bloom. There is no finer plant than this for outdoor decoration, planted in large pots or tubs on the lawn, terrace or piazza. It does well in the house or greenhouse in winter, but will not stand frost. It is a rapid grower, and increases in size and beauty every year; the chief point in its cultivation is to divide the plants before the pots or tubs become overcrowded with roots. With the most ordinary kind of care it will last forever.

1029 Agapanthus Umbellatus. The old favorite; flowers bright blue. Each, 20c.

1030 Umbellatus Alba. Pure white. Each, 20c.

ALSTROMERIA

ATAMASCO LILIES.

AGAPANTHUS

CALADIUM ESCULENTUM

CALADIUMS, FANCY LEAVED

1031 Large quantities of these are now used for summer and fall decoration, and nothing can equal the variety and gorgeous coloring of these ornamental-leaved plants when grown on verandahs or in situations partially shaded. They are easily grown, thriving in pots or boxes in the house or in shaded situations out of doors. The bulbs should be dried off in October, and kept in a warm, dry place during the winter. They should be started into growth about April 1st, requiring strong bottom heat. Choice fancy varieties, 20c. each.

CALADIUM ESCULENTUM

(ELEPHANT'S EAR)

1032 For planting in borders or upon the lawn, as single specimens, nothing will give a more sub-tropical appearance and pleasing effect than *C. Esculentum*; it will grow in any good rich garden soil, and is of easiest culture. To obtain best results it should be planted where it will obtain plenty of moisture; when well grown it will stand five feet high and bear immense light green leaves 3 to 4 ft. long by 2 to 2½ ft. wide. As soon as the foliage is touched with frost, remove the bulbs to the cellar, and give same care as Dahlias. Price, large bulbs, each, 25c.; medium size, each, 15c.; small size, each, 10c.

RED CALLA (New) (ARUM CORNUTUM)

1033 A curious and novel plant producing red flowers spotted with black. The stems are oddly mottled green and white; foliage is palm-like and very effective. It is particularly showy and ornamental, fine for winter decoration. Price, 20c. each; 3 for 50c.

DWARF CALLA

1034 *Calla, Little Gem* (true). Should not be confused with the Gem, being entirely distinct. It is indeed a "pigmy," scarcely ever exceeding the height of one foot, yet producing good sized flowers in great abundance. Our stock of Little Gem Calla has been procured direct from the originator of this variety. The flowers will be found exceedingly useful for cut flower work, and will be grown by the millions. Each, 20c.; 3 for 50c.

CALLA LILIES

1035 *White Calla* (Lily of the Nile). A well known plant of easy culture, and in winter is one of our best window plants. The only special treatment it requires is abundance of moisture, this trait making it invaluable for aquariums, etc. Give the leaves an occasional syringing to clear from dust; water with tepid water, and keep in a warm room. To aid profuse blooming, keep them dormant during the fall, and repot in November. Price, large bulbs, each, 25c.; 3 for 65c.; fine bulbs, each, 15c.; 4 for 50c.

SPOTTED CALLA

(RICHARDIA ALBA MACULATA)

1036 *Spotted Calla*. This beautiful and popular novelty gives the greatest satisfaction. The leaves are rich, deep green, finely spotted with white. Thus the plant even when not in flower is ornamental. It is easily grown, very distinct, free to bloom and in all other respects is like the favorite old Calla. Two or three bulbs may be grown in a 5 inch pot. (See cut). Bulbs, each, 15c.; 4 for 50c.

CALLA COLLECTIONS

- 1037 One each of the 4 varieties for..... 60
1038 Three each of the 4 varieties for 1 50

LITTLE GEM

FANCY CALADIUMS

CINNAMON VINE

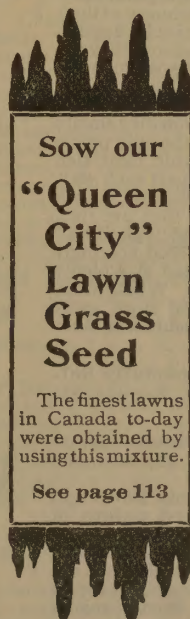

1039 *Cinnamon Vine*. A pretty, hardy vine, with edible roots and neat, glossy cordate foliage. In midsummer it bears clusters of tiny but exceedingly fragrant flowers, with an odor like cinnamon. A very pretty vine to train over a trellis or around a window. Each, 5c.; 6 for 25c.

CHLIDANTHUS

1040 *Chlidanthus Fragrans* is indeed a "delicate flower," delicate in looks and delicious in perfume. The flowers are borne in dense clusters during the months of July and August, and are of a deep canary-yellow; quite large (often three or four inches), extremely fragrant. The name of Golden Lily, given to *Glycorus Aurea*, should, by right, belong to this. It is one of many new bulbs received by us direct from Peru, and will no doubt prove a valuable addition to the favorites of the garden and greenhouse. Each, 10c.; per doz., 75c.

WHITE CALLA, OR LILY OF THE NILE

IRIS, OR FLOWERING FLAG.

IRIS OR Flowering Flag

1041 Iris, Japan (Iris Kämpferi).

The magnificence of these splendid new Iris surpasses description; in beauty, size of flower, richness of coloring, they are grand. The flowers are of enormous size, averaging from 6 to 8 inches across, and of indescribable and charming hues and colors, varying like watered silk in the sunlight; the prevailing colors being white, crimson, rose, lilac, lavender, violet and blue, each flower usually representing several shades, while a golden yellow blotch,

surrounded by a halo of blue or violet at the base of the petals, intensifies the wealth of coloring. The Japan Iris is hardy; flowers in great profusion in June and July. Attains greatest perfection if grown in a moist soil, or if plentifully supplied with water while growing and flowering. Bulbs, per doz., \$2; each, 20c.

1042 —English (Anglica). Large, handsome flowers, with rich purple, blue and lilac colors predominating; grows 18 to 20 inches high; perfectly hardy; mixed varieties. Bulbs, per doz., 25c.; 4 for 10c.

1043 —Spanish (Hispanica). This variety is well adapted for pot culture, blooming in the spring, earlier than the above, but smaller; beautiful shades of violet, yellow, blue and white; mixed varieties. Per doz., 25c.; 4 for 10c.

1044 —Germanica. This is one of the grandest classes of Iris. Plants form dense clumps, which send up many flower stalks, each one bearing several large beautiful flowers of various colors. No garden should be without them. They bloom early and are very sweet; mixed varieties. Per doz., 50c.; each, 5c.

1045 —Persian. Sweet scented; splendid. Bulbs, per doz., 30c.; 3 for 10c.

BESSERA ELEGANS, OR CORAL DROPS

1047 **Bessera Elegans, or Coral Drops.** A summer flowering bulb requiring the same treatment as the Gladiolus. It is a splendid companion to Milla Biflora, as it grows about the same height, and makes with that lovely flower a pretty contrast. The flowers are 1 inch in diameter, drooping in clusters, fine scarlet with a white band through the centre of each petal. It is easily grown and sure to please all. Native of Mexico. Price, 10c. each; per doz., 75c.

BEGONIAS, TUBEROUS ROOTED

Tuberous-rooted Begonias are among the handsomest and most popular of our summer-flowering bulbs, both for their planting in the open border for summer decorations, and for growing in pots for the greenhouse, conservatory or window. Their fascinating colors range from ivory white and flaming scarlet, through shades of bright, bronzy-yellow, light and dark crimson, orange, pink, ruby-red and rose. Nothing can excel their brilliancy, the delicacy of their tints, the richness of their single and double flowers and the gorgeousness of their effect in masses, with their graceful appearance in beds or borders. For hardiness, vigor and profusion of bloom for a long season, they are unsurpassed. The assortment we offer embraces some of the newest and rarest specimens in cultivation; they have been selected from prize European collections. Being of easy cultivation they should be generally grown; the only points of notice are to provide light rich soil, plant one foot apart each way, keep them cool and shaded, do not try to force them, as they are then apt to become long and "spindling." They should be watered sparingly at first, but once started give plenty of water and air. When done blooming, dry off and store away in same manner as Dahlias or other bulbous roots.

TUBEROUS-ROOTED BEGONIAS

1048 **Begonias, Specially Selected, Single.** Per doz., \$1; each, 10c.

1049 —Specially Selected, Double. Per doz., \$2; each, 20c.

The above Begonia Bulbs will be supplied in named colors of **Crimson, White, Yellow, Pink, Scarlet and Orange Scarlet**, as desired. If no special colors are named they will be sent in assorted colors; and having been specially selected while in bloom, our customers will receive a magnificent assortment of these most attractive flowering bulbs.

COOPERIA DRUMMONDI

(THE GIANT FAIRY LILY)

1046 **Cooperia Drummondii.** It is a member of the Amaryllis family, and should be planted in the spring, either in open ground or in pots (they do as well one way as the other), where they will bloom freely most of the summer, sending up beautiful lily-like white blossoms on stems 10 to 15 inches high. The foliage is quite long, and of peculiar lavender green color. In the fall the bulbs should be lifted and kept dry over winter like Gladiolus. It is one of the easiest of all bulbs to grow, absolutely sure to bloom freely, and the beautiful, pure, fairy-like blossoms are ever lovely. Strong bulbs, ready for immediate bloom. Per doz., 50c.; each, 5c.

COOPERIA

MONTBRETIA

MONTBRETIA CROCOSMIFLORA

- 1051 This is one of the most floriferous and showy of summer flowering plants, and destined to great popularity. Planted 6 inches apart in a group in a sunny position and allowed to remain undisturbed for several years, they form magnificent clumps, producing, in great numbers, graceful spikes bearing from 18 to 30 showy star-shaped flowers of orange suffused with red. They flower freely the first season. 3 for 10c.; per doz., 25c.; per 100, \$1.75; each 5

MADEIRA VINE

- 1052 **Madeira Vine.** A popular climbing tuberous-rooted plant, sometimes known as "Climbing Mignonette." It is a rapid grower with thick dark green glossy leaves and graceful feathery racemes of fragrant white flowers in great abundance. Being easy to grow and such a beautiful vine and flower, it is deservedly a general favorite. The roots will not endure severe freezing; they should be taken up in autumn and kept over winter in a cellar, requiring no more care than potatoes. Per doz., 30c.; 3 for 10c.; each 5

GIANT CYCLAMEN

These are among the most beautiful and interesting winter and spring flowering bulbs for the window and greenhouse. Not only are the flowers of striking beauty, but the foliage is also highly ornamental, consequently they are very decorative even when not in bloom. Most of them are, moreover, delicately fragrant. The flowers of this magnificent strain are of extraordinary size for a Cyclamen, and of great substance. The leaves are proportionately large and beautifully marked.

- 1053 **Cyclamen, Giganteum Roseum.** Rose color.
1054 — **Giganteum Album.** White.
1055 — **Giganteum Rubrum.** Crimson.

Price for any of above, 25c. each, \$2.50 per doz.

- 1056 **Giganteum, mixed varieties.** 20c. each, \$2 per doz.

HYACINTHUS CANDICANS (GIANT SUMMER HYACINTH)

- 1057 **Hyacinthus Candicans.** This plant somewhat resembles the Yucca, although not so large. It throws up a flower stem about 4 feet high, on which it bears from 15 to 20 pure white bell-shaped flowers. They are very gracefully hung, forming an almost perfect pyramid. Give them a slight covering for winter. Strong bulbs, per doz., 60c.; each 8

DIELYTRA

DIELYTRA, or DICENTRA (BLEEDING HEART)

A superb plant, without which no garden is complete. The flowers are borne on long, graceful, curved stalks, hanging like rows of pendant gems, delicate, rose-colored and white, with purple lips, and presenting when in full bloom a wondrously beautiful appearance. It will endure the coldest winter without protection, and is also excellent for cut flowers in winter, forcing very readily.

- 1062 **Dielytra Spectabilis.** Strong roots, specially grown for forcing, each 15

MILLA BIFLORA

(MEXICAN "STAR OF BETHLEHEM")

- 1063 **Milla Biflora.** A beautiful free-flowering Mexican bulb; flowers pure waxy white, star-shaped, two inches and over in diameter, borne on long slender stems; the petals are very thick and leathery, and will last for days when cut and placed in water. Per doz., 50c.; each 5

VARIEGATED GLADWIN

- 1064 **Variegated Gladwin.** A hardy ornamental plant. Its leaves resemble those of the Pandanus, being variegated with white and green stripes. The flowers are of a pleasing blue and freely produced; and that is not all, for they are succeeded by large capsules, which burst open when ripe and expose a number of bright red seeds. 3 for 60c.; each ... 25

GLOXINIAS

Charming greenhouse plants of dwarf habit. Flowers of the most exquisite and gorgeous colors are produced in greatest profusion. They are often 3 to 4 inches across, and many of them are magnificently spotted, mottled and blended. Under the commonest culture they bloom continuously for months, and by starting at intervals a succession of splendid flowers may be had nearly the whole year round. They are also exceedingly useful, if planted out in a warm frame and shaded from the bright sun, for cut flowers during summer. (See cut.)

- 1058 **Gloxinia, mixed varieties, each, 15c.; per doz., \$1.50.**

TIGRIDIAS

(PEACOCK TIGER FLOWER, OR MEXICAN SHELL FLOWER.)

Extremely handsome summer flowering bulbs, growing about two feet high, producing large gorgeous flowers, exquisitely spotted; blooms freely throughout the summer, particularly if the bulbs are planted in a warm sunny position.

- 1059 **Tigridia Conchiflora, Mexican Shell Flower.** Dark yellow, large red spots; 5c. each; per doz., 45c.
1060 **Tigridia Grandiflora, Peacock Tiger Flower.** Very large, bright crimson centre, mottled with yellow; 5c. each; per doz., 45c.
1061 **Tigridia Grandiflora Alba, The White Tiger Flower.** Flowers large ivory white, spotted at base with red on a yellowish ground, contrasting finely with the white of the petals. (See cut.) 10c. each; per doz., 90c.

GLOXINIAS

TIGRIDIAS

TUBEROSE

"Excelsior Pearl"

1071 Tuberose, "Excelsior Pearl." The flowers of this well known and popular plant are waxy-white, double, and so fragrant as to perfume the whole atmosphere for some distance around. To grow Tuberose fill 5-in. pots half full of cow manure, and the remainder with good rich earth mixed with sand. Plant bulbs in April, water moderately, hasten growth by putting in warm light place. First size bulbs, especially selected for our retail trade. Postpaid, per 100, \$2.25; doz., 40c.; each 5c.

TUBEROSE, "Silver Leaf"

1072 Showy and effective, even when not in bloom, the foliage being distinctly striped, white and green. Each bulb frequently throws up two or more spikes, 3 to 4 feet high, each bearing from 25 to 40 pure white, waxy flowers, much like an orange flower or Stephanotis, with a delicate and enchanting perfume. They flower several weeks earlier than double Tuberose, and the bulbs bloom year after year. 5c. each, 50c. per doz.

TUBEROSE, "Albino"

EARLY-FLOWERING BRANCHING

1073 A single white Tuberose. The flower spikes are very large and evenly filled; flowers in July and August, throwing from two to five flower stems from a single bulb, and these again are often branched. The petals recurve gracefully, which adds greatly to the size of the individual flower; 5c. each; 50c. per doz

SPIDER LILY

SPIDER LILY, "Japanese Pink"

1076 Spider Lily, "Japanese Pink." Our native white Spider Lily (*Pancratium Caribaeum*) pleased everyone so well (after we brought it into notice) that the Japanese pink and salmon varieties cannot fail to create another sensation. Moreover, if planted in a warm light position, they will prove perfectly hardy, with some protection. As shown in our illustration, a clump of bulbs produces a large number of spikes of the most delicate flowers, varying in their color from pinkish salmon to pink, vermilion and scarlet, the petals being beautifully undulated, and by artificial light sparkling like jewels; an ornament, indeed, for the finest parlor. They bloom from September until November, and therefore should be ordered as early as possible. All lovers of the beautiful should certainly add this to their collection. Largest bulbs of blooming size, 3 for 50c.; each 20

SPIDER LILY, "White"

1077 Spider Lily, "White." A bulb of easiest culture, which freely produces clusters of large white flowers of delightful fragrance. They may be grown in pots, in good rich soil, and will bloom well in house or conservatory. When planted out in summer they must be taken up in the fall, potted, and little or no water given until the next season, when the bulb will have increased in size, and will bloom more abundantly. It is indeed a curious and beautiful flower, and one which will delight all beholders. Too much cannot be said in favor of it. It is in every respect a lovely and charming flower. Large bulbs for immediate blooming, 3 for 50c.; each..... 20

LILY OF THE VALLEY

This beautiful little plant is a universal favorite. It is extensively grown for forcing in the winter and early spring months, producing tender stems, set with tiny bells of snowy whiteness, diffusing a delicate odor.

1078 Lily of the Valley. Strong imported clumps; contain a number of large strong crowns or pips. Each... 25

CYCLOBOTHRA FLAVA

1074 Cyclobothra Flava. A lovely little bulb from Mexico, producing 6-petaled cup-shaped blossoms, yellow, spotted with brown, and drooping. It is closely allied to the Calochortus, but it does not succeed well for winter blooming, and should be treated like a summer-flowering bulb, planted out in the spring and taken up in the fall, and kept dry over winter. Its foliage is narrow and grasslike. While it is a pretty little flower, it is not so showy as some other bulbs, but lovely for cutting. Each 10c.; per doz., 75c.

CYCLOBOTHRA FLAVA.

TUBEROSE "ALBINO"

SAUROMATUM SIMLENSE
OR "SNAKE LILY"

1075 Sauromatum Simlense.

A most wonderful bulb, bearing a very remarkable flower 30 inches in length, the inside of which is of a peculiar golden color, profusely spotted with rich purple and brown blotches, while the back is of a metallic brown, and the spadix (15 ins. long) is a frosty purplish brown. Altogether, one of the strangest flowers ever seen. The foliage is also highly ornamental, and fine palm-like leaves, 3 to 4 ft. high and wide, being produced in succession during the entire season. The leaf-stalk is beautifully mottled with black markings. The flowers are produced from January until June, almost immediately after planting. Plant in pots or in the garden 6 ins. deep; give plenty of water. This is a bulb that we can highly recommend; its easy growth, luxuriant foliage and curious flowers make it very attractive. Large blooming size bulbs, each..... 25

GLADIOLUS.

The most attractive of all summer flowering bulbs are the Gladioli. Wonderful improvements have been made in recent years in the size and beauty of these flowers, and our list comprises only the best selections, both in our mixtures and named sorts. Their cultivation is very simple, as they will thrive in any ordinary garden soil, but amply repay care and liberal feeding by enhanced size and beauty. Plant six inches apart in beds or double rows, and three inches deep. They are very effective when planted among roses, shrubbery, etc.

NEW GIANT OR CHILDSI GLADIOLUS

Gorgeous Colors and Marvellous Markings. Enormous Flowers

1079 Gladiolus, New Giant. This new race of extraordinarily beautiful Gladiolus represents the grandest achievements in the perfection of this genus since its introduction. The flowers have reached enormous dimensions, often 7 to 9 inches across, far surpassing any others and much resembling Orchids of the brightest hues and most curious designs. Every color known among Gladiolus is represented, and many never before seen, many having beautifully mottled and spotted throats, made up of white, crimson, pink, yellow, etc., of unsurpassed beauty. Mixed, per doz., \$1; each... 10

GLADIOLUS IN MIXTURES

- 1080 Gladiolus, all Colors, mixed, very choice, first size.** Per doz., 25c.; per 100, \$1.75.
- 1081 —White and Light Varieties, mixed.** Each, 4c.; per doz., 45c.; per 100, \$3.25.
- 1082 —Striped and Variegated Varieties, mixed.** Each, 4c.; per doz., 45c.; per 100, \$3.25.
- 1083 —Pink Varieties, mixed.** Each, 4c.; per doz., 35c.; per 100, \$2.25.
- 1084 —Red and Scarlet Varieties, mixed.** Each, 3c.; per doz., 25c.; per 100, \$1.75.
- 1085 —Yellow Varieties, mxd.** Each, 5c.; per doz., 50c.; per 100, \$3.50.
- 1086 —Lemoine's Butterfly Gladiolus, mixed.** Each, 4c.; per doz., 35c.; per 100, \$2.25.

VERY CHOICE NAMED VARIETIES

- 1087 Gladiolus, African.** Slaty brown on scarlet ground, streaked with scarlet and pure white. Per doz., \$1.50; each 15
- 1088 —Angele.** White, showy and effective. Per doz., \$1.00; each 10
- 1089 —Eugene Scribe.** Tender rose, variegated. Per doz., \$1.00; each 10
- 1090 —General Sheridan.** Bright scarlet with a large white throat. Per doz., \$1.00; each 10
- 1091 —Grand Rouge.** Enormous spikes of intense scarlet, with violet blotch in throat. Per doz., \$1.00; each 10
- 1092 —Lord Aberdeen.** Light red, white blotch, very fine. Per doz., \$1.00; each 10
- 1093 —Lord Byron.** Brilliant scarlet, blotched, pure white. Per doz., \$1.00; each 10
- 1094 —May.** White ground, slightly striped crimson; extra for florists' use. Per doz., \$1.00; each 10
- 1095 —Octoroon.** Very fine, salmon pink. Per doz., \$1.00; each 10
- 1096 —Shakespeare.** White, suffused with carmine rose. Per doz., \$1.25; each 12
- 1097 —Snow White.** The best white Gladiolus in cultivation; the entire flower is a perfect paper white with a slight cream shade on lower half of lower petal; Per doz., \$2.00; each 20
- 1098 —Viola.** Beautiful light pink, with pure white throat. Per doz., 75c.; each 8

SPECIAL OFFER—The set of 12 Choice Named Varieties, as above, for only \$1.00, or any part of the set at printed prices

50 CENT BEAUTY COLLECTION

SPECIAL OFFER—12 Named Gladiolus only 50 cents

We will send the following 12 named varieties for the surprisingly low rate of 50 cents, or about half their regular price. Any of the separate varieties may be ordered, but cannot send any part of the set at less than prices named below.

- 1099 Gladiolus, Addison.** Dark amaranth, with white stripes, each 10
- 1100 —Brenchleyensis.** Bright scarlet, each 5
- 1101 —Geisha.** White, spotted rose, each 5
- 1102 —Gen. Sherman.** Fine red, blotched, each 8
- 1103 —Isaac Buchanan.** Very fine yellow, each 10
- 1104 —John Bull.** White tinged with sulphur, each 8
- 1105 —Lamarck.** Cherry, white throat, each 10
- 1106 —Laura.** Light orange, tinged with carmine, white blotch, each 10
- 1107 —Evangeline.** Delicate rose pink, each 5
- 1108 —Napoleon III.** Bright scarlet, with white line on each petal, each 5
- 1109 —Princess of Wales.** White, flamed carmine rose, each 10
- 1110 —Rena.** White, flamed and streaked with carmine 10

CANNAS

The Canna is the coming flower. It is here to stay. Imagine this most beautiful plant, bearing above its broad leaves spike upon spike of the most lovely scarlet and gold Gladiolus-shaped flowers, easier to raise than a Dahlia, and as hardy as a Chrysanthemum; as beautiful as any Orchid, and far more stately, and perfectly adapted for ornamenting every lawn or flower garden from early spring till latest autumn. We have not to be satisfied with flowers of scarlet and gold alone, for there are now varieties revelling in hues of palest lemon-yellow, deepest orange, pretty fawn and nankeen buff, darkest shades of crimson, and blood red and pure white; others masquerading with parti-colored, splashed and spotted petals and speckled throats. They are simply grand. For outdoor cultivation plants should be purchased in the spring, and planted in beds or borders; the ground should previously be prepared and well enriched, adding a little sand if the ground is stiff and heavy. The plants will flower through the summer and autumn months. Cannas will repay good treatment and plenty of moisture, but must be lifted as soon as touched with frost and stored in a cool dry place, or under the greenhouse bench during winter. For winter decoration plant in a good sized pot in the fall, using light, rich soil, and water well. The varieties we offer are perpetual bloomers, specially selected for their fine foliage and bloom, and of dwarf habit, averaging 3 feet in height; many only grow from 2 to 2½ feet high.

NEW GIANT ORCHID FLOWERING ITALIAN CANNAS

What the introducer says: "This is absolutely a new and distinct class, which may be termed the highest degree of perfection that can be attained in the way of Cannas. In size and brilliancy of color, in magnificence of growth and foliage they exceed anything heretofore expected."

1115 Canna, "Italia." Very distinct in coloring; flowers very large and always show five and frequently six segments. Three of the segments are golden yellow in color and have a large blotch of orange scarlet, surrounded by smaller blotches. The centre and lower segment is scarlet and bordered by a narrow edge of golden yellow. The lower petals are the largest and frequently measure 2½ inches in width and peculiarly fringed and twisted. Price, 15c. each; 2 for 25c.

1116 "Austria." While not so gorgeous in coloring is considered superior to Italia, owing to its larger flowers, its rapid growth and majestic Musa-like foliage; comes quickly into bloom, and throws up numerous flowering stems, each being surmounted by tall spikes of large flowers, standing upright like large lilies, and said to measure as much as 8 inches across. The flower is pure yellow, the lower and fifth petals only being slightly spotted with crimson. They have each been awarded certificates in England and Italy, and are no doubt the first of a new race of Cannas. Price, 15c. each; 2 for 25c.

One each of above 2 varieties for 25c.

CANNA

"ITALIA"

SPECIAL CANNA COLLECTION

Price each, 12c.; 3 for 30c.; per doz., \$1.10

- 1117 Canna, Charles Henderson.** A splendid, dwarf, compact grower, throwing up erect compact heads of bloom, of large size; color bright crimson; very handsome, bright green foliage; 2½ feet in height. An excellent pot plant.
- 1118 —Explorateur Crampel.** Flowers of good size, borne in large heads thrown well above the foliage. Its color is bright orange crimson, with deep crimson markings; foliage green.
- 1119 —Florence Vaughan.** A grand bright golden yellow, heavily dotted with bright red spots; very broad petals; forms an elegant flower; spikes large and compact. Of dwarf habit.
- 1120 Flamingo.** One of the finest solid crimson varieties yet introduced, with large flowers over 4 inches in diameter, heavy in texture, and of the most refined reflexed form so much sought after, and which is found in very few varieties. They cluster around the stem in an even manner, giving the truss the grace and finish of a Hyacinth spike. Its habit is perfect, strong and compact, growing about 3 feet high.
- 1121 —Mad. Crozy.** One of the finest; foliage bright green. Bears immense trusses of orange scarlet flowers, each petal bordered with golden yellow. A splendid grower and free bloomer. About 3 feet high.
- 1122 —Paul Marquant.** One of the most pleasing and beautiful on account of its large size and distinct novel color. The flowers stand out from the stem in such a manner as to attract special attention. Their color is a striking shade of bright salmon with a carmine tint.
- 1123 —Queen Charlotte.** Flowers are large with broad rounded petals, slightly recurved; immense heads; stand well above the foliage and most attractive in color, being a bright orange scarlet, deeply edged with bright canary yellow. The plant is dwarf, a sturdy compact grower with deep green Musa-like foliage; a perpetual bloomer and one of the most decorative sorts.

NOTE—The set of seven (one each) for 65c.

UNIVERSAL COLLECTION

Price each, 12c.; 3 for 30c.; per doz., \$1.10

- 1124 Canna, Inglewood (Canadian novelty).** The foliage is a rich plum purple, broad and Musa-like. Extra strong, robust grower, carrying its numerous flower spikes well above the foliage; the dead flowers drop quickly, leaving the fresh blooms clean—a good habit. Flowers large, and of a clear, deep vermillion without markings.
- 1125 —J. D. Cabos.** Medal awarded. Four feet. Purplish green foliage, stalks numerous, flowers large and round, color exceedingly distinct apricot. Its marked and novel color attracts much attention.
- 1126 —Alphonse Bouvier.** Of the many crimson varieties yet introduced, this is, all points considered, probably the grandest and most effective. In color it is a rich brilliant crimson, almost approaching scarlet when it first opens, changing to a deep dazzling crimson as the flowers fully develop.
- 1127 —Brilliantissima.** Foliage dark metallic bronze, slightly tinted scarlet, giving it a very lustrous and handsome appearance. 3½ feet.
- 1128 —Chicago.** Foliage green, leaves very wide; flower truss and stalk stands boldly erect. Flowers large and of a deep orange scarlet color, smooth and without markings, except a purplish gloss. One of the very best. 3½ feet.
- 1129 Special offer.** The above 12 varieties, 1 each for \$1.10.
- 1130 Cannas, Mixed, unnamed.** These include many seedlings and varieties of merit, and variety of colors; for beds, borders or clumps they will make a handsome display. Each, 10c.; per doz., \$1; per 100, \$7.

DAHLIAS

The Dahlia is the grandest autumn flower we have. It is in its glory during September and October, when other flowers have faded; they surrender only to the frost. Our collection of Dahlias is grown upon our own grounds, and is without doubt one of the finest in the country. We carefully grow and test new sorts every season; if such are found desirable they are retained, otherwise discarded. Our assortment has taken first premium wherever shown, and cannot but please all buyers. Put Dahlia tubers in the ground when the season becomes warm, covering the neck some 3 inches. If many shoots start thin them out. After flowering, and before hard frosts, take up the plants, remove the tops, dry the bulbs a little and put into the cellar until spring, when they can be divided and replanted. Look at them occasionally to see that they are not shrivelling from too dry an atmosphere, nor starting the eye early in consequence of too much moisture and warmth. Tubers can be forwarded as soon as danger from frost is past, about 1st April.

SHOW DAHLIAS

- 1132 **Show Dahlia, A. D. Livonia.** By all means the best clear, soft pink Show Dahlia. Medium to large, form perfect, being round and full, with beautifully quilled petals. Plant of medium height, branching habit, strong and vigorous. Blooms profusely from June until frost, and the flowers are perfect until the last. (See cover, No. 4.) Each, 15c.
- 1133 **—Beauty.** Snow-white, of perfect form and good texture; always full to the centre; a most beautiful Dahlia. One of the very finest whites yet known, and valuable for all purposes. Each, 15c.
- 1134 **—Bird of Passage.** White, tipped with pink, always reliable. Each, 15c.
- 1135 **—Crimson Beauty.** Beautiful rich crimson, very pleasing. Each, 15c.
- 1136 **—Crimson Globe.** Bright crimson purple of perfect globe shape and always full to the centre. (See cover, No. 2.) Each, 15c.
- 1137 **—Condor.** Very peculiar color, buff, shaded with orange. Each, 15c.
- 1138 **—Countess.** Beautiful large yellow, very fine. Each, 20c.
- 1139 **—Empress of India.** White striped with lilac, perfect form, large. (See cover, No. 6.) Each, 15c.
- 1140 **—Goldfinder.** Yellow, tipped with red; a large, finely-shaped flower; each, 20c.
- 1141 **—General Gordon.** Yellow, most beautifully striped with scarlet; very scarce. Each, 20c.
- 1142 **—Harrison Weir.** Rich, clear yellow, very large and extra fine. Scarce. Each, 20c.
- 1143 **—Hector.** Large, cherry red, fine appearance. Each, 15c.
- 1144 **—Hercules.** Yellow ground, striped with red. (See cover, No. 5.) Each, 15c.
- 1145 **—Lottie Eckford.** Fawn, striped purple, fancy variety. Each, 15c.
- 1146 **—Maggie Soul.** Blush white, tipped purple. Each 15c.
- 1147 **—Mantas la Ville.** Deep rose, dark centre, beautiful large flower. Each, 15c.
- 1148 **—Maid of Kent.** Red tipped, pure white, showy color. Each, 15c.
- 1149 **—Madame Helen Furtado.** Pure white, the best. (See cover, No. 3.) Each, 15c.
- 1150 **—Mammoth Queen.** Rich blood red, very striking. Each, 15c.
- 1151 **—Miss Browning.** One of the loveliest when well grown. Color the purest yellow, tipped pure white, occasionally solid yellow. A very dainty and chaste variety. Should be protected from the hot noon-day sun during July and August. Each, 15c.
- 1152 **—Modesty.** Blush, with light centre; large, with great substance. Each, 15c.
- 1153 **—Mrs. Cox.** Bright yellow; being a pure color, it is very showy. Each, 15c.
- 1154 **—Mrs. Harris.** Pink, tipped white. Each, 15c.
- 1155 **—Queen of Primroses.** Beautiful primrose yellow, often tipped with purple. Each, 15c.
- 1156 **—Rossland.** Pure deep yellow, turning a little lighter at the tips of the petals, large and very double; a profuse bloomer. (See cover, No. 1.) Each, 15c.

Collection of Six of above Twenty-five Varieties for \$.80
 " Twelve " " " " " 1.50
 " all " " " " " " 3.00

POMPON, OR BOUQUET DAHLIAS

The flowers of this beautiful class are small, suitable for bouquets, perfect in form.

- 1168 **Dahlias, Mrs. Dobbs.** Vermilion.
- 1169 **—Nemesis.** Maroon with white.
- 1170 **—New Double Tom Thumb.** Grows but 12 to 15 inches high; pure yellow, tipped and lightly margined red. The flowers are 3 inches in diameter, produced in endless quantities, and last for weeks. Excellent for bedding, for pot culture, for children's miniature gardens, or for contrast with the tall varieties.
- 1171 **—White Aster.** Pure white quilled.

Price, 12c. each; Four for 40c.

CACTUS DAHLIAS

A very showy and wonderful class of Dahlias. The flowers are peculiar in form, very attractive, bloom freely and splendid for cutting. We specially recommend this class.

- 1157 **Dahlias, Apollo.** Rich crimson lake, very beautiful; petals round and beautifully formed, giving it a novel appearance. Each, 15c.
- 1158 **—Bertha Mawly.** Cochineal color, a magnificent flower, florets resembling a Chrysanthemum. Each, 15c.
- 1159 **—Countess of Gosford.** The florets very long, tapering to a point, and regularly curling, giving it a very grotesque and singular appearance. It is a marvellous improvement upon all the old varieties. There is nothing like it, and must become exceedingly popular. The color is a rich cinnamon, shaded towards the centre with gold, and one of the finest of the season. Has been awarded three first-class certificates. Each, 15c.

CACTUS DAHLIA

Dahlia yet offered; it is the first real white Cactus Dahlia ever raised and a marvellous improvement upon every variety in cultivation. It stands out in bold relief from all others, and is the admiration of every one who has seen it. The plant is of medium growth, exceedingly floriferous, the flowers standing clear above the foliage; these are of medium size, of the purest white, with a slight tinge of lemon in the centre when it first opens; this dies off as the flower fully expands. It is of English origin, and has been awarded numerous certificates and medals. Each, 15c.

Collection of above Eleven Varieties, \$1.30

SINGLE DAHLIAS

For density of color, grace and beauty, the Single Dahlia excels. The flowers are borne on long graceful stems, ranging from 3 to 5 inches in diameter; free bloomers; useful for cut flowers.

- 1172 **Dahlia, William T. Abery.** dark red, striped golden-yellow, semi-double.
- 1173 **—John Cowan.** Maroon shaded.
- 1174 **—Mrs. Bowman.** Purple; excellent.
- 1175 **—Ami Barrillett.** Richest scarlet; dark foliage.

Price, each, 12c.; the set of Four for 40c.

**Our Special
COLLECTION OF BULBS
FOR \$1.00**

These Bulbs are strictly first-class, and we make this exceptionally low offer with a view of introducing them to those with whom they are unknown, believing that when their beauty is once seen, and their easy cultivation known, they will become general favorites.

- 2 *Amaryllis Formosissima* (Jacobean Lily), intense crimson flowers, of most charming and graceful appearance.
- 4 *Atamasco or Fairy Lilies*. These are gems of rare beauty, producing beautiful lily-like flowers all Summer.
- 2 *Tuberous Rooted Begonias*. Different colors. Splendid for window decoration or the flower bed.
- 2 *Bessera Elegans* (Coral Drops). Produces beautiful clusters of bell-shaped flowers on long slender stems.
- 2 *Tritoma* (Red Hot Poker Plant). Flowers borne on long spikes, brilliant crimson and yellow.
- 4 *Camassia Esculenta* (Indian Hyacinth). Lovely blue flowers, resembling the Hyacinth, but more graceful.
- 2 *Spotted Leaf Callas*. Leaves are a rich deep green, finely spotted with white; flowers white, very ornamental.
- 2 *Cyclobotbra Flava*. Flowers are clear golden yellow, with intense black dots on each petal.
- 4 *German Iris*. Flowers of various colors, very hardy, and sure to bloom.
- 4 *Milla Biflora* (Mexican Star Flower). Flowers of three inches in diameter, pure waxy white, very fine.
- 2 *Tigridias* (Shell Flower). Flowers of nearly every color imaginable, prettily spotted.
- 4 *Excelsior Pearl Tuberoses*. Flowers pure waxy white, double and very fragrant, perfuming the atmosphere for some distance around.
- 6 *Chlidanthus Fragrans*. Very fragrant flowers, of a deep canary yellow color, borne in clusters.

We will send half the above collection for 55c.

CHINESE PÆONIES

The old fashioned Pæony has long been an inhabitant of our gardens. They are among the hardiest flowers we have, and are admired for their large and gay flowers, which are produced in the early Summer. While many beautiful sorts have been offered in our Catalogue, we have this season imported, direct from the most celebrated grower in the world, the finest collection obtainable in any list, including new and rare single flowering sorts, and many unique and gorgeous double varieties in various shades of colors and markings, and some with very delicious fragrance. The best season for planting Pæonies is the Spring; they will succeed in any ground unless so wet that the water will lie on the surface; but to obtain the greatest size of bloom and strongest growth, the soil should be well enriched.

NEWEST VARIETIES OF DOUBLE PÆONIES.

<i>Pæony, Beaute de Francaise</i> . Delicate pink, tipped blush white, each	85
<i>-Candidissima</i> . Double white, very large and full	40
<i>-Fragrans</i> . Bright rose, very fragrant, each.....	65
<i>-Globosa</i> . Clear silvery rose, centre white, shaded fawn, of immense size, each	75
<i>-Lilacina Superba</i> . Rosy lilac, changing to creamy lilac, very novel, each	75
<i>-Officinalis Carnescens</i> . Clear pink, changing to white; very early, each	50
<i>-Tenuifolia Plena</i> . A distinct plant, with elegantly divided fennel-like foliage and large full double flowers of a deep rich crimson; dwarf, compact grower, early bloomer, distinct in character from any other variety, each.....	75

Set of above 7 varieties for \$4.00 (postpaid)

SELECT NAMED VARIETIES

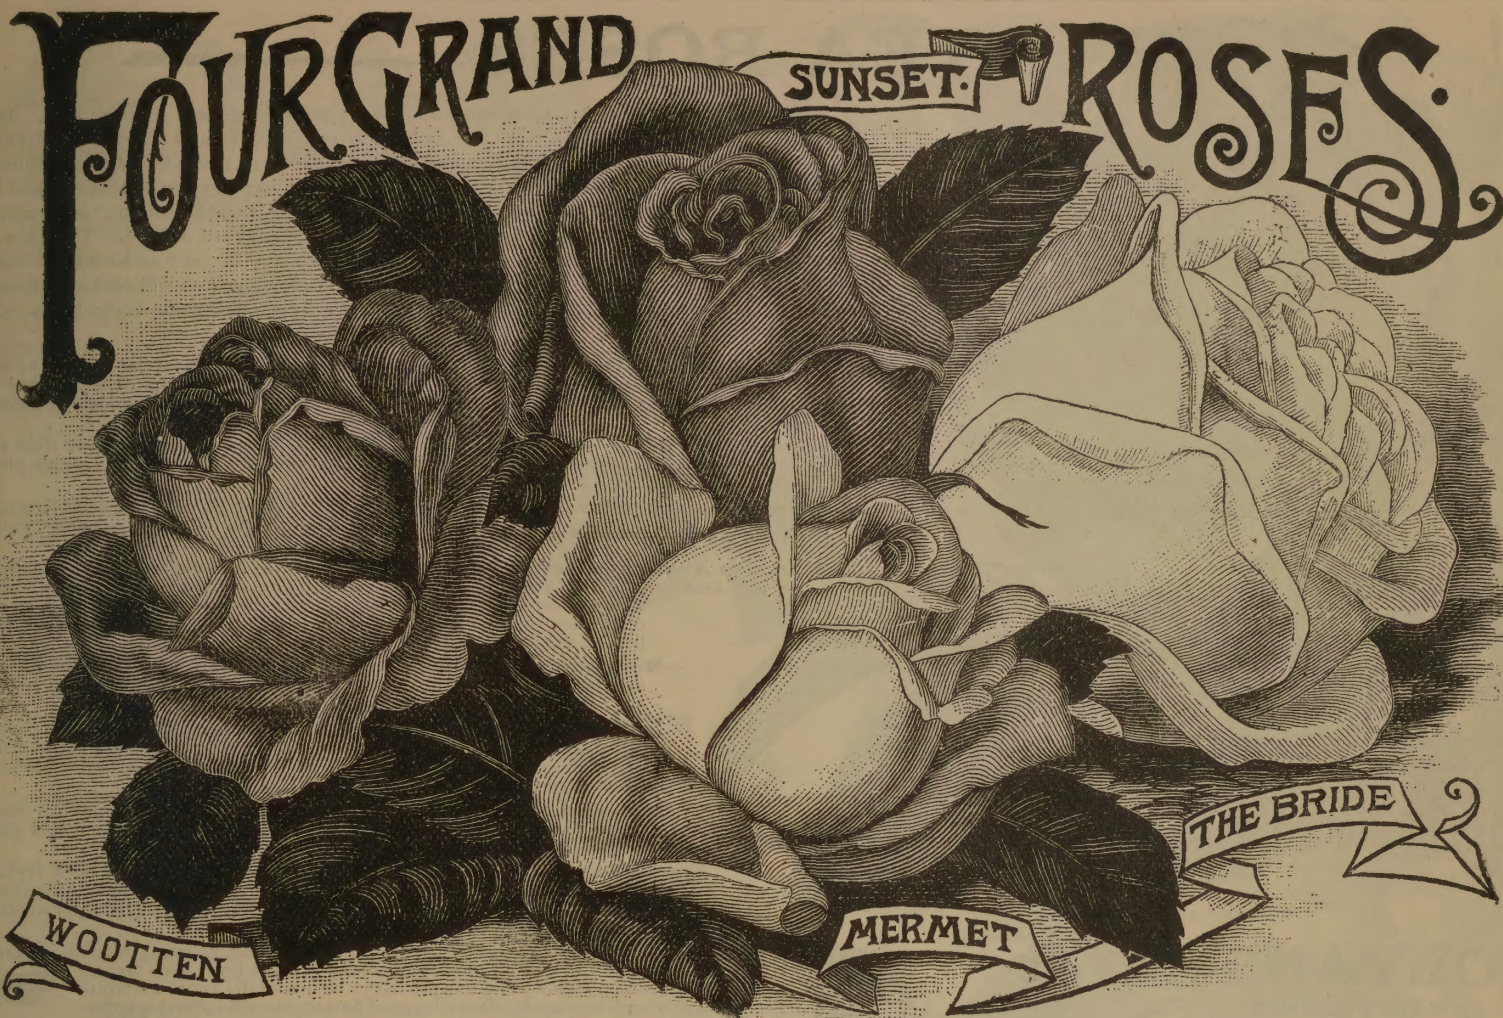

- Pæony, Anemonæflora*. Crimson. Very free flowering; one of the best.
- Artemesia*. Large bold flowers, guard petals deep blush; centre, fawn and blush; a great favorite.
- Lady Bramwell*. Light purplish rose, delicate lilac shading; very large and double.
- Louis Van Houtte*. Rich purple-lake; a noble variety; extra full and free.
- Striata Speciosa*. White, diffused with yellow and rose; novel.
- Tenuifolia Latifolia*. Deep rose, edged pink.
- Virgens*. White, lightly tinged with yellow in the centre.
- Whitlegia*. Sometimes slightly tipped with carmine, then passing into pure white; a strong grower, with beautiful broad foliage; early to flower; the very best white for cutting.

The above named varieties, each, 25c.,
or set of 8 for \$1.50

DOUBLE PÆONIES

See our fine assortment of Gladioli, page 41

**SOUVENIR DE WOOTTEN**

Bright magenta red, passing at base to fine violet crimson, richly shaded; flowers are large, full and regular, with thick leathery petals and delicious tea scent; makes beautiful buds, and is recommended both for open ground and conservatory; an immense bloomer. Each, 12c.

SUNSET

Pure yellow. This grand Rose is a great favorite wherever known; the color is a rich golden amber or old gold, elegantly shaded with dark, ruddy crimson, resembling the beautiful tints seen in a summer sunset; the flowers and buds are extra large, full, finely formed and deliciously perfumed. It is a strong and vigorous grower and free bloomer, highly recommended both for open ground and house culture. Each, 12c.

CATHERINE MERMET

One of the finest Roses grown. The buds are very large and globular, the petals being recurved and showing to advantage the lovely bright pink of the center, shading into light creamy pink, reminding one of La France in its silvery shading. A strong grower and fine bloomer. Each, 12c.

THE BRIDE (A SWEET ROSE)

A superb pure white Tea Rose, one of the best of its color; the buds and flowers are unusually large, finely formed, very double and full, and deliciously perfumed; it is a strong healthy grower and a quick and constant bloomer; does well in open ground and is particularly valuable for growing in greenhouse for cut flowers, as it produces abundantly and its blooms are of the most desirable form and quality for floral work, bouquets, wreaths, etc. There are many White Roses, but none more satisfactory than this lovely variety. Each, 12c.

For 40c. We will mail the above four Grand Roses (postpaid) **For 40c.**
to any address in Canada

OUR ROSES

Are all grown at our establishment in Toronto, on their own roots, from cuttings, in pots, under glass in ordinary field soil, and at a natural temperature of 50 to 75 degrees, with no stimulating fertilizers or forced heat to accelerate their growth. They are strong, healthy plants, kept from blooming, and with any fair treatment on the part of the planter are sure to grow and soon come into bloom. We cannot guarantee that any Roses or plants we send out cannot be killed by drouth, insects, accidents or frost after they are planted; we do, however, guarantee that they reach their destination in good growing condition; if they do not we must be informed by mail immediately on arrival and will replace them at once. When delivered in good order our responsibility ends. Plants which cannot be sent by mail will be delivered to express company in good order; we do not assume further risk. Customers must not expect all varieties to be of same size; some sorts, under the same conditions, make much stronger and larger growth than others, but very often the weaker grown produce the most beautiful flowers. We aim to please our customers, and while it is possible that some varieties may become exhausted before end of season, we reserve the privilege to send some other variety equal, or better, to take the place. We do not anticipate this necessity, but wish it understood in event of such.

HOW TO CULTIVATE ROSES.—As the cultivation of Roses may not be understood by many, a few hints as to their care may not be amiss. Select, if possible, a sheltered, sunny location, but away from heavy shrubbery or trees. Any good, loamy garden soil will grow Roses, but must be well fertilized with thoroughly decomposed stable manure; if this is not convenient, fine ground bone or other commercial fertilizers may be used, but such must be applied with judgment, for if used too freely the plants may be injured. Manure may be applied late in the fall, in spring or mid-summer. If in the fall, as a surface dressing, which will serve as a partial protection for winter; if in spring or summer, it will be beneficial as a mulch. After the ground has been prepared, manured, and made mellow, make holes in the soil about 12 inches apart; set the plants a little deeper than formerly, arrange the roots in their natural position, cover with fine earth, pressing it firmly down upon them and around the

stem, then water freely. When the weather is hot and the ground dry, give water at intervals as found necessary. Cover the plants with old newspapers through the heat of the day. When planting notice that the soil be not too wet, which will cause it to bake and harden, and possibly cause injury to the plants. Should the weather or ground be extremely wet when receiving your plants, they may be placed in the cellar; unpack and set them upright to allow air to circulate through them and water freely. They may thus be kept safely for several days. Should they have a withered appearance, caused by long distance or delay on the way, soak them for an hour or so in luke-warm water before planting. Keep the soil loose and free about the plants and free from weeds. Apply water at evening, which must be done judiciously, as too much water will more or less injure plants of any kind. Keep them free from insects, which may be easily done by the use of tobacco, whale-oil soap, or other insecticides.

WINTER PROTECTION.—In warm latitudes there is little danger from frosts, but in our northern climate winter protection is necessary with most Roses, and will amply repay the slight trouble; this may be done with leaves, hay, straw, light manure, pine or cedar boughs, corn stalks or anything of such description, but do not cover your clumps or beds until winter has fairly set in; if covered too early they are in danger of sweating and injury; be careful to use dry material for covering, and to admit of free air about the plants. When standing alone a stake may be driven alongside and the plant tied to the stake; around this place some straw and tie with a cord to hold in position; or an old barrel may be placed over the plant and filled with leaves or loose straw, but break out an occasional stave to admit air. Hardy Perpetual and Moss Roses usually need no protection; we would, however, recommend a slight covering where our winters are severe. Half Hardy Hybrids must have protection in northern latitudes and throughout Canada. As most plants are grown in a warm temperature, they should not be exposed to extreme cold. We do not send them out until weather has become settled for spring gardening, and which will be in good time, but if they are required at an earlier date they will be sent entirely at the risk of the buyer for safe delivery.

TEA ROSES

GOLDEN GATE

POLYANTHA

or FAIRY ROSES

Beautiful free-flowering miniature roses, admirably adapted to pot or window culture, and planted out they flower continually the whole season. The flowers are quite small, borne in large clusters, each cluster making a bouquet by itself. They are quite hardy, requiring but slight protection even in the north. An extra class for cemetery planting.

Rose, Clothilde Soupert.

The color is a French white, deepening to rosy blush in the centre. Its greatest value lies in its compact, vigorous habit and wonderful profusion of bloom, even the smallest plants being literally covered with flowers. The form and substance of the flowers are so perfect that the hottest weather does not cause a deterioration of either, so that even in midsummer a bouquet of splendid buds and open flowers can be obtained from this fine variety. Each, 15c.

—**Marie Payle.** Medium size, very full and double, borne in large clusters and masses; excellent for cutting; color rich creamy white, finely flushed with carmine rose; delightfully perfumed, very pretty and bright. Each, 10c.

—**Parquerette.** Flowers pure white, about one inch in diameter, flowering in clusters of from five to thirty blooms; very full, prettily formed, recalling blossoms of the double-flowering cherry, and fully equals the double white Primrose in profuse bloom during the Winter. It has a peculiarly delicious perfume that is exquisite. Each, 10c.

—**Perle D'Or.** Charming and very distinct; color coppery gold, changing to fawn and salmon; flat-rayed form, very double and elegantly perfumed; a constant and profuse bloomer. Each, 10c.

—**Pink Soupert.** New; produces full double flowers of various shades of pink, sometimes tinted red, shading to lilac; flowers somewhat flattened, delightfully tea-scented; a profuse bloomer, and equally well adapted to the open ground or as a pot plant. Each, 15c.

SPECIAL OFFER.—We will send one each (5) of these beautiful Fairy Roses for 50 cents.

PERSIAN YELLOW ROSE

Dark golden yellow. The best variety of its color; entirely hardy. It is difficult to imagine a finer sight than this when in full bloom, covered with its bright yellow blooms, which are borne along the ripened wood so that they appear in sprays. Each, 25c.

ENGLISH SWEETBRIAR ROSE

A fine old favorite; desirable for shrubberies and general planting; the flowers are bright pink and single. The fragrance of the flowers, leaves and young branches in the early spring frequently perfumes a whole neighborhood, and is truly delightful. Two-year plants, each, 10c.

METEOR

The following list of Roses is divided into two classes—Teas and Hybrid Teas. The former, being half-hardy, are too tender to remain in the open ground over winter. They may be planted in the garden during Summer, but require house protection for the Winter, where they will grow and bloom profusely. The Hybrid Tea varieties are semi-hardy, and by adopting some of the methods suggested under the head of "Cultural Directions" as to winter protection, a beautiful display may be had from early Summer until Autumn. They are of delightful fragrance and of exquisite delicacy of colors, and may be used as forcing varieties under glass. Our list includes many varieties of recent introduction; all will be found exceptionally fine. For the convenience of our customers we have marked the Hybrid Tea varieties "H.T."

—**Rose, American Beauty.** (H.T.) In "American Beauty" we have a hardy rose of the largest size, having the ever-blooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, consequently equally valuable for winter or summer flowering. Each, 15c.

—**Bridesmaid.** The pink sport from Catherine Mermet. It is a stronger grower than the parent, has handsome foliage, is shorter jointed, and the flowers are a much livelier pink. A grand variety. Each, 12c.

—**Golden Gate.** A magnificent rose with large, full and finely-formed flowers; buds long and beautiful; color rich creamy white tinged with golden yellow and clear rose. A free-blooming, beautiful variety. Each, 12c.

—**Kaiserina Augusta Victoria.** (H.T.) Pure ivory white; a flower of grand build from the very first bud-form till the rose drops its petals. This elegant variety can be had in first-class style and great purity of color throughout the year. A splendid grower, and with most beautiful foliage. Has proved one of the very best of the forcing roses. Each, 15c.

—**Madame Hoste.** One of the finest; strong bush grower; flower of ivory white, of even tint, except in summer, when it changes to canary; fine globular-pointed shaped bud. Each, 12c.

—**Maman Cochet.** (H.T.) A rose of French origin, which holds a prominent place among the highest grade ever-blooming roses, both for summer and winter blooming. Very free-blooming, flowers of splendid substance and a delightful shade of deep pink. Each, 12c.

—**Marechal Neil.** We offer a fine stock of this superb climbing Rose, which for fragrance, beauty and size is still without a rival; bright golden yellow. Each, 15c.

—**Meteor.** Shows the peculiar velvety richness of the best dark Hybrid Perpetuals, and blooms as freely as any Tea. Very double and perfect; a rich, glowing crimson, never tinged with magenta or dull purple in hot weather as are some dark roses. A grand bedding Rose. Each, 15c.

—**White Bougere.** A free bloomer; clean, healthy grower; blooms of great substance, pure white; good stiff stems. It has been very largely grown in this vicinity and has proved to be one of the very best white roses ever introduced. Every lover of flowers should have this splendid rose. Any florist wanting a first-class white rose cannot afford to be without it. Certificate of Merit, Toronto Show. Each, 15c.

SPECIAL OFFER—One each of above nine varieties for \$1.10

POLYANTHA ROSE

SPECIAL OFFER—

One each of the six illustrated varieties, extra strong plants, for \$1.50, postpaid.

HARDY HYBRID PERPETUAL ROSES

The Hybrid Perpetuals are considered the most valuable of Roses. They are chiefly distinguished for their luxuriant foliage, large prodigious bloom, vigorous growth, and for being entirely hardy. Their robust habit of growth makes them suitable for outdoor culture only, in which situation they will thrive with very little care, but are improved by liberal manuring and by cutting out dead and unhealthy wood. As a class they do not bloom until thoroughly established, usually the second year after planting. Their flowers are highly fragrant and of all the colors known to the Rose.

The following are strong and healthy mailing Plants:

Rose, Alfred Colomb (No. 5). Justly celebrated as one of the very finest; extra large, round flowers, very double and full; color clear cherry red, passing to bright rich crimson; very fragrant. Each, 1-year, 15c.; 2-year, 25c.; extra strong, 30c.

GENERAL JACQUEMINOT

—Anna de Diesbach (Glory of Paris). Brilliant crimson, sometimes shaded with bright maroon, long pointed buds, and large, finely formed, compact flowers, full and sweet; a very free bloomer. Each, 1-year, 15c.; 2-year, 25c.; extra strong, 30c.

—Chas. Lefebvre (No. 2). A beautifully formed Rose, with large, full, heavy petals; color rich crimson, with dark shadings; a very fine variety. Each, 1-year, 15c.; 2-year, 25c.; extra strong, 30c.

—Coquette des Blancches (No. 4). Sometimes called Ball of Snow. A finely formed pure white Rose; occasionally shows light flesh when opening; beautiful shell-shaped petals, evenly arranged. Flowers of good size, perfect and of fine form and finish. One of the finest, freest and most beautiful of the white Hybrids. Very suitable for cemetery planting. Each, 1-year, 15c.; 2-year, 25c.; extra strong, 30c.

—Duke of Edinburgh. Brilliant scarlet crimson, shaded maroon; very fine. Each, 2-year old, 25c.; extra strong, 30c.

—Duke of Connaught. Rich, velvety crimson, with intense fiery flush. Each, 2-year, 25c.; extra strong, 30c.

—General Jacqueminot. Color, bright crimson, exceedingly rich and velvety; the buds and partially expanded flowers are very fine, and fairly glow with deep rich coloring; a vigorous grower and free bloomer; grown extensively, and should be in every collection; known almost everywhere. Each, 1-year, 15c.; 2-year, 25c.; extra strong, 30c.

—Gloire de Margottin. Noted for its remarkably brilliant color; one of the very finest. The flowers are very large and of regular symmetrical form, somewhat globular, very full and deliciously scented; the color is a clear dazzling red, certainly one of the most brilliant Roses ever seen; highly recommended for its great beauty and wonderful color. Each, 2-year, 25c.; extra strong, 30c.

—John Hopper. One of the most reliable and satisfactory Hybrid Perpetual Roses; flowers are large, very regular and full; color, brilliant rose, changing to bright glowing pink, shaded with rich crimson; very sweet and remarkably profuse bloomer. Each, 1-year, 15c.; 2-year, 25c.; extra strong, 30c.

—Marchioness of Londonderry. This is a magnificent Rose and undoubtedly one of the finest yet raised. It is certain to take a very high place in the Rose world. The flowers are of great size, perfectly formed, and carried on very stout, erect footstalks. Color, ivory white, petals of great substance, shell-shaped and reflexed, highly perfumed and free flowering. A most valuable addition to the white color section. The growth is vigorous, and foliage very fine, we may say mildew proof. Each, 2-year, 25c.; extra strong, 30c.

—Marchioness of Lorne. Flowers of an exceedingly rich, fulgent rose color, slightly shaded in the centre with vivid carmine. They are large and very sweet, full and finely cupped shape; petals large and buds long and handsome. It is specially remarkable for its truly perpetual habit. Each, 2-year, 25c.; extra strong, 30c.

—Mrs. John Laing (No. 1). Color, a soft delicate pink, with a satin tinge; the whole flower frequently shows a distinctly silver tinge. The flowers are large, finely shaped and exceedingly fragrant. A vigorous, strong grower, every shoot producing magnificent bloom. Flowers very early, and is a remarkably profuse bloomer and very sweet. Splendid in pots or open ground. Each, 1-year, 15c.; 2-year, 25c.; extra strong, 30c.

—Paul Neyron. Flowers 5 in. across; color, lovely dark pink. Each, 2-year old, 25c.; extra strong, 30c.

—Paul Verdier. A splendid Rose; fine full round flowers, exceedingly sweet; color, clear bright pink; beautifully shaded; very handsome and desirable. Each, 2-year, 25c.; extra strong, 30c.

—Ulrich Bruner (No. 3). Bright red, flowers very large and full, resembling somewhat Paul Neyron; in all respects a beautiful Rose. Each, 1-year, 15c.; 2-year, 25c.; extra strong, 30c.

Strong 2-year old Roses, \$2.75 per doz.; extra strong, \$3.00.

Do not expect all Roses to be of the same size; some are stronger growers than others.

THE YELLOW RAMBLER ROSE "AGLAIA"

This promises to supply that "long-felt" want, a double yellow hardy climbing Rose, a thing which has been sought after the world over. It is perfectly double, very fragrant, entirely hardy, having withstood, unprotected, a prolonged temperature of from zero to two degrees below. It is related to the Crimson Rambler, and, like it, blooms in large trusses, often bearing from 120 to 150 flowers in a cluster. The flowers last three to four weeks without fading. It is a very vigorous grower, making shoots eight to ten feet in one season when well established, so that it possesses all the requisites for unbounded popularity. Price, 25c. each; two-year old plants, 75c. each. (See cut.)

PINK ROAMER ROSE

This variety shows undoubted traces of descent from the Sweet Brier, both in the color and the shape of the blossom and in its exquisite fragrance. The single flowers are over two inches in diameter, a bright rich pink, with a large, silvery-white centre and orange-red stamens, producing a most charming effect. This variety, from its artistic appearance, will undoubtedly be very largely planted in parks and large private grounds. The fragrance is not the least charm of this beautiful Rose, and we believe that eventually it will become one of the most valuable productions of recent years. Price, 25c. each.

NEW JAPANESE CREEPING ROSE

"WICHURIANA"

A low, trailing species, its stems creeping on the earth as closely as ivy, and forming a dense mat of foliage. The flowers are produced in greatest profusion, in clusters, after the June roses are past, and continue during the season. Pure white, from 1½ to 2 inches across and fragrant. The best cemetery rose in existence. Price, 15c. each.

New Cemetery Rose
"Wichuriana"

MOSS ROSES

Strong two-year-old plants, 35 cents each (post-paid)

Rose, Blanche Moreau. Pure white, beautifully formed and well mossed; one of the very best.

—Little Gem. Bright rosy crimson, tinted purple; a handsome rose; fine in bud.

—White Bath. Pure white with beautiful buds, a very free bloomer.

—James Veitch. Bright rose, large and full; a perpetual bloomer, and a most desirable rose.

—Crested Moss. Bright red, large, attractive and fragrant; should be in every collection.

MOSS ROSE

PINK ROAMER

CRIMSON RAMBLER ROSE

A hardy, ever-blooming, climbing Polyantha. It is perfectly hardy in the open ground, will grow 8 to 10 feet in a season, is in bloom all the time from early spring till late fall, the flowers appearing in great panicles as large as a man's hat, and of a deep rich crimson color, like blood-colored velvet. The flowers when cut last two weeks in water, and fully a month on the bush, which is a perfect mass of red crimson at all times. It can be grown in various ways, as a pillar rose, a trellis rose, and for covering a wall it has no equal, and when pegged down it will form a bed of itself. Cut back it is a magnificent pot rose for the window. It is always in bloom, even when very small, and is easily trimmed to a bushy grower. Price, each, 1-yr., 15c.; 2-yr., 25c.; 3-yr., 40c.

New

CRIMSON RAMBLER

HARDY CLIMBING OR PILLAR ROSES

These are well adapted for the adornment of pillars, trellises, arbors, or for covering porches or the ends of houses. In their blooming season they are fairly covered with lovely flowers, and are much valued by all discriminating planters of roses. Being perfectly hardy and of vigorous growth their successful culture offers no obstacles.

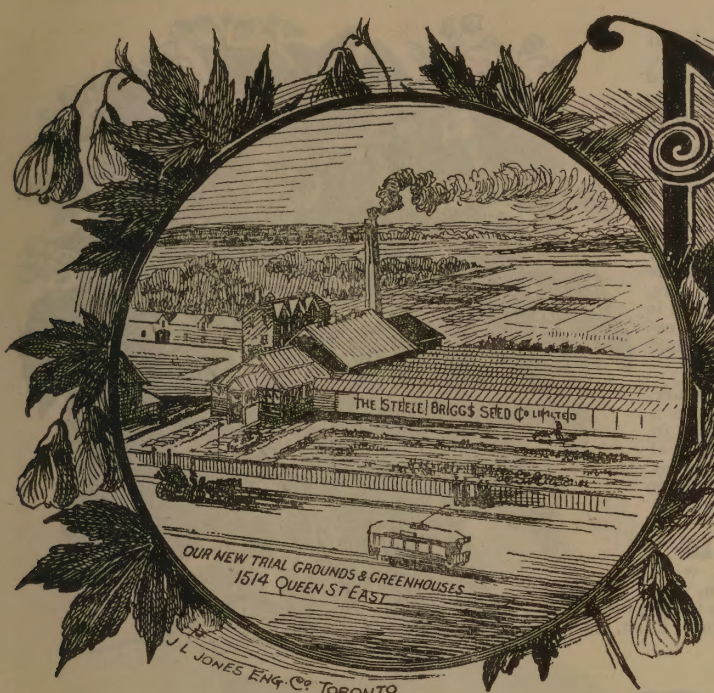

Rose, Anna Maria. This rose is a fine hardy bloomer, quite double and of medium size, very fragrant, color clear white, with centre changing to fine satiny pink.

—Baltimore Belle. Light blush and rose; fine and double, though of medium size; the blooms are produced in clusters, and the rapid growth is very graceful.

—Greville, or Seven Sisters. Blooms in large clusters, flowers changing from pure white to crimson.

—Tennessee Belle. Clear rose color, flowers in large clusters; a vigorous grower and free bloomer.

Large plants, 40c. (postpaid)

PLANT DEPARTMENT

We Guarantee Safe Arrival of all Plants by Mail.

Postage Prepaid except where Noted.

Plants that are sent by mail have but little soil left on them, and they should receive very careful treatment, especially the first few days after their arrival. If they look wilted put them in luke-warm water for fifteen or twenty minutes; this will greatly revive them. Should any plants become injured on the way, we must be advised promptly, and will replace them without delay.

READ THIS

ARAUCARIA EXCELSA

(NORFOLK ISLAND PINE)

Various names have been suggested for this grand plant to properly convey to the mind the appearance of it. Some have called it the "Christmas Tree Palm" from its resemblance to a Christmas tree; others have called it the "Star Palm," because the leaves are arranged to form a perfect star, but no descriptive name can give any adequate idea of its beauty. It has deep green feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage are unequalled in the vegetable kingdom. It is easily grown in the house, and is highly ornamental. Price, 15 to 18 inches high, \$1.50 each.

BUTTERFLY ORCHID

(EPIDENDRUM VERNOSUM)

This splendid Orchid is one of the very best. All that is necessary to grow it successfully is to secure the plant and a little moss bunched around the roots to a piece of board or bark, and suspend it in a window or conservatory. Keep the moss wet and plant free from dust, and you will have a unique and beautiful object. It blooms freely, producing large panicles of gay flowers, which keep perfect a long time. The flowers are composed of several colors; delicate butterfly-like. Strong plants of blooming size, 25c. each.

COBEA SCANDENS

Elegant rapid-growing climbers, 20 to 30 feet high, that can be grown in the greenhouse or conservatory, or in the garden in summer, where from their luxuriance they are particularly desirable for covering arbors, walls, etc.; flowers are large and bell-shaped. 3 for 25c.; each, 10c.

ABUTILON

The Abutilons are often called Flowering Maples. They are well adapted for greenhouse or house culture; of vigorous growth, clean foliage, and give a profusion of beautiful pendulous bloom.

Abutilon, Eclipse. An excellent plant for baskets or vases, of trailing habit, with large foliage beautifully marked with deep green and yellow. Flowers bright yellow with crimson throat. Each, 10c.

—Golden Fleece (Golden Bell). Far eclipsing all others of its kind and color. The habit of the plant is perfect, and the flowers, which are a rich golden yellow, are produced in great profusion. Each, 10c.

—Thompsonii Plena. The first double flowering Abutilon in existence, perfect double, like a miniature hollyhock; color, a deep orange, shaded and streaked with crimson. Each, 10c.

—Souvenir De Bonn. A very distinct and striking new plant with large bright green leaves, distinctly edged with a pure white band, as shown in illustration. The plant is of strong, robust growth, and forms fine specimens in a very short time. The long stemmed flowers are bright orange, veined with crimson, and stand well out beyond the foliage, producing a very pleasing effect. Each, 15c.

You are cordially invited to visit our Greenhouses and Trial Grounds, 1514 Queen St. East.

BEGONIAS

We know of no class of plants better adapted to amateur cultivation than these. The beauty of their foliage, combined with their graceful flowers and free-blooming qualities, tends to make them one of the most desirable class of plants grown. They require an average of seventy degrees to bring them to perfection. As pot plants for summer or winter decoration they have but few equals.

MANICATA

Large glossy leaves, beautifully blotched with creamy white, with carmine etchings in the mature leaves. Flowers, delicate bluish white on long stems. It is easily grown, and is one of the finest ornamental foliage plants for the house imaginable. Price, 20c. each. (See cut.)

SEMPERFLORENS GIGANTEA

The flowers of this new sort are a brilliant carmine red, and are borne in large panicles. It is one of the best of the new Begonias, and possesses vigorous habit. The flowers are unusually large and brilliant, and stand well above the foliage. Each, 15c.

WELTONIENSIS

An exceedingly fine Begonia, with small leaves of a delicate shade of green, stems and leaf-stalks bright crimson, blossoms waxy pink, produced freely in summer and autumn. Each, 15c.

MANICATA

BEGONIA REX

We offer ten of the most distinct and handsomely marked varieties of this beautiful class of Begonias. These are grown for their variegated foliage, and are very desirable for house and garden decorations, in shady positions, and especially well adapted for baskets, vases, etc. Price, 20c. each. (See cut.)

VERNON

This excellent variety is of unusual merit as a bedding sort, flowering fully as freely when planted out as when grown as a pot plant. It begins flowering when first planted and continues throughout the whole season until stopped by frost. Foliage rich, glossy green, often shaded deep bronze. Flowers at first opening are a deep red, changing to a beautiful clear rose in the fully open flower. It thrives everywhere, and is a popular bedding plant. Each, 10c.

ARGENTEA GUTTATA

A handsome foliage variety, purple bronze leaves, oblong in shape, with silvery markings, white flowers. An excellent pot plant. Price, each, 15c. (See cut.)

BEGONIA REX

RUBRA

One of the finest Begonias in cultivation. Its dark, glossy green leaves, combined with its free-flowering habit, make it one of the very best plants for home or conservatory decoration. The flowers are a scarlet-rose color, and are produced in the greatest profusion. Price, 15c. each. (See cut.)

GLOIRE DE SCEAUX

One of the finest flowering Begonias introduced for many years; it is of upright habit, producing during the entire winter large, open flat flowers, of a soft, silky pink, contrasting well with the rich, bronzy green foliage. Price, 15c. each.

SPECIAL OFFER

One each of the 5 illustrated varieties for 70c. by mail (postpaid).

BEGONIA RUBRA

METALLICA

METALLICA

This elegant variety has very large and glossy leaves, shaded with green, crimson and olive, with a peculiar metallic lustre over all. Flowers large, dark pink in color. The cut gives a good idea of its habit, but no engraving or description can portray its beautiful appearance. Price, 15c. each. (See cut.)

OLBIA

A grand variety. The leaves are from seven to ten inches in diameter, and are separated into deep, sharp points. The color is varying shades of brown and red, the young leaves being very bright. It has large flowers of lemon white; one of the richest colored foliage varieties. Each, 20c.

ARGENTEA GUTTATA

ASPARAGUS

Plumosus Nanus. This graceful climbing Asparagus has to a great extent taken the place of the once popular Smilax in all fine decorations. It possesses the advantage of being much more graceful, its foliage being finer than that of the most delicate fern, and will last for weeks after being cut, the whole plant being of a bright, cheerful green. It is an excellent house plant, succeeding under almost any conditions. 20c. each.

COCOLOBA PLATYCLADA

A plant of very singular and interesting growth, stem and branches growing in flat, broad joints. Well suited for vases and rustic work. Each, 15c.

DATURA CORNUCOPIA (HORN OF PLENTY)

The singular form, gigantic size, striking colors and pleasant odor of the flower make this novelty most conspicuous. The plant is of a very robust habit. The stem is thick

ASPARAGUS—PLUMOSUS NANUS

dark-brown purple, shining as if varnished. The branches are very numerous, spreading symmetrically three or four feet in every direction. The leaves are large, of a dark green color. The flowers are trumpet-shaped, measuring eight to ten inches in length and five to seven inches across the mouth, and form three distinct flowers growing each within the other, the throat and mouth of corolla a most delicate French white, beautifully contrasted and marbled with royal purple on the outside. They are produced in great abundance, a single plant giving from 200 to 300 fragrant blooms during the season under the most ordinary cultivation, followed by a large thorny seed vessel, which adds to the beauty of the plant. Each, 15c.; 2 for 25c.

BRUGMANSIA ARBOREA

BRUGMANSIA

Brugmansia Arborea, often called "Wedding Bells" and "Angel's Trumpet." This is one of the easiest to grow, and best hard wooded plants for pot culture. It forms a pretty bushy plant, and grows to several feet in height; when two or three feet high it is a marvel of beauty, being

literally covered with large pendulous blooms, of a rich creamy white color and of long trumpet shape, often measuring from eight to ten inches long, and five to six inches wide, and of a texture like thick fluted satin. The fragrance is delicately sweet, lasting for days in perfection, while new buds are constantly forming. It can be wintered in a cellar without water, or kept in growing condition as a winter decoration plant. Very attractive for the lawn during summer. Each, 15c.

—**Double Flowered.** Very similar in form and color to the Arborea, except that the handsome trumpet-shaped flowers are full and double. Each, 20c.

BOUGAINVILLEA GLABRA SANDERIANA

A new variety of Bougainvillea, and a plant that we feel certain will become very popular as a pot plant. We give the introducer's description: "It affords us great pleasure to offer this new and by far the most useful flowering plant known. We have grown this new Bougainvillea in a greenhouse, where it has continued flowering for seven months, small and large plants alike being covered with blossoms. Even plants in thumb-pots were laden with bloom. The house in which our plants have been cultivated has been a sheet of flowers from May until December. It produces as freely as a Fuchsia its dazzling rosy crimson flowers, lasting so long in perfection, and produced in smallest pots under all conditions, in amazing profusion." Plants, each, 25c.

Standard Plant Food

A preparation made expressly for plants grown in house, conservatory or garden, and cannot be recommended too highly. It is free from odor, clean to handle, and materially promotes a strong healthy growth and profusion of bloom; also aids in keeping plants free from insect pests. Directions for use on each package. Mail (postpaid), small package, 15c.; large package, 30c.; by express or freight, purchaser paying carriage, 5 lbs. for 75c.; 10 lbs for \$1.00.

BOUGAINVILLEA SANDERIANA

We guarantee safe arrival of all Seeds, Plants and Bulbs

FARFUGIUM GRANDE

CAREX JAPONICA VARIEGATA

The exquisite gracefulness of this new decorative gem is well known and will find a place for it among palms, ferns and dracenas. Indeed, its slender green foliage edged with white, can not be equalled by any other plant. It is extremely easy to grow, will stand heated atmosphere with impunity, and can be carelessly handled without being damaged. Decidedly a plant for florists and for indoor culture, and yet it is hardy in the garden. Plants 15c. each.

FARFUGIUM GRANDE

(LEOPARD PLANT)

A grand decorative plant and extra fine for shaded rooms where few variegated plants will retain their color or markings. This is as easy to grow as a Geranium. Round, thick, leathery leaves, with large yellow spots contrasting beautifully with the dark green groundwork. 25c. each.

UMBRELLA PLANT

PHRYNIUM VARIEGATUM

An elegant pot or bedding plant which is faithfully depicted in the accompanying cut, though it conveys no idea of the exquisite variegations of the leaves. Its manner of growth is much like that of a Canna, the leaves borne on erect foot-stalks with spreading blades of oblong-lanceolate form. They are bright pale green, beautifully variegated with white and gold, the variegation being extremely diversified. In some leaves the whole area is white, in others only one-half, in others again it is confined to the interspaces between two or three of the ribs, while in others it is reduced to a few stripes. It is very free growing, and one of the most ornamental plants imaginable. As a pot plant it surpasses the best Palms, and can be compared only to some of the rare Dracenas. As a bedding plant, planted out in full sun, it is simply elegant, making a specimen which for ornamental foliage has no equal. It is a free, vigorous and easy grower, succeeding in all situations and under all conditions. Being so very cheap, we trust all our customers will plant it. It is sure to delight all. 15c. each.

CYPERUS

(OR UMBRELLA PLANT)

A strikingly handsome plant, suitable for house or outside, of easy culture, and sure to give you complete satisfaction. It reproduces itself from the roots, and may be sub-divided. It requires an ample supply of water, and is almost an aquatic plant. Each, 10c.

STAPELIA CACTUS

(STAR FISH CACTUS)

Stapelia bears beautiful and very large flowers of leathery texture, buff yellow with maroon markings of wonderful construction. Astonishes with its profusion of bloom and distinct character. It grows with the greatest ease in any kind of soil, and flowers when quite small. Plants, 15c. each.

PHRYNIUM VARIEGATUM

QUEEN CACTUS

This grand Cactus grows several feet high. The flowers appear at evening and last all night, and are the grandest of all night-blooming plants, nearly ten inches across, and of the purest white color, delicately shaded pink outside, with a most lovely form and texture. It is not unusual for a large plant to have 30 to 40 of these enormous flowers open at once. It blooms freely every year. Plants, each, 25c.

KING CACTUS

A magnificent day bloomer. A fitting companion to the Queen. The enormous flowers are rich crimson, with a delicate purple shading towards the centre. The flowers keep perfect several days, and it is not uncommon for a good plant to have more than 50 flowers open at once. Plants, each, 25c.

NIGHT BLOOMING CEREUS

(THE QUEEN OF NIGHT)

Decidedly the grandest flowering plant in cultivation. Imagine a dozen flowers unfolding with the setting sun their hundreds of white wax-like petals, encircled by a wreath of gold in continual motion! Imagine such a flower three feet in circumference, perfuming the surrounding air with the most delicious fragrance known! Does it not deserve its royal title? It grows and blooms with the greatest ease, requiring absolutely no care, living for months without water, increasing in value yearly. We have the genuine variety, the only one with fragrant flowers, 12 to 20 inches across. Plants by mail, each, 25c.

CAREX JAPONICA VARIEGATA

CORDOLINE, or DRACENA

Cordoline Indivisa. One of the most useful classes of plants for decorative purposes. The narrow leaves are green and bronze; a very graceful plant for the centre of vases or hanging baskets, each, 20c.

DAISY

(SNOW CREST)

A most distinct variety and an improvement on all existing sorts. Its habit of growth and size of flowers, in comparison with older varieties, are gigantic. The flowers are borne on stout stiff stems, from 6 to 10 inches long, and of the purest white and full to the centre. It makes an admirable hardy garden plant. Each, 10c.; 3 for 25c.

CORDOLINE

EUPHORBIA, or THORN PLANT

Not many plants will give greater satisfaction than this, because of its easy growth and beautiful coral red flowers, well set off by its clean green foliage, which are produced in abundant trusses during the entire season, and especially in winter, when flowers are scarce. The stems are not so thorny but that they can be trimmed into various graceful forms, as shown in cut. The Japanese have procured some wonderful examples in that line. Altogether it is sure to please, no matter how grown. Price, 15c. each.

EUPHORBIA

EVER-BLOOMING CARNATION PINKS

Few other flowering plants present such an array of intense and gorgeous coloring, beauty of form and exquisite fragrance as the Carnation, and to such an extent has it been hybridized by its admirers that the varieties have become almost innumerable. Every year many new and excellent varieties are introduced as claimants for first place; the consequence is that we must try a great many, and exercise the utmost care that those which we offer are among the most desirable, and thus save our customers the trouble and risk in offering a long list to choose from, who have not the advantage of seeing them before making their selections. We are confident that the following selection will be found entirely satisfactory, and which are acknowledged by Carnation growers to be the very best; many of them are of most recent introduction. No other flower is more admired for winter-flowering in the greenhouse or window garden. They are the main dependence of the average florist for cut bloom during winter. The best way to obtain them is to get young plants in the spring and put them out in the garden. Keep the tops of all long shoots pinched off so as to form compact plants; and nip off all buds that appear previous to the first of August; after that allow all to grow. Take up and pot the plants the first of October and remove to the house; they will soon commence to bloom and continue through the winter.

Carnation, Flora Hill. The grandest white variety to date, and destined to be found in every greenhouse because of its easy management. The flower is of enormous size and rounded build, and wonderfully free in bloom; stems are strong enough to support the blooms nicely, and they keep stiffening as the season advances; good calyx; not subject to rust. This is, without exaggeration, as prolific a bloomer as the Carnation family affords. Each, 15c.

Geo. M. Bradt. (Seedling 1893.) Color clear white, heavily edged and striped with bright scarlet, giving it a very bright and cheerful appearance. Flowers large and full, with centre petals standing erect, giving the bloom a well-rounded form; calyx resembling Mme. Albertini; habit strong and vigorous. This variety is now in its fifth year, and has proven the most even and constant bloomer from early to late. Each, 10c.

Daybreak. Of perfect habit and a very healthy grower; every flower is borne on long individual stems, there never being more than one bud on a stem. Flowers are of largest size and perfectly double. Color, clear, bright flesh tint, without shading. Each, 10c.

Goldfinch. Light clear yellow, edged with pink. Medium size, very double flower on stiff stems fourteen to eighteen inches long. Plant an upright free grower and the freest bloomer with us of all the yellow Carnations. Very healthy and vigorous. Does well on all soils. It is growing better with us this year than ever before. Cuttings root freely, and we consider it a very desirable yellow Carnation. Each, 10c.

DAYBREAK

Harrison's White. This variety has excited a great deal of interest among carnationists, and is one of the best yet introduced. It

is a pure white sport from Wm. Scott, a little different in style of grass, but having every good point of Scott. Much has been said about the character of the bloom, and its similarity to the parent, also the nature of the growth. Experts have examined these with the result that the flowers are pronounced similar to the parent. The flower stem and calyx are absolutely identical with the parent, but the petalage, in some instances, varies, being slightly flatter and contour. These slight variations in petalage

are of no consequence, but rather help the flower than otherwise, giving it a larger spread and better appearance than the variety from which it has sported. The plants are singularly healthy and propagate well. This grand Carnation should be in every collection. Each, 15c.

Mayor Pingree. Color clear lemon yellow, lightly marked with pink and occasionally splashed with white. A very strong robust grower, continuous bloomer, and not a cropper. Blooms measure 2½ to 3 inches and over in diameter. Stems extraordinarily stiff, and from 18 to 30 inches long as the season advances. Excellent keeper, very productive. Cuttings strike readily, and promises to be a splendid yellow commercial Carnation. Certificated wherever shown. Each, 10c.

Triumph. This grand variety will not take rust, though surrounded by it. Color, a pure bright pink; blooms of the very largest size, on erect stems 2 to 3 feet in height; never bursts its calyx; a strong grower; a splendid keeper and traveler. Already in heavy demand, as growers are finding out its capabilities. Each, 15c.

Ontario, New White. Introduced by John H. Dunlop, Florist, Toronto. The plants are free from disease, clean, healthy growers, flowers of a large size. Has been awarded first prize and also certificate of merit. Each, 15c.

President Garfield. Color a deep rich scarlet-crimson; ends of petals twirled in shell-like fashion. The flowers are produced in great abundance. Each, 10c.

Portia. A valuable addition to the list of Carnations. Flowers of a brilliant scarlet, and remarkably sweet-scented; on this account the flowers are always in great demand. Plant a strong grower of bushy habit. Each, 10c.

Wm. Scott. Flowers large and non-bursting, of a deep pink, a little irregular, but not to any disadvantage; it helps to overcome the sameness and stiffness which are so often objectionable in a bunch; stems long, of good strength. Each, 10c.

The above Collection of 11 Select Varieties for only \$1; or 6 of our selection for 50 cents.

You are cordially invited to visit our Greenhouse and Trial Grounds, 1514 Queen St. East.

CHRYSANTHEMUMS

A Select List of the Newest and Best

The Chrysanthemum is among the handsomest, most valuable and popular late autumn and early winter flowering plants, and may be truly called the "Queen of Autumn." Our list embraces but a small number of the numerous varieties now in cultivation, but which will be found to possess more than ordinary merit, and includes several shades of colors, various forms and sizes, making an assortment large and varied enough to meet all requirements, and such as are most popular with florists and lovers of this grand flower.

Young plants should be obtained in the spring, and may be either planted in the ground or remain in the pots, by sinking the pots well below ground; in this way they will require repotting about twice during the season. As soon as the plants begin to throw up shoots, pinch off the tops, and repeat this two or three times up to Aug. 1st, not later, as the buds then begin to form. In September or October those planted in the open ground should be lifted and potted after copious watering the day before. The plants will soon recover the effects of lifting if kept in a sheltered, shaded place a few days. They must be fed liberally with water and liquid manure, or water and mulching with well rotted cow manure. Never let your plants wilt, nor expect large perfect flowers if grown in poor soil. To get the largest and most perfect flowers, allow only one bud, not more than two buds, to each shoot; remove all other buds as soon as or before they reach the size of small peas, but exercise care not to injure the shoots when disbudding.

A. H. FEWKs

CHRYSANTHEMUMS

The following varieties 10c. each, except where noted

We have this season grown and tested the cream of the newest varieties, and select from them the following as worthy and valuable introductions.

- Chrysanthemum, A. H. Fewks.** Excellent habit; dwarf; a strong grower; bright yellow.
- Fisher's Torch.** Pure deep red, flowers quite full, but flat. One of the best; 4 ft.
- Glory of the Pacific.** Pink, of good form, large size, with broad, finely reflex petals, showing its clear, pink color to great advantage. Comes in with Mad. F. Bergmann, just what is wanted with florists. Height, 2½ ft.
- G. W. Childs.** Rich, velvety crimson, tipped gold, large flat flowers. 4 ft.
- Gretchen Buettner.** A magnificent white variety; large flowers, very beautiful and striking. In color it is pure snowy white, in form grand, with good stem and fine foliage.
- Ivory.** Snow white, perfect form, flowers large, incurved; very early. 2½ ft.
- J. E. Lager.** Clear yellow; reflex Japanese; large and very early. 3 ft.
- Mayflower.** A grand, bold white; flower very large and incurving. It has a strong stem and good foliage. A fine exhibition variety.

- Major Bonnafon.** Soft clear yellow; globular incurved, full centre; 3 ft.
- Modesto.** Color intense yellow, large in size, of an incurved, slightly whorled form with very high full centre; matures about Nov. 15th. Height, 4 ft.
- Mrs. Henry Robinson.** Purest white, immense incurved, broad channelled petals; bloom large and globular, very early. 3 ft.
- Mrs. H. Weeks.** An immense flower with broad claw-like petals, incurving to form a globe of white, a few outer petals reflexing; of medium height. A grand variety and sure to become a leader.
- Mme. F. Bergmann.** Pure white with creamy centre, early; 2½ ft.
- New York.** Color white, very large incurved Japanese, densely packed with petals, regularly formed, filling up well to the centre; foliage and stem good and able to sustain its massive bloom.
- Philadelphia.** White, illuminated with lemon yellow, blooms large, globular, incurved and whorled; indispensable for exhibitions. 3 ft.
- Pink Ivory.** Shell pink, incurved, large, early; florists' favorite. 2½ ft.
- Western King.** The best white yet introduced for commercial or exhibition blooms, or for plants, either bush or single stem. An incurved flower, with outer petals slightly reflexing; pure white, maturing Nov. 1st; height, 3½ to 4 ft; good from either bud; stem and foliage excellent; no variety has been as highly commended.

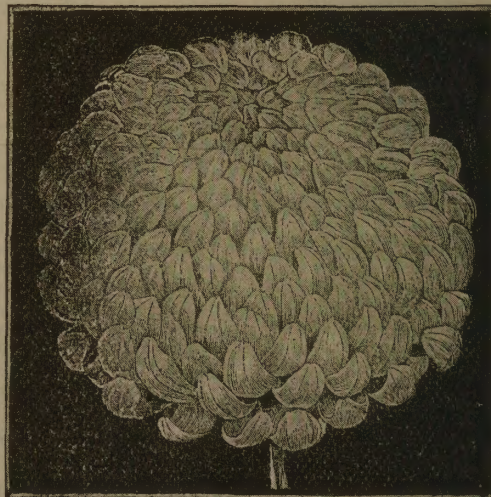

OSTRICH PLUME CHRYSANTHEMUMS

Chrysanthemum, Mrs. Alpheus Hardy. It is pure white, immense, broad petalled and incurved, the surface being downy, like loose piled plush, frosted, glittering white.

L. Boehmer. Color an exquisite shade of silvery pink, with deep rose on the inside of petals. These curve gracefully inward, and have the same wonderful hair-like growth on them as Mrs. Alpheus Hardy.

W. A. Manda. The new golden yellow hairy Chrysanthemum; flower very large, borne upright on a stout stem.

Each, 10c.; the 3 for 25c.

PINK IVORY

FUCHSIAS

PHENOMENAL

—**Phenomenal.** A giant among Fuchsias. The largest that has ever come to our notice, a red-dish crimson color; corolla very full and double, of a beautiful azure violet, flaked with red. Each, 15c.

—**Earl of Beaconsfield.** Vigorous growing free flowering variety; tube and sepals light rosy carmine; corolla deep carmine. Price, each, 10c.

—**Speciosa.** This is a genuine winter bloomer, and all who know it value it very highly for this quality. The habit of the plant is erect and compact, presenting a decidedly neat and attractive appearance as a pot plant. The flowers are four inches or more in length; the tube and sepals bright rose; corolla brilliant carmine. It blooms quite freely, plants in two-inch pots frequently producing flowers; but large, well-established plants will bloom more freely and produce larger clusters. Each, 10c.

GLOIRE DES MARCHES

Fuchsia, Madam Bruant. This is a novel and distinct new Fuchsia, entirely different in color from any other variety with which we are acquainted. The flower is very large and double. A fine large rounded corolla with strongly recurved sepals as shown in our engraving. The corolla is a delicate heliotrope color, suffused with rose, slightly marked and veined with carmine; sepals deep coral red. Plant a vigorous grower and of fine graceful habit. This is a decided new color in Fuchsias, which, combined with its fine large flowers and splendid habit, will make it popular with all lovers of this beautiful class of plants. Each, 15c.

—Gloire des Marches.

A new distinguished French Fuchsia, which promises to be a most useful variety. It is a strong grower, of fine upright branching habit, very abundant in bloom. Corolla large, double and pure white; sepals bright red. One of the finest double white Fuchsias we have yet seen. Lovers of this most attractive flower will find it a gem. Each, 15c.

STORM KING

—**Storm King.** One of the numerous varieties of Double White Fuchsias sent out the past few years; this is certainly perfection. It is of strong, vigorous growth, of elegant habit, free from all disease, and produces its pure double white flowers in the greatest profusion. Each, 10c.

—**Lord Macaulay.** This splendid new single variety is a very rapid grower and free bloomer, with a large expanded corolla of the deepest purple; sepals are a little lighter in color. We especially recommend this variety for house culture. Price, each, 15c.

SPECIAL OFFER.—We will mail (postpaid) the above eight varieties of Fuchsias for 90c.

FICUS OR INDIA RUBBER TREE

Ficus elastica. The well known India Rubber Tree, one of the very best for table or parlor decorations; its thick leathery leaves enable it to stand excessive heat and dryness, while its deep glossy green color always presents a cheerful aspect. Fine plants, 12 to 15 inches high, each, 50c.; 15 to 20 inches, each, 75c. (postpaid).

TRAILING QUEEN

—**Trailing Queen.** This Fuchsia differs from all others in habit of growth. Instead of growing upward the young branches spread out toward the edge and then droop downward, continuing this way until the vines are four feet more in length, and covered with handsome foliage. The flowers are borne in clusters, large, long and graceful. The corolla at first is deep violet purple, changing to crimson; buds, tubes and sepals rosy scarlet. Each, 15c.

MAD. BRUANT

"We received Plants last night and think they are grand."—Dundalk, Ont.

GERANIUMS

Our list embraces many new and the most desirable old and standard varieties suitable for bedding and pot culture. Nothing is more desired than a bed of bright Geraniums.

IVY-LEAF GERANIUMS

A splendid class of climbing or trailing Geraniums, adapted for baskets, vases, rock work and trailing on trellises. They bloom with the greatest freedom during the spring and summer. The following are among the newest and best varieties in cultivation.

Geranium, Beauty of Castlehill. A most beautiful variety, producing enormous flowers of a lovely soft shade of rose, with a dark blotch on the upper petals.

—**Beauty of Jersey.** Lovely scarlet, shaded purple; fine truss. One of the best.

—**Gen. Championnet.** A grand scarlet, as double as a rose, and of largest size.

—**Ryecroft Surprise.** Flowers of a lovely and distinct shade of salmon rose.

—**Souv. Chas. Turner.** One of the finest of its class.

The color is a deep bright pink, approaching to scarlet, the upper petals feathered maroon; quite double. This variety has been awarded numerous certificates at all the leading Horticultural Societies.

Each, 15c.; the set of 5 for 60c.

SWEET-SCENTED GERANIUMS

Our collection contains roses, variegated, nutmeg, mint, apple and other beautiful sweet-scented varieties. Plants, each, 10c.; per doz., \$1

Geranium, Mrs. Taylor. A distinct variety of the Scented Geranium, with a strong rose fragrance and large deep scarlet flowers of the Hybrid Perpetual class. Combining, as it does, free flowering qualities with fragrant foliage, it is very useful for summer cut flowers, and as a pot plant it cannot be surpassed. Plants, each, 15c.

4 for 50 cents.

IVY-LEAF GERANIUMS

MRS. TAYLOR GERANIUM

SINGLE VARIETIES

Geranium, Banquis. A strong compact grower, bearing enormous trusses of large, pure white flowers.

—**Gettysburg.** Bright crimson maroon of beautiful shade.

—**Madonna.** Bright green foliage, the flowers softest shade of pale pink; the florets are large, and grow showy trusses well above the foliage.

—**Mrs. E. G. Hill.** A most pleasing shade of salmon, with light shading at the centre; trusses are very large.

—**Violet Queen.** Enormous truss of beautiful shading of rose and heliotrope.

—**Countess de Harcourt.** Pure snow white, a charming bedder, stands drought to a remarkable degree. Florets large and beautifully formed; extremely free in blooming, forming a bank of white.

—**Souvenir de Mirande, or Peach Blossom.** A fancy sort, equally good for pot culture or bedding. A nice grower, with brilliant green foliage of fine texture. It has nicely formed round florets, upper petals cream white, with a distinct salmon rose border; lower petals salmon rose, streaked with pure white; a most novel and pleasing color; it is extremely free flowering and produces fine trusses of its magnificent blooms.

Each, 10 cents; per doz., \$1.00

DOUBLE AND SEMI-DOUBLE

Geranium, Admiration. Beautiful rose pink, borne in large trusses, standing well above the foliage, very double, free flowering, and of dwarf bushy habit. Excellent bedders.

—**Beaute Poitevine.** Very large semi-double florets of the most beautiful and distinct form, and borne in immense trusses; free bloomer; color, brilliant salmon.

—**Benj. Schroder.** Bright green foliage, flowers extremely large, bright, rosy pink color, with distinct white blotch.

—**Mad. Jaulin, semi-double.** Blooms in large, grand trusses; florets very large with salmon pink centre, surrounded with a border of creamy white. For freshness and beauty it is unsurpassed; fine for outdoor bedding and equally good as a specimen plant.

—**General Grant.** A superb bedding variety, with very large truss and brilliant scarlet flowers.

—**Golden Dawn.** Rich orange, the nearest approach to orange yet sent out.

—**La Favorite.** A perfectly double pure white variety. Remarkably free flowering and a perfect ball of snow-white flowers; as a pot plant for house it is very valuable.

—**Le Cid.** Very compact but vigorous in growth. Color brilliant crimson red. Truss and flower very large. Excellent bedder.

Each, 10 cents; per doz., \$1.00

PELARGONIUM

Sometimes called Lady Washington Geraniums. They are well adapted for pot and greenhouse plants, but unsuitable for bedding purposes; the flowers are very large and showy, the petals of which are usually blotched and striped. Plants, each, 15c.

TRICOLOR

Leaves finely variegated. These Geraniums are much prized for the beauty of their foliage, which is very handsome. For culture in the house or conservatory they are among the best.

Geranium, Mrs. Pollock. Leaves bright bronze-red zone, belted with crimson and edged with golden yellow. A beautiful variety. Plants, each, 15c.

—**Sunset.** A rich, broad, golden outer belt, the inner margin of which is overlaid with a bright carmine, and zone of flame scarlet tints. Plants, each, 15c.

—**M'me Sellerol (Silver Variegated).** Very fine for massing or bordering. A thrifty, healthful grower, rarely reaching a height of more than ten inches. Leaves very small, of a peculiar green, edged with pure white. Plants, each, 10c.; per dozen, 90c.

We pay postage except where noted.

GENISTA FRAGRANS

NEW GIANT FLOWERED HELIOTROPE

Efforts to improve the Heliotrope have been persistently made by experts all over the world for a number of years, and at last these efforts have been successful; realization has surpassed the most ardent expectation. One can scarcely recognize the old garden favorite in its new glorified form. The size of the foliage and its quality is doubled; the habit of the plant is made compact and bushy instead of being scraggy and sprawling; the size of the flowers is magnified beyond belief, specimen heads measuring ten to fifteen inches across; the color is made clearer and better. The soul of a flower is admitted to be its perfume, one head of the New Giant being equal to a whole bunch of the old sort. For the garden this new race is admirable, but for pot culture it is beyond valuation. (See cut.) Plants, each 15c.; 2 for 25c.

HOYA CARNOSA (WAX PLANT)

This is an old favorite whose popularity, instead of diminishing, seems to steadily increase. The flowers are bluish white in color, resembling wax, and are borne profusely in large umbels. Foliage is thick and fleshy, very handsome in appearance. It is a quick grower and good bloomer. For window and parlor culture in winter it is a most beautiful and valuable plant. Fine plants, 15 cents.

HOYA CARNOSA

GENISTA FRAGRANS

(SHOWER OF GOLD)

A most desirable spring flowering plant, producing its fragrant, bright, golden yellow flowers in the greatest profusion, flowering so freely as to literally cover the plant with its rich golden yellow flowers when well grown. It is grown in large quantities by the leading florists of the country for decorating purposes at Easter time. As a window plant of the easiest culture it is unsurpassed. Each, 15 cents.

GREVILLEA ROBUSTA

(AUSTRALIAN SILK OAK)

This is a most beautiful plant, with delicate fern-like foliage, and forms a most attractive specimen for any decorative uses. It is of noble habit, and has large divided leaves; in a collection of house plants it is striking and graceful. It will resist drouth to a remarkable degree, and is therefore well adapted to dust and heat of living rooms. Each, 15 cents.

GIANT FLOWERED HELIOTROPE

CLERODENDRON BALFOURI

A beautiful winter-blooming vine. We can safely recommend this grand Clerodendron as one of the most satisfactory plants for window culture now known. It is a vigorous, rapid and healthy grower, and produces an abundance of blooms, which are bright crimson, surrounded by pearly-white petals, producing a striking contrast against the dark green foliage. It can be used for a fine specimen pot plant, and can be grown to fine form by cutting off the ends of the growing shoots. A partially shaded position is conducive to rapid growth. Good strong plants 20 cents each.

BOUVARDIA

(BOUVARDIE)

This is a class of beautiful autumn and winter blooming plants deserving much attention. They are easily raised, and reward the grower with a profusion of brilliant flowers all winter. By plunging the pots in summer a vigorous growth will be insured. "Plunging," as gardeners call it, is sinking the pot in the soil as low as the rim. They should be removed to the house or conservatory in September. 15 cents each.

AUSTRALIAN SILK OAK

ENGLISH IVY

Ivy, English. Not hardy outside, but grand to decorate a room; grows well, with but little light. Each, 10c.

—Variegated Leaved. Leaves completely and beautifully margined with white. Each, 10c.

—German, or Parlor Ivy. A rapid growing kind, well adapted for covering trellis work or training in the parlor. Each, 10c.

FERNS

Sword Ferns. A splendid extra hardy sort, wonderfully well adapted for house culture, succeeding with ordinary care with everyone who tries it. The fronds are often 4 feet long. Makes a fine hanging basket plant for window bracket, throws out runners which quickly make new plants. Each, 15c.; 3 for 35c.

House Ferns. Our collection contains the choicest of the "Maidenhair" varieties and best basket and vase sorts. They are of the easiest culture, and nothing adds more grace and beauty to a home than a few handsome ferns. Each, 15 cents.

MANETTIA VINE

HYDRANGEA

Beautiful blooming plant, adapted to rather shady location. The large clusters of flowers resemble the Snowball, only being much larger.

Hydrangea, Otaksa Monstrosa. One of the most valuable plants that has been introduced in years and cannot fail to become very popular as a decorative plant. The trusses of flowers are of enormous size even on quite small plants. Color intense deep rose. Plant a strong free grower and remarkably free in bloom. A valuable addition to our list of plants for Easter decoration. Also makes elegant specimen plants for the porch or lawn, being a mass of bloom the whole season. Plants, mailing size, each, 15 cents.

—**Thomas Hogg.** This is one of the finest varieties grown. The flowers are produced in large heads of white, shading to pink. It is hardy through the South, or can be cultivated as a tub plant. It certainly has no equal for show or attractiveness. Plants, mailing size, each, 15 cents.

—**Paniculata.** (See Hardy Shrubs.)

MEXICAN PEPEROMIA

A new Mexican plant. It is a lovely trailer, to be used as one would use the old "Wandering Jew." It makes an attractive trailing or creeping vine, as its leaves are exceedingly beautiful, being a dark velvety greenish black, freely blotched with silver. It is very beautiful for any position where a trailing plant can be used. Plants, each, 15c.

MEXICAN PRIMROSE

MEXICAN PRIMROSE

A charming basket or pot plant, introduced recently, and is certainly an acquisition to this class of flowering plants. It is strictly a perpetual bloomer, a good specimen showing from 10 to 20 large saucer-shaped blossoms, about 3 inches across, of a beautiful, bright clear pink color, veined with scarlet, and a white centre. The superb colors, combined with airy grace and beautiful form, go to make a flower which is, in beauty, perfection itself. The plant grows about 10 inches high, inclining to a trailing habit, holding its large silky flowers erect. As a window plant or for open ground culture it is desirable, early frosts not injuring it, and will bloom on until frozen solid within the ground, or if taken in the house in the fall will bloom on uninterruptedly all winter. Strong plants, 3 for 25c.; each 10c.

MANETTIA VINE

Manettia Bicolor. This beautiful vine can be grown either in the house or garden and blooms the greater part of the year. In open ground it will grow 10 feet, branching freely, showing thousands of bright blossoms. The flowers are the size shown in the cut, and of the most intense fiery scarlet, shading off into bright yellow tip; they are also covered with a scarlet moss of hairy substance. No plant is easier to grow, and it commences to bloom at once from the smallest cuttings, and continues to bloom most profusely at all times. It is a grand plant, and of striking beauty, attracting the admiration of every eye. Strong healthy plants already budded and blooming, 3 for 25c.; each, 10c.

HYDRANGEA

Manettia Cordifolia. A variety of rapid growth, with deep glossy green foliage, and a wonderful profusion of crimson-scarlet tubular flowers, one and a half inches long, borne on long stems. Price, each, 10c.

MOON FLOWER

A very rapid growing vine, which will easily cover a surface of 25 by 40 feet during the season. At night and during dull days the plants are covered with an abundance of pure white fragrant flowers, three to four inches in diameter. One of the most showy of the annual climbers. Price, each, 15c.

JESSAMINES

Jessamine, Grandiflorum (Catalonian Jessamine). One of the most desirable. The plant is of shrubby, half-climbing habit, with very delicate foliage, and its small, star-shaped, fragrant flowers are produced all the year round. Each, 15c.

—**Revolutum.** A strong climbing plant with glossy leaves and single, deep yellow, fragrant blossoms. A beautiful plant and easily grown. Each, 15c.

JESSAMINE GRANDIFLORUM

MOON FLOWER.

PALMS and other DECORATIVE PLANTS

A few Palms and other decorative plants are most useful and ornamental in the window or parlor; they are very hardy, easily managed, and will repay the small cost. No class of plant is in greater demand, and that our customers at a distance may obtain them, we will send any of the sizes under 20 inches high by mail, postpaid; those of 20 inches and upwards are too large for mailing; they can be sent only by express, purchaser paying carriage. We carry a large supply at all seasons of the year.

KENTIA BELMOREANA

This is sometimes called the Curly Palm, and is recognized as among the best for all purposes, being capable of standing more ill usage perhaps than any other. The leaves have a tendency to curl as the plants grow older, hence its popular title of Curly Palm. Price, 12 to 15 ins., \$1; 16 to 20 ins., \$1.60, by mail, postpaid; 20 to 24 ins., \$2.25, by express at purchaser's expense.

KENTIA FOSTERIANA

The leaf segments droop instead of curving upwards as in *K. Belmoreana*, which it much resembles in other fine points. Price, 18 to 20 ins., \$1, by mail, postpaid; 20 to 24 ins., \$1.50, by express at purchaser's expense.

SEAFORTHIA PALM

SEAFORTHIA ELEGANS

Well known the world over for its feathery grace. One of the most elegant and useful species for conservatory or greenhouse. The fronds of old plants are from 6 to 10 feet long, dark green, perfectly smooth, and composed of many narrow pinnae. Nice plants, 75c. each, by mail, postpaid.

LATANIA BORBONICA

A very desirable species, one of the handsomest and most useful in the genus. It is of free and rapid growth, resisting dust and gas well, and showing its characteristic habit at an early age. Leaves very broad and beautiful; leaflets much recurved. Price, 10 to 12 ins., 75c. (post-paid); 6-in. pots, \$1; 7-in. pots, \$1.50 (by express at purchaser's expense).

PANDANUS UTILIS

A grand decorative plant. Its glossy dark green foliage, gracefully arranged, renders it particularly attractive, and one of the most useful of our ornamental foliage plants. As a vase plant or single specimen in greenhouse or conservatory it cannot be surpassed. Small plants by mail (postpaid), 30c.; large size, 60c.

LATANIA BORBONICA

PANDANUS UTILIS

CYCAS REVOLUTA

This is the so-called Sago Palm, and is sometimes called the Japanese Fern Plant. In young plants the stem is bulb-like, but develops into a stem or trunk as it grows older. The leaves, which are like Fern fronds, are remarkable for their great beauty, which is retained for years, as the leaves do not die and drop off every year. While the frond-like leaves are of most graceful appearance, they are also of a firm, strong texture and difficult to injure. They are of a dark, deep green, and look as if varnished. It may well be termed a "family plant," as it lives to a great age, growing finer and more valuable every year. As a decorative plant, both for indoor and outdoor (in summer) use, it is without a rival, for its noble and majestic habit is most impressive; it is very hardy, its heavy glossy fronds resisting alike the gas, cold and dust. Pots should be well drained and water applied sparingly during the winter. We offer fine plants \$1 each, postpaid, and specimen plants \$1 to \$3 each, by express at purchaser's expense.

KENTIA BELMOREANA

ARECA LUTESCENS

A remarkably fine decorative Palm, with long arching fronds of firm texture, and rich shining green above and below. A robust grower, soon developing into fine specimens, well furnished with leaves. Nice plants, \$1 each (postpaid).

COCOS WEDDELIANA

A perfect little gem; one of the most elegant and graceful little Palms that has ever been introduced. The plant is dwarf and very neat; leaves whitish green on the underside, and arching most gracefully. It is finely adapted for decoration of all sorts, and easily endures the hardships usually falling to house plants. Nice plants, 30c. and 60c. each (postpaid).

MUSA ENSETE

The leaves are magnificent, long, broad and massive; of a beautiful green, with a broad crimson mid-rib; the plant grows luxuriantly from 8 to 12 feet high. During the hot summer, when planted out, it grows rapidly, and attains gigantic proportions, producing a tropical effect on the lawn, terrace or flower garden. It can be stored in a light cellar or cool greenhouse during the winter, with a covering of soil, or planted in a tub and watered sparingly. Plants, 25c. each (postpaid).

CYCAS REVOLUTA

We cordially invite all our Customers to visit our Greenhouses and Trial Grounds, 1514 Queen Street East.

RUSSELLIA JUNCIA**RUSSELLIA JUNCIA**

This plant has long, wiry, leafless stems, which grow in graceful, drooping masses, flowing like hair. On these bare stems are borne quantities of long, tubular flowers of the most vivid scarlet color, something like a *Manettia* bloom, but more numerous. It is a novel, beautiful plant, suitable either for beds in summer or for pot culture. In pots it blooms the entire year, especially during the winter and early spring months. The great drooping masses of bloom are like a fountain of coral, scarlet and green. It is one of the very easiest of house plants to grow, and certainly one of the most brilliant and persistent bloomers. It is a valuable addition to our standard list of best plants. Each, 15c.

STROBILANTHES DYERIANUS

It forms a compact bush, 18 inches high, with leaves 6 to 9 inches long, 3 or 4 inches wide, and of the most intense metallic purple color, shading into light rose with a light green margin, a combination unapproached by any other plant; it easily surpasses a *Coleus* or *Begonia* for a novel effect. The flowers are a lovely violet blue, very beautiful. It has created a veritable sensation wherever exhibited. Price, each, 15c.; 2 for 25c. (See cut).

NERIUM OLEANDER

SANSEVERIA ZEALANICA

A beautiful plant, splendidly adapted for house decoration, as it stands drouth and dust with impunity. The leaves grow to a length of 3 to 4 feet, and are beautifully striped crosswise with broad, white variegations on a dark green ground. It is a rare and beautiful plant, which should be abundantly grown for positions out of the reach of sunlight, where other plants will not thrive. It has a singular beauty for decorative purposes which other plants do not possess, and is useful both winter and summer. For vases or baskets it makes a fine centre piece, and it grows splendidly out of doors during the summer months. Price of strong healthy plants, 15c.

SMILAX

A very graceful climber, possessing the rare qualities of delicate and tolerably dense foliage and vining habit, admirably adapting it to climbing or drooping, as may be required. It is also fine as a parlor or window plant. 10c. 6 for 50c.

SMILAX

SANSEVERIA ZEALANICA

OTAHEITE ORANGE

A very beautiful pot plant, with glossy, evergreen leaves, and producing flowers as large as the regular orange blossoms, and with the same delicate sweet fragrance, and bears a small pretty fruit resembling a miniature orange, that will remain on the little bush like balls of gold for many weeks after they are ripe. They will bloom and fruit in a two-inch pot, and if given a fair-sized pot and good care they will yield bloom and fruit the greater part of the year. As a window plant they are unique, and we know of no other that is more attractive; its delicate leafy sprays of bloom are indescribably dainty and fragrant. It is as easily managed as an ordinary geranium. Plants, 25c. and 40c. each.

STROBILANTHES DYERIANUS

NERIUM OLEANDER

The Oleanders are too well known to require extended description. No plant is easier to manage; the flowers possess a fragrance almost rivaling the rose, and a well grown specimen in bloom is an object of great beauty. In the fall they can be removed to the cellar, where they will require no further attention until spring.

Oleander, Rosea Splendens. Double pink, very fragrant. A beautiful variety, producing its flowers in great abundance. Each, 15c.

TRADESCANTIA

A beautiful trailing vine, the foliage of which is composed of many colors; bronze, silver, pink, grey, rose, crimson, etc. It is very beautiful and will grow in any part of a light room, whether the sun strikes it or not. It grows rapidly and propagates freely. Very beautiful for decorating. Each, 10c.

ORANGE TREE

SOLANUM GRANDIFLORA

A beautiful plant that grows to the height of about 6 feet, and is covered with large clusters of fine star-shaped white flowers. It is a splendid pot plant for winter culture, and one of the best summer-blooming climbers ever introduced. It is indeed a grand sight to see this and *Manettia* Vine trained side by side on a trellis, mingling their beautiful blossoms. The demand for this beautiful plant has decided us to grow a large stock this season, and we have made the price exceedingly low. White and blue flowering varieties. Each, 15c.

**NEW DWARF
JUSTICIA VELUTINA**

An elegant new plant for pot culture and bedding, which we are sure our friends will like to have; begins to bloom when only a few inches high, and continues bearing its beautiful feathery plumes of lovely pink flowers the whole season, and when taken indoors will bloom all winter, too. Each, 20c.

**CARYOPTERIS
MASTOCANTHUS**

(BLUE SPIRÆA).

A handsome, half-hardy perennial plant introduced from China. It is of vigorous growth, producing flowers in great profusion the whole length of its branches, even young plants in small pots flowering freely. The color is a rich lavender or sky blue. A valuable plant either for bedding or pot culture, blooming continuously from midsummer until cut by frost in the Fall. Plants, each, 10c.

NEW DWARF JUSTICIA VELUTINA

AQUATIC PLANTS

Can be grown in a very simple yet effective way by use of oil barrels cut in two. The tubs can be arranged in a row, each one a little higher than the one next to it. The tubs may be connected with short pieces of hose; a small stream of water can be kept constantly running into the highest tub, the overflow of which will run from tub to tub, thereby changing the water in all. They can also be arranged in groups, in rockeries, etc. About the middle of May the tubs should be placed in position and filled to half their depth with a mixture of loam and well decayed manure, which should be covered with two inches of sand after the roots are planted, to prevent the manure from rising to the top.

NYMPHÆA ODORATA.

The well-known fragrant pond lily. Its pure lovely white flowers, so common in some locations, are worthy of a place among

SPIRÆA ANTHONY WATERER

THE CRIMSON SPIRÆA

(SPIRÆA "ANTHONY WATERER")

Is acknowledged as the ideal florists' plant. When scarcely three inches high it begins to bloom, and thereafter is seldom out of flower. As a house plant nothing can equal it. In the garden it will make a plant 3 ft. high and wide, and will be covered with heads 1 ft. across of brilliant crimson flowers. It was introduced last year. Mr. Golding, of the Royal Gardens, Kew, says of it: "It is one of those exceptional novelties that occur at rare intervals." Plants, each, 10c.; 3 for 25c.; large plants, 20c. each.

CARYOPTERIS MASTOCANTHUS

PARROT FEATHER

the choicest varieties where cultivated. All *Nymphaeas* of this type are useful for naturalization. Each, 10c.

NYMPHÆA FLAVA. This is a true Water Lily, with yellow flowers and a delicate perfume. Its leaves are beautifully variegated with brown. It is a very desirable variety, either for pond, tub or aquarium. Each, 25c.

PARROT'S FEATHER (MYRIOPHYLUM PROSERPINACOIDES). An aquatic hanging plant; is a novelty indeed, and we have it to perfection in this dainty little jewel. Its long trailing stems are clothed with whorls of the most exquisite foliage as finely cut as the leaves of the Cyprus Vine and much more delicate. Planted in a watertight hanging-basket, so water can be kept standing on the surface of the soil, it will trail down over the sides in a most charming manner. In a tank or lake it prefers shallow water. Plant 3 in a pot. Each, 10c.; 3 for 25c. (See cut).

See page 41 for our superb assortment of *Gladiolus*.

SWAINSONIA GALEGIFOLIA

A most desirable ever-blooming plant, flowers produced in sprays of from 12 to 20 flowers each, the individual blooms resembling a Sweet Pea. As a decorative plant for the window or conservatory we know nothing that will give as much satisfaction as the Swainsonia. Its easy culture, growing in almost any light position, its freedom of bloom, rarely ever being out of bloom, and the grace and beauty of the flower, and entire plant, will undoubtedly make this one of the most popular plants in cultivation.

Swainsonia, White. Large milky white flower, exquisite; each, 15 cents.

—**Rose (new).** Fine dark rose, with large white blotch on wings; a superb variety; each, 15 cents.

SPECIAL OFFER—One each of above 2 Varieties for 25 cents
VIOLETS

These popular and fragrant plants can be forced in a cool window or cold frame, but must have lots of fresh air. The single varieties flower most abundantly, but the double flowers are much larger and more showy.

Violet, The California. The flowers are single, intensely fragrant and a clear violet purple that does not fade out. They are very large, some covering a silver dollar, and borne on stems from ten to fourteen inches long, giving them unusual value as cut blooms. Each, 10c.; 6 for 50c.

—**Luxonne (new).** It is of the same size as the California, but appears nearly double its size, as all the petals open out flat, and has the advantage of flowering continually from early in September until April, and does not come in crops like the California. It is of a beautiful rich, but soft violet purple color, with strong, stout stems from 9 to 12 inches long, and very fragrant. Each, 10c.; 6 for 50c.

—**Marie Louise.** Rich dark blue with white eye; very double and fragrant. Each, 10c.; 6 for 50c.

SPECIAL—One each of the above 3 Varieties for 25 cents

SWAINSONIA GALEGIFOLIA

THE HARDY DOUBLE ENGLISH VIOLET

This Violet is entirely hardy, perfectly double, a deep violet purple color, and most deliciously fragrant. It surpasses the well-known "Marie Louise" Violet in richness of color, being many shades darker, and far excels it in its delightful odor; this is one of its greatest merits. It is entirely free from disease of any kind, will bloom and grow in any garden and in any situation. Nothing is more appropriate for cemetery plots than the Hardy Double English Violet. (See cut.) Strong clumps, 20c. each, 3 for 50c.

SALVIA (WM. BEDMAN)

The plants form handsome globular bushes about two feet high by two feet in diameter. The spikes grow erect, and stand clear above the foliage, completely covering the plant, and are of the most brilliant dazzling scarlet. Each, 10c.

WATER HYACINTH

One of the most remarkably curious and beautiful plants we have ever grown. Instead of growing in soil it floats in the water, which it is enabled to do by means of its curiously inflated leaf stalks, which resemble bladders or balloons filled with air. A large mass of feathery blue roots grow downwards, their ends entering the soil. It forms a lovely rosette of curious shining green leaves, and throws up spikes of the most exquisite flowers imaginable, resembling in form a spike of Hyacinth bloom. Color, a beautiful soft lilac rose, sparkling as if covered with diamond dust. Can be grown in the open air in summer and in the window in the winter, in anything which will hold water. Each, 10c.

SPECIAL COLLECTIONS OF PLANTS

50c. WINDOW COLLECTION

- 1 **Rose, Hermosa.** Admirably adapted to pot culture.
- 1 **Mexican Primrose.** A charming basket or pot plant; perpetual bloomer.
- 1 **Sword Fern.** A splendid Fern, wonderfully adapted for house culture.
- 1 **Solanum Grandiflora.** A beautiful pot plant for winter culture.
- 1 **Geranium, La Favorite.** A perfectly double pure white flower; as a pot plant for house it is very valuable.
- 1 **Fern, Pteris.** A good plant for the window.
- 1 **Fuchsia, Speciosa.** A charming variety, and the freest flowering of all Fuchsias.
- 1 **Begonia, Weltoniensis.** Produces lots of waxy pink blossoms.
- 1 **Begonia, Vernon.** A good house plant; flowers deep red, changing to rose.

\$1.00 GARDEN COLLECTION

- 1 **Anemone, Whirlwind.** Flowers $2\frac{1}{2}$ to 3 inches across, have several rows of pure white petals.
- 2 **Heliopsis, Pitcheriana.** A beautiful free-flowering hardy perennial; flowers single yellow with dark centre.
- 2 **Gaillardia Grandiflora.** Flowers produced on long stems, and are excellent for cutting, and of the most gorgeous colors.
- 2 **Helianthus.** These glorious flowers hardly need description.
- 1 **Rudbeckia.** A vase filled with these lovely flowers is a grand sight.
- 2 **Achelia Alba.** A free-blooming hardy white perennial, blooming from early Spring until Fall.
- 2 **Perennial Phlox.** Producing a gorgeous display of bloom from midsummer until checked by frost.
- 2 **Delphinium.** One of the best perennials known.
- 2 **Dahlias.** Best show varieties. 2 **Cannas.** Mde. Crozy's best.

We send these Collections carefully packed (postpaid).

HARDY SHRUBS AND

HERBACEOUS PLANTS

By this term is meant such plants as may be allowed to remain permanently in the open ground.

HARDY SHRUBS. These are exceedingly attractive for lawns or borders, and will increase in size and beauty from year to year, some being valuable for their floriferous habits, while others are prized for their ornamental foliage. They are a source of pleasure continually.

READ THIS  **HERBACEOUS PLANTS** are those whose foliage dies to or near the ground each autumn, coming forth again with renewed vigor the following spring. There are yet but few who secure the best results from open air gardening, while anyone with a few rods of ground may enjoy a beautiful and permanent flower garden by planting these herbaceous or perennial plants; their first cost is the only cost, as they increase in size and beauty from year to year. The varieties herein will succeed each other and give flowers from early spring until cut down by frost in autumn, and make the garden a source of unflagging interest. With slight attention to their selections, varieties may be had for any condition of soil, wet, dry, sunny or shady—there are plants for all.

ACHELIA ALBA

("THE PEARL")

One of the very best white flowered plants for the border. The flowers are borne in the greatest profusion the entire summer on strong, erect stems. Pure white in color, somewhat resembling Pompon Chrysanthemums. As a summer cut bloom it is a great acquisition. Each, 10c.; 3 for 25c.

AQUILEGIA

(COLUMBINE)

These make elegant border plants, unrivalled for beauty of form and rich blending of colors. Our collection includes a variety of colors, although not offered separate; they will give a pleasing effect to any flower garden. Each, 15c.; 2 for 25c.

ALTHEA

ACHELIA ALBA, "THE PEARL"

ANEMONE, "WHIRLWIND"

A new semi-double form of Anemone Japonica Alba, which is supposed to be a cross between this beautiful variety and A. Japonica Rosea. In general style and habit it is identical with the white Anemone. It is of the same strong habit of growth, and is even more free-flowering than the original type. The flowers, which are $2\frac{1}{2}$ to 3 inches across, have several rows of pure white petals, and have the advantage of lasting much longer than the single varieties. We consider this a good acquisition, and cannot recommend it too highly. Clumps, each, 15c.

FUNKIAS, or DAY LILIES

Handsome hardy foliage and flowering plant. Their noble aspect, elegant outline, and bold luxuriant foliage, render them exceedingly attractive for large effective clumps, succeeding in sunny positions, and equally well in shady places where many plants would not exist. They are also much grown in Europe for greenhouse decoration in winter.

Funkia, Aurea Malculata. Beautiful, golden striped foliage, very handsome. Each, 15c.; per doz., \$1.50.

—Subcordata Grandiflora (White Plantain Day Lily). Very showy, splendid milky white flowers, nearly 4 inches long; very fragrant. Each, 15c.; per doz., \$1.50.

ALTHEA

or Rose of Sharon

Flowers are of large size, very double and full, and of various brilliant and striking colors; they are borne in August and September, when other flowers are scarce. The plant is of regular and compact growth, with deep, glossy green leaves; thrives in all ordinary situations, and is entirely hardy. They make beautiful ornamental hedges. We offer four distinct varieties, all very beautiful, viz.: **Double Purple, Double Striped, Double White and Variegated.** Plants, each color, 25c., postpaid; large plants, $3\frac{1}{2}$ ft. high, each, 40c., by express at purchaser's expense.

CLETHRA

or Sweet Pepper Bush

Clethra Alnifolia (Sweet Pepper Bush). A low growing shrub with dense, pale green foliage, covered with spikes of delightfully fragrant white flowers, producing from July to October, when flowers are of such value. A hedge of it fully equals the wonderful Jessamine hedges of the South, both in beauty and fragrance. Mailing plants, 30c. each.

SWEET PEPPER BUSH

We guarantee safe arrival of all Goods sent by mail

**BERBERIS (A GRAND FOLIAGE SHRUB)**

Japan Berberry, or Berberis Thunbergii. A most valuable and distinct shrub of dwarf, compact habit, forming a low, globular bush of dense growth. Its leaves are small, glossy, very rich dark green with metallic reflections, and so numerous as to completely conceal the branches; turning in autumn to the most brilliant scarlet imaginable, so vivid, in fact, as to suggest a ball of fire. The branches are thickly studded with coral-like berries which cling to the bush till May, and its numerous little blossoms are very unique. Each, 15c.; large plants, 2½ ft. high, 30c. each, by express at purchaser's expense.

—**Purple-Leaved Berberry, or Berberis Vulgaris Atropurpurea.** One of the most valuable shrubs, especially for producing color effect in grouping. Its abundant handsome foliage is always clean, of a deep rich plum color, and does not fade out in summer, as do most purple-leaved plants. Like the type, it produces fruit freely, of a bright crimson color, that remains upon the plant until spring. It forms a beautiful hedge, and is also exceedingly pretty as a single specimen. Each, 15c.; large sized plants, 2½ ft. high, 30c. each, by express at purchaser's expense.

DEUTZIAS

ANDROMEDA

HOLLYHOCK

HOLLYHOCKS

(FINE DOUBLE VARIETIES)

These are always in great demand and are used for backgrounds or centres of beds, their tall spikes of beautiful flowers making them very valuable for such situations. Our stock of plants is healthy and very fine, embracing all colors—crimson, buff, yellow, lemon, purple, rose, etc. Plants, 2 years old, 20c. each; \$2 per doz.

DEUTZIAS

Early spring flowering shrubs, with long, graceful spikes of flowers from every bud or eye, pretty foliage of upright growth and forming handsome lawn shrubs. They flower early in June.

Deutzia, Gracilis. Grows from 2 to 3 ft. high, and is almost bell-shaped in its close, compact bush, profuse blooming, being covered with graceful sprays of small bell-shaped white flowers. Blooms early in June. Each, 20c.

—**Double Pink.** Each, 15c.

—**Double White.** Each, 15c.

CATALPA KÆMPFERI

(JAPANESE CATALPA)

Catalpa Kæmpferi. This variety is an elegant shrub of rather slender growth, producing large clusters of fragrant flowers of a yellowish cast; they remain in bloom a long time and are succeeded by seed-pods; the leaves are of a dark purplish-green color. Bees are attracted by this shrub. Mailing plants, 25c.; three for 60c.; large plants, 40 and 50c. each (by express) at purchaser's expense.

ANDROMEDA

Andromeda Mariana. A beautiful flowering shrub of low growth, bearing numerous panicles of lovely drooping bell-like white blossoms in June. The flowers are of a peculiar waxy appearance, and so numerous as to almost envelop the plant. It is sometimes styled the Lily of the Valley Shrub, which is an appropriate name. It is perfectly hardy, succeeding in all situations. The leaves remain on almost the entire year, its handsome, peculiar foliage turning to a deep red after cold weather sets in, making it a valuable and desirable plant for ornamental purposes in the foreground of borders, etc. 20c. each.

CARAGANA

One of the finest shrubs for Manitoba and the North-West

Caragana Arborescens, or Siberian Pea. This is the plant of all others suited for our North-West, where it will stand the climate well. It is a tall growing shrub, say four to five ft., somewhat like the Laburnum in appearance, being profusely covered with pea-shaped yellow flowers in May. We feel quite confident it will please all who try it. Young plants, each, 15c.; 6 for 75c.

DELPHINIUM LARKSPUR (Ranunculaceæ)

A most important class of free-flowering and ornamental-foliaged perennials, of easy culture in ordinary rich loam. The tall-growing sorts are admirable for the back portion of the border or for grouping among shrubs, while the lower-growing species do finely in all positions in the border. All are of the greatest value for cut-flower purposes. By preventing the flowers from going to seed the plants will bloom continually until hard frost. Many rare species can be furnished. Named varieties in separate colors, comprising all the new ones, 15c. each; two for 25c.; per doz., \$1.20.

PRUNUS PISSARDI

Prunus Pissardi. (Purple-leaved Plum.) The finest purple-leaved small tree or shrub of recent introduction. The young branches are a very dark purple; the leaves when young are lustrous crimson, changing to a dark purple, and retain this beautiful tint till they drop late in autumn; no other purple-leaved tree or shrub retains its color like this. It transplants easily and is worthy of wide dissemination. Flowers small, white, single, covering the tree. 20c. each.

HYPERICUM MOSERIANUM

(THE NEW ST. JOHN'S WORT)

We take pleasure in calling attention to this beautiful plant, which has been universally admired and is acknowledged to be one of the very best herbaceous plants of recent introduction. The habit of the plant is free and graceful; it produces long, slender, much-branched stems, leafy to the base and all drooping toward the ends, apparently from the weight of the flowers and buds, although the flowers face so that none of their beauty is lost. It is marvellously free flowering, of large size, measuring from 2 to 2½ inches in diameter; in color a rich golden yellow, which is rendered still more effective by the numerous yellow stamens and crimson anthers, and blooms continuously the entire season. It is perfectly hardy, forming a bush about three feet high. Strong plants, 20c. each.

CATALPA KÆMPFERI

JL JONES

COREOPSIS LANCEOLATA

GAILLARDIA (ARISTATA GRANDIFLORA)

Gaillardias are among the showiest and most effective of hardy perennial plants; beginning to flower in June, they continue one mass of bloom the entire season; they will thrive in almost any position or in any soil, but respond freely to liberal feeding; being perfectly hardy they require absolutely no protection. The flowers are large, $2\frac{1}{2}$ to $3\frac{1}{2}$ in. diameter, produced on long stems, and are excellent for cutting, and of the most gorgeous coloring. The centre is dark red brown, while the petals are variously marked with rings of brilliant scarlet crimson, orange and vermilion, and often combine all these colors in one flower. Assorted colors, each, 10c.; per doz., \$1.

GAILLARDIA
ARISTATA
GRANDIFLORA**COREOPSIS
LANCEOLATA**

A beautiful hardy plant, with dark lance foliage, a close compact habit of growth, and a continuous succession of the most brilliant golden-yellow flowers of any hardy plant in existence. Each flower is borne on a leafless stem, 8 to 10 inches in length, most admirably adapted for cutting. The flowers, often two inches or more in diameter, will last ten days without fading, and are most excellent for bouquets. We offer the true variety, which is very distinct from all other species of the class. Each, 10c.; 3 for 25c. (See cut.)

HYDRANGEA PANICULATA GRANDIFLORA

(THE GRANDEST SHRUB OF ALL)

One of the best and most handsome Hardy Ornamental Shrubs ever grown. It blooms finely the first year, and gets better and grows larger with age; it grows 3 to 5 feet high, is perfectly hardy in all parts of the country, and needs no protection in winter; blooms in July and August, when other flowers are scarce, and remains in bloom two or three months. The flowers are pure white, afterwards changing to pink and rich coppery red, and are borne in immense pyramidal trusses, more than a foot long, and nearly as much in diameter. The bush should be cut back every spring one-half of last season's growth, dug around and well manured. The finest flowers are borne on the new wood, and are largest and best when the plant has made a vigorous growth. Strong 3-year plants cut back for mail, each, 25c. Large plants, 35c. each, by express, at purchaser's expense.

MAGNOLIA GRANDIFLORA

MAGNOLIA

Grows into trees of the highest ornamental merit; their elegant habit and foliage alone would render them indispensable, but the flowers, their crowning beauty, are unrivalled in size, beauty, individual charm and showy effect among all hardy trees or shrubs. As specimens upon the lawn they are simply grand. They should be planted in a somewhat sheltered position, and will grow in a low or high situation.

Magnolia Grandiflora. Greatly prized for its beautiful white, sweet-scented flowers, which come later than most all other kinds, not expanding until early in June. Small plants, each, 30c.

HYDRANGEA GRANDIFLORA

HELIANTHUS (PERENNIAL SUNFLOWER)

These glorious flowers hardly need description, allied as they are to the common Sunflower. They will well repay the slight trouble they give, flourishing splendidly in any garden soil, and for the second or back row in borders, or for shrubberies, they can hardly be surpassed.

Helianthus Multiflorus, fl. pl. (Double Hardy Sunflower or Dahlia Sunflower.) Perfectly hardy and produces large Double Dahlia-like golden yellow flowers in great profusion during the entire summer and fall. Each, 10c.

Laetiflorus. One of the most beautiful plants for the garden; flowers about four inches in diameter, of the richest golden yellow color; habit very distinct, of pyramidal growth; leaves narrow, of a bright sea-green color; perfectly hardy; flowers from July to Sept. Each, 10c.

Soleil d'Or. This grows about 4 feet, composed of numerous rigid stems smothered with large golden yellow flowers; very fine for cutting and general decoration. Each, 10c.

One each of the above 3 Varieties, 25c.

HELIANTHUS

VIBURNUM PLICATUM (JAPANESE SNOWBALL)

FLOWERING ALMOND (AMYGDALUS)

This is one of the earliest flowering shrubs, and one you cannot afford to do without. The stems are literally covered with most beautiful blossoms, which make it a thing of beauty. **Double Pink** and **Double White**, 40c. each, postpaid; large plants, 60c. each, by express at purchaser's expense.

SALISBURIA (MAIDEN HAIR TREE OR GINGKO)

Salisburia Adiantifolia. A Japanese tree of large size and rather erect growth. A most elegant ornamental tree, with very handsome deep green foliage, shaped like the Maiden Hair Ferns. It is hardy, upright and regular in habit, and makes a splendid appearance anywhere, growing freely and rapidly. It is much different in appearance from any other tree, and very ornamental indeed with its great profusion of beautiful foliage. Mailing size, 20c. each.

LONICERA (TARTARIAN BUSH HONEYSUCKLE)

Forms a graceful branching ornamental bush, 3 to 5 ft. high; very desirable for lawn or garden; foliage dark green, flowers beautiful creamy white, very fragrant, blooms in May and June. Each, 25c.

PHILADELPHUS CORONARIUS

(SWEET-SCENTED SYRINGA OR MOCK ORANGE)

A hardy shrub of rounded form and luxuriant foliage, with masses of pure white, intensely fragrant flowers in June. This is one of the first to bloom, and deserves a place in all collections. Each, 15c., postpaid; large plants, 3 1/2 to 4 ft. high, each, 30c., by express at purchaser's expense.

SALISBURIA, OR MAIDEN HAIR TREE

SPIRÆA BUMALDA

PHILADELPHUS (MOCK ORANGE)

LOBELIA

The handsome perennial Lobelia is worthy of attention. They are partial to moisture and also to a deep rich loam. They attain a height of 2 feet and make an imposing effect as a back row to a ribbon border.

Lobelia, "Queen Victoria." Vivid scarlet flowers; metallic crimson foliage. Each, 10c.

SMOKE, OR FRINGE TREE

Rhus Cotinus. (Also called Purple Mist and Venetian Sumach). From Southern Europe. A large shrub or small tree of low growth and rounded form, attaining a height possibly of 12 ft. The foliage is of a lively bright green, and the flowers appear in June in large, loose, fringe-like panicles of a light purplish color, and change finally to masses of reddish seed-vessels, which remain until frost. Mailing size, each, 20c.

SPIRÆA VAN HOUTTEI

SMOKE TREE

SNOWBALL

Viburnum Plicatum (Japanese Snowball). Is a very great improvement on the old common Snowball; it is distinct in every way; of upright bushy growth with plaited leaves and a large number of pure white heads of flowers. It stands unexcelled amongst shrubs. You cannot afford to leave this off your list. By mail, each, 40c. Large plants, 2 1/2 to 3 ft. high, each, 50c., by express at purchaser's expense.

PERENNIAL PHLOX

For hardy clumps of brilliantly colored masses of flowers on the lawn or among shrubbery, Hardy Perennial Phlox takes the very first rank. The great showy heads or panicles of bloom are produced and multiplied in gorgeous profusion from midsummer until checked by frost. Named varieties, assorted colors, 15c. each; 6 for 75c.

SPIRÆAS

Spiraea Bumalda. Nothing in the way of hardy flowering shrubs we have ever seen

can equal the charming freshness and delicacy of color and structure of this Spiraea. It is of dwarf habit, forming a dense clump of slender branches and pretty, airy foliage, not exceeding two ft. in height at maturity, is of the greatest hardihood

HERBACEOUS PHLOXES

and bursts into masses of exquisitely beautiful flowers in early June, and continues to cover the bush with clusters of bloom, each plant resembling a huge bouquet during the entire summer and autumn. Bright rosy red in color. Each, 10c., 3 for 25c., postpaid; large plants, 20c. each, by express at purchaser's expense.

—**Thunbergii.** One of the finest Spiræas; blooms in early April, noted for its compact, regular growth and pretty fern-like leaves; makes a head almost as round as a ball; flowers are white and borne in large clusters. Postpaid, each, 10c.; per doz., \$1. Large plants, 30c. each, by express at purchaser's expense.

—**Aurea, Golden-Leaved Spiræa.** A handsome shrub, with bright golden yellow foliage, very conspicuous and contrasting finely with the deep green of other varieties; small white flowers. Each, 15c., postpaid. Large plants, 30c. each, by express at purchaser's expense.

—**Van Houttei.** This rare variety is the most showy of all the Spiræas, and is one of the very best flowering shrubs in cultivation. In the spring the plants are a perfect snow-bank of bloom, the long slender branches drooping gracefully with their weight of flowers; strong growing and entirely hardy; rich blue green foliage. Postpaid, each 10c.; per doz., \$1. Large plants, 30c. each, by express at purchaser's expense.

WIEGELA (DIERVILLA)

A valuable genus from Japan, introduced as late as 1843. Shrubs of erect habit while young, but gradually spreading and drooping as they acquire age. They produce in June and July superb large trumpet-shaped flowers of all shades and colors, from pure white to red. In borders and groups of trees they are very effective, and for margins the variegated-leaved varieties are admirably suited, their gay-colored foliage contrasting finely with the green of other shrubs. They flower after the lilacs in June.

Fine plants, mailing size, each, 25c.; any 2 for 40c.

Wiegela. Variegated-Leaved Dwarf. Of dwarf habit, and possessing clearly defined silvery variegated leaves; flowers nearly white. It stands the sun well, and is one of the best dwarf variegated-leaved shrubs.

—**Rosea.** This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large and of deep rosy color; they are borne in such profusion that the whole plant appears a mass of lovely bloom.

—**Floribunda.** Dark cinnamon or chocolate colored flowers with projecting white stamens and pendulous habit, reminding one of a Fuchsia. It blooms profusely in spring with other Wiegelas, and again in autumn, especially if headed in after its early bloom, rendering it an almost perpetual bloomer of great value.

—**Candida.** This is the very best of all the white-flowered Wiegelas; a strong, upright, erect grower; flowers pure white and produced in great profusion in June, and continues to bloom through the entire summer.

WIEGELA CANDIDA

EULALIE JAPONICA

Eulalie Japonica Zebrina. This is one of the most beautiful and distinct hardy plants in cultivation. The foliage is distinctly marked with broad yellow bands, as shown in cut. It grows from 4 to 6 ft. in height, forming a most striking and graceful plant, resembling nothing else we know of. The expanded flower spike is very showy, and when dried will last for years. Plant entirely hardy. Whether used as a single plant or groups on lawns it has no equal. Each, 20c.

PRIVET CALIFORNIAN

Of all the ornamental hedge plants, this is the most highly prized. If cut to the ground one or two years after planting it makes a very thick hedge right from the bottom, sending up many strong shoots. The leaves are a rich green and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter. This is especially the case if the hedge has attained some age and has frequently been trimmed. Though it is a strong grower it can be kept to a low size by frequent trimming. Hedges that are six to seven feet in height, and have been trimmed flat on the sides, look like a solid green wall. It thrives in dry situations and is extremely hardy, making it very valuable for our Canadian climate. 60c. per doz., postpaid; \$3.50 per 100 by express, at purchaser's expense.

TRITOMA UVARIA GRANDIFLORA

(FLAMING TORCH, or RED HOT POKER PLANT)

A splendid half-hardy summer and autumn flowering plant, producing magnificent spikes of rich orange-red flowers. They may be left in the ground during winter with good protection, or can be taken up in the fall and potted and kept from frost. Each, 15c.

TRITOMA UVARIA GRANDIFLORA

YUCCA

YUCCA

(SPANISH BAYONET)

Yucca Filamentosa. A low-growing hardy evergreen plant, with long, narrow leaves; very distinct and almost tropical in appearance. The flower stalk is from two to four feet high, and rises from the centre. It bears a profusion of creamy-white, bell-shaped flowers, very beautiful; very effective lawn plant; will thrive and succeed in the poorest soil. Each, 15c.

TULIP TREE

TULIP TREE

Liriodendron Tulipifera.

A magnificent native tree, of tall, pyramidal habit, with broad, glossy, fiddle-shaped leaves of a light green color, and beautiful tulip-like flowers; allied to the Magnolias, and, like them, difficult to transplant, unless of small size. Each, 15c., postpaid. Large size, 30c. each, by express at purchaser's expense.

THRIFT, SEA PINK

Thrift, or Armeria Formosa.

A hardy perennial plant with compact tufts of narrow green foliage. Particularly valuable for edging. The flowers are a clear bright pink, and borne in clusters on tall stems. Increases rapidly by division. Plant a good lot of it for borders. Each, 10c.; per doz., 75c.

EULALIE JAPONICA ZEBRINA

THE TREE LILAC

Syringa Japonica. From Japan. It makes a straight, stout, well-branched tree, with large and handsome leaves. It flowers in mid-summer, when other lilacs have long been gone, its immense clusters of white blossoms standing stiffly up on the outer and top shoots, sometimes measuring 16 to 24 ins. in size. Specimens are now to be seen in Boston, Mass., 12 years planted and 20 feet high. Plants by mail, each, 20c.

THE PURPLE FLOWERED LILAC

Syringa Villosa. A purple Japanese species with large leathery green foliage like the white fringe tree. Flowers purple, distinct, new color, very floriferous. Plants by mail, each, 30c. Large plants, 50c each, by express at purchaser's expense.

SWEET SCENTED SHRUB

Calycanthus Floridus.

A native species growing 6 to 8 feet high. Flowers of a chocolate brown color, and have a powerful aromatic and fragrant odor; from May to August. The leaves and wood are also fragrant. Blooms freely, is hardy and succeeds everywhere. Often termed Strawberry Shrub from the resemblance of its flowers. Each, 15c.; 2 for 25c.

SWEET SHRUB

LILAC (SYRINGA)

HARDY OUTDOOR CLIMBERS

AMPELOPSIS VEITCHII

Sometimes called "Boston Ivy" and "Japan Ivy"

No picture can portray the beauty of this grand climbing plant. As an important aid to architectural beauty it is rapidly attaining prominence, being now a feature on the finest houses. It is entirely hardy in the most exposed places, attaining a height of 20 to 30 ft. in 2 or 3 years, clinging to stones, brick or woodwork with the greatest tenacity. For covering dead trees, gate posts, boundary walls, verandahs, etc., it has no equal, while its rapid growth, and tenacious clinging qualities make it a most desirable plant for staying up terraces. In summer the foliage is a shade of green, and in fall tinted with scarlet, crimson and orange. Fine mailing plants, each, 15c.; 4 for 50c.; 2-year old plants, 25c.; 3-year old plants, 50c.

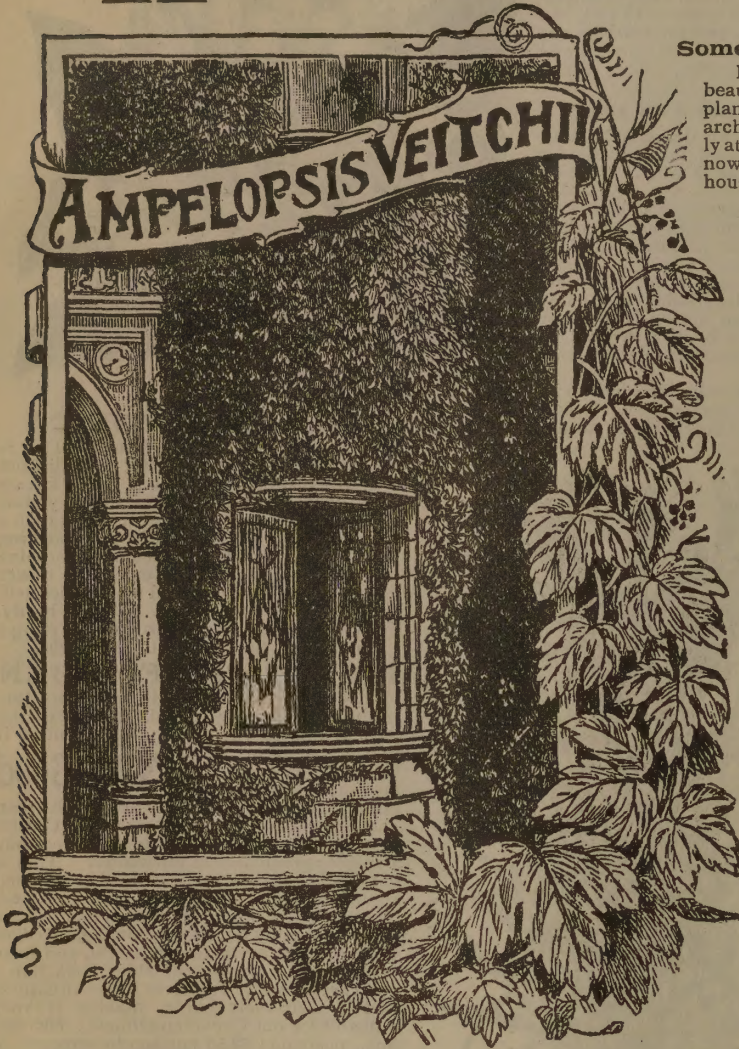

AMPELOPSIS QUINQUEFOLIA

American Ivy or Virginian Creeper

Has beautiful digitate leaves that become rich crimson in Autumn; a very rapid grower. Like the Bignonia and Ivy it throws out tendrils and roots at the joints, by which it fastens itself to anything it touches. One of the finest vines for covering walls, verandahs or trunks of trees; affords shade quickly. Hardy in the North-West. Mailing plants, each, 15c.

CHINESE WISTARIA (IMPERIAL GARDENS AT PEKIN)

ARISTOLOCHIA SIPHO (DUTCHMAN'S PIPE)

A vigorous and rapid growing climber, bearing singular brownish colored flowers resembling in shape a Dutchman's pipe. Its flowers, however, are of little value, but its fine, light green leaves, which are of very large size, retain their color from early spring till late fall; perfectly hardy. Each, 25c.

WISTARIAS

Wistaria, Chinese White. Plant this Wistaria whenever you want a good tall growing vine to shelter high porches or second floor fronts. It grows strong and high, makes a pretty leafy screen, not too dense, and is loaded with bloom in the early spring, just when you seem to need flowers and shade most. There are several varieties of Wistarias; this is the finest of all; immense clusters; pure white flowers, very sweet; extra fine plants, sure to bloom. Each, 35c.

Chinese Blue. One of the most beautiful of all Wistarias; a vigorous strong growing vine, producing in early summer a great profusion of large clusters of lovely, rich violet-blue flowers, deliciously sweet and exceedingly handsome. One of the very best climbing vines for verandahs, balconies, second-floor fronts, etc. Each, 35c.

BIGNONIA RADICANS

BIGNONIAS (TRUMPET CREEPER)

Bignonia Radicans. A splendid climbing plant, suitable for covering dead trees, fences, etc., with large clusters of trumpet-shaped orange-red flowers; blooms in August; about three inches long, handsome in bud as well as in flower. The foliage is also very beautiful, a collection of small leaflets arranged upon a single stem, beautiful for vase and flower work. This plant is not only an admirable climber, but on the lawn makes a pretty tree-formed bush or tree, if tops are cut back and artificial stem supplied, thus having the appearance of a weeping shrub. Mailing plants, each, 20c.; 4 for 75c.

Grandiflora. A hardy, fast grower, suitable for covering dead walls, back buildings, fences, etc.; produces in August large, orange-red, trumpet-shaped flowers in clusters; very handsome. Each, 25c.

See page 113 for "Queen City" Lawn Grass

ENGLISH CLEMATIS

The Clematis we offer this season are exceptionally fine strong plants, two years old; we have reduced the number of varieties to such sorts as from experience we know to succeed best in our climate. Many failures in the growing of Clematis are the result of too shallow planting; the crown of the roots should be set at least three inches below the surface of the soil. For covering walls, trellises and verandahs, old trees or ruins, they have scarcely an equal, certainly no superior.

Clematis, Madame Edouard Andre. An entirely distinct and most novel variety, and the nearest approach to a bright red ever sent out. The plant is a strong, vigorous grower, being a hybrid of the popular Jackmanni, which it resembles in freedom of bloom, strong vigorous growth and shape and size of flowers, but is of a distinct carmine red color of a most pleasing shade, entirely different from all other varieties. Each, 80c.

—**Magnifica.** Distinct light lilac rose; a new and handsome variety of the Jackmanni type; very free bloomer, vigorous grower. Each, 60c.

—**Duchess of Edinburgh.** The best of all the double whites, deliciously scented. Each, 70c.

—**Victoria.** Rich royal purple. Each, 70c.

CLEMATIS PANICULATA

—**Flammula** (Virgin's Bower). A general favorite, where a hardy, rapid-growing vine is desired. Its small, bright-green foliage is almost hidden by clusters of small white flowers. Each, 25c.

—**Gem.** Lavender blue. Showy flowers of an exquisite color. Each, 60c.

—**Jackmanni.** The best known and most popular variety. Color dark rich royal purple. A mass of bloom when in full flower. Each, 50c.

—**Jackmanni Alba.** Immense pure white flowers, very fine. Each, 70c.

—**Miss Bateman.** White with chocolate red anthers. Each, 60c.

—**New Coral.** (Clematis Coccinea). Grows 8 to 10 feet high; suitable for verandah or trellis; a constant bloomer, bearing a great profusion of rich coral scarlet, tulip-shaped flowers all through the season, from early summer until fall, very pretty and desirable. Each, 25c.

—**Star of India.** Reddish plum with deeper colored bars down the centre of each sepal, a very showy and useful variety. Each, 60c.

JACKMANNI

CLEMATIS PANICULATA

(SWEET-SCENTED JAPAN CLEMATIS)

Has a stem $1\frac{1}{2}$ inches in diameter at the base, and completely covers a space 18 feet high and 12 feet wide. The foliage is remarkably clean and healthy and very free from insect enemies; of a dark, clear, glossy green. For any situation where a rapid growing climber is needed this will be found a most valuable plant. For making arbors, covering trellises, trailing over old stumps or trees, or as an ornament to porches, it is especially desirable. The flowers are pure white, sometimes slightly tinged with cream, about three-fourths of an inch in diameter, star-shaped, and of a most pleasing and penetrating fragrance. They are borne in clusters, on stiff stems, four to six inches long. It is the most fragrant flower of the Clematis family. Price, each, 30c.

HONEYSUCKLES

For real home vines, to be near you, climbing over your windows and doorways, there is nothing prettier than fine, sweet-scented Honeysuckles; the foliage is pretty, neat and clean, the flowers almost continuous, and their fragrance delicious. The varieties described below are the very best.

Honeysuckle, New Halliana. A new variety introduced from Japan, and considered a great acquisition; it is evergreen and a constant bloomer; flowers pure white, changing to yellow; very fragrant; good for trellis or pillar; one of the very best varieties for all purposes. Each, 15c.

—**Golden-Leaved.** An elegant and very desirable variety of moderate growth; leaves beautifully veined and netted with clear yellow, so that the prevailing color of the foliage is bright yellow; flowers yellow and fragrant; admirable for pillar and trellis work. This beautiful Honeysuckle is so distinct that it is one of the best varieties to plant with other vines for a striking contrast. Each, 15c.

—**Monthly Fragrant.** A fine rapid growing variety; flowers large and very fragrant; color red and yellow; a constant bloomer. Each, 20c.

MISCELLANEOUS PLANTS

Lack of space prevents extended descriptions, but most varieties are well known garden favorites; among them are a few hardy perennials; these are distinguished with the letters h.p.; there are also half-hardy or greenhouse perennials, but are here listed as annuals; they will not stand the vigor of our winters out of doors.

A few of the annuals are somewhat tender and liable to damage when packed and sent through the mails at long distances. As we have numerous enquiries every season for such, we shall endeavor to supply them, but on the understanding that those marked (*) will be sent without guarantee as to safe arrival. We shall use every possible care when packing, to guard against damage.

QUEBEC CITY, Que.—"Seeds and Plants have arrived in fine condition. Your goods have always given satisfaction."

SMALL FRUITS

We pack carefully, and guarantee their safe arrival to destination, after which our responsibility ceases. The varieties offered are the best standard sorts in cultivation. Not less than 50 plants at 100 rates.

STRAWBERRIES

On arrival of plants, unpack them at once, loosen the bunches and "heel" them in the ground or dip their roots in a "muddle," made by mixing earth in water until of the consistency of cream, and lay away in a cool, damp cellar, where they can neither dry nor freeze, until they can be planted in suitable weather. Do not leave in packages and pour water over them, as this will surely cause the plants to heat and spoil. In planting take but few plants from the trench or package at a time, and expose as little as possible to the wind or sun. Never plant on a windy day, and never in freezing weather. Do not plant very deep, but press the earth firmly about the roots. Should the weather be warm, shade valuable plants for a few days with a handful of coarse litter over each plant, or with berry boxes or baskets (old rejected ones are as good as any).

Strawberries will succeed in any soil that is adapted to ordinary farm or garden crops. Soil should be thoroughly prepared to a good depth, well drained and enriched. Vegetable manure (muck, rotten turf, wood soil, ashes, etc.) is the best. For field culture set in rows 3 to 3½ ft. apart, 15 to 18 inches in rows; for garden, 12 inches apart each way, leaving pathway every third row. To produce fine, large fruit, keep in hills, pinching runners off as soon as they appear. Ground should always be kept clean and well cultivated. In winter a covering of leaves, straw or some kind of litter will protect the plants. Do not cover them until ground is frozen, or so deep as to smother the plants, and remove covering before growth starts in the spring. Mulching will keep the fruit clean and the soil in good condition through the fruit season.

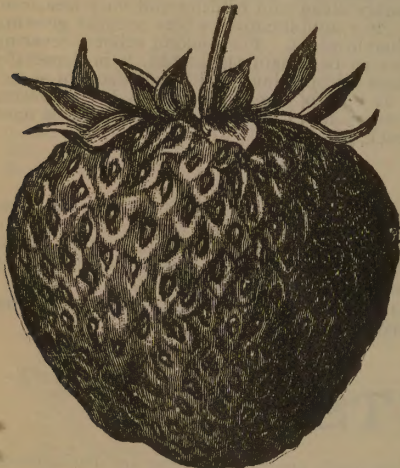

The blossoms of all varieties are bi-sexual or perfect, except those marked with the letter P., which are destitute of stamens and are termed the pistillate or imperfect. Pistillate varieties must have a row of a perfect flowered sort planted every 9 or 12 ft. among them, or, better yet, every third or fourth plant in the row, to pollinize their blossoms.

CLYDE

This splendid new variety has fruit of enormous size, bright scarlet in color, in shape round and conical. It is one of the most productive varieties on record, stands the dry seasons well and has given immense satisfaction wherever grown, being a vigorous grower, early, and of fine quality. Per doz., 40c.; per 100, \$2, by mail (postpaid); by express at purchaser's expense, \$1.75 per 100.

WM. BELT (P)

The plant is a most luxuriant grower and remarkably productive, medium early in ripening, extra large in size; color of a brilliant glossy red, rather long and conical in shape. It is as near perfection as possible, and we recommend it as being one of the best for market purposes. Per doz., 40c.; per 100, \$2 (postpaid); by express at purchaser's expense, \$1.75 per 100.

MARSHALL

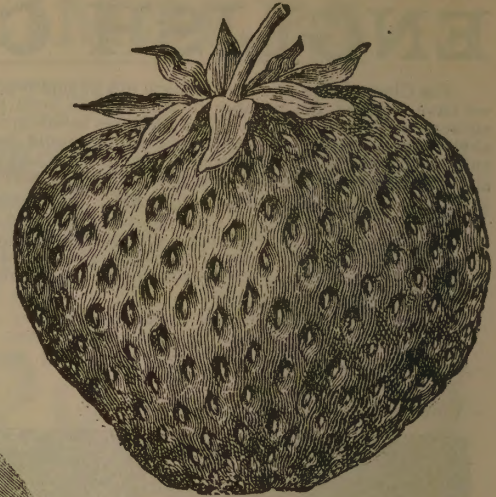

exceedingly popular; berries grand and of a bright crimson color. While not a new variety, it is a favorite with all who grow it, as being one of the best marketing sorts; stands our winters well and always pays the grower well by its great productiveness. Early to mid-season. Per doz., 20c.; per 100, 80c. (postpaid); per 100, by express at purchaser's expense, 60c.; per 1,000, \$4.

WILLIAMS

Of Canadian origin, yields very large, handsome berries; extremely productive and hardy; one of the finest field varieties; fruit firm and of a dark crimson color, very uniform in shape and size, a vigorous grower. Mid-season. Per doz., 20c.; per 100, 80c. (postpaid); per 100, by express at purchaser's expense, 60c.; per 1,000, \$4.

THE STRAWBERRY-RASPBERRY

This is a most novel and beautiful dwarf-growing Raspberry of Japanese origin. Said to be a hybrid between the Strawberry and the Raspberry; the plant and its fruit present strong evidence that this statement is correct. In habit it is a spreading, low growing bush, producing its fruit in branching clusters at the ends of the stems and well above the foliage. The fruit, in form and appearance, is about as good a combination of a strawberry and red raspberry as one could well imagine—in size, about midway between the two, and the form of neither, but half way between each; being formed of drupes like a raspberry, but in color a crimson, equalling in brilliancy the most beautiful strawberry, and of delicious flavor. The bush dies down in winter, starting again in spring more luxuriant than ever. Well established plants, by mail, each, 15c.; 4 for 50c.

BRANDYWINE

BRANDYWINE

The fruit is of exceedingly large size, very firm, solid and shapely for so large a berry; flesh red to the core, of delightful aroma, rich, juicy and luscious; the seeds are but slightly imbedded, which adds to its firmness; the color is of dark, rich, glossy scarlet; in productiveness it is a marvel, as well as for size and quality. The plants are vigorous, healthy and hardy. Growers in the vicinity of Toronto pronounce it a superior variety in all respects. Mid-season. Per doz., 20c.; per 100, \$1, (postpaid); per 100, by express at purchaser's expense, 75c.; per 1,000, \$6.00.

MARSHALL

Of recent introduction, originating in Massachusetts; has now been tested in many localities, and all agree that it is a remarkable berry for its great size and quality. Plants strong and vigorous, with heavy thick foliage, protecting the blossoms and roots; stands drought well. The fruit is of a dark crimson color, flesh fine and of delicious flavor; a firm keeper and carries to market well. Mid-season. Per doz., 20c.; per 100, \$1 (postpaid); per 100, by express at purchaser's expense, 80c.; per 1000, \$6.

GLEN MARY

A superb early variety, uniting large size, great productiveness and good quality in a remarkable degree, and is evidently one of those sorts that are especially adapted to the amateur and those who grow extra fine berries for market. It is of extra large size, bringing the highest price in market, bright glossy crimson, and fine in flavor. The plant is strong and healthy, very prolific, and on good soil the berries maintain their large size to the end of the season. We feel confident it will give great satisfaction, and all who delight in fine berries should not fail to set at least a few plants of it this season. Per doz., 30c.; per 100, \$1.50 (postpaid); per 100, by express at purchaser's expense, \$1.25.

New

HILL'S MANCHESTER

Originated by one of our most successful Canadian growers, and so favorably is it becoming known, that in our best strawberry growing districts it is taking first place as a grand producing and marketing sort. It commands the very highest prices, even sells when other sorts become a drug upon the market. The berries are exceedingly large, uniform in size and of a very rich, handsome bright red color, flesh firm and luscious; a strong grower, productive and profitable. Mid-season. Per doz., 20c.; per 100, \$1 (postpaid); per 100, by express at purchaser's expense, 75c.; per 1,000, \$5.

WARFIELD (P)

Its handsome appearance, earliness, firmness, good flavor, productiveness and vigor of growth, make it a favorite with all who grow it, as being one of the best marketing sorts; stands our winters well and always pays the grower well by its great productiveness. Early to mid-season. Per doz., 20c.; per 100, 80c. (postpaid); per 100, by express at purchaser's expense, 60c.; per 1,000, \$4.

THE STRAWBERRY-RASPBERRY

Do not fail to examine our magnificent assortment of Dahlias on page 43.

RASPBERRIES...

LUCRETIA

Will do well on any soil that will produce a good corn crop. Land should be thoroughly prepared and well enriched; ground bone is one of the best of fertilizers. There are two general types of Raspberries, and they require different treatment. Black caps and others that increase from the ends of the canes should be planted 3 feet by 7; 1,074 plants to the acre, and plant potatoes, corn or beans half way between. Cultivate often enough to keep the soil loose and free from weeds. When the canes attain the height of 1 foot, pinch off the end. This causes the cane to branch, grow stocky and self-supporting. After fruiting cut out all the dead wood. Red Raspberries and others that sucker should be set 3 feet by 6 apart. Allow only three or four canes in each hill to grow; treat all others that spring up as weeds. When three or four feet high pinch back cane same as with Black-caps. The secret of raising fine crops of Raspberries is in rigorous pruning and keeping suckers down. If not checked the tendency is to mat the surface with canes, when very little fruit is secured. For field culture plant in rows about five feet apart, with plants three and a half feet in the row, except Cap varieties, which should be six feet by three and a half. For garden culture they may be set three feet apart each way, with Caps four by three feet.

At dozen prices we prepay postage; at hundred rates add 40 cents per hundred for mailing, if wished by mail; otherwise they will be shipped by express at purchaser's expense.

BLACK CAP VARIETIES

Raspberry, Ancient Briton. One of the best of hardy varieties; in Wisconsin and other northern States is superseding all other kinds; without booming has worked its way on its own merits to the highest place as a profitable and valuable market sort. Very vigorous, healthy and hardy, producing large fruit stems loaded with good sized berries of fine quality, that carry well to,

TAYLOR

YELLOW VARIETIES

Golden Queen. A beautiful large golden yellow berry seedling of the Cuthbert and surpassing that variety in size, beauty, quality and adaptability, succeeding in all sections. Canes hardy, of strongest growth, wonderfully productive. Should be in every home garden, its beauty and high quality placing it at the head for table use. 3 for 20c.; doz., 60c.

DEWBERRY

(OR CREEPING BLACKBERRY)

Lucretia. In earliness, size and quality it equals any of the tall growing sorts; the plant is perfectly hardy, healthy and remarkably productive, with very large, showy flowers. The fruit, which ripens early, is soft, sweet and luscious throughout, with no hard core; ripe before late Raspberries are gone. Should be mulched to keep berries from ground. The most profitable small fruit we cultivate. 3 for 25c.; doz., 75c.

ANCIENT BRITON

and fetch highest price in market. For general planting for home or market in all sections subject to severe winters, the Ancient Briton is recommended as a first-class variety; 3 for 15c.; per doz., 55c.; per 100, \$3.50.

Taylor. One of the largest, fruit of the best quality, melting and without core. Nearly as hardy as Snyder, berries much larger, one of the most productive; ripens late. In all sections subject to severe winters, it is one of the very best. Per doz., 50c.; 100 for \$2.25.

Erie. One of the best hardy varieties, having stood unharmed a temperature of 25 degrees below zero; as vigorous as Kittatinny; very productive, not having failed in producing a fine crop each year since it originated; foliage clean and healthy, free from rust, fruit large, round in form, giving it the appearance of being larger than it really is; good quality. Doz., 55c.; 100 for \$3.50.

Kansas. Strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early, color jet black, and almost free from bloom; firm, of best quality; presents a handsome appearance, and brings highest price in market. Every planter who wants a prolific, hardy, early berry of immense size, handsome appearance and superb quality, should plant it. Per doz., 50c.; 100 for \$3.25.

RED VARIETIES

Cuthbert, or Queen of the Market. A remarkably strong, hardy variety; stands the Northern winters and Southern summers equal to any. Berries very large, measuring three inches around; conical; rich crimson, very handsome, and so firm they can be shipped hundreds of miles by rail in good condition; flavor is sweet, rich and luscious. The leading market variety for main crop. Per doz., 30c.; 100 for \$1.50.

London. A variety originating with that veteran horticulturist, F. W. Loudon, of Wisconsin, and claimed to be the greatest advance in red raspberries since Cuthbert. Its points of superiority are vigor of growth, large fruit, beautiful rich dark crimson color, good quality, and marvellous productiveness and hardiness, enduring winters without protection and without injury to the very tips. It stands shipping the best of any variety, and will remain on bushes the longest without injury. The *Rural New Yorker* says: "Likely to supersede the Cuthbert, more vigorous, perfectly hardy, averages larger. Adheres well to the stem, never crumbles, bright red, darker when dead ripe." Each, 3 for 35c.; doz., \$1.25.

Royal Church is earlier than Cuthbert, yet continues longer in bearing. It combines the large size and superior qualities of the best foreign varieties. No variety heretofore introduced combines these excellencies so completely as this. Doz., 75c.

SELECT HARDY GRAPES

The limits of a Catalogue do not permit more than brief mention of the modes of cultivation of the Grape. We refer the reader to the excellent works of Fuller on "Grape Culture" for full details. Plant in rows eight feet apart and six to eight feet apart in the row. Dig holes sufficiently large to amply accommodate the roots of the vine, and use only fine surface soil in filling in, mixing with it a little ground bone. Spread the roots out, after trimming them; place the stalk of the vine at one side of the hole and fill up with soil, pressing down firmly with the feet. Set a stake by the side of the stalk, to which the vine should be kept tied, which will be all the support needed for two years. Keep old wood trimmed off, growing fruit on new canes. Any manner of pruning that will admit the sun and air to the fruit will insure a crop. Generally the vines do best trained on trellises, and in localities where the winters are severe the vines can be pruned in the fall and then laid down on the ground, where they are seldom injured by cold, even if not covered or otherwise protected.

BRIGHTON

Niagara (Light greenish white). Vine hardy, unusually strong grower; bunches very large and compact, sometimes shouldered; berries as large or larger than the Concord, mostly round; semi-transparent, slightly ambered in the sun; skin thin, but tough, and does not crack; quality good, very little pulp, melting and sweet to the centre. 1-year, 15c.; 2-year, 20c.

Moore's Early (Black, with heavy blue bloom). Bunch medium size, berry very large, better than Concord in quality, and with more pulp; vine a moderate grower, very healthy and hardy; moderately productive; a valuable market variety on account of its earliness, ripens some twenty days earlier than the Concord. Exempt from mildew and blight. 1-year, 15c.; 2-year, 20c.

Eaton (Black). A seedling of Concord, but in general appearance of bunch and berry it strongly resembles Moore's Early. Bunch very large, compact; berries very large, round, covered with a thick blue bloom, skin thick; flesh juicy, with some pulp, though tender. Midsummer. 1-year, 25c.; 2-year, 30c.

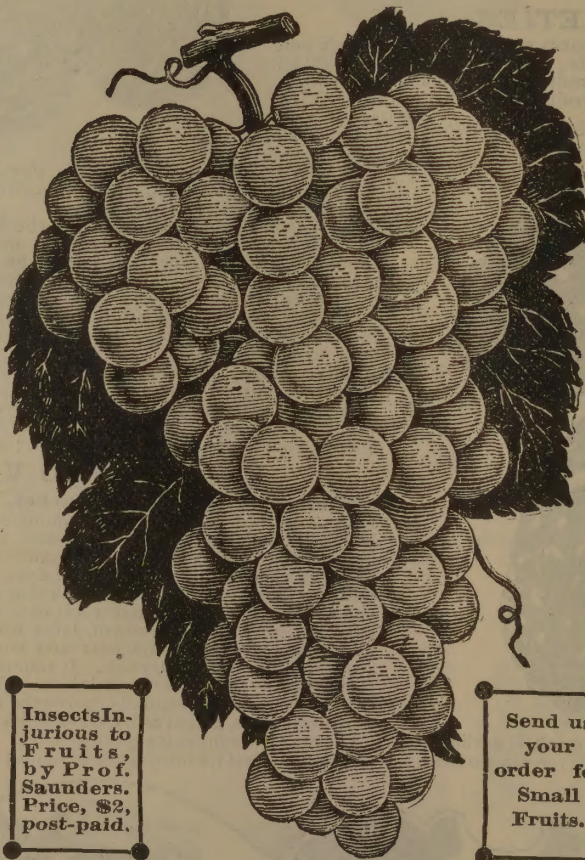

EATON

1-year old roots by mail, postpaid, or 12 for cost of 10; 2-year roots by freight or express, purchaser to pay carriage, 12 for cost of 10.

Brighton (Red). Too much can scarcely be said in favor of this as to quality and other properties. In color, form and size of both bunch and berry, it resembles Catawba, but ripens earlier. Vine a free grower and productive, and quite free from mildew. 1-year, 15c.; 2-year, 20c.

Moyer (Red). Originated in Canada, and seems to be a cross between the Delaware and some purely native variety. In habit of growth, hardiness, quality and size of cluster, it resembles the Delaware very much, but it ripens with the very earliest, has larger berries, and so far has been free from rot and mildew. It has stood, unprotected, 35 degrees below zero without injury. Very sweet as soon as colored; skin tough, but thin; pulp tender, juicy, of delicious flavor. 1-year, 20c.; 2-year, 25c.

Pocklington (Yellow). Bunch medium to large; berry large, round, of a rich yellow color; flesh pulpy, juicy, and of good quality; ripens at the time of the Concord; vines vigorous, healthy, very hardy and productive, and is considered a very valuable and reliable variety, and is constantly growing in favor. 1-year, 15c.; 2-year, 20c.

POCKLINGTON

Insects Injurious to Fruits, by Prof. Saunders. Price, \$2, post-paid.

Send us your order for Small Fruits.

MOYER

Worden (Purplish black). In growth and habit very similar to the old Concord; bunch large, compact and handsome, ripens early and is of good flavor. It is very hardy and particularly well adapted for Canadian cultivation; one of the most popular market grapes now in use. 1-year, 15c.; 2-year, 20c.

MOORE'S DIAMOND

Moore's Diamond (Greenish white). A pure native, being a cross between Concord and Iona. Vine a vigorous grower, entirely hardy, with large, dark, healthy foliage. It is a prolific bearer, producing large, handsome, compact bunches, slightly shouldered. The color is a delicate greenish white, with a rich yellow tinge when fully ripe; skin smooth, very few seeds, juicy and almost entirely free from pulp. Berry about the size of Concord, and adheres freely to the stem. It ripens early. 1-year, 20c.; 2-year, 25c.

SPECIAL OFFER

One each of the five illustrated varieties for 80c.
Or one each of the eight varieties for \$1 (one year plants) postpaid.

CURRANTS

A cool, moist location is best for this fruit, and for this reason it succeeds admirably when planted by a stone wall or fence, being benefited by a partial shade. Plant in rows four feet apart, and the plants three feet apart in the rows. Keep the ground mellow and free from weeds and grass, using fertilizers copiously. Mulching is necessary for the best returns. So soon as the leaves turn yellow and begin to fall, with a pruning knife remove all the old wood and cut back the young shoots a third of their length, cutting to the ground enough of these to admit air and light into the bush freely. When the currant worm appears dust the bushes with Buhach or Tobacco Dust; it can be exterminated also by dissolving powdered white Hellebore (to be had at any drug store) in the proportion of an ounce to a pail of water, and applied with a syringe upon the leaves.

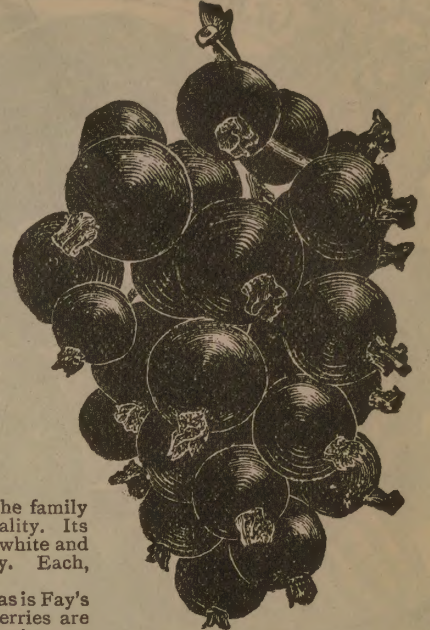

Strong plants by mail (post-paid)

Currants, Fay's Prolific. This well-tried new variety of Currant is undoubtedly one of the very best in cultivation, both for market and home use. It is a very heavy cropper; the large uniform berries are less acid than any other sort; large handsome strings of cherry-red fruit; unexcelled for the family garden or market. Each, 10c.; per doz., \$1.

—**Large Red Cherry.** The most popular market sort, and uniformly the largest of all the red currants except Fay's Prolific. Bunches large; berries very large, bright, sparkling crimson, beautiful, very acid. Each, 10c.; per doz., 90c.

—**White Grape.** This is a currant of all others that should be in the family garden, not only for its handsome appearance, but for its fine quality. Its bunches are extremely long, berries large, of a beautiful translucent white and excellent flavor. The largest and decidedly the best white variety. Each, 10c.; per doz., \$1.

—**Black Champion.** As great an improvement among black currants as is Fay's Prolific among the red varieties. Like Fay's the clusters and berries are exceedingly large, and, unlike the other varieties of its class, the bushes are heavy annual bearers. The flavor of the fruit is richer and much milder than the old Black Naples or Black English, from which it has no doubt sprung. Entirely exempt from the ravages of the currant worm or other insects. It is very fine for making jellies, jams, and, in brief, is by far the finest Black Currant yet produced. Each, 10c.; per doz., \$1.

BLACK CHAMPION CURRANT

—**Black Naples.** Very hardy and prolific. This is especially valuable for Canada and other points of the extreme north. All the black kinds are much prized for making jams and jellies, and are highly profitable for market growing in some sections. Each, 10c.; per doz., 75c.

—**North Star.** The points of excellence are its hardiness, vigorous growth of wood, early fruiting and great productiveness. It has made an average growth during an extremely dry season on light gravelly soil, of from 30 to 36 inches. The size of the berry averages one-half inch in diameter, and the length of the fruit cluster frequently measures 5 and 6 inches, and averages over four and one-half inches. It has a naked stem which attaches the cluster to the wood and allows the fruit to be readily picked. It is superior in quality, rich in flavor, and much less acid than old sorts. Each, 10c.; per doz., \$1.

Rothesay, N.B.—"Seeds and Plants arrived safely and in good condition."

GOOSEBERRIES

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit. The English varieties especially do best in partial shade, and should be heavily mulched. To prevent mildew spray bushes soon as leaves appear and several times during the summer, with potassium sulphide (liver of sulphur), one ounce to four gallons of water.

Two-year plants by mail (post-paid).

Gooseberries, Industry. The best English Gooseberry; of vigorous, upright growth, and a greater cropper than any known variety; berries of largest size, 1½ in. in diameter, and of most excellent flavor, both pleasant and rich; color, when fully ripe, dark red. Each, 20c.; per doz., \$2.

—**Downing.** The best of the American sorts and a vast improvement upon the Houghton, of which it is a seedling. Fruit large, pale green, and of excellent quality, both for cooking and table use. Bushes stocky, vigorous, hardy, very prolific and nearly free from mildew, but densely clothed with large, sharp spines. The best for general planting. Each, 15c.; per doz., \$1.25.

—**Lancashire Lad.** One of the largest and best of the English varieties. Fruit smooth, bright red, extra size, fine quality, one of the best dessert berries. Bush strong grower and productive. Each, 30c.; 3 for 80c.

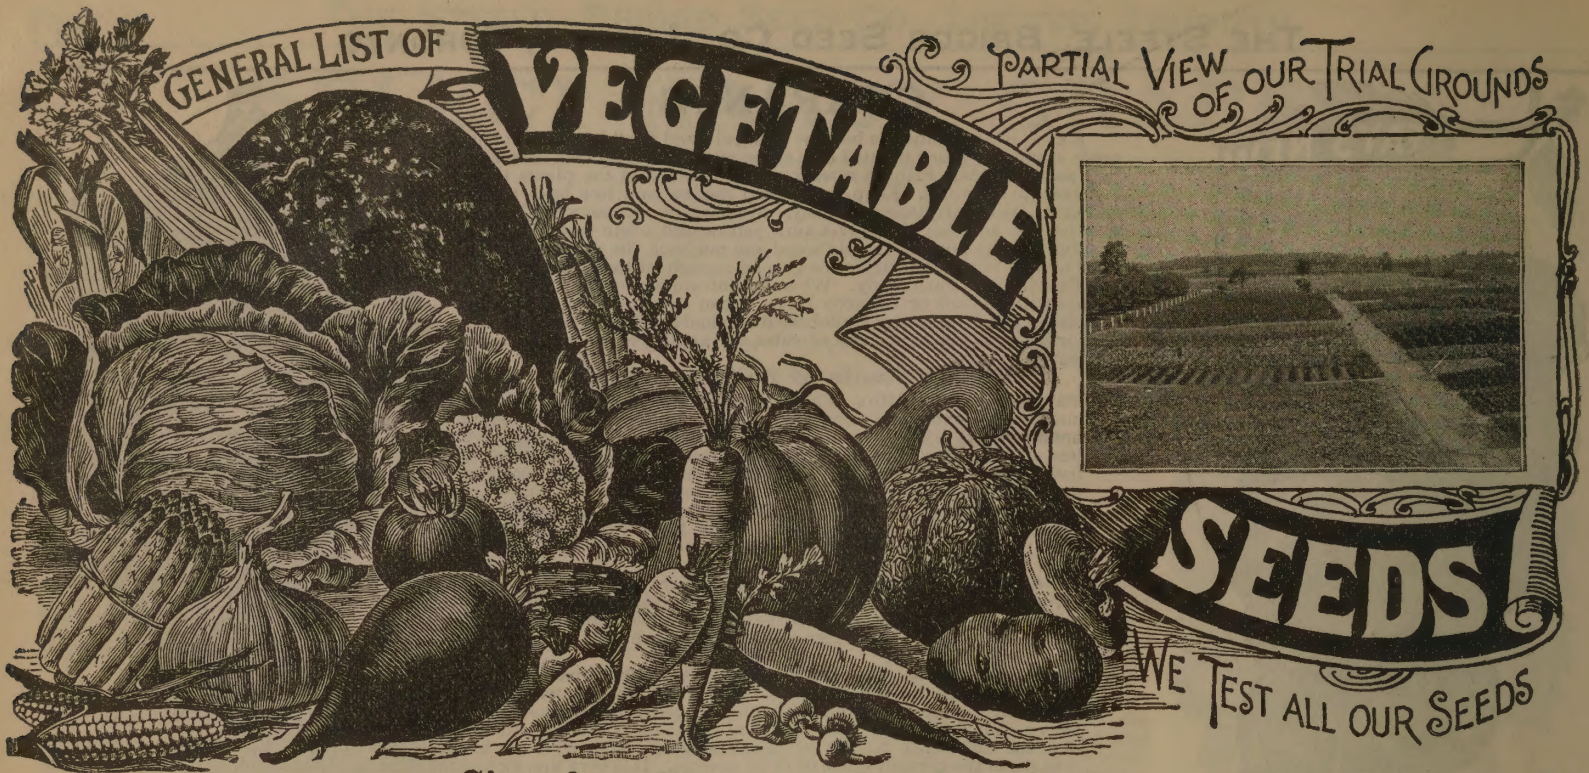

NEW "COLUMBUS" GOOSEBERRY

This is one of the most valuable introductions of recent years in small fruits, and it fully sustains the high opinion first formed of it. The fruit is of largest size, handsome, of a greenish yellow color, and the quality is excellent. The plant is vigorous, extremely hardy and productive, and does not mildew. It merits a place in every garden. The raisers of this variety say it out-crops the Industry, and is also superior in quality. Price, each, 50c.; per doz., \$4.

LANCASHIRE LAD
GOOSEBERRY

COLUMBUS GOOSEBERRIES

NOTE.—Send us your order for Small Fruits; we can supply you with the best.

Given free with every order. See page 9

We make it our constant aim to supply seeds of the highest standard of excellence a first consideration, and next, to make prices as low as such quality of seeds can be sold. Every variety is tested at our own grounds each year, and by careful comparison with stocks obtained from other sources, we know that it is impossible to procure better seeds from any source than we sell. By these comparative trials we learn the merits and demerits of every known vegetable, and by leaving from our list varieties of doubtful merit saves our customers disappointment and loss. Our list will be found to contain the most reliable varieties in cultivation, and such as we supply to the most critical market gardener and experienced planter, who must have the best.

SEEDS PREPAID BY MAIL

also guarantee safe arrival of any seeds, plants, bulbs, etc., when sent by mail; thus you have only to send us Catalogue prices when ordering, except where noted, and be assured that we shall do the rest.

MARKET GARDENERS

Gardener or Florist.

Please bear in mind that prices in the following list include prepayment of postage by us to any post office in Canada for all seeds offered by the ounce, two ounce, quarter pound and pound, unless otherwise noted. We who require large quantities of seeds are invited to write for our Special Gardener's List. This list will only be sent to those who grow for the market, and require to purchase seeds in quantity. In writing please state whether you are a Market Gardener or Florist.

ASPARAGUS

FR., *Asperge*; GER., *Spargel*. Sow 1 oz. for 60 ft. of drill. Sow in March or April, in rows 1 foot apart. When two years old transplant into permanent beds, which should be well and deeply manured, and trenched to the depth of 2 feet. Set the plants (in rows) from 3 to 4 feet apart, and 2 feet in the rows, spreading out the roots, and covering from 6 to 8 inches.

Asparagus, Columbian Mammoth White. A choice variety, producing white stalks of large size and finest quality. Per lb., 50c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.

—**Palmetto.** Early, even and regular in its growth. Per lb., 45c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.

—**Colossal.** Standard variety. The shoots are of the largest size, very productive. Per lb., 40c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.

ASPARAGUS ROOTS

(Postpaid)

Asparagus Roots, Colossal. Fine two year old roots at \$1.30 per 100. By express at purchaser's expense, 90c. per 100; per 1000, \$8.

—**Palmetto.** Fine two year old roots at \$1.50 per 100. By express at purchaser's expense, \$1 per 100; per 1000, \$9.

—**Columbia Mammoth.** Fine two year old roots at \$1.75 per 100. By express at purchaser's expense, \$1.25 per 100.

ARTICHOKE

(JERUSALEM)

Grown exclusively for its tubers, which somewhat resemble potatoes, and are cultivated in a similar manner, only that the rows should be at least four ft. apart when grown in strong soils. It is enormously productive, producing 1,500 bushels per acre. It is used mostly in feeding sheep and hogs.

Artichoke, Jerusalem.

Strong tubers, 15c. per lb., four lbs., 50c., postpaid; per peck, 50c., by express at purchaser's expense.

ARTICHOKE (GLOBE)

FR., *Artichaut*; GER., *Artichoke*.

Sow in April in rich soil, and transplant the following spring to permanent beds (in rows or hills), three feet apart, and two feet between the plants. They only give a partial crop the first season, but the beds will remain in bearing for years. Protect in winter by a covering of leaves or coarse manure.

Artichoke, Large Globe. Grown for the unripe flower heads, which are highly esteemed by epicures. Per oz., 30c.; pkt., 5c.

BRUSSELS SPROUTS

FR., *Chou de Bruxelles*; GER., *Kopfkohl Grener*.

This is one of the best vegetables for winter use, producing from the axils of the leaves an abundance of sprouts resembling small cabbages, of excellent mild flavor. By sowing in April or May, and planting out in July, it may be had in fine condition until December.

Brussels Sprouts, Dalkeith. Produces compact sprouts or heads of excellent quality. Per $\frac{1}{4}$ lb., 40c.; oz., 15c.; pkt., 5c.

BROCOLI

FR., *Brocoli*; GER., *Spargel Kohl*.

Sow end of April in the open ground, then transplant about two feet apart in deep, rich ground. When they begin to flower, break the large leaves over the heads to protect them from the sun.

Brocoli, Walcheren White. Large, firm, white heads, very hardy, endure cold, and withstand heat and drought well. Per $\frac{1}{4}$ lb., \$1.20; 1 oz., 40c.; pkt., 5c.

BORECOLE OR KALE

FR., *Chou Vert*; GER., *Blatter Kohl*.

Sow from the middle of April to the beginning of May, in prepared beds, covering the seed thinly and evenly; transplant in June, and treat in the same manner as for cabbage. The varieties are all extremely hardy, and are best when touched by frost.

Borecole, Green Curled Scotch, Dwarf. Grows to a height of 18 or 20 inches, and with good cultivation spreads to three feet in diameter; leaves bright green and beautifully curled. Per $\frac{1}{4}$ lb., 25c.; 1 oz., 10c.; pkt., 5c.

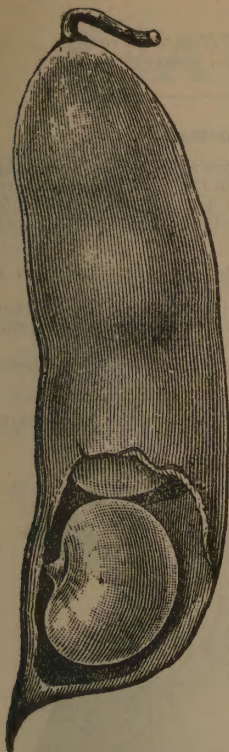

COLUMBIA MAMMOTH WHITE

BRUSSELS SPROUTS

Seeds of the Best Quality can nowhere be obtained for less money. Please note prices.

BURPEE'S BUSH LIMA BEAN

WAX PODDED VARIETIES (Continued)

Beans, White-Seeded Wax. Excellent snap bean; fine for shelling; seed pure white. Peck, \$1.20; quart, 18c.; pint, 10c.; pkt., 5c.

Keeney's Rustless Golden Wax. A strong-growing bush variety, of remarkable vigor and freedom from rust. It sends out short tendrils, on which pods are formed in addition to those near the central stalk of the plant, which accounts for its wonderful productiveness. The pods are meaty and well filled, thick, flat when young, and semi-round later; of rich yellow color and fine quality, and entirely stringless even when large enough to shell. Peck, \$1.50; quart, 25c.; pint, 15c.; pkt., 5c.

Mammoth Wax. (See cover). The monster pods of this variety average 10 to 14 inches in length, are nearly all solid pulp and absolutely stringless, cooking tender and delicious; rich golden yellow; a vigorous grower, covering the ground with its heavy foliage. A desirable variety. Peck, \$1.00; quart, 30c.; pint, 15c.; pkt., 5c.

GREEN PODDED VARIETIES

Early China. Very early, and of fine quality; seeds white, spotted with purplish red. Peck, \$1; quart, 18c.; pint, 10c.; pkt., 5c.

Early Mohawk. First early; none better for first planting; productive, very hardy, almost rust proof; can be used when half grown. Peck, \$1; quart, 18c.; pint, 10c.; pkt., 5c.

Extra Early Round Pod Valentine. At least ten days earlier than the Early Valentine, and usually ready to pick in 35 days after planting. Pods round, thick and fleshy, of finest quality and unequalled in uniformity of ripening; one of the most profitable for market gardeners. Peck, \$1; quart, 18c.; pint, 10c.; pkt., 5c.

Improved Large Refugee. Both pods and seeds are larger than the old Refugee variety, and it is a better yielder. Seeds, when ripe, purple, speckled with white. Peck, \$1; quart, 18c.; pint, 10c.; pkt., 5c.

Early Long Six Weeks. One of the earliest; flat pods; good quality. Peck, 95c.; quart, 15c.; pint, 10c.; pkt., 5c.

Royal Dwarf Kidney. One of the best late kinds for winter use; has no superior. Beans, white. Peck, 90c.; quart, 15c.; pint, 10c.; pkt., 5c.

ENGLISH, OR BROAD

Broad Windsor. This class is very hardy, and should be planted as soon as the soil is in good state in the spring. Plant 4 inches apart in row, and 2 inches deep, in drills 4 feet apart. To insure well-filled pods, pinch off the tops as soon as pods begin to set. Quart, 20c.; pint, 12c.; pkt., 5c.

CHICORY FR., Chicoree; GER., Cigorien.

Sow Chicory seed in the spring in drills half an inch deep, and in good mellow soil; the after culture is the same as for Carrots. In the autumn the plants will be ready for blanching, when it is used as a salad. The principal use of Chicory, however, is as a substitute for coffee. The roots are cut and dried, and then roasted for a substitution with coffee. An ounce of seed will sow about 100 feet of drill, and from two to three pounds an acre.

Chicory, Large Madgeburg or Coffee. Per lb., 40c.; $\frac{1}{2}$ lb., 25c.; oz., 10c.; pkt., 5c.

BEANS DWARF OR BUSH

FR., Haricot nain. GER., Busch Bohnen.

One quart will plant 100 feet of drill. One and one-half bushels will plant one acre.

Dwarf Beans, as a rule, are more hardy, and earlier, than the running sorts. They are usually planted in drills, and stand well without support. The rows should be 2 to 3 feet apart, according to the character of the soil, and the covering about 2 inches. Beans will thrive upon light soils, although more profitably grown under good cultivation upon stronger land, where the rows should be kept well apart. Being quite tender, they should not be planted till danger from frost is over; and a dry, warm soil is needed to insure germination. The vines should not be disturbed when moist, or the pods will become rusty. A succession of plantings may be made from early in May till the first of July. Lima Beans require to be planted as soon as danger from frost is past in the spring.

If you want Beans by mail add 5c. per pint,
10c. per quart, for postage

Beans, Burpee's Bush Lima. A true bush form of the large Lima Bean, growing 18 to 20 inches high; very productive; quality the best. Price, per quart, 30c.; pint, 15c.; pkt., 5c.

WAX PODDED VARIETIES

Beans, Black-Eyed Wax. Very early, very tender, and of excellent quality. Peck, \$1.20; quart, 20c.; pint, 12c.; pkt., 5c.

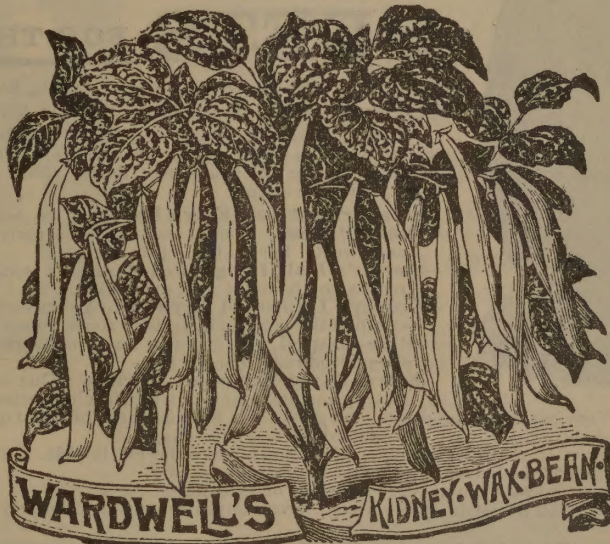

Black Wax. A popular variety; pods a waxy-yellow; solid, tender, almost transparent; stringless; seeds when ripe, jet black. Peck, \$1; quart, 18c.; pint, 10c.; pkt., 5c.

Golden Wax. One of the best dwarf beans known; very early; pods long, brittle, stringless, of a beautiful, rich, golden wax color. Peck, \$1.00; quart, 18c.; pint, 10c.; pkt., 5c.

Wardwell's Kidney Wax. Vines large, strong-growing and vigorous, producing a large crop of long, nearly straight, handsome, white, wax-like pods of good quality. They ripen about the same time as the Golden Wax. Market gardeners find this a profitable variety, owing to its large size and handsome color. Peck, \$1.10; quart, 18c.; pint, 10c.; pkt., 5c.

Giant Dwarf Red-Seeded Wax. New, early, stringless, pods large, beautiful, rich creamy white color; prolific; a favorite with market gardeners. Peck, \$1.50; quart, 25c.; pint, 15c.; pkt., 5c.

Scarlet Flagonet Wax. One of the best, either for family or for market. It is as early as the Golden Wax, and the pods are nearly always free from rust. The pods are very long, broad, flat, yellow, entirely stringless; quality excellent; very productive. Peck, \$1.25; quart, 20c.; pint, 12c.; pkt., 5c.

DWARF GOLDEN WAX BEAN

If you want Beans by mail add 5 cents per pint, 10 cents per quart for postage.

BEANS POLE OR RUNNING

FR., *Haricots a rames*.
GER., *Stangenbohne*.

One pound will plant 75 hills.

If wanted by mail, add 5c. per pint, 10c. per quart, for postage.

The planting of the various sorts of pole-beans should be delayed a week or more after the first planting of the early dwarf sorts. The Limas, being very tender, will do better if not planted in the open ground before June 1st. Plant in hills about 3 ft. apart, and 1 to 2 ins. deep, using 5 or 6 seeds to each hill, and set a pole firmly in the centre. Manure liberally in the hill with well-composted fertilizer. Thin the plants, leaving three in each hill.

- Beans, Cuban Asparagus** (or Yard Long). Pods from 20 to 36 inches long; very tender and delicious as a Snap Bean. Per pint, 40c.; pkt., 5c.
- Giant Wax or Butter**. Red seeded. One of the most valuable varieties for either private or market garden purposes. It is earlier than either the Black or Golden Wax sorts, and has a peculiar value in the fact that it is always exempt from rust. Per quart, 30c.; pint, 15c.; pkt., 5c.
- Lazy Wife's**. Large, pale green pods; very thick meat; stringless; rich, tender and buttery; ripens early; clings well to the pole. Per quart, 25c.; pint, 15c.; pkt., 5c.
- Dutch Case Knife**. Very productive, one of the earliest. Per quart, 25c.; pint, 15c.; pkt., 5c.
- Indian Chief, or Tall Black Wax**. Yellow pods, very tender and sweet; thick and fleshy. Per quart, 25c.; pint, 15c.; pkt., 5c.
- Kentucky Wonder**. A splendid, vigorous and productive variety. Pods in clusters, succulent and delicious; matures in seventy days from germination, bearing until frost. Per quart, 25c.; pint, 15c.; pkt., 5c.
- Large White Lima**. A large late variety, with long, broad, very thin, dark green pods; although late, it is esteemed as one of the very best. Per quart, 25c.; pint, 15c.; pkt., 5c.
- London Horticultural, or Cranberry**. An old favorite for both snap-shorts and dry beans. Per quart, 25c.; pint, 15c.; pkt., 5c.
- Red Speckled, or Cut Short**. An excellent bean, very productive, and bound to prove satisfactory. Per quart, 25c.; pint, 15c.; pkt., 5c.
- Scarlet Runners**. This variety grows from 10 to 12 feet high; foliage green, and flowers brilliant scarlet; fine for covering arbors, at the same time yielding a supply of wholesome and nutritious food. Per quart, 30c.; pint, 15c.; pkt., 5c.
- White Dutch Runner**. Similar to the preceding, excepting seeds and flower, which are white. Per quart, 30c.; pint, 15c.; pkt., 5c.

BEETS FOR THE TABLE

FR., *Betterave Potagere*. GER., *Runkel Rube*.

One ounce will sow 50 feet of drill; 5 to 6 lbs. to an acre.

Sow as early in spring as ground can be worked, in light, well manured soil, in drills 12 ins. apart, covering the seeds one inch deep, and pressing the soil firmly over them. Thin out 4 ins. apart for table beets; cultivate often.

Beets, Briggs' New Extra Early. (See Novelties).

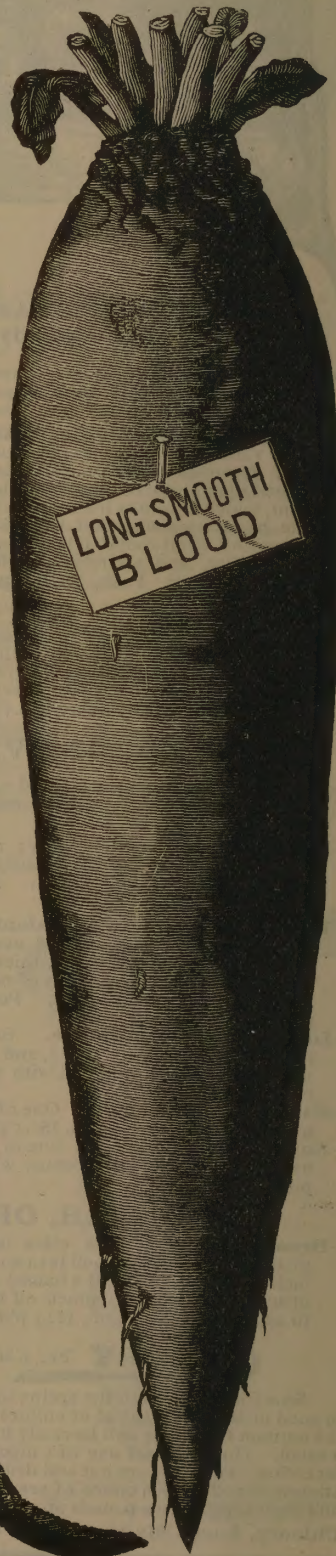

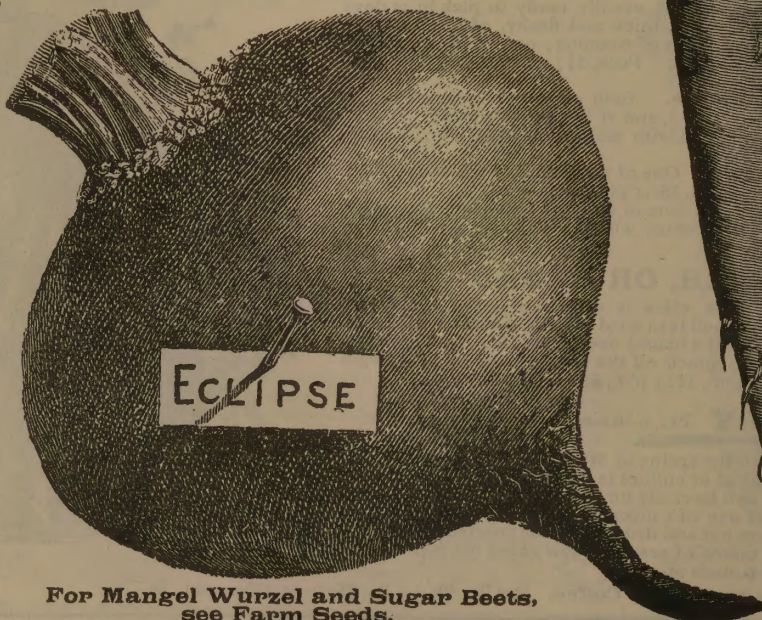

- Black Prince**. Round, medium size, early; deep dark red, tender and sweet. Per lb., 65c.; ½ lb., 20c.
- Dewar's Half Long**. Red flesh-pink zones, sweet and tender; roots smooth and of fine, even shape.
- Crosby's Improved Egyptian**. A very early and carefully selected strain of the original Egyptian; roots somewhat thicker. Per lb., 45c.
- Olive-Shaped**. A superior half-long variety, very smooth; flesh deep blood red. Per lb., 50c.
- Extra Early Egyptian Turnip**. One of the earliest, of good quality and medium size, a fine forcing variety, small top.

- Edmand's Early Blood Turnip**. Very beautiful round form and good size; flesh dark red of finest quality; splendid keeper.
- Lentz Turnip**. Top small; dark red and white; early and profitable; fine even shape.
- Early Blood Turnip**. A standard summer or winter variety. Rich deep blood red. Per lb., 35c.
- Early Eclipse**. Very early; globe-shaped; flesh dark, tender and of desirable quality.
- Early Flat Bassano**. Flesh white, circled with pink. Very sweet, of delicate flavor, early.
- Long Smooth, Deep Blood Red**. An excellent late variety; great improvement on Common Long Blood. Per lb., 35c.
- Ne Plus Ultra**. Half long, dark red, one of the finest varieties in cultivation, especially adapted for market gardeners' use. Per lb., 45c.

Price of any of the above varieties, except where noted, per lb., 40c.; 1-4 lb., 15c.; oz., 10c.; pkt., 5c.

- Spinach Beet, or Swiss Chard**. (White Curled). A variety of beet with beautiful, tender leaves, which are used for "Spinach," and the mid-ribs as "Asparagus." Per ½ lb., 20c.; oz., 10c.; pkt., 5c.

- Ornamental Leaved**. See page 12.

For Mangel Wurzel and Sugar Beets, see Farm Seeds.

Buy our famous Seeds. Please compare prices before sending your orders elsewhere.

CABBAGE

FR., *Chou pomme*.
GER., *Kopf Kohl*.

For early use sow in a hot-bed in February or March. For late crop sow in a nursery bed, May or June, and transplant as soon as the plants are 5 or 6 ins. high. A mixture of salt and ashes applied to the hill when planting is excellent for promoting growth and keeping down the maggot. There is no vegetable in which the character of the seed is of more importance than this. Good seed, deep rich soil, plenty of manure, thorough cultivation. These are the cardinal points in raising a good crop of cabbage. One ounce of seed will raise about 2,000 plants. See remarks on Nitrate of Soda.

FIRST EARLY VARIETIES

- Cabbage, Express Extra Early.** The earliest of all. Medium size, with few leaves; can be planted very close. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- Extra Early Etampes.** Finest French. A very early sort, producing medium sized heads, very sharply pointed. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- Early French Ox-Heart.** Heart-shaped. It grows low on the stump and heads freely. Per lb., \$1; ¼ lb., 30c.; oz., 10c.; pkt., 5c.
- Early Winningstadt.** French. One of the best cabbages for general use. Heads regularly conical, solid, and of excellent flavor. Per lb., 90c.; ¼ lb., 30c.; oz., 10c.; pkt., 5c.
- Early Jersey Wakefield.** One of the earliest and hardiest heading of the extra early sorts, and most gardeners depend upon it for the bulk of their extra early crop. Our stock is grown and selected with the greatest care, and there is none better and few as good. Heads conical, very compact and solid, of excellent quality. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.

EARLY JERSEY WAKEFIELD

- Early Dwarf York.** One of the most popular early varieties. Heads small roundish ovoid; firm and tender. Per lb., 90c.; ¼ lb., 30c.; oz., 10c.; pkt., 5c.
- Early Sugar-Loaf.** A conical-shaped head; a favorite with many. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.

SECOND EARLY VARIETIES

- Cabbage, Early Summer.** The earliest large variety; two weeks later than the Wakefield; a solid, handsome and compact growth. A favorite with gardeners, and valuable for family use. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- All-Head Early.** One of the earliest of large cabbages, being at least a week earlier than Early Summer, fully one-third larger, and sure to produce uniform, solid heads. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- Fottler's Improved Brunswick.** A second early variety of superior quality. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- All Seasons.** An early Drumhead Cabbage, yielding heads of good size. Very desirable, either for extreme early spring or fall use. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- Vandergaw.** A quick growing flat Dutch variety, suitable for fall and winter use, like the All Seasons, which it closely resembles. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- Succession.** Follows ten days after Early Summer, forming more solid heads, while it can be planted nearly as close. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.

LATE VARIETIES

- Cabbage, Autumn King.** One of the finest winter cabbages. Per lb., \$1.25; ¼ lb., 40c.; oz., 15c.; pkt., 5c.
- Surehead.** Produces large, round, flattened heads, of the flat Dutch type, and is remarkable for its certainty to head. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- Premium, or Late Flat Dutch.** A very fine standard variety. Per lb., \$1; ¼ lb., 30c.; oz., 10c.; pkt., 5c.
- Stone-Mason Drumhead.** A standard late sort; heads very solid; fine keeper. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.

VANDERGAW

- Marblehead Mammoth.** Late; the largest cabbage grown; solid; excellent keeper. Per lb., \$1.40; ¼ lb., 40c.; oz., 15c.; pkt., 5c.
- Steele-Briggs' Chester King.** (See cover). Heads are medium size, solid, round, and as hard as they can be, and of a bluish-green color. The quality is fine and flavor excellent, heads when opened being crisp and white. It is very sweet flavored, keeps well; is good for shipping. Per oz., 30c.; pkt., 5c.
- St. Dennis Large Drumhead.** Heads large, round and a little flattened, solid, and of good quality. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- Quintal Drumhead.** Largest of late sorts. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- Large Late Drumhead.** A standard winter cabbage for main crop. Per lb., 90c.; ¼ lb., 30c.; oz., 10c.; pkt., 5c.
- Filderkraut.** A German favorite; fine solid heads. Per lb., \$1.25; ¼ lb., 35c.; oz., 10c.; pkt., 5c.
- Lupton.** A new winter variety of excellent quality and distinct character; a little earlier than the Flat Dutch, but will maintain shape and solidity for storing; of compact growth, color dark green and very uniform head. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.

RED CABBAGE

- Cabbage, Mammoth Rock Red.** A large growing and selected strain of late red cabbage. The heads will average 12 lbs. each. Per lb., \$1.40; ¼ lb., 40c.; oz., 15c.; pkt., 5c.
- Dark Red Early Dutch.** Forms very hard, round heads, of a deep red or purple color. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
- Red Drumhead.** Heads large, nearly round, very hardy, and of exceedingly deep red color. Per lb., \$1.40; ¼ lb., 40c.; oz., 15c.; pkt., 5c.

SAVOY CABBAGES

- Steele-Briggs' Savoy Cabbage, Chester.** Considered the finest Savoy in cultivation; heads solid, large, uniform, deeply savoyed and curled. Per lb., \$1.75; ¼ lb., 50c.; oz., 20c.; pkt., 5c.
- Early Favorite.** The earliest Savoy variety; distinct and good; heads small but firm. Per ¼ lb., 50c.; oz., 15c.; pkt., 5c.
- Victoria.** A medium sized Savoy; most beautifully netted and of excellent quality. Per ¼ lb., 40c.; oz., 15c.; pkt., 5c.
- Early Ulm.** Round, deep green heads; early. Per lb., \$1.35; ¼ lb., 40c.; oz., 15c.; pkt., 5c.
- Drumhead Vertus.** The largest of the Savoy; dark green leaves; fine keeper. Per lb., \$1.35; ¼ lb., 40c.; oz., 15c.; pkt., 5c.
- Globe Curled.** Of delicate flavor; medium size; very solid; heads nearly round. Per lb., \$1.35; ¼ lb., 40c.; oz., 15c.; pkt., 5c.
- Improved American.** Finely curled, solid, round heads; fine flavor; very sure header. Per lb., \$1.35; ¼ lb., 40c.; oz., 15c.; pkt., 5c.

STEELE-BRIGGS' CHESTER SAVOY

Remember our Premium on Seeds in packets and ounces (see page 9).

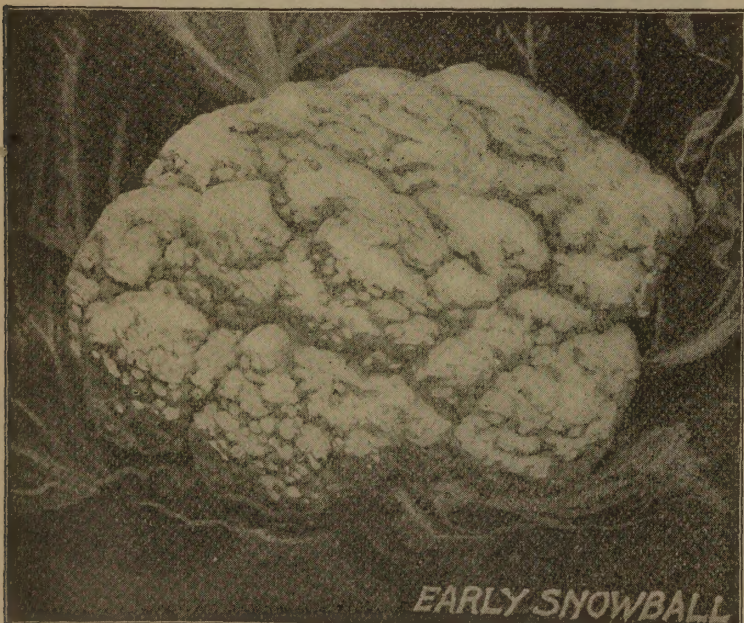

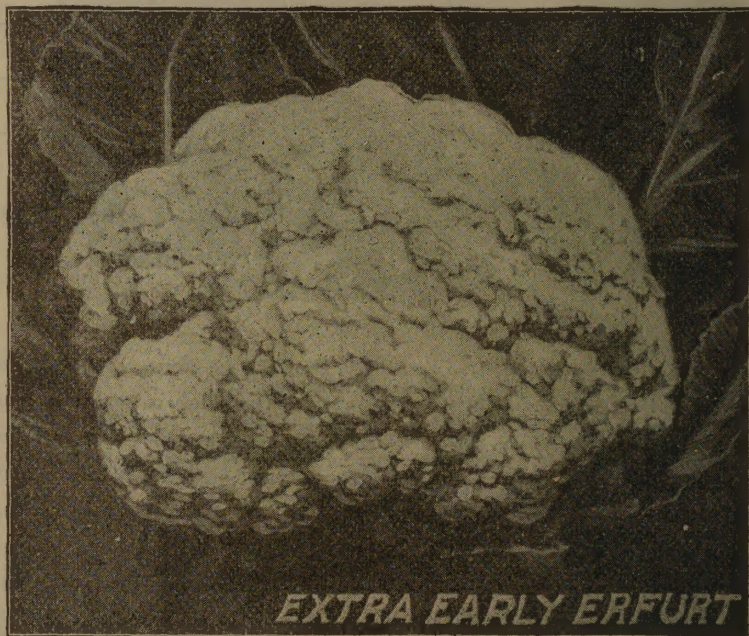

CAULIFLOWER

FR., Chou-Fleur. GER., Blumen Kohl.

For spring and early summer crop sow in March or early in April in hot-bed, and transplant to cold frame when sufficiently large, and to the open ground as soon as danger of hard freezing is over. The plants will endure a light frost. The soil for cauliflower should be like that for cabbage, but it is better to be made richer than is ordinarily used for that crop. Give the plants thorough culture, and keep free from worms with Persian insect powder. For late crop sow at same time as for late cabbage, and treat in the same manner. It should be borne in mind that cauliflower will not head up well in hot, dry weather, and hence the sowing should be so regulated as to bring it in either in early summer or late fall. Although nine-tenths of the cauliflowers grown in this country are produced without it, frequent and abundant watering is so beneficial that it pays well for the labor it costs. After the heads begin to form draw the leaves over them and pin or tie them together to protect them from the sun and keep them white. They should be cut for use while the "curd" is compact and hard, as they soon become tough and bitter after they open and separate into branches. Owing to the seeds of these sorts being very expensive, there is great temptation to use the cheaper sorts. We think it well, therefore, to caution our customers to use only the best—the crop tells.

Cauliflowers grown from our Seed last Season captured First Prize wherever exhibited

- Steele-Briggs' Extra Early Whitehead.** Remarkable both for its extra earliness and certainty to head—features in which we know no other strain can equal it. Of dwarf, compact growth, with short stalks, it bears close planting, and the leaves, growing upright, naturally protect the heads. The large, handsome heads, measuring eight to ten inches across, are pure snowy white, very close, and of the finest quality. So extremely solid and deep, nearly globe shaped, are the heads, that they weigh heavier than most, if not all other cauliflowers of the same size. Gardeners can use our Extra Early Whitehead for either early or late. $\frac{1}{4}$ lb., \$8.00; 2 oz., \$4.25; 1 oz., \$2.30; $\frac{1}{2}$ oz., \$1.25; pkt., 20c.; $\frac{1}{2}$ pkt., 10c.
- Selected Extra Early Dwarf Erfurt.** One of the earliest varieties; small-leaved, dwarf for forcing, producing very solid, pure white heads of the finest quality. Do not confound this variety with the cheaper Early Dwarf Erfurt. $\frac{1}{4}$ lb., \$7.50; 2 oz., \$4.00; 1 oz., \$2.20; $\frac{1}{2}$ oz., \$1.20; pkt., 20c.; $\frac{1}{2}$ pkt., 10c.
- Early Snowball.** More extensively grown than any other variety, both for forcing or wintering over for early crop. It is exceedingly early and hardy, and is one of the surest to make a solid, compact head. For these reasons it is growing more and more in favor for planting for the late summer and fall crop. We have taken great pains to secure the best seed procurable, and confidently recommend it as equal to that offered by anyone. $\frac{1}{4}$ lb., \$7.50; 2 oz., \$4.00; 1 oz., \$2.20; $\frac{1}{2}$ oz., \$1.20; pkt., 20c.; $\frac{1}{2}$ pkt., 10c.
- Steele-Briggs' King of the Earlies.** This new "King of the Earlies" has borne out its name by maturing ready for the table several days ahead of any other variety, and differs from Snowball, Erfurt and other favorite Extra Early sorts, in its form of head, being somewhat flatter at the crown, and broad but quite firm and solid; the foliage is broader than that of the Erfurt type, and erect, forming good protection for the flower while blanching. $\frac{1}{4}$ lb., \$8.00; 2 oz., \$4.25; 1 oz., \$2.30; $\frac{1}{2}$ oz., \$1.25; pkt., 20c.; $\frac{1}{2}$ pkt., 10c.

Cauliflower, Early Large Erfurt Market. A lower priced strain of Erfurt, not so reliable in heading as the Extra Select variety. $\frac{1}{4}$ lb., \$4.50; 2 oz., \$2.50; 1 oz., \$1.50; $\frac{1}{2}$ oz., \$1.00; pkt., 15c.

—**Early Favorite.** About the same size as Early Erfurt; medium sized head, which is solid, crisp, tender, of the very best quality, and keeps in condition for use a long time. $\frac{1}{4}$ lb., \$4.00; 2 oz., \$2.25; 1 oz., \$1.25; $\frac{1}{2}$ oz., 75c.; pkt., 10c.

—**Extra Early Paris.** Heads large, white, compact, solid; excellent flavor, tender and delicious; leaves large, stalks short; a favorite for general early crop. $\frac{1}{4}$ lb., \$2.25; 2 oz., \$1.25; 1 oz., 75c.; $\frac{1}{2}$ oz., 50c.; pkt., 5c.

—**Early Paris, or Nonpareil.** A little later than Early Paris; planted with it will make a fine success on; also an excellent autumn sort, and preferred by some gardeners to any others; heads large, white, solid and fine-flavored. $\frac{1}{4}$ lb., \$2.00; 2 oz., \$1.20; 1 oz., 70c.; $\frac{1}{2}$ oz., 45c.; pkt., 5c.

—**Lenormand's Large, Short Stemmed.** This is without doubt one of the finest late varieties grown; heads large, white, well formed and compact; of excellent quality, very hardy, semi-dwarf, producing many large leaves, which protect the close, solid curd, keeping it well blanched. $\frac{1}{4}$ lb., \$2.25; 2 oz., \$1.25; 1 oz., 75c.; $\frac{1}{2}$ oz., 50c.; pkt., 5c.

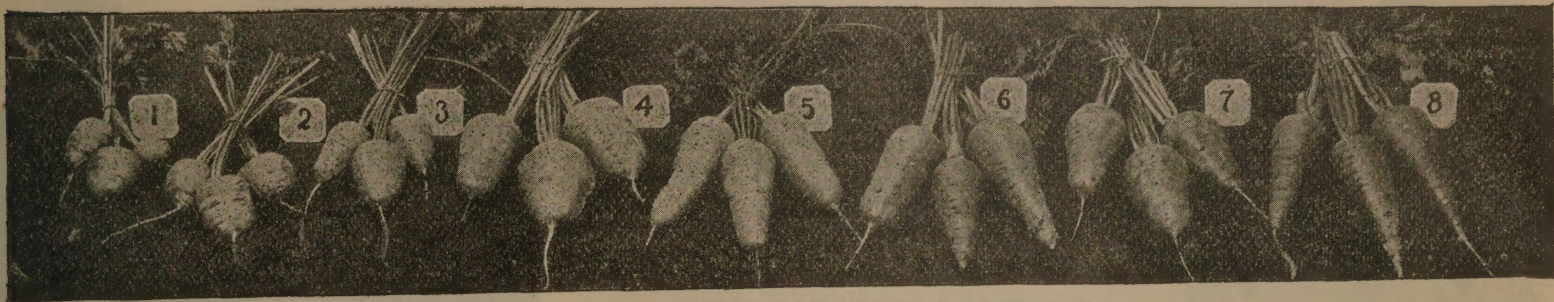

—**Veitch's Autumn Giant.** A valuable late variety; heads large, beautifully white, firm and compact. Being well protected by its heavy foliage, it remains a long time fit for table use. To insure their full development, the plants should be started and transplanted early in the season. $\frac{1}{4}$ lb., \$1.50; 2 oz., \$80c.; 1 oz., 50c.; $\frac{1}{2}$ oz., 30c.; pkt., 5c.

—**Walcheren White.** Large, firm, white heads, very hardy, endure cold, and withstand heat and drought well. $\frac{1}{4}$ lb., \$1.20; 2 oz., 70c.; 1 oz., 40c.; $\frac{1}{2}$ oz., 25c.; pkt., 5c.

Cheap Seeds are dear at any price. You will find our prices very low for the Best Seeds

CARROT

FR., Carotte; GER., Mohre.

PHOTOGRAPH OF SPECIMENS GROWN FROM OUR OWN SELECT STRAINS

One ounce will sow 100 feet of drill; two to three pounds for one acre.

Carrots to grow to perfection, require a rich, deep sandy loam, well pulverized and deeply cultivated; for an early crop sow in May and June in drills about one foot apart, thinning out to four inches in the row; sow for main crop in June and July.

Carrots, Earliest Shorthorn, for forcing (Fig. 1). The earliest variety in cultivation and best suited for forcing. Tops small, finely divided; root dark or reddish-orange, globular, with slender top, and grooved at the crown. They grow about 2 inches in diameter, but should be used before they are full grown. Per lb., 80c.; $\frac{1}{4}$ lb., 25c.

Early Scarlet Horn (Fig. 3). Excellent for planting out of doors. Tops small, coarsely divided; roots tap shaped, but tapering abruptly to a small tap; surface dented; skin orange-red.

Guernsey, or Oxheart (Fig. 4). This variety has given great satisfaction. While not attaining one-half the length of many other varieties, it will compare favorably in bulk of crop, as on good land it will produce Carrots four to six inches in diameter. The crop can also be readily pulled.

Price, each (except where noted), per lb., 55c.; $\frac{1}{4}$ lb., 20c.; oz., 10c.; pkt., 5c.

Half Long Scarlet Nantes, stump rooted (Fig. 5). Tops medium; roots cylindrical, smooth, bright orange; flesh orange, becoming yellow in centre, but with no distinct core; of the finest quality. Per lb., 50c.

Chantenay, Half Long Scarlet, stump-rooted; see cover (Fig. 7). Similar to Scarlet Nantes, but with larger shoulder and more productive.

Half-Long Luc, stump-rooted (Fig. 6). Useful main crop sort; early and productive.

Half-Long Danvers. Thick; of good quality and exceedingly productive.

Scarlet Intermediate, point-rooted (Fig. 8). Size, full medium; skin, bright; flesh orange yellow, fine grained, well flavored, and when young is excellent for table use. Per lb., 45c.

Long Scarlet Altringham. Roots long, with tops an inch or two above ground; of medium size; skin deep scarlet; flesh bright, crisp and of fine flavor; excellent for garden or field cultivation; requires deep cultivation. Per lb., 45c.

PARIS GOLDEN YELLOW

Celery, Dwarf White Solid (large-ribbed). Dwarf, white, stiff, close habit; solid, crisp, and of fair quality. Said to keep in good condition later in the season than any other variety. This variety is also sold as *Large Ribbed Kalamazoo*. $\frac{1}{4}$ lb., 40c.; oz., 15c.; pkt., 5c.

Sandringham, Dwarf White. A very crisp and solid stout-growing variety, juicy, and of decided nutty flavor, remaining a long time fit for use. $\frac{1}{4}$ lb., \$1; oz., 30c.; pkt., 5c.

RED VARIETIES

Celery, Pink Plume. Similar to White Plume, except that the stalks are delicately marked with pink. It also has the rich, nutty flavor of the red Celeries. $\frac{1}{4}$ lb., \$1; oz., 30c.; pkt., 5c.

London Prize Red. One of the best of its color. $\frac{1}{4}$ lb., 80c.; oz., 25c.; pkt., 5c.

New Dwarf Rose. One of the best pink Celeries; large, crisp, and exceptionally nutty; a good keeper and of handsome appearance. The pink Celeries are becoming popular for their fine appearance and superior aromatic, nutty flavor. $\frac{1}{4}$ lb., 75c.; oz., 25c.; pkt., 5c.

Rose Ribbed Paris. This beautiful new Celery possesses all the good qualities of the famous Paris Golden Yellow. It has the same beautiful rich golden yellow color, is self-blanching to the same remarkable degree, and differs only in the color of the ribs; these are of a very attractive shade of rose, which deepens as the season advances. $\frac{1}{4}$ lb., \$1.50; oz., 50c.; pkt., 10c.

Celeriac, Large Smooth, Prague. A variety of Celery with turnip-shaped roots, which are white fleshed, comparatively tender, and have the flavor of Celery stalks. $\frac{1}{4}$ lb., 60c.; 1 oz., 20c.; pkt., 5c.

Soup Celery. (Old Seed). Excellent for flavoring. $\frac{1}{4}$ lb., 15c.; oz., 5c.

CELERY

FR., Celeri; GER., Sellerie.

Sow in the open ground as soon as it is fit to work in April, and keep clear of weeds until the time of planting in June and July. The tops should be shorn off once or twice before planting, so as to ensure "stocky" plants, which suffer less on being transplanted. Plant in rows 3 feet apart for the dwarf varieties, and 4 to 5 feet for the larger sorts, and set 6 inches apart in rows. If the weather is dry at the time of planting great care should be taken that the roots are properly "firmed" by pressing the side of each plant gently with the foot. This compacts the soil and partially excludes the air from the roots until new rootlets are formed, which will usually be in forty-eight hours, after which all danger is over. After the planting of the Celery is completed, nothing further is to be done for six or seven weeks, except running through between the rows with the cultivator or hoe and freeing the plants from weeds. About the middle of August we begin the "earthing up," necessary for the blanching and whitening of that which is wanted for use during the months of September, October and November. The first operation is that of "handling." After all the soil has been drawn up against the plant with the hoe, it is further drawn close around each plant by the hand, firm enough to keep the leaves in an upright position and prevent them from spreading. This being done, more soil is drawn against the row (either by the plow or hoe, as circumstances require), so as to keep the plant in this upright position. The blanching process must, however be finished by the spade, which is done by digging the soil from between the two rows and banking it clear up to the top on each side of the row of Celery. For fuller details on Celery culture see our Celery Manual, which is sent free by mail for 50c.

Celery, Paris Golden Yellow, Large Solid, French (see cover). Beyond doubt the best Celery for early market use. Plants of a yellowish green color when young, but as they mature the inner stems and leaves turn a beautiful golden-yellow, which adds much to their attractiveness and makes the work of blanching much easier. The handsome color, crispness, tenderness, freedom from stringiness, and fine nutty flavor of this variety make it only necessary to be tried in order to establish it as the standard of excellence as an early sort. $\frac{1}{4}$ lb., \$1.25; oz., 40c.; pkt., 10c.; $\frac{1}{2}$ pkt., 5c.

White Plume. Excellent variety; tender, crisp, mild, pleasing flavor; not a good keeper. $\frac{1}{4}$ lb., 70c.; oz., 20c.; pkt., 5c.

Giant Pascal. A green leaved variety developed from the Golden Yellow Large Solid, and has no superior for fall and winter use. It blanches very quickly after earthing up, to a beautiful yellowish-white color, is very solid and crisp and of a nutty flavor. The stalks grow broad and thick. With rich soil and high culture this variety will give the best of satisfaction. $\frac{1}{4}$ lb., 50c.; oz., 15c.; pkt., 5c.

Golden Heart, or Golden Dwarf (self blanching). A distinct variety of sturdy dwarf habit. Solid, an excellent keeper, fine nutty flavor. When blanched, the large and full heart is light yellow, making this an exceedingly showy and desirable variety for both market and private use. $\frac{1}{4}$ lb., \$1; oz., 30c.; pkt., 5c.

Boston Market. For many years one of the most popular sorts in the markets of Boston. Instead of a single large heart it forms a number of smaller ones, which are remarkably tender and crisp. The best variety for light soils. $\frac{1}{4}$ lb., 40c.; oz., 15c.; pkt., 5c.

GIANT WHITE PASCAL

CORN SWEET OR SUGAR

FR., *Mais*;
GER., *Mais*.

44 lbs. per Bushel.

All varieties of Sweet or Sugar Corn may be either sown in rows four and one-half feet apart, and the seeds placed about eight inches apart in the rows, or planted in hills at distances of three or four feet each way, according to the variety grown or the richness of the soil in which it is planted. The taller the variety, or the richer the soil the greater should be the distance apart. We make our first plantings in this vicinity about the middle of May, and continue successive plantings every two or three weeks until the last week in July. Cultivate often and thoroughly. One pint of seed plants 100 hills. One peck will plant one acre. For field varieties see *Agricultural Seeds*.

Add 5c. pint, 10c. quart for postage if wanted sent by mail.

EARLY VARIETIES

Corn, Extra Early Cory (White Cob). Undoubtedly the earliest of all, and the very best extra early Sweet Corn. Peck, 75c.; quart, 15c.; pint, 8c.; pkt., 5c.

—**First of All** (Red Cob Cory). Differs from the preceding only in the color of the cob. Peck, 70c.; quart, 12c.; pint, 7c.; pkt., 5c.

—**Early Marblehead**. A week later than the Cory; ears medium size, eight rowed, small, red cob, kernel broad, shallow and very sweet. Peck, 70c.; quart, 12c.; pint, 7c.; pkt., 5c.

—**Early Minnesota**. Next to the Marblehead in earliness; ears of fair size, kernels broad, sweet and tender. Peck, 70c.; quart, 12c.; pint, 7c.; pkt., 5c.

—**Crosby Early Sugar**. Early and a great favorite. Rather small ears, but productive and of excellent quality. Peck, 70c.; quart, 12c.; pint, 7c.; pkt., 5c.

—**Early Giant** (new). We have much pleasure in introducing this grand new and distinct variety of Sweet Corn. It combines more merit than any other early variety in cultivation. The ears grow to a large size, kernels pure white, sweet and tender. The accompanying cut is taken from a photo of ears grown on high land on stalks from 4 to 5 ft. high, and needs no further explanation. Gardeners report the corn ready to use in sixty days grown on sand, and seventy-two days on heavy clay. It is worthy of general use, and will entirely supplant many older varieties. Price, by mail (postpaid), quart, 25c.; pint, 15c.; pkt., 5c.

MEDIUM EARLY VARIETIES

Corn, Perry's Hybrid. No better second early for the market gardener. It is nearly as early as Early Minnesota, but makes a larger ear. Kernels white, large, sweet and very tender. Peck, 70c.; quart, 12c.; pint, 7c.; pkt., 5c.

—**Shaker's Early**. A splendid market sort, ready very soon after Early Minnesota, but the ears are much larger. The stalks, in good soil, attain a height of 6 ft., bearing usually 2 large ears, well filled out to the tips of each cob; the kernels are large, white, and of delicious flavor. Peck, 70c.; quart, 12c.; pint, 7c.; pkt., 5c.

LATE OR MAIN CROP VARIETIES

Corn, Country Gentleman. This variety is the highest attainment yet achieved in the cultivation and improvement of Sweet Corn; remarkably delicious corn for family use. Its long, small, milky kernels are full of sweetness, and as the cob is small, and the corn white and tender, it is sure to please. Peck, 70c.; quart, 12c.; pint, 7c.; pkt., 5c.

—**Mammoth**. Second Early. Largely used by market gardeners. Produces the largest ears of any sweet corn; ripens earlier than the evergreen. Peck, 70c.; quart, 12c.; pint, 7c.; pkt., 5c.

—**Red Cob Evergreen**. A sport from Stowell's evergreen with a red cob and slightly earlier. A most excellent sweet table corn. Peck, 70c.; quart, 12c.; pint, 7c.; pkt., 5c.

—**Stowell's Evergreen**. Grown more extensively than any other; a great favorite with canners and market gardeners for late use. The ears are of large size; kernels very deep, tender and sugary; very productive, and remains for a long time in fit condition for table use. Peck, 60c.; quart, 12c.; pint, 7c.; pkt., 5c.

—**Pop Corn**. Cultural directions same as for Sugar Corn. Quart, 15c.; pint, 10c.; pkt., 5c.

CRESS, OR PEPPER GRASS

FR., *Cresson*; GER., *Kresse*.

Sow thickly in shallow drills, early in the spring, and at intervals throughout the season, for a succession, as it soon runs to seed. Water Cress requires a stream of running water, ditch or pond, in which it will grow without care, except at first keeping weeds from interfering with it. It is easily introduced by planting along the margin of ditches or streams, and increases rapidly by the spreading of the roots or from the seed.

Cress, Extra Curled. Very fine; may be cut two or three times. Per lb., 40c.; $\frac{1}{2}$ lb., 15c.; oz., 10c.; pkt., 5c.

—**Broad-Leaved Green**. Very large leaved variety, pungent and pleasant flavored. Sometimes used for soups. Per lb., 45c.; $\frac{1}{2}$ lb., 20c.; oz., 10c.; pkt., 5c.

—**Australian**. Leaves delicate green, mild and fine flavor; considered the best variety in cultivation. Oz., 15c.; pkt., 5c.

—**Upland**. A perennial variety, used much the same as Water Cress, which it strongly resembles in taste. Oz., 35c.; pkt., 10c.

—**Water**. A most desirable and appetizing salad, thriving best in shallow water, on the edges of streams. Per oz., 40c.; pkt., 10c.

CHERVIL, CURLED FR., *Cerfeuil*; GER., *Gartenkerble*.

Cultivated and used like Parsley; sow at any time in the spring in shallow drills, one ft. apart. $\frac{1}{2}$ lb., 30c.; oz., 10c.; pkt., 5c.

CORN SALAD, OR FETTICUS FR., *Mache*; GER., *Ackersalat*.

Grown for use as a salad. Sow very early in spring, in rows a foot or more apart. In six or eight weeks it is ready for use. For early spring use sow in September, and when cold weather sets in, cover with litter, and winter over like Spinach. Per lb., 60c.; $\frac{1}{2}$ lb., 20c.; oz., 10c.; pkt., 5c.

EGG PLANT

FR., *Aubergine*; GER., *Eierpflanze*.

For perfection of growth, a rich soil, plenty of moisture and warm weather are required, with the addition of frequent hoeing. Sow in a gentle heat about the first of April. Transplant about the middle of June, setting the plants three feet apart. One ounce to fifteen hundred plants.

Egg Plant, New York Improved. Purple; best for market and home use; very large, oval, heavy fruit. Oz., 50c.; pkt., 10c.

—**Early Long Purple**. Fruit longer and smaller than the above sorts; hardy, productive, early and excellent. Per oz., 30c.; pkt., 5c.

COUNTRY GENTLEMAN

sand, and seventy-two days on heavy clay. It is worthy of general use, and will entirely supplant many older varieties.

Price, by mail (postpaid), quart, 25c.; pint, 15c.; pkt., 5c.

EXTRA CURLED CRESS

BROAD LEAVED CRESS

Turn your back on old notions—join the majority and use the best Seeds.

CUCUMBER

FR., Concombre.
GER., Gurke.

1 oz. for 50 hills; 2 to 3 lbs. in hills for an acre.

For very early Cucumbers, sow the 1st of April in a hot-bed, upon pieces of sod (grass-side down) so that they can be readily transplanted to the open ground, in rich soil, when danger of frost is over, or protect by hand-glasses. For general use plant when the weather has become settled and warm in hills about four feet apart each way; thin out to four of the strongest plants to each hill, after all danger from insects is over; they succeed best in a warm, moist, rich, loamy soil; continue planting at intervals for a succession. The Cucumbers should be gathered when large enough for use, whether required or not; if left to ripen it destroys their productiveness. For pickles plant from June until the middle of July.

Prices for the following varieties (except where noted), per pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 20c.; lb., 50c.

Cucumber, Cool and Crisp. An improved variety of the Early Arlington, white spine, being longer, more cylindrical and tapering at the ends, a most desirable shape for pickles. At the pickling stage, they are long, slim and even, and of a deep dark green color. One of the earliest and most prolific of cucumbers. The flesh is peculiarly crisp and tender, and is one of the very best for table use. Per lb., 60c.

Extra Early Long Green. This new strain of Long Green is claimed to be as early as the White Spine. The earliness combined with size, makes it quite desirable for the market gardener. Per lb., 60c.

Japanese Climbing. Vines are extra strong and foliage much more vigorous than other kinds, and being a climbing sort can be grown on trellises, etc., saving valuable space in small gardens. It is very prolific, from forty to fifty cucumbers having been counted on single plants. Fruit cylindrical, about ten inches long, thick and of fine flavor. $\frac{1}{4}$ lb., 25c.; lb., 70c.

White Wonder. A most distinct and valuable variety. It is of a pure waxen white from the time the fruit is first set until it has matured. It is very prolific and likely to be valuable both for forcing and garden cultivation. Per lb., 60c.

Paris Prolific Pickling. A very desirable and distinct French sort. The fruit is very long, slender, cylindrical; densely covered with fine prickles, and deep rich green in color. The flesh is very crisp and tender. Per lb., \$1; $\frac{1}{4}$ lb., 30c.; oz., 15c.; pkt., 5c.

Short Green Gherkin. A very small prickly variety, used exclusively for pickling, for which purposes it should be gathered while young and tender. A favorite with market gardeners. Per lb., \$1.20; $\frac{1}{4}$ lb., 35c.; oz., 15c.; pkt., 5c.

Hill's Forcing White Spine. Of perfect form, remarkably even, and of that desirable dark green color. It grows more compact about the hill than most other kinds. Considered to be one of the best table varieties. Per lb., 60c.

Giant Pera. This magnificent variety is of most delicious flavor; flesh white, very crisp and tender at all stages, and can be eaten at any time during growth. Of enormous size. Per lb., 60c.

Steele-Briggs' Evergreen (see cover). A remarkably fine strain of Cucumber, which is especially recommended for market, table, or pickling purposes, differing from the ordinary and popular White Spine in color; it retains a deep green color in all stages of its growth; produces extra long smooth shaped fruit; very prolific and very white in flesh, tender and crisp.

OTHER STANDARD VARIETIES

Evergreen Early White Spine.

Early Arlington White Spine.

Nichols' Medium Green.

Improved Long Green.

Chicago or Westerfield Pickling.

Early White Spine, Per lb., 45c.

Green Prolific.

Early Frame. Per lb., 45c.

Short Green. Per lb., 45c.

Long Green. Per lb., 45c.

FORCING OR FRAME CUCUMBERS

These are grown in the greenhouse or in a hot-bed; very handsome, both in form and color; attain a length of from 20 to 30 inches. The following are the cream of the many popular sorts:

Cucumber, Blue Gown. Black spined variety, 18 to 24 inches long. Per pkt., 20c.

Cuthill's Black Spine. Very handsome fruit of moderate size, prolific. Per pkt., 20c.

Duke of Edinburgh. A fine white-spined variety, averaging over 30 inches in length. Pkt., 20c.

Marquis of Lorne. A fine white-spined variety; immense size and symmetrical form. Pkt., 20c.

Empress of India. (Reid's). A fine white-spined variety, growing from 18 to 24 inches, very uniform in shape, of excellent flavor and remarkably productive. Per pkt., 20c.

Carter's Model. Handsomest Cucumber grown; perfect outline, scarcely any neck, fine flavor. Pkt., 20c.

Rollison's Telegraph. Very prolific, crisp, and of superior quality. Per pkt., 25c.

GOURDS FR., Gourde; GER., Zier Kuerbis.

The following varieties will be found useful for household and farm purposes. Instructions for growing are printed on each paper of seed. For ornamental varieties see flower seeds, page 18.

Gourd, Dipper. Valuable for household purposes. Make dippers of various sizes, which will last years. Pkt., 5c.

Sugar Trough. They grow to hold from 4 to 10 gals. each, have thick, hard shells, light, but durable. Pkt., 5c.

Nest Egg. Grows exact size, color and shape of an egg, and makes a very good nest egg. It is a rapid growing climber. Do not plant until danger from frost is over. Pkt., 5c.

ENDIVE FR., Chicoree; GER., Endivien.

This plant makes a tender and delicious autumn salad. It is planted in June or July, and when nearly full grown the outer leaves are tied together in order to bleach in the centre. One ounce will sow 100 feet of drill, and will produce about three thousand plants.

Endive, Extra Green Curled. Curled dark green leaves, which blanch white, crisp and tender. Price per lb., \$1.50; $\frac{1}{4}$ lb., 50c.; oz., 20c.; pkt., 5c.

Moss Curled. Has the appearance of a tuft of moss, color dark green; blanches beautifully. Price per lb., \$1.50; $\frac{1}{4}$ lb., 50c.; oz., 20c.; pkt., 5c.

LEEK FR., Poireau; GER., Lauch.

The Leek is very hardy, of easy culture, and succeeds best in a light rich soil. Sow early in April, in drills 1 foot apart, and 1 inch deep. When the plants are 6 to 8 inches high transplant in a deep rich soil, in rows 12 inches apart and 6 inches in the rows, as deep as possible, so that the neck may be covered and blanched; draw the earth to them as they grow. One ounce will sow about 100 feet of drill.

Leek, London Broad Flag. Large and strong, with broad leaves growing only on two sides, like the Flag. Per lb., 80c.; $\frac{1}{4}$ lb., 25c.; oz., 10c.; pkt., 5c.

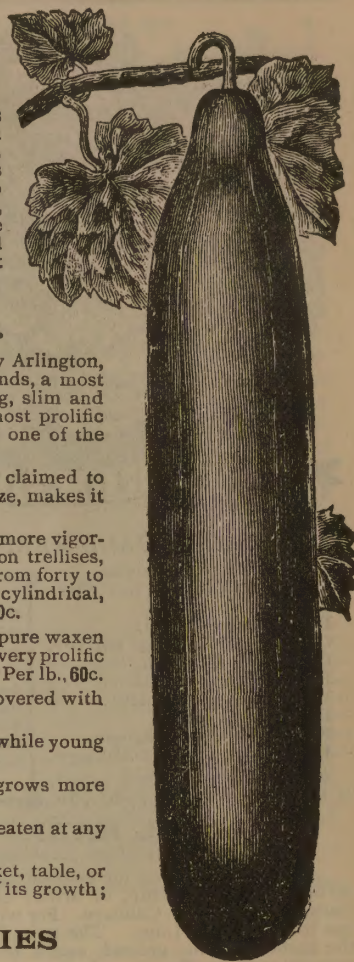

Giant Carentan. The largest variety; often three inches in diameter, and becoming very white and tender; a very hardy sort. Per lb., \$1.10; $\frac{1}{4}$ lb., 30c.; oz., 10c.; pkt., 5c.

Musselburgh. A very large variety of superior quality. Per lb., \$1.25; $\frac{1}{4}$ lb., 40c.; oz., 15c.; pkt., 5c.

We pay postage on packet, ounce, $\frac{1}{4}$ lb., and lb. prices (except where noted), to any address in Canada

KOHL RABI

FR., *Chou Rave*; GER., *Kohlrabi*.

Kohl Rabi is sown for general crop in the spring, like the Turnip, in drills; or may be transplanted like the Cabbage. For winter table use sow middle of June. The stem, just above the surface of the ground, swells into a bulb something like a Turnip. It is cooked like the Turnip, and is highly prized for stock in Europe, as a substitute for Turnips. It will bear drought better, and therefore a crop is more certain.

- Kohl Rabi, Early White Vienna.** Green top, white flesh, popular, handsome, good flavor. Lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.
 —**Early Purple Vienna.** Differs from the preceding only in color. Lb., \$1.50; ¼ lb., 40c.; oz., 20c.; pkt., 5c.

MUSHROOM SPAWN

Although the Mushroom is one of the most delicious, and at the same time most nutritious of all known esculents, its cultivation is not generally understood. We have had so many inquiries regarding cultivation of Mushrooms that we have prepared and published an 8-page pamphlet, written by a practical grower, which gives in a concise form all necessary information for the successful raising of the best Mushrooms. This pamphlet will be sent free to any one interested. We make a specialty of supplying the genuine English "Miltack" Mushroom Spawn. We receive several importations a year, so that customers can depend on receiving spawn fresh and genuine at all times. **Mushroom Spawn, English.** Per brick, 25c.; 5 for \$1 (postpaid); by express 5 for 75c.; 10 for \$1.20; 16 for \$1.60.
 —**French.** Per 2-lb. box, \$1.10, postpaid.

MUSHROOM CULTURE

Chapters on "Mushroom House," "Preparations of Materials," "Spawn," "Spawning," "Culture in Cellars and Out-houses," "Cave Culture," "Culture in Open Air," "Culture in Pastures," "Mushroom Varieties," "Modes of Cooking," etc. Profusely illustrated. New edition, 172 pages. By WM. ROBINSON, F.L.S. Cloth, 50c., postpaid.

A BED OF MUSHROOMS GROWN FROM OUR SPAWN

LETTUCE

FR., *Laitue*.
 GER., *Lattich*.

One ounce will sow 150 feet of drill.

Lettuce is a plant of most simple culture when grown in the open air. It requires rich soil, plenty of well rotted manure and abundant moisture. With these conditions its growth is vigorous and rapid; and to be crisp and tender, it should be grown quickly. Of all the salad plants, lettuce easily takes the lead; and no garden is worthy the name without its lettuce-beds. It has few, if any, insect enemies, and flourishes throughout the spring and summer months. Droughts and hot weather are its worst drawbacks, as during such periods it is inclined to run up to seed. Seed may be sown in a frame in February or March, not much bottom heat being required. The plants may be set out as early as the ground can be worked, as light frosts will not injure them. Set in rows about eighteen inches apart, leaving eight or ten inches between plants. For successive crops, sow every two weeks up to July.

- Lettuce, Grand Rapids Forcing.** This is regarded in the West as the best forcing and shipping variety. It matures quickly, is of large size and of handsome appearance, crisp and tender, and will keep from wilting after cutting longer than any other sort. ¼ lb., 35c.; oz., 15c.; pkt., 5c.
 —**Big Boston.** A most desirable variety, either for forcing or for open ground; very large and solid, heads well, and is a valuable sort. ¼ lb., 50c.; oz., 20c.; pkt., 5c.
 —**Toronto Gem.** (See cover). The finest market variety to be found. Its beautiful yellowish green color, crimped, curled and well formed heads, tender quality and sweet flavor place it at the head of the list for the market gardener or for family use. It withstands the heat of summer, and retains its sweetness for a longer time than any other variety we know. ¼ lb., 35c.; oz., 15c.; pkt., 5c.
 —**Nonpareil Cabbage.** One of the best in cultivation; color, beautiful light yellowish green; heads well; very tender. ¼ lb., 35c.; oz., 15c.; pkt., 5c.
 —**Ohio Cabbage.** Early Ohio is good either for spring or summer use; forms a large solid head of a beautiful light green color; very tender and of delicious flavor. ¼ lb., 35c.; oz., 15c.; pkt., 5c.
 —**All the Year Round.** A very hardy, compact variety; white, solid and crisp; for the summer and forcing this variety is unsurpassed. ¼ lb., 30c.; oz., 10c.; pkt., 5c.

- Black-Seeded Simpson.** (Curled). Forms a large loose head; its nearly white curly leaves are large, thin, exceedingly tender, and of very good quality; one of the very best sorts for the frame or hot-house, as well as for early outside planting; not so desirable for shipping as Grand Rapids. ¼ lb., 35c.; oz., 15c.; pkt., 5c.
 —**Red Edge Victoria.** Crisp and tender; of a light pale green color, tinged with red at the edges; one of the best for family uses. ¼ lb., 35c.; oz., 15c.; pkt., 5c.

COS, OR CELERY LETTUCE

This is the favorite class of Lettuces in Europe, and is becoming more popular here. The long narrow leaves, which form solid heads almost like a Wakefield Cabbage, bleach and quickly become snowy white. They excel all other Lettuces in quality, having a taste and crispness unequalled. The leaves when bleached are stiff like celery stalks, and can be eaten in the same manner.

- New Celery Lettuce, "Trianon."** This excels all other Lettuces in quality, having a crispness, tenderness and flavor peculiarly its own and unapproached by any other variety. The heads are long and conical, often nine inches high by eighteen inches in circumference. The long and narrow leaves require to be tied, when they soon form solid heads and quickly bleach to snowy whiteness, and become as stiff, crisp and sweet as celery stalks, and are delicious when eaten in the same manner, or prepared for salad. Price, per ¼ lb., 40c.; oz., 15c.; pkt., 5c.
 —**Paris White Cos.** ¼ lb., 40c.; oz., 15c.; pkt., 5c.

MUSTARD

FR., *Moutard*; GER., *Senf*.

Sow thickly in drills 8 or 10 inches apart, in rich, loamy soil, covering the seed half an inch deep. When young the leaves are used in salad, and in more advanced stage as greens in the same way as spinach. Sowings for succession may be made from April till July.

Mustard, White. The best for salads; seeds are also used for mixing with pickles and for preserving cider. Lb., 30c.; ¼ lb., 15c.; oz., 10c.; pkt., 5c.

—**New Chinese.** Highly esteemed for salads. The leaves are twice the size of the ordinary White Mustard, flavor sweet and pungent. ¼ lb., 25c.; oz., 10c.; pkt., 5c.

MELON—MUSK

FR., Melon. GER., Zucher Melone.
1 oz. for 60 hills; 2 to 3 lbs. in
hills for an acre.

The Melon, being of tropical origin, reaches perfection only in a warm temperature. In this latitude we must give the Melon every possible advantage to secure earliness and thorough ripening. The same culture as recommended for Cucumbers will ensure success. It is desirable also for the North to secure early ripening varieties. There are two distinct species of Melons—the Musk and the Water Melon. The former is the most easily grown, though, with a selection of early sorts and a little attention to forwarding the young plants early in the season, a good crop of either can be secured almost anywhere. The Melon will grow and ripen well in a warm, sandy, poor soil, but when grown in such a situation the hill must be thoroughly enriched with plenty of available food for the roots.

SELECT VARIETIES

Price, each, for the following varieties, except where noted: $\frac{1}{2}$ lb., 20c.; 1 oz., 10c.; pkt., 5c.

- Melon, Musk. The Banquet.** "The Banquet" is a medium-sized Melon, flat at both ends, and more beautifully netted than any other known variety. In quality it has no equal, the flesh is uniformly deep and of that granulated character that always indicates a good melon; the color is a dark rich salmon.
- Early Hackensack.** This strain is the result of careful selection of the old variety of the same name, but is ten days earlier and of superior quality. Flesh light green and of delicious flavor.
- Emerald Gem.** Medium size; nearly round; flesh a delicate light salmon color, very thick, fine grained, and of most excellent flavor. The rind is thin, dark green, ribbed, slightly netted. One of the best for home use.
- Large Hackensack.** Fruit large; slightly flattened at ends; lightly ribbed and closely netted; flesh thick; deep green and of sweet, pleasant, musky flavor.
- Osage, or Miller's Cream.** A leading favorite yellow-fleshed variety. It is round, slightly ribbed and netted; skin very dark green; flesh a deep, rich salmon, sweet, highly flavored and delicious to the rind; it is very seldom that one of poor quality is found. The whole crop is very even and extra heavy, owing to the thickness of the meat.
- Surprise.** This old variety is still highly esteemed by many. Vines hardy and productive; fruit oval, not deeply ribbed, covered with slight patches of netting; skin yellowish white; flesh deep salmon color.
- Tip-Top.** Quite distinct in appearance, this new Melon is of the finest quality; flesh yellow, sweet, juicy and firm, but not hard; fruit ribbed and beautifully netted; a very productive and excellent variety. $\frac{1}{4}$ lb., 30c.; oz., 15c.; pkt., 5c.
- Exquisite.** (See Novelty list.)

- Montreal Green Nutmeg.** To all who wish to grow the handsomest Melon possible for exhibition or for market, we recommend this one. The shape is almost round; deeply ribbed; skin, green and densely netted; flesh remarkably thick, light green and of fine flavor.
- Princess.** A distinct Melon, and one of the best, both for market and the home garden. They are nearly round; skin dark green, thickly netted; flesh salmon, very thick and of excellent flavor. They ripen early. This Melon was introduced several years ago, and while we did not find it in our trials to equal the Osage, we can recommend it to our customers as an extra good sort.
- Banana.** Yellow-fleshed; entirely free from netting; skin delicate straw color.
- Bay View.** The leading oblong, green-fleshed sort; large, prolific and fine flavor.
- Casaba, or Green Persian.** Fruit long, oval, a little pointed at each end; flesh pale yellow, very mild flavor.
- Large Yellow Cantaloupe.** Flesh reddish orange, sweet, and of good flavor; early and productive.
- Skillman's Netted.** Form, roundish oval; flesh light green, sweet and richly perfumed; an early and delicious variety.
- Small Green Nutmeg.** Fruit round, of medium size, slightly ribbed; skin dark green, becoming yellow when over ripe; flesh thick, a little coarse, but of fine flavor. This variety is in universal demand for both home and market use.
- Irondequoit. (New.)** Flesh thick, orange-yellow in color, melting, juicy, nectar-like. The vine is a strong grower and very productive. Fruit is large—12 to 15 inches in diameter—round, ribbed, of light grayish color, with a prominent network over the surface. A splendid Melon. $\frac{1}{4}$ lb., 30c.; oz., 15c.; pkt., 5c.

MANGO MELON

Also called Vegetable Peach, or Vine Peach. This peculiar new vegetable grows on a vine like a melon, and is golden yellow in color, resembling an orange in shape and size, and the flesh is snow white. They are used fried, like egg plant, when green; they also make splendid mangoes, stuffed with cabbage, like peppers. When they first ripen they are quite hard and tasteless, but they soon become mellow and sweet, and have a very rich flavor. For sweet pickles, pies or preserving they have no equal. They are very early, hardy and productive, the vines being literally covered with fruit. You should try them, and we know you will be pleased with them. Will suit the North-West, where fruit is scarce. Oz., 10c.; pkt., 5c.

GARDEN LEMON

The Garden Lemon is a very interesting fruit, about the size of a lemon; bright golden color; pulp about half an inch thick; agreeable, pleasant flavor, sub-acid, with the richness of a musk melon; a desirable addition to the list of new fruits. Cultivate in hills. Oz., 10c.; pkt., 5c.

How to Prepare Garden Lemons for Preserves.—Peel, halve and remove seeds from the Garden Lemons selected. To each pound of fruit so prepared allow one pound of white sugar. Sprinkle sugar over fruit and let stand over night; pour off juice into preserving kettle and let it come to a boil; then place the fruit in and cook until fork will pierce it easily. Take out carefully and place in jars. Let syrup boil a few moments to thicken, then skim and pour over fruit; seal closely.

MELON—WATER

FR., Melon d'eau. GER., Wasser-Melone.

One ounce will plant 30 hills.

Water Melons are cultivated in hills, which should be six to eight feet apart each way, and composed of light, moderately rich soil. The hills should be dug about two feet square; eighteen inches deep, and half filled with well-rotted manure, which must be thoroughly incorporated with the soil. Plant in May, ten seeds to a hill, and when the plants are well up, thin out to three. Cultivate until the vines cover the ground, and pinch the ends of the growing shoots to induce early fruiting.

Price, each, of the following varieties (except where noted),
 $\frac{1}{4}$ lb., 20c.; 1 oz., 10c.; pkt., 5c.

Melon, Black Spanish. Fruit medium size, almost round; skin dark green; flesh red, sweet and delicious.

Cuban Queen. A very fine variety, growing to great size; flesh, bright red, solid and sweet. The skin is beautifully striped with dark and light green. Melons are wonderfully solid, rind thin. They are enormously productive and ripen early.

Dixie (7). A melon of excellent quality, extremely sweet, juicy and tender. Very early, hardy and productive.

Hungarian Honey (5). This variety ripens early. The flesh is a very brilliant red color, and of a very rich honey flavor; color of skin medium bright green; uniformly of medium size.

Mountain Sweet. A good early variety. Standard everywhere. Oblong in shape, dark green color with beautiful core; is of good size. Its color and shape make it valuable for all purposes.

Peerless (4). Grand favorite and standard variety. Superior in every respect. Has beautiful crimson core, which is always fine grained and cannot be surpassed in flavor. Very prolific, magnificent grower. Is one of the best for market and home purposes.

Phinney's Extra Early (3). Established standard sort, of western origin and well acclimated; it is sweet, of good size and very productive. Its market qualities are the very best; flesh is red, sweet and luscious. It will please you for all purposes. Include it in your order.

Ruby Gold (2). This is a fine, new, large, long melon; the flesh is solid, pure golden yellow, variegated with streaks and layers of bright pink; most delicious flavor and melts in the mouth like cream. One of the earliest, a sure cropper, and is the most beautiful table melon grown.

Seminole. A long oval melon, of fair quality and profuse bearer. Melons either gray or light green in color.

The "Boss." Oblong in shape; skin, dark green; flesh, deep scarlet and rich flavor. Early, heavy, productive and a good shipper.

Sweet Heart. A new variety of largest size, a little longer than thick, being nearly globular in shape, skin a bright beautiful mottled green. Flesh bright red, firm and heavy but crisp, melting and exceedingly sweet. Sweet Heart is not only a good keeper but it improves in quality for a long time after ripening. $\frac{1}{4}$ lb., 30c.; oz., 15c.; pkt., 5c.

Cole's Early. An early variety that is named will mature in any latitude where the season is as long as that of New York State. A fine melon, of medium size, almost round in shape, green, striped a lighter shade. Thin rind, bright red flesh of a delicate texture. $\frac{1}{4}$ lb., 30c.; oz., 15c.; pkt., 5c.

OKRA, or GUMBO

FR., Gombo; GER., Essbarer.

Extensively cultivated for its green pods, which are used in soups and stews, and are very wholesome and nutritious. Sow about the middle of May, in drills three feet apart, and thin out the plants to one foot apart.

Okra, Long Green. Long ribbed pods; very productive. Oz., 15c.; pkt., 5c.

MELON—CITRON

(PRESERVING)

Melon, Citron. Standard everywhere for making preserves; slightly striped, round in shape. Makes the most beautiful, delicious, clear, transparent preserves. You should have this variety in your garden. It grows wonderfully prolific. $\frac{1}{4}$ lb., 20c.; oz., 10c.; pkt., 5c.

Colorado Mammoth. This is quite distinct from the ordinary preserving citron, the seeds being of light green color. It is immensely productive. The flesh is very firm and solid, with few seeds. The preserving qualities are the very finest; makes beautiful, clear, nearly transparent preserves of surpassingly fine flavor. You should try it. $\frac{1}{4}$ lb., 20c.; oz., 10c.; pkt., 5c.

MARTYNIA

The seed pods are used to a considerable extent for pickling when gathered green and tender. Sow in the open ground in May. Oz., 30c.; pkt., 5c.

ONION SETS

Prices for Onion Sets are based on market values at time of sale; we therefore are unable to quote bushel prices now, but shall be glad to give prices by letter, in season, to those who write. Prices, as quoted by the pound, pint and quart, include postage, and will stand unchanged during the season. As Onion Sets are liable to injury from frost, we do not send them out until the weather is safe in spring.

Onion Sets, New White Multiplier. These are of a pure silvery white color, enormously productive, frequently producing as many as twenty bulbs in a single cluster from a single bulb planted, of excellent quality and size for bunching green, or can be ripened for use as pickling onions, and for this latter purpose can be grown much more economically than from seed. Their keeping qualities are remarkable, having kept perfectly sound for a year; but their most important quality is extreme earliness, being ready for market from three to four weeks ahead of other Onion Sets. Pint, 18c.; quart, 30c.

Dutch Sets (Yellow). Quart, 20c.; two quarts, 35c.

Top, or Button Onions. Pint, 15c.; quart, 25c.; two quarts, 45c.

English Potato Onions. Lb., 15c.; four lbs., 50c.

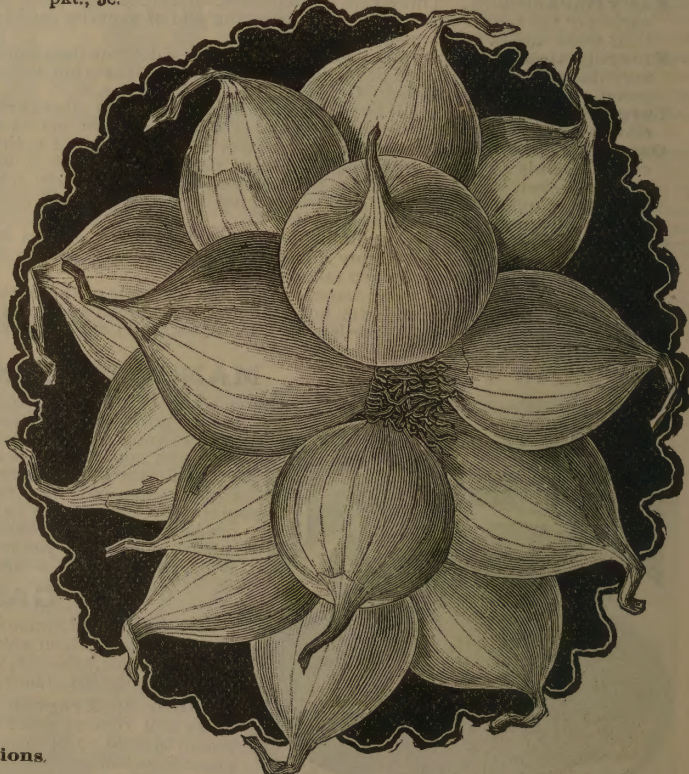

Shallots. Quart, 10c.; four quarts, 30c.

Egyptian, or Perennial Tree Onion. These are for fall planting, very hardy, and a great favorite, producing green Onions in the spring before any other variety. Orders booked during spring will be forwarded in time for planting in the fall. Quart, 18c.; two quarts, 30c.; four quarts, 50c.

Garlic Sets. Per lb., 25c.; $\frac{1}{2}$ lb., 15c.

The above prices are approximate values postpaid, subject to market fluctuations.

Special prices by the bushel on application.

WHITE MULTIPLIER ONION SETS

Send your Order to us; it will pay you.

We are in a position to supply the best Seeds that grow.

ONIONS

FR., Ognon; GER., Zwiebel.

An ounce will sow 100 feet of drill.
Four to five pounds to the acre.

The onion thrives best in a rather deep, rich, loamy soil, and, unlike most vegetables, succeeds well when cultivated on the same ground for successive years. The best culture requires that the ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to pulverize. As early in the spring as the ground is in working order, commence operations, levelling the ground with a rake, and tread it firmly; sow thinly in drills about a quarter of an inch deep, and one foot apart; cover with fine soil, and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually, so that they stand three or four inches apart. Keep the surface of the ground open and free from weeds by frequent hoeing, taking care not to stir the soil too deeply, or to collect it about the growing bulbs.

Our Onion Seed has a splendid reputation, and no pains will be lacking to maintain its present high standard. Choice American grown Seed.

Onion, Giant Prizetaker. The largest, handsomest, finest flavored, best shaped, most superior yellow globe onion ever introduced.

There has never been an onion in the Dominion that could equal it, and we believe it will supplant all other yellow globe onions now in cultivation as soon as its sterling qualities are known, for it is certainly perfection. Our select strain produced, the past season, onions averaging two pounds each; thirty filled a heaped bushel basket. This is not unusual. Of a clean bright straw color, it always grows to a uniform shape, which is a perfect globe. It has a very small neck, and it always ripens up hard and fine, without any stiff-necks. Regarding its keeping qualities, experience proves it to be an excellent keeper—say till the end of February. Per lb., \$2.25; ¼ lb., 60c.; oz., 20c.; pkt., 5c.

—**Yellow Globe Danvers.** Early round, very small neck, fine grained, mild flavor, immensely productive and an excellent keeper. Per lb., \$1.60; ¼ lb., 45c.; oz., 15c.; pkt., 5c.

—**Early Flat Yellow Danvers.** Differs from the Globe strain only in shape, being more flat. Very productive. Per lb., \$1.50; ¼ lb., 45c.; oz., 15c.; pkt., 5c.

—**Large Red Wethersfield.** The staple variety, very productive, large size, deep red color, pleasant flavor and an excellent keeper. Per lb., \$1.65; ¼ lb., 45c.; oz., 15c.; pkt., 5c.

—**Extra Early Flat Red.** Matures very early, yields abundantly, and is of mild flavor; medium size, deep red, close grained, solid and heavy; highly recommended, particularly for the north and north-west, and even there it will produce good sized onions. Per lb., \$1.75; ¼ lb., 50c.; oz., 15c.; pkt., 5c.

—**Southport Red Globe.** Beautiful globe-shaped, rich, purplish crimson; a good keeper, and of superior quality. Per lb., \$3.50; ¼ lb., 90c.; oz., 25c.; pkt., 5c.

—**White Portugal, or Silverskin.**

A handsome onion, of mild flavor, but not a good keeper; excellent for summer and fall use. Per lb., \$2.75; ¼ lb., 75c.; oz., 25c.; pkt., 5c.

—**Southport White Globe.** A large, globe-shaped onion, firm, fine-grained, of mild flavor; keeps well; of beautiful shape, clear white skin. Per lb., \$3.25; ¼ lb., 90c.; oz., 25c.; pkt., 5c.

—**Southport Yellow Globe.** A very large, handsome globular-shaped yellow variety, productive, of mild flavor, excellent keeper. Per lb., \$1.65; ¼ lb., 45c.; oz., 15c.; pkt., 5c.

FOREIGN ONIONS

The following varieties have been tested in this country, and have given perfect satisfaction. The flavor of the Italian varieties is mild, and they are in every way well adapted to culinary purposes.

Onions, Adriatic Barletta. A very early, small, pure white variety, having a very delicate silver skin, flesh firm and mild in flavor. Its great merit over all others is its extreme earliness. For pickling purposes it is unequalled. Per lb., \$3.00; ¼ lb., 80c.; oz., 25c.; pkt., 5c.

—**White Queen.** A silver skinned variety, of quick growth and remarkable keeping qualities. If sown in early spring it will produce onions 1 to 2 ins. in diameter early in summer, and if sown in July will, with favorable weather, be ready to pull late in autumn. Particularly valuable for pickles. If sown thickly they will mature perfect, hard onions from ½ to ¾ of an inch in diameter. Per lb., \$3.00; ¼ lb., 80c.; oz., 25c.; pkt., 5c.

—**Mammoth Silver King.** Large size, flat, skin silvery white, flesh pure white; exceedingly mild, delicate flavor. Per lb., \$2.50; ¼ lb., 70c.; oz., 25c.; pkt., 5c.

—**Small Silverskin.** Pickling. A small French variety, used extensively for pickling; very early. Per lb., \$2.75; ¼ lb., 75c.; oz., 25c.; pkt., 5c.

—**Giant Yellow Rocca.** A splendid large variety, globular-shaped, bright brown or yellow skin and delicate flavor. Succeeds best in a warm situation. Per lb., \$1.65; ¼ lb., 45c.; oz., 15c.; pkt., 5c.

—**Giant Brown Rocca.** A well known variety, of very mild, delicate flavor, immense size, handsome globular shape, and light reddish brown skin. Per lb., \$1.65; ¼ lb., 45c.; oz., 15c.; pkt., 5c.

—**Welsh Red.** Skin reddish brown, and remarkably hardy; used for fall sowing. Per lb., \$1.25; ¼ lb., 35c.; oz., 15c.; pkt., 5c.

—**Giant White Italian Tripoli.** Large size, beautiful form, fine, white skin. First season will grow an onion of from 1 to 1½ lbs.; but to attain full size, bulbs should be set out the following spring. Per lb., \$2.50; ¼ lb., 70c.; oz., 25c.; pkt., 5c.

—**Giant Red Italian Tripoli.** In shape and size like the Giant White Tripoli. Skin thin, rich blood-red; flesh white, fine grained. Per lb., \$2.00; ¼ lb., 60c.; oz., 20c.; pkt., 5c.

THE GIANT PRIZETAKER ONION

Buy the best; our seeds are of the highest quality procurable.

PEAS

FR., Pois;
GER., Erbsen.

2 1-2 to 3 bushels for an acre.

Sow peas in drills not less than four inches deep, about one pint to forty feet, in warm, well enriched soil. The drills must not be nearer than two feet, except for the lowest sorts. Those growing three feet high or more should not be nearer than three or four feet, and should have brush for their support. The large, fine wrinkled varieties are not as hardy as the small sorts, and if planted very early, should have a dry soil, or they are liable to rot. It is well to sow the earliest Peas just as soon as possible; in two or three weeks after make another sowing—a few more early and some for late crop.

The crop should be gathered as fast as it is fit for use. If even a few pods begin to ripen, new pods will not only cease to form, but those partly advanced stop growing.

Add 5 cents to pint, 10 cents to quart for postage

EXTRA EARLY PEAS

Peas, The Steele, Briggs Best Extra Early (2 feet), white dented. This "First of All" Pea possesses all the qualities most essential for a first-class variety, being extra early and ripening with great uniformity. About 45 days from planting is the average time for gathering the crop. Per peck, 90c.; quart 15c.; pint, 10c.; pkt., 5c.

—**The Steele, Briggs Seed Co.'s Extra Early.** Per peck, 75c.; quart, 12c.; pint, 8c.; pkt., 5c.

—**Alaska.** This beautiful blue market pea has become a standard variety, and is the earliest of all blue peas; twenty inches high; very uniform, maturing the crop for earliest of all blue peas; retaining its desirable color after cooking. Per peck, 80c.; quart, 12c.;

Add 5c. per pint, 10c. per quart, for postage on Peas if wanted by mail.

one picking; of excellent quality and retaining its desirable color after cooking. Per peck, 80c.; quart, 12c.;

—**American Wonder.** (9 inches). Green wrinkled. One of the earliest; finest quality, productive, and of dwarf, compact growth; pods good size and well filled. Per peck, \$1; quart, 18c.; pint, 10c.; p.k., 5c.

—**Nott's Excelsior.** (12 ins.) Vines a little larger and more vigorous than American Wonder, and earlier and more prolific than Premium Gem. Pods are always well filled, and the Peas for sweetness and tenderness have no equal. Peck, \$1.10; quart, 18c.; pint, 10c.; p.k., 5c.

—**Premium Gem.** (15 inches). A great improvement over the Little Gem, nearly as early as the American Wonder, and the vine is decidedly larger, bearing an immense crop of pods, which are invariably well filled with Peas of the best quality. Per peck, \$1; quart, 17c.; pint, 10c.; p.k., 5c.

—**Early Kent.** One of the earliest. Per peck, 70c.; quart, 12c.; pint, 7c.; p.k., 5c.

—**Rural New Yorker.** Very early, prolific and uniform in ripening. Per peck, 80c.; quart, 12c.; pint, 8c.; p.k., 5c.

MEDIUM OR SECOND EARLY

Peas, Horsford's Market Garden. (3 feet). A grand wrinkled variety, coming in between Premium Gem and Advancer. It is a prolific bearer, pods of medium size, and literally packed with peas of a delicious sweet flavor. A favorite with market gardeners and canners. Per peck, 90c.; quart, 15c.; pint, 8c.; p.k., 5c.

—**Duke of Albany.** The pods are of immense size, on the style of "Telephone," except that they are dark green—and are well filled with fine large peas. It grows about four feet high, is very prolific, matures very quickly, and has the great advantage of possessing a rich flavor. It is, without doubt, one of the finest sorts in cultivation, and will surely take a high place among the standard varieties. Per peck, \$1; quart, 17c.; pint, 10c.; p.k., 5c.

—**McLean's Advancer.** (2 ft.). Green wrinkled variety; broad long pods; of fine flavor, productive. Largely used among canners, as the skin will stand cooking without breaking. Peck, 85c.; quart, 15c.; pint, 8c.; p.k., 5c.

—**Shropshire Hero.** (2 ft.) A second early wrinkled variety, covered from top to bottom with long, handsome and well-filled pods, with from 6 to 8 peas of superior flavor and quality. Keeps in good condition for a length of time; of value both to the market gardener and for home consumption. Peck, 90c.; quart, 15c.; pint, 8c.; p.k., 5c.

—**Heroine.** (2 ft.) Medium early green wrinkled Pea, one of the best; large, recurved, showy pods; immense cropper; finest quality. Peck, \$1; quart, 17c.; pint, 10c.; p.k., 5c.

MAIN OR LATE CROP

Peas, Pride of the Market. (2 feet). Is a strong-growing Pea, wonderfully productive. The pods are also of large size and handsome appearance, and the peas are of splendid quality. Peck \$1; quart, 17c.; pint, 10c.; p.k., 5c.

—**Stratagem.** (2 feet). One of the very best. A heavy cropper, and produces large, remarkably well filled pods of excellent flavor. Peck, \$1; quart, 17c.; pint, 10c.; p.k., 5c.

—**Everbearing.** (2 feet). A first-class Pea for summer and autumn use; pods, three to four inches long, and contain six to eight peas of a rich flavor, very sweet and tender. Peck, 90c.; quart, 15c.; pint, 10c.; p.k., 5c.

—**Telephone.** (4 feet). Wrinkled variety of strong growth; a good cropper, bearing immense pods of large peas of excellent flavor. Peck, \$1; quart, 17c.; pint, 10c.; p.k., 5c.

—**Yorkshire Hero.** (2 feet). A splendid main crop Pea; very prolific, finely flavored, great cropper; branching. Peck, 85c.; quart, 15c.; pint, 8c.; p.k., 5c.

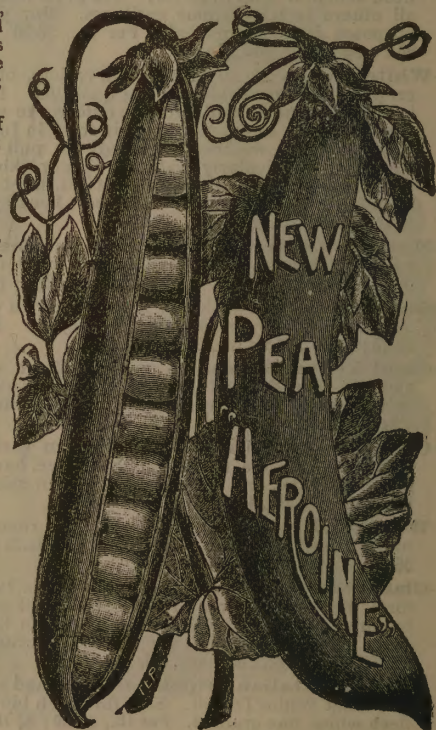

—**Champion of England.** (5 feet). One of the richest and best flavored Peas grown; very productive. Peck, 80c.; quart, 15c.; pint, 8c.; p.k., 5c.

EDIBLE PODDED OR SUGAR PEAS

This is a favorite class of Pea, with very tender, edible pods, and for table use is served up after the manner of green beans.

Peas, Extra Early Dwarf Britanny. (2 feet). The earliest; pods long, somewhat sickle shaped. Per lb., 30c.; ¼ lb., 10c.; p.k., 5c.

—**Large Crooked, or Scimitar.** (4 feet). Large, often twisted, sometimes five inches long, and one inch or more broad. The best. Per lb., 35c.; ¼ lb., 10c.; p.k., 5c.

PUMPKINS

FR., *Potiron*,
GER., *Kuberis*.

One ounce will plant 15 hills; 1½ pounds for an acre.

These are easily grown and are profitable for stock feeding. At time of corn planting scatter a few seeds in the hills, or for a large crop sow in May, in good warm soil, in hills 10 to 12 feet apart each way.

Pumpkin, Japanese Pie. Crook-necked variety, with extremely small seed cavity; nearly all solid meat; quality extra fine; productive; ripe early; medium size; good keeper. Per lb., 55c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

Jumbo, or Mammoth King. This is the variety to be grown where "the biggest pumpkin" is wanted. The color of skin is a deep yellow, the flesh being of a lighter shade, somewhat resembling a squash. Per lb., \$1; ½ lb., 35c.; oz., 10c.; pkt., 5c.

Grey Mammoth. A French variety; grows to an enormous size, frequently weighing 100 to 150 pounds; specimens have weighed 200 pounds; used mainly for stock feeding; oblong in shape, of a greyish colored rind and very large seeds. Per lb., \$1; ½ lb., 35c.; oz., 15c.; pkt., 5c.

Large Cheese, or Kentucky. One of the best for table use; productive; skin, orange; flesh, yellow and sweet. Per lb., 50c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

Nantucket, or Negro. Small dark shell, warted; fine flavor; the variety from which the old-fashioned pumpkin pies were made. Per lb., 55c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

Sweet, or Sugar. Small, but fine grain, and very sweet; fine for table use. Per lb., 60c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

Connecticut Field. Very productive; largely grown for feeding stock. Per lb., 25c.; ½ lb., 10c.; pkt., 5c.

RHUBARB

FR., *Rhubarbe*,
GER., *Rhabarber*.

Sow in drills an inch deep, and thin out the plants to six inches apart. In the fall, transplant the young plants into very highly-manured soil, setting them three feet apart each way, and give a dressing of coarse manure every fall. The stalks should not be picked until the third year, and the plant never allowed to exhaust itself by running to seed.

Rhubarb, Johnston's St. Martin. The finest and one of the earliest; an enormous size; the flavor is superior, and requires less sugar than any other variety; color, delicate pink. Oz., 20c.; pkt., 5c.

Myatt's Linnaeus. A second early sort, with very long, thick, roundish stalks; of a deep green color, and of excellent flavor. Oz., 20c.; pkt., 5c.

Victoria, or Giant. A later kind than the preceding; stalks red, very thick, large, tender, and of good quality. Oz., 20c.; pkt., 5c.

Rhubarb Roots. Each, 15c.; 4 for 50c.; \$1.25 per dozen, postpaid.

PARSNIP

FR., *Pancais*; GER., *Pastinake*

One ounce per 200 feet of drill; 5 to 6 lbs. in drills for an acre.

They do best on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich, but fresh manure is apt to make the roots coarse and ill shaped. As the seed is sometimes slow to germinate, it should be sown as early as possible, in drills twenty inches to two feet apart; cover one-half inch deep, and press the soil firmly over the seed; give frequent cultivation and thin the plants four to the foot.

Price, each, per lb., 50c.; ¼ lb., 20c.; 1 oz., 10c.; pkt., 5c.

Parsnip, Long Smooth, or Hollow Crown. One of the very best Parsnips grown.

—**Guernsey.** Half long; the roots do not grow so long as the Hollow Crown, but are larger in diameter and more easily gathered; smooth, fine grained and of most excellent quality.

—**Student.** The roots of this variety are of moderate size, tapering regularly, clean yellowish skin.

PEPPER

FR., *Piment*; GER., *Pfeffer*.

The Pepper is much esteemed for its seasoning qualities, and is extensively used for pickling. The seed should be sown early, to be ready for transplanting when the weather becomes warm. Plant ten inches apart and keep well hoed.

Pepper, Black Nubian. The peppers are deep blue black (never green, even when small), superior for pickles at any stage, and attract universal attention. Per oz., 40c.; pkt., 5c.

—**Celestial.** One of the most useful varieties for culinary uses. Each pepper is beautifully variegated with bright golden and deep red, sometimes striped or variegated. Oz., 30c.; pkt., 5c.

—**Golden Dawn.** A new variety, resembling the large Bell in shape, but more delicate in flavor, and the color is a rich golden yellow. Per oz., 30c.; pkt., 5c.

—**Large Red Bell or Bull Nose.** Of large size, sweet and pleasant; rind, thick and tender. Oz., 25c.; pkt., 5c.

—**Monstrous.** A popular French variety, growing 6 ins. long, by 2 ins. thick, sweet flavor. Per oz., 40c.; pkt., 5c.

—**Procop's Giant.** They grow uniformly to a very large size, of brilliant scarlet color and in flavor just enough to be pleasant. Oz., 40c.; pkt., 5c.

—**Sweet Spanish, or Mountain.** A large and early variety; mild and pleasant; less pungent than some varieties. Oz., 30c.; pkt., 5c.

—**Long Red Cayenne.** Fruit, brilliant coral red, conical, intensely acid and productive. Oz., 30c.; pkt., 5c.

—**Chili.** Very small and prolific; generally used for making pepper sauce. Oz., 30c.; pkt., 5c.

PARSLEY

FR., *Persil*,
GER., *Petersilie*.

One ounce will sow 150 ft. of drill.

Parsley succeeds best in rich, mellow soil. As the seeds germinate very slowly, three or four weeks elapsing sometimes before it makes its appearance, it should be sown early in spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart, and half an inch deep. For winter use protect in a frame or light cellar, or a few plants may be placed in pots or boxes and kept in the house for convenient use during the winter.

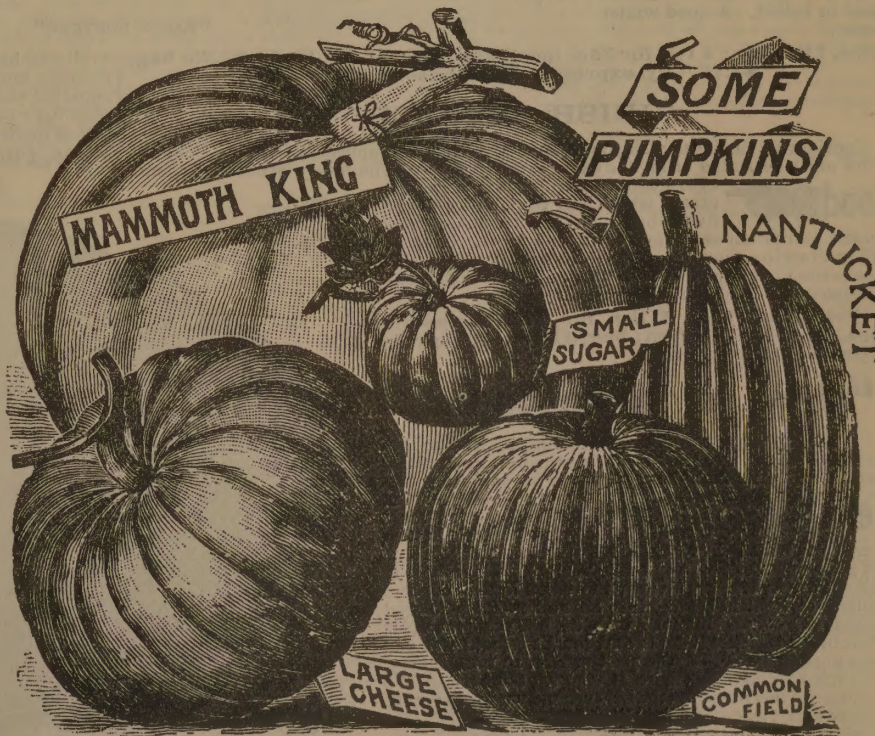

Parsley, Champion, Moss Curled.

Very select stock; leaves crimped and curled; very fine for garnishing. Lb., 75c.; ¼ lb., 25c.; oz., 10c.; pkt., 5c.

—**Fine Triple Curled.** A fine dwarfish curled variety, hardy and slow in running to seed. Lb., 60c.; ¼ lb., 20c.; oz., 10c.; pkt., 5c.

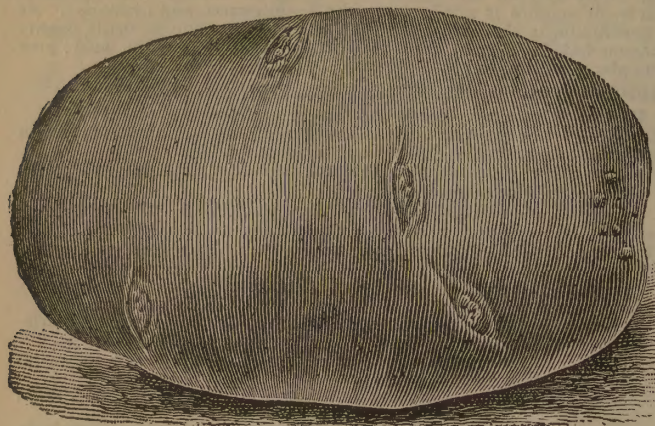

LARGE BELL, OR BULL NOSE PEPPER

The Best is always Cheapest. Buy Steele-Briggs' Seeds and get your money's worth.

NEW AND SELECT VARIETIES

.... POTATOES

LIGHTNING EXPRESS

"Lightning Express"

Extra Early and a heavy yielder. Great claims have been made for this potato from reliable sources as to earliness and yield. It is said to be a week earlier than the "Early Norther." The tubers grow compact in the hill, with very few small ones, almost every one being of marketable sizes; the eyes are very shallow and the surface is smooth and regular. It is easily cultivated, the vine being strong and erect. Its exceptionally fine quality makes it an excellent variety for the table, and its earliness renders it a very profitable potato for the market.

Price, 1 lb., 15c.; 3 lbs., 35c. (postpaid); peck, 50c.; bush., \$1.50; bag, \$2. By express at purchaser's expense.

"EARLY NORTHER"

There are but few varieties of potatoes which we have introduced during the past few years that have not become standard and favorite sorts. The "Early Norther," which we offered for the first time four years since, has proved to be one of the finest early varieties in existence. No garden, however small, should be without them. The handsome tubers are of medium size, oblong, smooth and white. Its table qualities are unexcelled; it cooks dry and floury whether baked or boiled. A good winter keeper.

Price, 1 lb., 10c.; 4 lbs. for 35c. (postpaid); peck, 40c.; bush., \$1.25; bag, \$1.75. By express at purchaser's expense.

"IRISH COBBLER"

Considering earliness, yield, fine quality and handsome appearance, "Irish Cobbler" is the most desirable of all the extra early potatoes. The tubers are nearly round, eyes slightly indented, bright, smooth cream white. In trials with eighty-five other sorts, the "Irish Cobbler" yielded more than any other extra early sort. It keeps well until spring, then the sprouts are strong and healthy. This is the kind to plant to have a good crop before any one else in the neighborhood.

Price, 1 lb., 10c.; 4 lbs. for 35c. (postpaid); peck, 40c.; bush., \$1.25; bag, \$1.75. By express at purchaser's expense.

"Gem of Aroostook"

A robust, healthy grower, not having shown any disposition to rot in any locality during the past most trying season, but while the tubers are of the finest quality they are smaller than usual this season. It is of excellent quality for table use, either baked or boiled; is dry, floury, and white. For handsome tubers and large yields it is not surpassed by any other variety. The shape is well shown in the engraving; the color is a handsome mottling of light magenta-pink, on amber, flesh-colored ground. It colors this way with us, but potatoes color differently in different soils and localities, and this one came pure amber color the past season in one locality, and pink in another, where it was sent for trial. We recommend this potato as the best second early; to secure it order early, as our stock is limited.

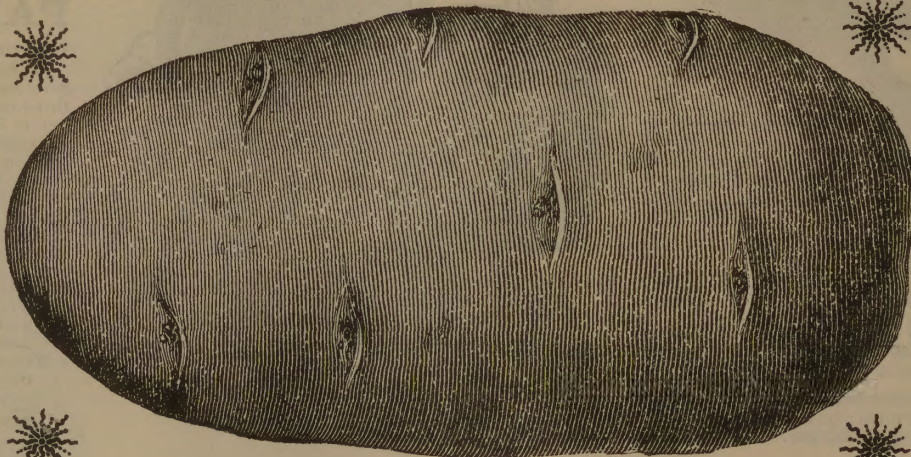

Price, 1 lb., 20c.; 3 lbs., 50c. (postpaid); peck, 60c.; bus., \$2; bag, \$2.50. By express at purchaser's expense.

Because of low prices the past two seasons, growers must not lose heart and cease planting. Many will no doubt grow less acreage, but those who keep right on will be sure to win, as it is very unusual to have such low prices many years in succession. We believe the most money in Potato growing is in planting the very best varieties, even at an increased cost for seed. With the constant improvements in new varieties each year, it will not pay to continue growing old varieties; but try to find something that will produce more and of superior quality. Progressive growers act on this principle, and make money. If it pays a large grower, it is of equal advantage to the lesser grower, whether for market or home use. Any one variety is not adapted to every soil and situation. **Two or more new sorts should be tried every season, as no other crop degenerates more quickly when planted on the same soil from year to year.** Your potatoes become watery when cooked, small and very disappointing. Why? In most cases for a want of a change in seed.

We endeavor each season to introduce one or more new varieties. Most of our introductions have been money-makers with leading growers. We offer only such varieties as we believe to be the very best known at the time; and while very many new sorts are constantly being offered, we have selected two for this season, "Lightning Express" and "Gem of Aroostook," which, so far as we have tried them, are of most excellent quality and fine appearance. The other varieties upon our list, while not new, are of such superior excellence that they should be more generally grown.

SHIPPING.—We begin sending out potatoes as early in spring as safe from frost. Quotations at peck, bushel and bag (90 lbs.) include cost of bags, but carriage must be paid by purchaser. When ordering please state if to be shipped by express or as freight, and name station to which they are to be sent. A bag of potatoes can be shipped by freight for about the same cost for carriage as a smaller quantity. When sent at long distances peck quantities may be sent by mail more cheaply than by express. The postage and extra packing for one peck is seventy-five cents. If to be mailed this amount must be added to peck prices. **By mail, quotations at pound, three pound and four pound quantities, include postage.**

Note our low prices.

"EARLY NORTHER"

"QUAKER CITY"

A mid-season potato, yielding abundantly wherever tried, even without manure or fertilizers. Tubers are smooth, buff color, shape somewhat longer than wide, slightly flattened, blunt at ends, and highly recommended to growers who desire a heavy crop of good quality and handsome appearance. A strong, vigorous grower. One of the best keeping varieties we have seen. As late as June they were solid and firm, with but slight growth at the eyes.

Price, 1 lb., 10c.; 4 lbs. for 35c. (postpaid); peck, 40c.; bush., \$1.25; bag, \$1.75. By express at purchaser's expense.

"NEW QUEEN"

A most excellent new variety coming from Maine, where it has given the highest satisfaction in color and shape. In addition to growing large they are of excellent quality and superior yielders. The "Queen," planted April 13th, has been dug in 65 days after planting; on account of their extreme earliness are the first ready for market, and sell at highest prices, just what the grower wants. It is a grand potato. Try it.

Price, 1 lb., 10c.; 4 lbs. for 35c. (postpaid); peck, 40c.; bush., \$1.25; bag, \$1.75. By express at purchaser's expense.

GEM OF AROOSTOOK

For reliable quality and true value use Steele-Briggs' Seeds.

RADISHES FOR ALL THE YEAR ROUND

FR., Radis, Rave, Petit Rave; GER., Rettig.

1 oz. for 100 feet of drill; 10 lbs. in drills for an acre

Radishes thrive best in a light sandy loam; heavy or clayey soils not only delay their maturity, but produce crops much inferior both in appearance and flavor. For a successive supply sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot bed in February, care being taken to give plenty of ventilation, otherwise they will run to leaves.

Prices for the following (unless noted) each, per ¼ lb., 20c.; oz., 10c.; pkt., 5c. For pound prices see separate varieties

EARLY ROUND, OR TURNIP-SHAPED

Radish, Earliest Deep Scarlet Turnip, White Tip. (Forcing or Rapid Forcing).

A small, round, turnip-shaped radish, of bright scarlet, distinctly tipped with clear white, sharply delineated, which gives a very pleasing appearance to the bunches when ready for market. It grows so quickly that the radishes are ready to pull fifteen to twenty days after sowing. Per lb., 70c.; ¼ lb., 25c.

—Early Scarlet Turnip, White Tip. (Forcing). Same as above, only not so deep in color. Per lb., 60c.; ¼ lb., 25c.

—Rosy Gem. (Forcing). One of the earliest; perfectly globular; color rich, deep scarlet at the top, blending into pure white at the bottom, exceedingly tender and crisp; delicious; desirable for the market or home garden. Per lb., 50c.

—Early Scarlet Turnip, White Tip. Handsome bright scarlet color, with white tip. Many gardeners make a sowing of it every two weeks all summer; quality always pleases. Per lb., 50c.

—Early Scarlet Turnip. Very early; in great demand for home use; small, round, with short top. Per lb., 45c.

—Early White Turnip. Pure white, with a small top; flesh pure white and semi-transparent. Per lb., 45c.

—Non Plus Ultra. One of the best forcing Radishes in cultivation. Roots small, round, deep scarlet, crisp and tender, with a white flesh. Per lb., 50c.

EARLY OLIVE-SHAPED

—Olive-Shaped Earliest, Deep Scarlet, White Tip. (Forcing). Mild and tender, and one of the best for forcing. Oval form, scarlet, tipped with white. Per lb., 70c.; ¼ lb., 25c.

—French Breakfast or Scarlet, Olive-Shaped, White Tipped. Of quick growth, mild and tender, one of the best for forcing; oval form, scarlet, tipped with white. Per lb., 50c.

—Early Scarlet, Olive-Shaped. In the form of an olive, terminating in a very slim tap root. Skin scarlet; neck small; flesh rose colored, tender and excellent; early and well adapted for forcing or general crop. Per lb., 45c.

—Early White, Olive-Shaped. Like the olive-shaped varieties in everything except color. Per lb., 45c.

LONG EARLY AND SUMMER

—Early Long Scarlet Short Top. The leading out-door quick-growing variety; grown in rich, light soil; its average length is about eight inches; grows half out of the ground, straight, uniform in color, brittle and crisp; small tops; bright scarlet. Per lb., 45c.

—Wood's Early Frame. Ten days earlier than the long scarlet; an excellent variety for forcing. Per lb., 50c.

—Improved Chartier. (Scarlet, White Tip). A distinct, exceedingly handsome and attractive sort. Color of the top is scarlet-rose, shading into pure waxy-white at the tip. Attains a very large size before it becomes unfit for the table; undoubtedly the best all seasons' radish for the open ground. Ready for use or market nearly as early as Long Scarlet Short Top, and keeps crisp and tender. Planted late it makes a good winter keeper. Per lb., 50c.

—Pearl Forcing. The color is pearl white, with waxy appearance and the texture is very firm and solid. It is about a week later than Wood's Early Frame; but after they are ready for marketing they remain in eatable condition fully two weeks longer. Per lb., 60c.; ¼ lb., 25c.

—Early Half-Long Deep Scarlet. An excellent intermediate sort, for forcing or open ground. Per lb., 50c.

—Long Scarlet, Improved. The old standard family and market gardeners' variety; long, bright scarlet, with small top. Per lb., 45c.

—White Strasburg. The roots are of handsome, oblong, tapering shape; both skin and flesh are pure white; the flesh is firm, brittle and tender, and possessing the most desirable character of retaining its crispness, even when the roots are old and large. Per lb., 70c.; ¼ lb., 25c.

WINTER VARIETIES

Sown in summer and used in the fall, or put away same as turnips. For winter use store in the cellar.

—California Mammoth White. Grown extensively in California; 8 to 12 inches long, 2 to 3 inches in diameter; white; solid; good flavor. Per lb., 60c.; ¼ lb., 25c.; oz., 10c.; pkt., 5c.

—Rose, or Scarlet China. Certainly one of the best, and would be grown generally by radish growers if better known. Per lb., 60c.; ¼ lb., 25c.; oz., 10c.; pkt., 5c.

—Long Black Spanish. The popular winter sort. Per lb., 50c.; ¼ lb., 20c.; oz., 10c.; pkt., 5c.

—Round Black Spanish. Like the above, except in shape. Per lb., 50c.; ¼ lb., 20c.; oz., 10c.; pkt., 5c.

—Chinese White. Stump rooted, very like Nantes Carrot; 6 inches long; fine for winter. Per lb., \$1; ¼ lb., 40c.; oz., 15c.; pkt., 5c.

MIXTURES OF RADISHES

Summer Radishes, Mixed. For use in family gardens we offer a mixture of seed of all the summer varieties. Per ¼ lb., 25c.; oz., 10c.; pkt., 5c.

Winter Radishes, Mixed. Seed of the best white, black and rose skinned varieties for autumn and winter use. Per ¼ lb., 30c.; oz., 10c.; pkt., 5c.

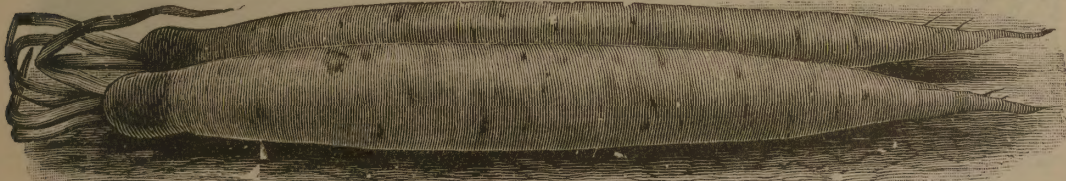

SALSIFY, OR VEGETABLE OYSTER

The Salsify is one of the most delicious and nutritious of vegetables, and should be more generally cultivated

for use in winter, when the supply of really good vegetables is so limited. It has a grassy top, and a long, white, tapering root, nearly resembling a small parsnip. It closely assimilates to the taste and flavor of the oyster when properly cooked, and is a good substitute for it; very wholesome and nutritious. The roots are either boiled or mashed and made in fritters, in which form they are delicious.

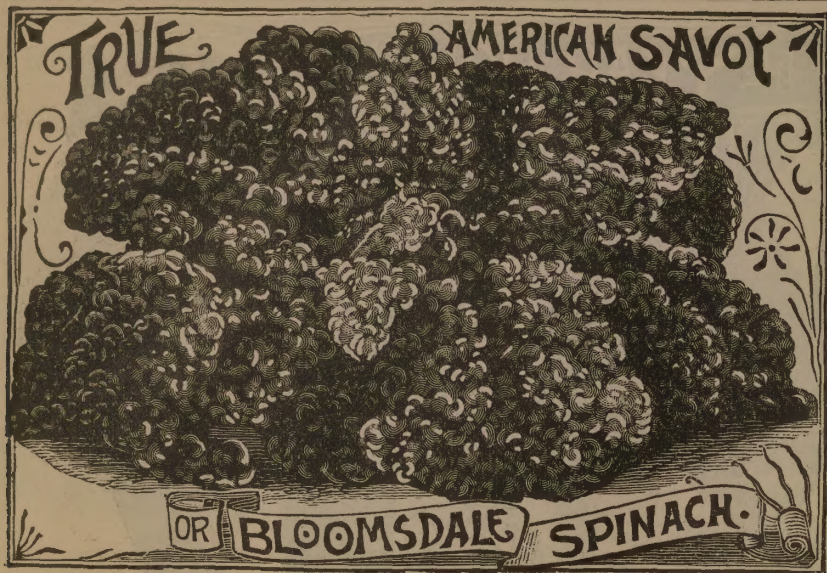

Salsify, Long White. The well known standard variety. Per lb., \$1; ¼ lb., 30c.; oz., 10c.; pkt., 5c.

—Sandwich Island Mammoth. Of extra large size, and fully equal in quality to the popular old variety mentioned above. Per lb., \$1.20; ¼ lb., 35c.; oz., 15c.; pkt., 5c.

SANDWICH ISLAND SALSIFY

If you want to win the Premiums at your Fair next Fall you need our Seeds.

SPINACH FR., *Épinard*; GER., *Spinat*.

Sow in good rich soil, in drills one foot apart, covering the seed one inch deep, at intervals of two weeks from April to July. For winter use sow in August and protect with a covering of straw during cold weather. Sow 1 oz. to 100 feet of drill; 12 lbs. per acre.

Price (except where noted), lb., 30c.; $\frac{1}{2}$ lb., 15c.; 2 oz., 10c.; pkt., 5c.

Spinach, Victoria. This grand Spinach has shown on trial ground a distinct improvement on any of the old sorts. The foliage is heavy, the broad, dark green leaves being of the true Savoy appearance and of the finest quality, but the most remarkable feature that will make it of special value, both for market and family gardens, is the fact that it was in prime condition from two to three weeks after all other varieties had run to seed.

—Bloomsdale, Savoy-Leaved. The leaves are numerous, succulent, curled and wrinkled like a Savoy cabbage. It produces nearly twice the weight of crops as the ordinary sorts, and is also the hardiest of all the varieties.

—Flanders. A large broad-leaved, hardy variety, very productive, and good for either fall or spring sowing.

—Round Thick Leaved Summer. Produces large, thick, dark green leaves, somewhat crumpled, and possesses the valuable quality of standing a long time. Lb., 25c.

—Long Standing. An improved round-seeded strain of excellent merit, having all the good qualities of the ordinary sorts. It is especially desirable because it goes to seed much later than any other variety.

—Monstrous Round Leaved Viroflay. Resembling the preceding in shape of its leaves, but is of much larger size.

—Prickly or Fall. One of the hardiest; most generally used for fall sowing.

SQUASH FR., *Courge*; GER., *Kurbiss*.

The squashes are of tropical origin, and therefore it is useless to plant them until the soil is quite warm, and all danger of frosts or cold nights is over; and as they make a very rapid growth there is no necessity for hasten getting the seed into the ground. Squashes are good feeders, and like a rich soil; it is best to manure in the hill. For the bush varieties from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown in each hill, thinning out after they have attained their rough leaves, leaving three of the strongest plants. One ounce for 50 hills; five to six pounds in hills for an acre.

SUMMER VARIETIES

Price, each, lb., 50c.; $\frac{1}{2}$ lb., 20c.; oz., 10c.; pkt., 5c.

Squash, Golden Bush Scalloped. Deep orange color, grown for first crop; esteemed for earliness.

—White Bush Scalloped. Like the above except in color, which is a creamy white.

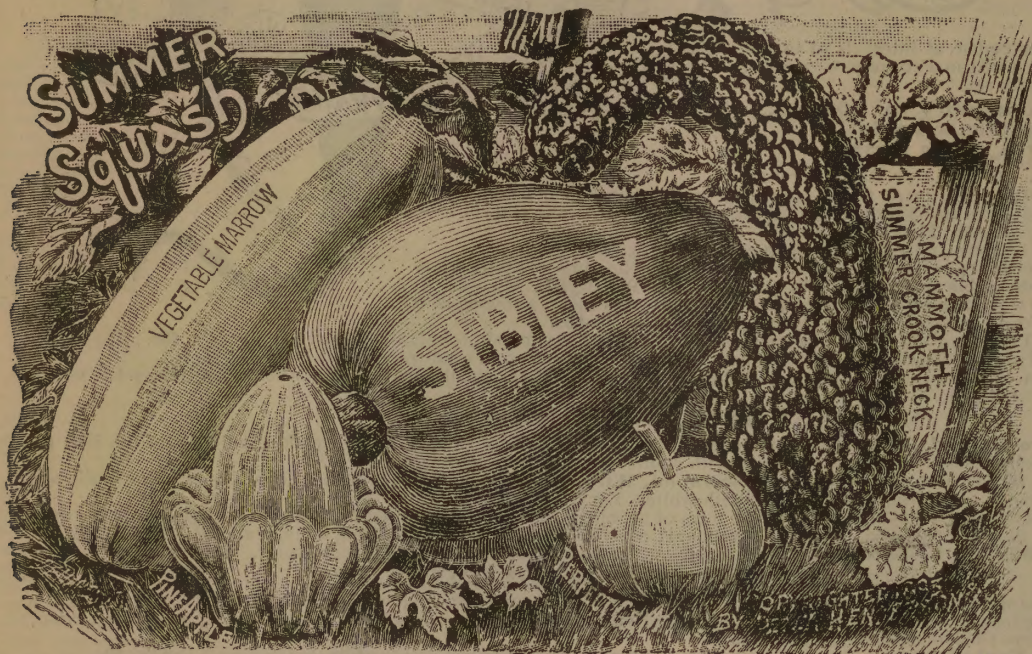

—Summer Crookneck. One of the best summer squashes. Of dwarf bushy habit and exceedingly productive. Flesh greenish yellow, dry and of the most agreeable flavor found in squashes.

VEGETABLE MARROW

—English Vegetable Marrow. Skin greenish yellow; flesh white, soft and of a rich flavor; quite distinct. Lb., \$1; $\frac{1}{2}$ lb., 30c.; oz., 10c.; pkt., 5c.

—Long White Bush Marrow. Longer than preceding; creamy white; good quality. A profitable market sort. Lb., \$1.20; $\frac{1}{2}$ lb., 40c.; oz., 15c.; pkt., 5c.

—Italian Striped Marrow. Fruit slightly narrowed at stalk; skin smooth, dark green, striped yellow or paler green; tender, delicately flavored. Lb., \$1.25; $\frac{1}{2}$ lb., 40c.; oz., 15c.; pkt., 5c.

AUTUMN AND WINTER SORTS

Price, each, per lb., 50c.; $\frac{1}{2}$ lb., 20c.; oz., 10c.; pkt., 5c.

Squash, Boston Marrow. A good, tender, rich variety, for fall and winter; very productive.

—Essex Hybrid. Richest flavored, finest grained and sweetest of the Squash family; the very best keeper.

—Hubbard. More largely grown as a late sort than any other; of large size, flesh fine grained, dry and of excellent flavor.

—Marblehead. An excellent winter squash; good keeper; dry, sweet and delicious.

—White Pine Apple. A fall and winter sort. The skin is of a creamy white, with flesh of same color.

—Turban or Turk's Cap. Good fall and early winter; greenish, striped white, flesh orange.

—“Pike's Peak,” or Sibley. The shell is very thin, smooth and of a pale green color; flesh solid, thick, bright orange color, with a delicate rich flavor.

—Warty Hubbard. This wartiness indicates a very hard shell, one of the best features in a long-keeping squash; it also denotes extra choice quality—the harder and more warty the shell of a Hubbard Squash is, the more delicate and sweet the flesh will be found.

—Cocozelle Bush. This is a distinct type of bush Squash; the plants grow very compact and uniform in height and the vines do not run. The squashes are oblong in shape, green and white striped. A remarkable feature is that the little green squashes when still very small are most delicious in flavor. Can either be boiled whole or sliced and fried like egg plant.

STOCK FEEDING VARIETY

Squash, Mammoth King. Grows to a large size, often weighing over 200 pounds; very productive; excellent for all uses; very profitable for stock. Lb., \$1; $\frac{1}{2}$ lb., 35c.; oz., 10c.; pkt., 5c.

—Mammoth Whale. See Novelties.

If you have not favored us with an order, do so this season and grow our famous seeds.

TOMATO

FR., *Tomate*.
GER., *Liebesapfel*.

1 oz. for 1,500 plants;
¼ lb. (to transplant) for an acre.

Sow the seed in the middle of March or April in the hot-bed, or in a box in a sunny place in the house. To make very healthy stocky plants they may be transplanted when about 2 or 3 inches high. When 5 or 6 inches high, if the ground has become warm, transplant to the open ground. Set the plants 4 ft. apart.

Following Varieties (except where noted), each, ¼ lb., 60c.; oz., 20c.; pkt., 5c.

- Tomato, The True Ponderosa.** This grand variety is the monster of the Tomato family, the Tomatoes often weighing 2 to 3 lbs. each; of a rich, bright crimson color and all solid meat, exceptionally free from seeds. Per oz., 40c.; pkt., 5c.
- The Aristocrat.** An excellent sort, resembling in habit of growth and foliage the Dwarf Champion, but the color of the fruit is a fine, rich, glossy red. It is solid and smooth, and in size from medium to large. Valuable for forcing.
- Buckeye State.** A fine, new extra large Livingston sort, nearly one-half larger than Beauty, deep color, heavy, and of splendid quality.
- Earliest of All (Steele-Biggs').** See cover. This Tomato has fully sustained its claim for extra earliness, and we consider it the earliest Tomato in cultivation. The Tomatoes are of a rich, dark red color and are entirely free from core. The vines are most profusely loaded with fruit, and continue to bear throughout the season. ¼ lb., 70c.; oz., 25c.; pkt., 5c.
- Golden Queen.** Smooth, solid and productive. In color a beautiful yellow, and there is none better suited for preserving. ¼ lb., 70c.; oz., 25c.; pkt., 5c.
- Early Ruby.** The earliest of all the large-sized Tomatoes, which combines good form, color and solidity, and it is certain to prove the leading market variety.
- Dwarf Champion.** Quite distinct in foliage and habit of growth, being compact and upright; fruits early and resembling the Acme in appearance.

- The New Stone.** Ripens for main crop; is very large, and of bright scarlet color; very smooth; ripening evenly to the stem without a crack; exceedingly solid and firm fleshed (as its name indicates); is an excellent shipper; quality the very best; fine for canning.
- Livingston's Royal Red.** Bright scarlet, and the reddest throughout of any grown. In size, smoothness, productiveness, solidity, and general fine appearance it will please the most fastidious.
- Mayflower.** This is one of the earliest large Tomatoes. Of splendid shape, perfectly smooth, of a bright red color, and ripens uniformly up to the stem.
- Potato Leaf.** This is a mammoth variety, like Mikado or Turner's Hybrid, but very careful tests show it much smoother, and as good in other ways.
- Mikado, or Turner's Hybrid.** Color a purplish red; quality good, when well ripened; foliage distinct; generally quite smooth, but always some rough ones.
- Atlantic Prize.** One of the earliest; not only ripens its first fruits, but a large proportion of the crop, earlier than any other sort; valuable to all with whom earliness is an object. ¼ lb., 55c.
- Imperial.** This new variety is highly recommended by leading growers. The originator claims it to be much earlier than any other; a beautiful, symmetrical and meaty Tomato.
- Acme.** Medium; red; smooth and very fine. ¼ lb., 50c.
- Matchless.** Of a rich, cardinal red color; symmetrical in form; free from core; of large size; a good healthy grower. ¼ lb., 55c.
- Ignotum.** Very prolific; earliest of the large red smooth sorts. ¼ lb., 55c.
- Optimus.** Uniform in size, produced in clusters of four or five; each of remarkable size; ripens evenly, free from cracks and blemishes; flesh of a crimson scarlet color. ¼ lb., 55c.
- Conqueror.** A very early sort, with medium sized fruit of the finest flavor.
- Beauty (Livingston's).** One of the best; round, smooth, and a glossy crimson color, slightly tinged with purple; very solid, free from cracks and rot. ¼ lb., 50c.
- Perfection (Livingstone).** Early, evenly large and very productive. ¼ lb., 50c.
- Favorite (Livingstone).** One of the handsomest; very smooth. ¼ lb., 50c.
- Trophy.** An old favorite for general home use; unsurpassed in flavor and productiveness. ¼ lb., 50c.
- Honor Bright.** One of the most attractive and handsome varieties grown; the color of the fruit when fully ripe is a rich bright red, but before reaching this stage it undergoes several interesting changes—first it is a light green, then an attractive waxy white, then lemon, changing to red. The skin is nearly crack-proof; an enormous cropper and an excellent variety for the table. ¼ lb., 75c.; oz., 25c.; pkt., 5c.

FANCY AND PRESERVING SORTS

- Tomato, Yellow Peach.** This is a deep lemon yellow. Soft leathery skin, which is such a distinguishing feature of the Peach variety, and is equally desirable for cooking purposes. Both this and the Purple Peach have a flavor peculiar to this variety, and is without rival for eating from the hand; the skin is thin and may be easily pulled. Price, per oz., 25c.; pkt., 5c.
- Purple Peach.** Very distinct; fruit of uniform size, resembling a peach in shape, size and color, which is a deep orange rose, covered with a delicate bloom like a peach, the flesh being of a rich and most delicious flavor. Per oz., 25c.; pkt., 5c.
- Strawberry, or Barbadoes Gooseberry.** A distinct variety; the fruit has a juicy pulp of a pleasant, strawberry-like flavor, with a certain degree of sweetness and acidity intermixed; with the assistance of lemon juice it is frequently preserved like plums. Per oz., 50c.; pkt., 5c.
- Pear-shaped Yellow, Red Currant, Yellow Cherry, Red Cherry, Yellow Plum.** Each, per oz., 40c.; pkt., 5c.

IMPERIAL

TURNIP

FR., Navet. GER., Steckrube.
Two pounds in drills for an acre.

For early Turnips sow as soon as the ground is dry enough. Fall Turnips may be sown from the first week in July to the end of September. Swedes should be sown in June or early in July, in drills eighteen inches apart. Turnips should be thinned when large enough, six to nine inches apart in the drills, according to size. The soil should be rich and well worked.

- Turnip, Extra Early Milan.** Early, with purple top and strap leaf; mild and sweet. Per lb., 50c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.
- Early Snowball, or White Stone.** A fine garden variety; globe shaped; medium sized; firm texture. Per lb., 40c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.
- Jersey Half-Long White.** Nearly cylindrical, but swollen at the lower end. Per lb., 40c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.
- Large Amber Globe.** One of the best varieties either for table use or for a field crop for stock. Flesh yellow, fine grained and sweet, color of skin yellow, with green top. Hardy, keeps well, a good cropper, and grows to a very large size. Per lb., 40c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.
- Large White Globe, Strap Leaf.** Flesh white, firm and crisp; a very desirable early variety. Per lb., 40c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.
- Golden Ball, or Orange Jelly.** Of excellent flavor; globe-shaped; bright yellow color; a superior table variety. Per lb., 40c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.

- Turnip, Red Top, Strap Leaf.** Rapid grower and of mild flavor; the most popular variety for early use, for the table. Per lb., 30c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.
- White Six Weeks, or Nimble Dick.** Very early; fine shape; small top and excellent flavor. Per lb., 40c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.
- Sweet German.** Should be sown a month earlier than flat Turnips. The flesh is white, hard, firm and sweet, and keeps well. Per lb., 30c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.
- Early White Flat Dutch, Strap Leaved.** Roots medium size, flat; color white; sweet and tender. It is desirable for table use. Per lb., 40c.; $\frac{1}{4}$ lb., 15c.; oz., 10c.; pkt., 5c.
- Laing's Purple Top, Strap Leaf.** An excellent variety for the garden or field; medium size. Per lb., 25c.; $\frac{1}{4}$ lb., 10c.; pkt., 5c.
- Hazard's Swede.** This is undoubtedly the finest Swede for table use; juicy, and of exquisite flavor when cooked. Per lb., 20c.; $\frac{1}{4}$ lb., 10c.; pkt., 5c.

TOBACCO

The seed should be sown as early as possible after the danger of frost is over. A good plan is to burn a quantity of brush and rubbish in the spring, on the ground intended for the seed bed; then dig and thoroughly pulverize the earth and mix with the ashes, after which the seed may be sown and covered very lightly. When the plants are about six inches high, transplant into rows six feet apart each way, and cultivate thoroughly with plough and hoe.

- Tobacco, Connecticut Seed Leaf.** This is an old and well tried variety; produces immensely on good soil. Per oz., 25c.; pkt., 5c.
- Bradley Broadleaf.** The popular variety for several types—noticeably manufacturing and cigars. Per oz., 35c.; pkt., 5c.
- General Grant.** It produces leaves forty-four inches in length, and matures very far north. Per oz., 35c.; pkt., 5c.

- Tobacco, Havana, Choice.** An early variety, and the best of the Americanized Havanas. Our seed is of exceptionally fine quality. Per oz., 35c.; pkt., 5c.
- White Burley.** This is largely used in the manufacture of cigars when a light-colored wrapper is desirable. The leaf is light colored, very fine texture. Oz., 40c.; pkt., 5c.
- Quesnelle.** One of the best. Per oz., 35c.; pkt., 5c.

SWEET, POT AND MEDICINAL HERBS

No garden is complete without a few herbs for culinary and medicinal purposes, and care should be taken to harvest them properly. This should be done on a dry day, just before they come into full bloom, then dried quickly and packed closely, entirely excluded from the air. Sow in spring in shallow drills, one foot apart, and when well up thin out and transplant to a proper distance apart.

- Anise (Pimpinella Anisum).** Used for cordial, garnishing and flavoring; the seeds have an agreeable, aromatic taste. Per oz., 20c.; pkt., 5c.
- Balm (Melissa Officinalis).** Principally used for making balm tea or balm wine for use in fevers. Per oz., 25c.; pkt., 5c.
- Basil, Sweet (Ocimum Basilicum).** The leaves and tops of the shoots are used for high season dishes, soups, stews and sauces; a leaf or two is sometimes introduced into salads. Per oz., 25c.; pkt., 5c.
- Borage (Borago Officinalis).** Much used in clarets and other drinks. An excellent bee plant. Per oz., 25c.; pkt., 5c.
- Caraway (Carum Carui).** The seeds are used in confectionery and medicine; in spring the under leaves are sometimes put in soups. Per $\frac{1}{4}$ lb., 45c.; oz., 10c.; pkt., 5c.
- Catnip (Nepeta Cataria).** A favorite medicinal herb; a mild nervine for infants. Per oz., 60c.; pkt., 5c.
- Coriander (Coriandrum Santivum).** Used for garnishing, and the seeds are used by confectioners. Per oz., 10c.; pkt., 5c.
- Dandelion, Improved Cabbaging.** The improved variety makes one of the earliest and best greens in cultivation. Per oz., 50c.; pkt., 5c.
- Dill (Anethum Graveolens).** The leaves are used in soups and sauces, and to put along with pickles. Per oz., 20c.; pkt., 5c.
- Fennel (Anethum Feniculum).** The leaves boiled enter into many fish sauces, and raw form a beautiful ornament. Per oz., 20c.; pkt., 5c.
- Horehound (Marrubium Vulgare).** Principally used for cough remedy. Per oz., 20c.; pkt., 5c.
- Hyssop (Hyssopus Officinalis).** The leafy tops and flowers are gathered and dried for making Hyssop Tea and other purposes. Per oz., 25c.; pkt., 5c.
- Lavender (Lavandula Spica).** A popular aromatic herb. Per oz., 15c.; pkt., 5c.
- Marigold, Pot (Calendula Officinalis).** Per oz., 20c.; pkt., 5c.
- Marjoram, Sweet.** Per $\frac{1}{4}$ lb., 35c.; oz., 15c.; pkt., 5c.
- Marjoram, Pot (Origanum Onites).** For seasoning. Per oz., 40c.; pkt., 5c.

- Pennyroyal (Mentha Pulegium).** Per pkt., 10c.
- Rosemary (Rosmarinus Officinalis).** An aromatic herb. Per oz., 60c.; pkt., 5c.
- Rue (Ruta Graveolens).** Used for medicinal purposes; also given to fowl for the croup. Per oz., 30c.; pkt., 5c.
- Saffron (Carthamus Tinctorius).** Per oz., 15c.; pkt., 5c.
- Sage (Salvia Officinalis).** The leaves and tender tops are used in stuffing and sauces. Per lb., \$1.25; $\frac{1}{4}$ lb., 35c.; oz., 15c.; pkt., 5c.
- Savory, Summer (Satureia Hortensis).** Used for seasoning. Per lb., 75c.; $\frac{1}{4}$ lb., 30c.; oz., 15c.; pkt., 5c.
- Savory, Winter or Perennial (Satureia Montana).** Per oz., 20c.; pkt., 5c.
- Thyme, Broad Leaved (Thymus Vulgaris).** For seasoning, etc. $\frac{1}{4}$ lb., 45c.; oz., 15c.; pkt., 5c.
- Tansy (Tanacetum Vulgaris).** Per oz., 40c.; pkt., 5c.
- Wormwood (Artemisia Absinthium).** Used for medicinal purposes; it is also beneficial to poultry, and should be planted in poultry grounds. Per oz., 25c.; pkt., 5c.

HERB PLANTS

- New Golden Lemon Thyme.** This handsome Thyme is perfectly hardy, growing rapidly. The leaves are curiously edged and variegated with golden yellow. As an edging or border plant it has no superior. Each, 10c.; 3 for 25c.
- Holt's Mammoth Sage.** The plants are very strong-growing. The leaves are borne well above the soil, keeping them clean; they are very large and of unusual substance, strong in flavor and of superior quality. Each, 10c.; 3 for 25c.; 7 for 50c.
- Chives, Roots.** Grown for their tops, which are used wherever the flavor of onion is required. Planted in small clumps in any common garden soil, they will grow readily and increase. Perfectly hardy, and should be in every garden. Clumps, each, 10c.; per doz., \$1.

A complete descriptive price list on Tobacco will be sent on application.

OUR FAMOUS FARM SEEDS

TO INSURE A GOOD CROP USE OUR SEEDS

ROOT CROPS FOR FARM STOCK

IMPORTANT

A good crop of Field Roots is a source of profit to every grower; to attain such results, much time, expense and labor are required in the preparation, cultivation and attending the crop, but unless good seeds are used the labor is in vain, and disappointment the reward. It is therefore of first importance to secure the best known seeds; but the poorest economy in the world is to pay good money for inferior, cheap and unknown strains; the grower cannot afford such chance; the ordinary risk of an unfavorable season and contingencies over which he has no control is very great with any and all crops; the use of good seed will save the double risk.

Thousands of agriculturists in the Dominion attest to the good quality of our seeds and will use no other. We have a supply sufficient for thousands more of the same good quality. Our prices are right, and the facilities for every grower to obtain them are the most favorable.

AGRICULTURAL SEEDS BY MAIL.—Our postal arrangements enable us to forward parcels under five pounds in weight to any Post Office in the Dominion of Canada at four cents per pound. Prices quoted "by mail" include postage.

When ordered in quantity for shipment by freight or express, please add sufficient to cover cost of bags, at the rate of twenty cents each. When this is omitted we require to reduce the quantity sent to cover the cost of packages, as profits would not allow such a discount. Note conditions of sale on page 1.

SUGAR BEET

The Sugar Beet is acknowledged to be the finest food for Milch Cows. It contains an immense amount of the most nutritious food and imparts a richness and flavor to milk superior to any other variety of roots. They are easily grown and harvested, and keep well through winter. The ground intended for growing Sugar Beet should be manured in the fall preceding the season of crop; on freshly manured ground they are apt to be rooty should the season be dry. Prepare drills thirty inches apart as early in the spring as the ground can be worked, upon which sow from four to six pounds of seed per acre, covering about two inches deep. Cultivate as soon as plants become large enough, for which purpose a "Planet Jr." Horse Hoe is best; thin plants to one foot apart in the row. Keep well cultivated throughout the season. When harvesting care should be exercised to avoid bruising or breaking the roots. The following varieties are the best for stock feeding, but are not adapted for the production of Beet Root Sugar.

Beet, Red Top, Sugar. Tops medium size; roots above medium size; long, top-shaped, growing slightly above the surface; white, washed with red at the top; flesh fine grained and very rich, making it the best for cattle feeding. We think that for this purpose it is much superior to the larger and coarser mangel wurzels, and we urge our customers to try it, believing they will find it superior to any field beet they have cultivated. Per $\frac{1}{4}$ lb., 10c.; lb., 20c.; mail, 24c. lb.; 5 lb. lots and over, 17c. per lb.; by mail, 21c. lb.

Vilmorin's Improved Sugar. A medium sized white sugar beet, brought by the most careful selection to the highest perfection, in shape, size and color of roots. Esteemed by sugar manufacturers. Per $\frac{1}{4}$ lb., 10c.; lb., 20c.; by mail, 24c. lb.; 5 lb. lots and over, 18c. per lb.; by mail, 22c. lb.

Danish Sugar. This splendid Red Top variety is an enormous yielder. The roots are clean, well shaped, very uniform in size and of splendid color, grows well out of ground, which makes it very easily harvested. Per $\frac{1}{4}$ lb., 12c.; lb., 40c.; by mail, 44c. lb.

White Silesian Green Top. A standard variety, yielding somewhat larger roots, but not so rich feeding quality. Per $\frac{1}{4}$ lb., 10c.; lb., 20c.; by mail, 24c.; 5 lb. lots and over, 17c. per lb.; by mail, 21c. lb.

Imperial Sugar. A variety of great merit. Per $\frac{1}{4}$ lb., 10c. lb., 20c.; by mail 24c. lb.; 5 lb. lots and over, 16c. per lb.; by mail, 20c. lb.

Lane's Improved. Much liked by stockmen wherever used; heavy yielder and contains about 8 per cent. of sugar. Per $\frac{1}{4}$ lb., 10c.; lb., 20c.; by mail, 24c. lb.; 5 lb. lots and over, 17c. per lb.; by mail, 21c. lb.

CARROT FIELD . . . VARIETIES

Sow seed in drills eighteen to twenty-four inches apart, from middle of April to the first of June, and when about three inches high thin out from four to six inches apart. Carrots require deep, rich loamy soil to produce heaviest crops, and should be prepared and manured the fall preceding the carrot crop. Two to three pounds is the usual quantity per acre.

NOTE.—Our stock of Carrots is all clean rubbed seed, and can be sown as early as turnip.

Carrot, Improved Short White. See next page for description and prices.

Large White Belgian. Grows one-third out of the ground; root pure white, green aboveground, with small top; flesh rather coarse, but the roots on light, rich ground grow to a large size, and are extensively grown for stock feeding. Per $\frac{1}{4}$ lb., 10c.; lb., 30c.; by mail, 34c. lb.

Long Yellow or Orange Belgian. (Green Top.) Not so heavy a cropper as the White Belgian, but of richer quality. Per $\frac{1}{4}$ lb., 15c.; lb., 35c.; by mail, 39c. lb.

White Vosges, or Giant. Produces a medium sized root, very short, with heavy shoulder; pure white and of excellent quality; grows almost entirely under ground, making it a little difficult to harvest. It is quite different in manner of growth and shape and yields less per acre than our "Improved Short White," for which it has been sold, but in no way to be compared with that variety. Per $\frac{1}{4}$ lb., 15c.; lb., 35c.; by mail, 39c. lb.

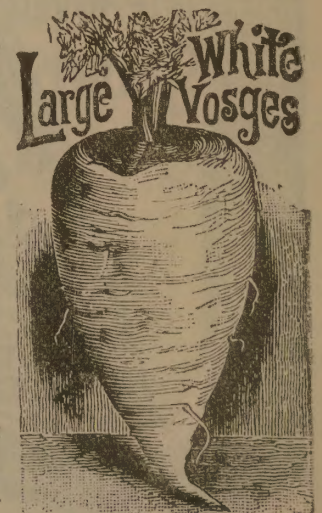

Long Orange or Red Surrey. A popular field variety, large fine quality, and tapers regularly to a point. Per $\frac{1}{4}$ lb., 15c. lb., 40c.; by mail, 44c. lb.

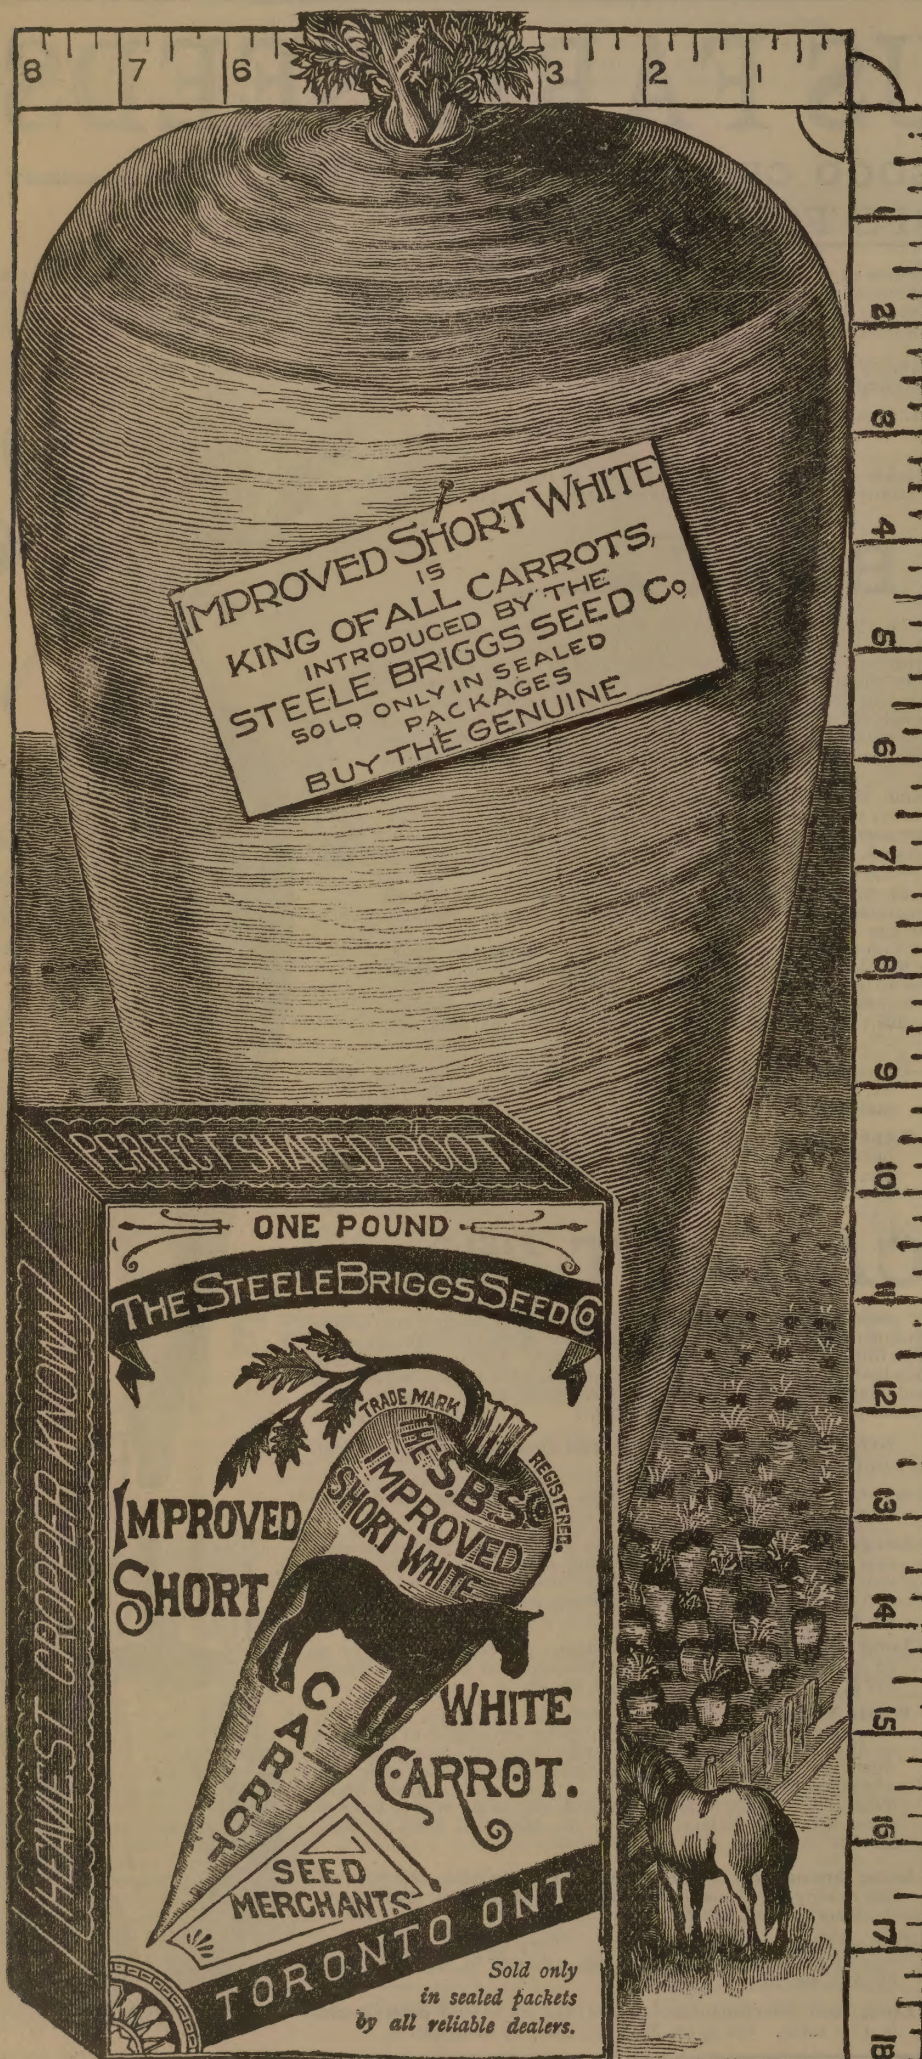

James' Scarlet Intermediate. Very smooth and tapering regularly to a point; second early. Per $\frac{1}{4}$ lb., 20c.; lb., 45c.; by mail, 49c. lb.

Long Red Altringham.—Bright red color and crisp; excellent for table. Per $\frac{1}{4}$ lb., 20c.; lb., 45c.; by mail, 49c. lb.

SUGAR BEET

A FIELD GEM

The Steele, Briggs Seed Co.'s

ORIGINAL

"Improved Short White"

CARROT

THE SUREST CROPPER,

THE HEAVIEST YIELDER,

The Handsomest Shaped,

Easiest Harvested,

The Most Uniform Sized,

The Greatest Favorite,

AND

The very Best Field Carrot
in Existence.

It may be properly called "Little Giant." Seldom exceeds sixteen inches in length, and has been grown to measure twenty-seven inches in circumference; stands nearly one-fourth out of ground, with a strong handsome top, broad and heavy at the shoulder, tapering evenly to a point, as perfect as if turned in a lathe. The color is pale green above ground, and a light creamy white under-ground; flesh rich white, solid, sweet and very nutritious. Under good cultivation has yielded one thousand bushels per acre.

AS AN EXHIBITION PRIZE WINNER IT HAS NO PEER

PLEASE NOTE

As a safeguard to those who wish to grow this favorite Carrot, we supply it in SEALED PACKAGES ONLY, bearing our name and trade mark, as represented on the accompanying illustration, and printed in colors, which is a CERTAIN MARK OF GENUINENESS.

Those desiring this "Improved Short White" Carrot may be assured that they are buying the true variety by purchasing our Sealed Packages, either direct from us or from resident merchants whom we supply.

PRICE (post paid)

Per lb., 45c.; ½ lb., 25c.; ¼ lb., 15c.; oz., 10c.

PRIZE STRAINS GROWN FROM SELECTED ROOTS

Sow 4 to 5 lbs. per acre

For a good crop of Mangels select a deep, rich loam. The heaviest crops are invariably grown upon land which has been liberally manured and thoroughly cultivated. Artificial manures applied at the rate of from 500 to 1,000 pounds per acre, with the addition of 300 to 400 pounds of salt, will increase the yield per acre to a very large and profitable extent. Sow any time from the middle of April to the end of May, in drills from 2 to 3 feet apart, covering the seed a uniform depth, and thin the plants to 12 to 15 inches in the row. The long varieties do best in a deep, sandy loam; the round varieties the same, if possible, but the latter will succeed well on strong, stiff land.

Mangel, Giant Yellow Intermediate. A great improvement on Yellow Intermediate, of considerably larger size, growing more than half above the ground. Remarkably even in shape, rather elongated, of vigorous growth, and has a fine neck; flesh white, firm and sweet. We highly recommend this new variety, as it makes a magnificent root, is easily lifted from the ground, produces enormous crops, and is an excellent keeper. $\frac{1}{2}$ lb., 10c.; lb., 17c. (by mail, 21c.); 5 lbs. or over, 15c. (by mail, 19c.).

—**Yellow Intermediate or Ovoid.** Same as above, but not as perfect in shape. $\frac{1}{2}$ lb., 10c.; lb., 17c. (by mail, 21c.); 5 lbs. or over, 15c. (by mail, 19c.).

—**Yellow Leviathan.** Root long, olive shaped, large, growing over one-half out of the ground; flesh white, sweet and tender; tops bright green, comparatively small; neck small, short. Next to the Giant Yellow Intermediate, this is one of the best. Its fine flesh never becomes woody, and its roots grow so well out of the ground that the crop is easily harvested. $\frac{1}{2}$ lb., 10c.; lb., 17c. (by mail, 21c.); 5 lbs. or over, 15c. per lb. (by mail, 19c.).

—**Steele-Briggs' Prize Mammoth, or Giant Long Red.** There is no other root crop grown, which produces so large an amount per acre of desirable cattle food for winter feeding as the Mammoth or Prize Long Red Mangel. Under high cultivation over 2,000 bushels per acre have been grown. To secure the best results good seed must be sown. Our strain of Mammoth Long Red is exceptionally fine and expressly grown for our own trade from selected well-shaped roots. Dealers and growers who have used it for years past prefer it to any other long red variety. Has a distinct appearance; roots are massive, straight and regular in size, broad shouldered, small top, free from coarseness and of most excellent feeding and keeping qualities. $\frac{1}{2}$ lb., 10c.; lb., 18c. (by mail, 22c.); 5 lb. lots or over, 15c. per lb. (by mail, 19c.).

Mammoth Long Red, or Saw Log. A good variety. $\frac{1}{2}$ lb., 10c.; lb., 16c. (by mail, 20c.); 5 lbs. or over, 13c. per lb. (by mail, 17c.).

—**Long Red.** (Selected Stock). Roots of immense size; stands well out of ground; color light red; flesh white and rose; firm and crisp. Our stock is of superior quality. $\frac{1}{2}$ lb., 10c.; lb., 15c. (by mail, 19c.); 5 lbs. or over, 12c. per lb. (by mail, 16c.).

—**Red Globe.** A large round variety, of excellent quality, productive and a good keeper; color light red, flesh white; better adapted to shallow soil than the long varieties. $\frac{1}{2}$ lb., 10c.; lb., 17c. (by mail, 21c.); 5 lbs. or over, 15c. per lb. (by mail 19c.).

—**Yellow Globe.** (Select). Similar to Red Globe, except color; equally productive; color light yellow; handsome shape and good keeper. $\frac{1}{2}$ lb., 10c.; lb., 15c. (by mail, 19c.); 5 lbs. or over, 13c. per lb. (by mail, 17c.).

—**Steele-Briggs' Giant Yellow Oval.** It is remarkably even in shape, rather elongated and of vigorous growth; it has a fine neck, large leaves with green stems and a very smooth, fine skin. The flesh is white, firm and sweet, greatly relished by cattle, easily lifted (growing more than half above the ground), producing an enormous crop, and is an excellent keeper. $\frac{1}{2}$ lb., 10c.; lb., 18c. (by mail, 22c.); 5 lbs. or over, 15c. per lb. (by mail, 19c.).

—**Golden Fleshed Tankard.** Most nutritious variety in cultivation, roots large, ovoid, but filled out at top and bottom, terminating with a small tap root; flesh deep golden yellow, solid, crisp, sweet and rich; excels all others in milk producing qualities, and very productive. It has no superior as a keeper. We have known Mangels of this variety to be kept sound and crisp, and in full flavor till June. $\frac{1}{2}$ lb., 10c.; lb., 17c. (by mail, 21c.); 5 lbs. or over, 15c. per lb. (by mail 19c.).

—**Steele-Briggs' Giant Yellow Globe.** (New). The finest Yellow Globe in cultivation. Roots are of immense size, fine shape, single tap root and neat top. The flesh being remarkably firm and fine grained, renders it an excellent keeping variety. $\frac{1}{2}$ lb., 10c.; lb., 17c. (by mail, 21c.); 5 lbs. or over, 15c. per lb. (by mail, 19c.).

—**Orange Globe.** Roots medium size, uniformly globe shape, having a very small tap and few side roots; color deep orange yellow; flesh white and of excellent quality. $\frac{1}{2}$ lb., 10c.; lb., 15c. (by mail, 19c.); 5 lbs. or over, 13c. per lb. (by mail, 17c.).

—**Red Intermediate.** Half long, of a somewhat oval shape, grows well out of ground, is easily harvested and well adapted to heavy soils; a good cropping variety; skin of a deep red color; flesh firm, and a good keeper. $\frac{1}{2}$ lb., 10c.; lb., 17c. (by mail, 21c.); 5 lbs. or over, 15c. lb. (by mail, 19c.).

SWEDISH OR RUTA BAGA TURNIPS

Sow from 2 to 3 pounds per acre in drills

Our stock of Turnip Seed has been grown from carefully selected bulbs by growers of the highest standing in England and Scotland, and includes the most desirable varieties in cultivation. Sow 2 to 3 lbs. per acre.

¼ lbs. and ½ lbs. postpaid, at prices noted

PURPLE TOP VARIETIES

Swede Turnips. The Steele, Briggs Co.'s Selected Purple Top. Produces large, round, perfectly shaped bulbs, with very small top; fleshy, rich yellow, firm, free from coarseness, and of excellent quality; skin yellow, with deep purple top. A splendid keeping variety. There is no other sort which we have ever grown that yields a more uniform sized and handsome crop, or that will produce a greater weight, if as much, to the acre, which has been repeatedly proven on actual trials. It is a prize winner everywhere. The Turnip being one of the staple root crops of Canada, it has been our endeavor to obtain a variety of undoubted merit, and such that we could depend upon from year to year. This variety has fully realized our expectations for the past ten years, and having become the universal favorite with the leading root growers in Ontario, the demand has so increased as to require thousands of pounds annually to fill our orders. Sold only in sealed packages, 15c., as illustrated. If your dealer does not keep it send direct to us. Price, ¼ lb., 10c.; ½ lb., 15c.; 1 lb., 20c. (by mail, 24c.); 5 lbs. or more, 17c. lb. (by mail, 21c. lb.).

—**Steele-Briggs' Jumbo** (Extra select stock). A very large, handsome, tankard-shaped root, with small neck and top; color purplish crimson above ground, yellow below; flesh yellow, very solid, fine grained, and of best flavor; stands well out of the ground, and is a giant compared with many varieties; a heavy cropper and a good winter keeping sort. Both in England and Canada it is becoming a great favorite. Sold only in sealed packages. Price, ¼ lb., 10c.; ½ lb., 15c.; 1 lb., 20c. (by mail, 24c.); 5 lbs. or more, 17c. lb. (by mail, 21c.).

- Monarch.** A large crimson top variety of merit. One of the heaviest croppers in cultivation. ¼ lb., 10c.; 1 lb., 18c. (by mail, 22c.); 5 lbs. or over, 16c. per lb. (by mail, 20c.).
- Steele-Briggs' Highland Prize.** One of the largest and heaviest cropping Swedes grown in Scotland; by constant and careful selection the originator has attained perfection in form, the bulbs being of a handsome oval shape, with small neck and single tap root, uniform in size, very rich in quality, and an excellent keeper. Price, ¼ lb., 10c.; 1 lb., 17c. (by mail, 21c.); 5 lbs. or more, 15c. lb. (by mail, 19c. lb.).
- Steele-Briggs' Select Westbury.** A favorite with many growers; large round variety and good keeper. Price, ¼ lb., 10c.; 1 lb., 20c. (by mail, 24c.); 5 lbs. or more, 17c. lb. (by mail 21c. lb.).
- Drummond's.** A very hardy well shaped root of excellent quality, and a good cropper. Price, ¼ lb., 10c.; 1 lb., 17c. (by mail, 21c.); 5 lbs. or more, 15c. lb. (by mail, 19c. lb.).
- Hall's Westbury.** A larger round variety and good keeper. Price, ¼ lb., 10c.; 1 lb., 17c. (by mail, 21c.); 5 lbs. or more, 15c. lb. (by mail, 19c. lb.).
- Steele-Briggs' Perfection.** A new and improved strain of Purple Top Swede; bulbs round very uniform in size, small neck, short tap root, deep purple above ground, yellow beneath; flesh rich yellow, firm and sweet; a good cropper and an excellent keeper. Price, ¼ lb., 10c.; 1 lb., 18c. (by mail, 22c.); 5 lbs. or more, 16c. lb. (by mail, 20c. lb.).
- Laing's Improved.** A handsome shaped variety, of medium size, very small top, and excellent flavor; requires rich soil. Price, ¼ lb., 10c.; 1 lb., 20c. (by mail, 24c.); 5 lbs. or more, 18c. lb. (by mail, 22c. lb.).

WELL KNOWN STANDARD VARIETIES

Price, each, ¼ lb., 10c.; 1 lb., 15c. (by mail, 19c.); 5 lbs. or more, 12c. (by mail, 16c.).

- Bangholm Improved, Purple-top.** A standard variety, large size, small neck, and yields well.
- Carter's Imperial Hardy, Purple-top.** An excellent field variety. It is a hardy sort, and yields heavily.
- East Lothian Improved, Purple-top.** Bulbs large, rich purple-top, and stands well out of the ground; hardy and of good quality.
- Shamrock Improved, Purple-top.** A very large, short neck, handsome shaped variety.
- Sharpe's Improved, Purple-top.** Similar to the Skirving in habit, small top and thin neck, and large bulb; a heavy cropper.
- Skirving's Improved, Purple-top.** A robust grower, heavy cropper, and an excellent keeping variety.
- Sutton's Champion, Purple-top.** Highly recommended for its fine shape, size and keeping qualities.

GREEN AND BRONZE TOP SWEDES

- Gloucester, White Flesh Green Top.** A handsome, useful variety; flesh firm and sweet; excellent for table; a heavy cropping field sort; keeps well. ¼ lb., 10c.; 1 lb., 20c. (by mail, 24c.); 5 lbs. or more, 17c. (by mail, 21c.).
- Hasard's Improved Swede.** A distinct variety; the flesh is firm and white, while its hardy keeping qualities are superior to most sorts, and adapted to either field or garden cultivation. Sold only in sealed packages. ¼ lb., 10c.; ½ lb., 15c.; 1 lb., 20c. (by mail, 24c.); 5 lbs. or more, 17c. (by mail, 22c.).
- Halewood Bronze Top.** A favorite Scotch variety; heavy cropper; good keeper. ¼ lb., 10c.; 1 lb., 18c. (by mail, 22c.); 5 lbs. or more, 16c. (by mail, 20c.).
- Hartley's Bronze Top.** Oval-shaped bulbs, large and solid, small neck and single tap root; rich in quality; productive, and a good keeper. ¼ lb., 10c.; 1 lb., 18c. (by mail, 22c.); 5 lbs. or more, 16c. (by mail, 20c.).

Sow our Selected Purple Top Swede, and you will have a magnificent crop.

PURPLE TOP ABERDEEN YELLOW
TURNIP

TURNIPS FOR FALL FEEDING

YELLOW AND WHITE FLESH VARIETIES

Sow 2 lbs. per acre in drills, or 4 to 6 lbs. broadcast

The following varieties are not so well adapted for late winter feeding as the Swede; being of larger and quicker growth, are coarser in texture, and when kept too long in winter become spongy and lose their fine feeding qualities; but for fall and early winter feeding are grown with profit, producing a great bulk per acre, and may be sown much later in the season than the Swede varieties.

Turnip, Aberdeen Yellow, Purple-Top. An excellent variety for early winter feeding, and deserves to be grown more generally. $\frac{1}{4}$ lb., 10c.; lb., 1c. (by mail, 22c.); 5 lbs. or over, 16c. per lb. (by mail, 20c.)

Aberdeen Yellow, or Bullock, Green-Top. Similar in form and size to the preceding; the bulb is bright green above and yellow flesh. $\frac{1}{4}$ lb., 10c.; lb., 18c. (by mail, 22c.); 5 lbs. or over, 16c. per lb. (by mail, 20c.)

Devonshire Greystone. A very useful kind of Turnip, which produces an immense crop, of excellent quality; it is of great value for feeding off early, and well adapted to late sowing. $\frac{1}{4}$ lb., 10c.; lb., 15c. (by mail, 19c.); 5 lbs. or over, 12c. per lb. (by mail, 16c.)

Purple Top Mammoth, or Improved Greystone. Produce a greater weight per acre in a given time than any other Turnip, and it will grow remarkably heavy crops on poor soils. Flesh very solid and nutritious. Fine shere, a certain cropper, and will stand the winter well if sown late in the season. $\frac{1}{4}$ lb., 10c.; lb., 15c. (by mail, 19c.); 5 lbs. or over, 12c. per lb. (by mail, 16c.)

Red Globe Norfolk. Medium sized; skin red where exposed to the sun, below ground, white; should be fed early. $\frac{1}{4}$ lb., 10c.; lb., 17c. (by mail, 21c.); 5 lbs. or over, 15c. per lb. (by mail, 19c.)

Pomeranian White Globe. Roots globular, large sized, adapted to early feeding. $\frac{1}{4}$ lb., 10c.; lb., 15c. (by mail, 19c.); 5 lbs. or over, 12c. per lb. (by mail, 16c.)

Cow Horn. Matures very quickly; roots long, half above ground; flesh white, fine grained. $\frac{1}{4}$ lb., 10c.; lb., 25c. (by mail, 29c.); 5 lbs. or over, 23c. (by mail, 27c.)

Red Top, Strap Leaf. Early, hardy, very prolific, of excellent quality. It is one of the best for late sowing. The bulbs are flat, smooth and regular in form; flesh clear, white, and remarkably well flavored. $\frac{1}{4}$ lb., 15c.; lb., 30c. (by mail, 34c.); 5 lbs. or over, 25c. (by mail, 29c.)

PURPLE-TOP MAMMOTH OR IMPROVED GREYSTONE

RAPE OR COLE

1 to 2 lbs. per acre in drills;
4 to 6 lbs. broadcast

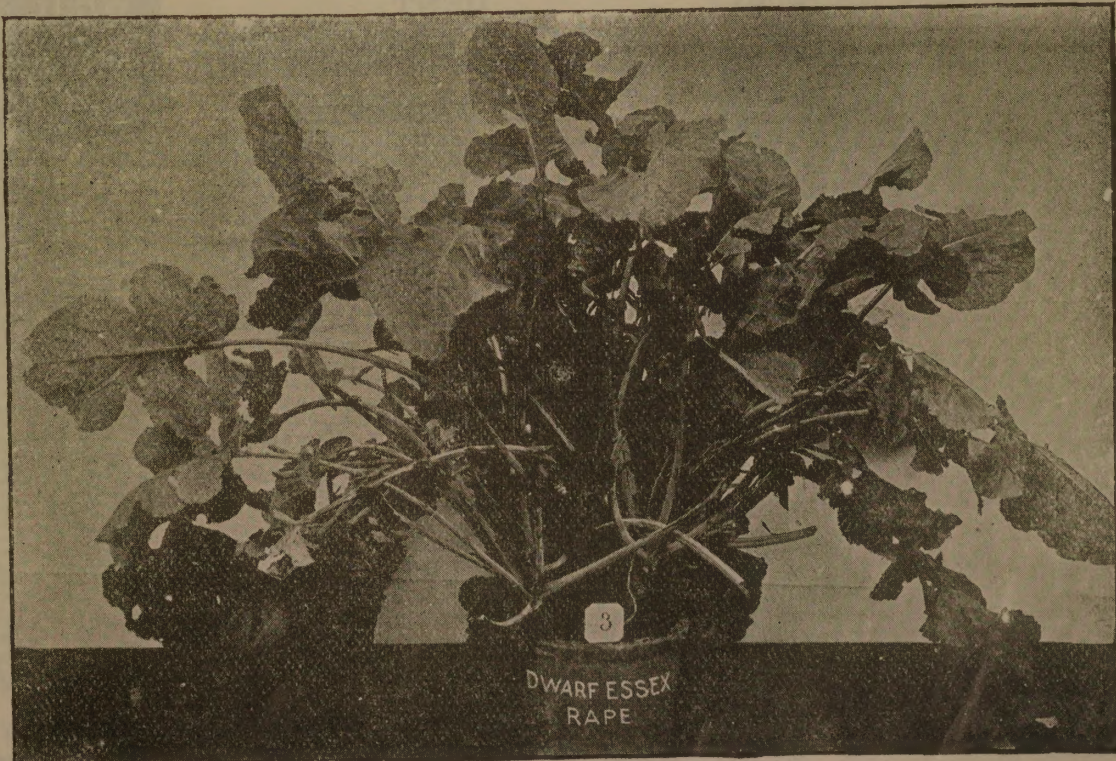

English Sowing Rape, commonly called "Dwarf Essex" Rape, is becoming more generally sown each succeeding year, and is one of the most easily grown and useful soiling crops we have. A field of Rape coming into use when the pasture is almost barren from continuous feeding and dry weather, is a boon to the farm. For feeding sheep and lambs, preparatory for the market, nothing is better; not only does it fatten quickly, but imparts a quality to the flesh superior to almost any other pasture. It has been estimated that one acre of Rape, when not preceded by any other crop the same season, will feed from thirty-five to forty lambs for two months, and that the gain in flesh per month was from eight to twelve and one-half pounds on each lamb. Young cattle thrive on it as well as swine. Rape may be sown either in rows or drills and cultivated or sown broadcast. When sown in rows the plant will grow much stronger and more luxuriant in foliage, and will also stand longer feeding as it is less liable to be tramped down. It may be sown in May, and when it is sufficiently advanced it can be fed off, and then allowed to grow up again, thus giving a second crop the same season; but the usual time for sowing is the last half of June until the end of July, and it has been sown towards the end of August with success. As it will stand late sowing it can be sown after a Rye or Barley crop. The cultivation of Rape should commence as soon as it is well started, and with repeated cultivation until the leaves become too large to work between the rows. Poor soil is often sown with Rape and plowed under as a fertilizing crop, for which purpose few, if any other crop, is better. Lb., 10c.; 10 to 25 lb. lots, 8c. per lb.; 100 lbs. or over, 7c. per lb. (If wanted by mail add 4c. per lb.)

MAMMOTH RUSSIAN SUNFLOWER

The Giant of all Sunflowers. Growing to double the size of the common sunflower, and the yield of seed is twice as great. One hundred and twenty-five bushels to the acre have been grown at less expense than corn. It is highly recommended for poultry; the best egg producing food known. The seed is good food for horses, and yields a fine quality of oil. The strong thick stalks are used for fuel. In fact there is no waste whatever. Per lb., by mail, postpaid, 20c.; $\frac{1}{4}$ lb., 10c.; pkt., 5c.

WILD RICE

Wild Rice, Zizania (for fall sowing.) The Zizania is valuable as a forage plant on inundated lands and along the shores of marshes. Cattle are fond of it when green, and it makes a good hay. As an attraction for wild fowl it is invaluable. In fish ponds and lakes it purifies the water and affords a refuge to the small fry from the large fish, and also furnishes them with food from the animalculæ on the stalks. The seed should be sown in the fall in six inches to six feet of water, having a soft mud bottom and where there are but few weeds. It commences to sprout in spring as soon as the water gets warm, and grows rapidly, ripening late in August and September. Per lb., 30c. (by mail, 35c.); 10 lbs. or over, 25c. per lb. (by mail, 30c. per lb.)

DWARF ESSEX
RAPE

SELECTED ENSILAGE SEED CORN...

THE MOST PROFITABLE VARIETIES TO GROW

The following prices are f.o.b. Toronto, subject to market changes, cash with order.

Cotton Bags 20c. each extra.

Corn by mail: Any variety sent postpaid, 1 lb. for 15c., 2 lbs. 25c., 8 lbs. 90c.

CLOUD'S EARLY YELLOW DENT

Early, strong and vigorous, growing from 8 to 10 feet high, producing large, handsome ears with unusually deep grain. The Guelph Agricultural College reports it "among the heaviest yielding varieties of those tested for six years." It is the earliest of all the heavy varieties, and produces a large amount of ears per acre, the average weight for six years being 3.21 tons, and for the whole crop 19.51 tons per acre. $\frac{1}{2}$ bush., 50c.; bush., 90c.

EARLY BUTLER YELLOW DENT

An extra early variety which will ripen in most sections. Where a well maturing corn is desired Early Butler will give excellent results. The average yield of well-matured ears is 3.09 tons per acre. $\frac{1}{2}$ bush., 55c.; bush., \$1.

EARLY HURON YELLOW DENT

One of the earliest dent corns in cultivation in Western Ontario; it is largely grown for a ripened crop. A strong grower; stalks and ears of good size, small cob, long deep grains and wonderfully productive. $\frac{1}{2}$ bush., 50c.; bush., 90c.

EARLY MASTODON YELLOW DENT

Among the heaviest producing varieties upon our list. Grows quick, strong and vigorous, has broad, heavy leaves and large ears, with very large, deep grains. One of the best Ensilage varieties; matures ears to a dough state when harvested. The Guelph Agricultural College average for a number of years shows 3.05 tons of ears per acre, and 19.33 tons of total yield per acre, which is a very strong recommend. $\frac{1}{2}$ bush, 55c.; bush., \$1.

GIANT PROLIFIC SWEET ENSILAGE

One of the most extensively grown varieties of Ensilage or Fodder Corn used in Canada. As a green fodder dry cured, or prepared as Ensilage, it is in the highest favor throughout the Dominion. The stalks are sweet, juicy, tender and covered with long, broad leaves. On strong soil will grow from 12 to 16 feet high. More fodder can be produced from an acre than from any other variety we have grown, and when well cured is quite equal to hay. Beef can be made cheaper by feeding it than with hay; it will increase the milk and cream production fully to per cent., as well as furnish cheap and acceptable food for the winter. As a green food for cutting in the latter part of the summer, one acre is worth eight acres of ordinary pasture. Prices quoted on application.

RED COB ENSILAGE

An old favorite variety, yielding very large crops of excellent fodder. Ears large, cob small and red, grains large, deep and white, indented. Prices quoted on application.

HORSE-TOOTH OR YELLOW DENT

Well known everywhere, but much inferior to many of the more recently introduced sorts, both as to yield and quality of the product. Prices quoted on application.

FLINT VARIETIES

Salzer's North Dakota White Flint. A grand variety, matures early, yields enormously, produces a larger number of good ears, and a smaller number of poor ears than any other variety. Will ripen in nearly all sections of Ontario. Our supply has been grown in Canada, which is the strongest recommend for its adaptability to this climate. $\frac{1}{2}$ bush., 55c.; bush., \$1.

Compton's Early Yellow Flint. Very extensively used for ensilage and for a grain producing crop. While not giving as heavy a green crop as many others, it is especially valuable for the quantity and quality of ears produced, and makes a rich, palatable food when cured as silage. Its extreme earliness adapts it to eastern and northern Ontario, where it is a favorite sort. Ripens well, yielding an average of 3.32 tons of ears per acre. $\frac{1}{2}$ bush., 50c.; bush., 90c.

Longfellow Yellow Flint. One of the favorite varieties in eastern and northern Ontario. Grows quickly and fully ripens in nearly every section of the province. To grow as a fodder Corn, or for the grain, it is one of the very best. Ears long, bright golden yellow grain, smooth and very hard. None better for grinding. $\frac{1}{2}$ bush., 50c.; bush., 90c.

Angel of Midnight White Flint. An excellent early eight-rowed variety. $\frac{1}{2}$ bush., 50c.; bush., 90c.

Canada Yellow Flint. A standard variety. $\frac{1}{2}$ bush., 50c.; bush., 90c.

Large White Flint. Ears long pearly white, and of a beautiful appearance. $\frac{1}{2}$ bush., 50c.; bush., 90c.

EARLY IMPROVED LEAMING

A fine early Yellow Dent variety; ears of good size, cobs red and small, with large deep grains; a strong grower, and produces well on light and heavy land where other varieties of Yellow Dent will not thrive. It has given great satisfaction the past two years. While not ripening in all sections the ears arrive at a firm dough state at time for cutting, and make fine silage. The average weight of ears is 3 tons per acre. $\frac{1}{2}$ bush., 40c.; bush., 75c.

MAMMOTH CUBAN YELLOW DENT

The heaviest ear-producing corn upon our list; and grows enormous crops of excellent fodder. With a favorable season it will form parching ears throughout central Ontario. Ears very large, grain yellow, dented, the average yield of ears being 3.51 tons per acre as reported by Guelph Agricultural College. $\frac{1}{2}$ bush., 55c.; bush., \$1.

WHITE CAP YELLOW DENT

A new variety, originated and introduced by Mr. Clark, of Ohio, one of the most famous corn growers of the United States. He claims for it the largest cropping variety upon the market; stands drought well, crops well on poor land; ears large, handsome and well filled; the tips of the grain are white, the inside yellow, thus giving it a beautiful color. One grower in Western Ontario reports having harvested the largest and finest crop he has ever grown. $\frac{1}{2}$ bush., 45c.; bush., 80c.

WISCONSIN YELLOW DENT

A most desirable variety, strong grower, produces a large percentage of ears. $\frac{1}{2}$ bush, 55c.; bush., \$1.

EARLY DAWSON OAT

Every Farmer
in Canada should
sow the

Early Dawson

OAT

It's a money-maker for
every man who grows it.

Dawson is one of the earliest Oats in cultivation. Early Oats always **PAY WELL**

The originator claims it is the hardiest and healthiest variety ever grown, full of new blood and overflowing with vigor. Once sown it grows from start to finish. The straw is strong and stiff, and so far has never shown the slightest signs of rust. The accompanying cut shows one of the handsomest heads of oats ever grown. The grain is very heavy and of fine quality. With careful culture and good farming (which is the only kind that pays) you can have a wonderful crop if you sow the Dawson. Sow a small quantity this season and you will have your own seed next year of this grand new Oat. You will find it a good investment. Our stock is limited. Order early and avoid disappointment. Price, per lb., by mail, postpaid, 15c.; 4 lbs., 50c.; larger lots by express or freight at purchaser's expense, peck, 30c.; bushel, \$1; per bag (2½ bushel bag included) \$2.25.

J. D., Cedar Grove, says—"The Early Dawson Oats surpassed all my expectations. They were the admiration of all who saw them, the straw growing 4½ feet high. I cannot say too much in their favor."—And numerous other testimonials from all over Canada.

SELECTED AND RE-CLEANED SEED GRAIN

Read This Our customers may be assured that we spare no effort to supply the finest samples of Seed Grain that we can procure, and all thoroughly cleaned over our mills, which are the most complete and perfect of any that are made. It is impossible for us at this issue to make a complete price list. We shall, however, be pleased to quote prices and send samples to intending purchasers when desired.

Seed grains are always quoted and sold free incars, Toronto, the purchaser to pay transportation charges on arrival. Pound prices include payment of postage. Good cotton bags supplied in filling orders at 20c. each and to be included in remittance with orders. The following varieties have succeeded best in various parts of the country.

BARLEY *Mandscheuri*. An early six-rowed variety, very strong strawed and stools well, bearing large well filled heads of beautiful grain, possessing malting qualities of a high order and adapting itself readily to a great variety of soils. It has occupied first place at the O. A. C., Guelph, for some time. We offer especially grown seed from the genuine imported stock, thoroughly cleaned. Per lb., 15c.; 5 lbs., 50c. (by mail postpaid). Per peck, 30c.; bush., 85c.

—*Baxter's Six-Rowed*. A standard sort of great merit; straw is strong and stands well. Per lb., 15c.; 5 lbs., 50c.; (by mail postpaid). Per peck, 25c.; bush., 80c.

—*Black Hullless*. Per lb., 15c.; 5 lbs., 50c. (postpaid); bush. of 60 lbs., \$1.

—*Canadian Six-rowed, Chevalier Two-rowed, Duckbill Two-rowed, and Hullless*. Prices on application.

BUCKWHEAT. (Carefully re-cleaned).

Buckwheat, Japanese. Enormously productive; the kernels are nearly twice the size of any other variety, and of a distinct shape; the color is a rich dark brown; very heavy straw, branches more and does not need to be sown as thickly as other sorts. Per lb., 15c.; 5 lbs. for 50c. (postpaid); bush., 85c.

—*Silver Hull*. Superior to the common variety; in bloom longer, matures sooner and yields much more per acre; thin husk and of a silvery grey color. Per lb., 15c.; 5 lbs. for 50c. (postpaid); bushel, 85c.

—*Common Grey Variety*. Excellent for plowing under. Lb., 15c.; 5 lbs., 50c. (postpaid). Bush. prices on application.

FLAX *Choice Screened*, for seeding; 4 lbs., 50c. (by mail, postpaid); peck, 50c., bushel, \$1.60.

—*Prime*. For feeding. Prices quoted on application.

OATS *Siberian* (White), *Goanette* (Black), *Oderbucker* (White), *American Banner* (White), *Black Tartarian*, *Gothland* (White), *Egyptian* (White). Prices on application.

PEAS *The Egyptian Mummy*, per bushel, 90c.; *Canadian Beauty*, per bushel, \$1; *Large White Marrowfat*, per peck, 40c.; per bushel, \$1.10; *Black-eyed Marrowfat*, peck, 40c.; bushel, \$1.10.

—*Prussian Blue, Golden Vine, Crown*. (Prices quoted on application).

RYE For Spring sowing, per lb., 10c.; 4 lbs., 35c. (postpaid); per bushel, \$1.

TARES *Black Spring*. Per peck, 50c.; bushel, \$1.50.

SPRING WHEAT *Herison's Bearded*. This grand variety originated in France, and has given an average yield of over 26 bushels per acre on a 9 years' trial at the Ontario Experimental Farm at Guelph. It possesses a strong straw, is not inclined to rust, and is considered to be one of the best milling wheats on record. Price per lb., 15c.; 4 lbs., 50c. (postpaid); peck, 40c.; bushel, \$1.50. By freight or express at purchaser's expense.

—*Colorado Spring, Red Fife, White Russian, Triumph, Red Fern, and Wild Goose, etc.* Prices on application.

FALL WHEAT Descriptive list will be issued about the 15th of August, and sent free to all who apply. Ask for it.

TERMS—All Seed, Grain, Clovers, Timothy and Grasses are sold on very close margins and for spot cash; a remittance for full amount must accompany all orders, and 20 cents each for bags included. We do not pay freight or send goods C. O. D.

N.B.—These prices are subject to market fluctuations. We will be pleased to quote special prices for quantity on application.

NEW FODDER PLANTS

The increasing demand for something new in Fodder Plants has induced us to offer the latest and most highly recommended varieties yet known, and which are now largely grown in many parts of America, where dry weather predominates. The Japanese Millet has been grown in Canada the past season with marvellous success. We have grown the Kaffir Corn the past summer on our grounds, and found it quite prolific. They are well worthy of a trial, and for which purpose only do we recommend them yet. They all grow and thrive where corn will grow, and require similar cultivation.

THE FODDER GRASS

For the North-West and British Columbia

Bromus Inermis (*Awnless Brome Grass*). This has proved to be the best grass of any yet tried. From Winnipeg to the western coast it has stood the rigor of the winter, has yielded from three to four tons of hay per acre. Comes early into growth, thrives well in loose soils, withstands dry weather, grows freely in rich, damp soil, and forms a close sward; produces a heavy aftermath of succulent leafy shoots. Where a permanent lay is desired Bromus Inermis will fill the bill. Sow twenty-five pounds per acre. Price, per lb., by mail (post-paid), 25c.; for 25 lbs. or more, special prices on application.

JAPANESE MILLET

Japanese Millet A new variety recently introduced from Japan, greatly surpassing the ordinary variety of millet and Hungarian grass in vigor of stalk, yield of seed and value of crop. From reports received those who have grown it the past season are loud in its praise. The plant attains an average height of six feet, short jointed, and at every joint there is put forth an immense number of long, thick, fleshy leaves that increase its value as a cattle food. The seed constitutes an excellent food for hens, and is considered equal in value to corn meal for milk production. The stalks are very juicy, making excellent green food, and should prove valuable when cured as silage. When cured as hay, it is readily eaten by cattle and horses. Sow in drills fifteen inches apart, with twelve to fifteen pounds per acre.

KAFFIR CORN

AMBER SUGAR CANE

BROMUS INERMIS

JERUSALEM CORN

This corn belongs to the non-saccharine sorghums, and comes from the arid plains of Palestine. It is pronounced the best and surest grain crop for dry countries and seasons, even superior to Dhoura or Milo Maize. It grows about 3 feet high, makes one large head on main stalk, and several smaller heads on side shoots, even as many as eight heads on a single stalk. The grains are pure white and nearly flat. Three pounds will plant an acre. Price, by mail, postpaid, per pkt., 5c.; lb., 15c.; 3 lbs. for 40c.

KAFFIR CORN

(White). Grows from five to six feet high, making a straight, upright growth. The stems are stalky and very thickly clothed with wide leaves. The stalks keep brittle, tender and juicy, not hardening like many of the sorghums. Makes excellent fodder either green or dry, which is highly relished by cattle or horses. For fodder sow one-half to three-quarters of a bushel per acre in drills. Price, by mail, postpaid, pkt., 5c.; lb., 15c.; 3 lbs. for 40c.

TEOSINTE

(*Reana luxurians*). Somewhat resembling corn in appearance, but the leaves are much longer and broader, and the stalks contain sweeter sap. In its perfection it produces a great number of shoots, growing as much as twelve feet high; very thickly covered with leaves, yielding such an abundance of foliage that one plant is considered sufficient to feed a pair of cattle for twenty-four hours. Eighty-five stalks have been grown from one seed, attaining a height of eleven feet. Horses and cattle eat it as freely as young sugar corn. About three pounds of seed will plant an acre. Price, by mail, postpaid, pkt., 5c.; oz., 10c.; 1/4 lb., 25c.; lb., 75c.

EARLY AMBER SUGAR CANE

Well known in many parts of Canada. We have seen magnificent crops, and it should be more generally grown, as it makes a valuable green cutting crop, which is relished by all kinds of stock. Usually grows from ten to twelve feet high, stands up well, produces small, tender, sweet and juicy stalks, well covered with leaves. When allowed to ripen the seed is valuable for poultry. Price, by mail, postpaid, pkt., 5c.; lb., 15c.; 3 lbs. for 40c.

BROOM CORN

Improved Evergreen. This variety of Broom Corn is more largely grown in the Western States than any other. The brush is noted for its fine quality, good length and handsome appearance; cut before the seed is ripe, it is a beautiful pea green color. Brush very fine and seldom gets crooked. It ripens early and yields heavy crops. Per lb., by mail (post-paid), 15c.; large pkt., 5c.; 3 lbs. for 40c.

TEOSINTE

To ensure success every farmer should grow our Famous Seeds

AGRICULTURAL GRASSES

Crested Dogtail (*Cynosurus cristatus*). May be advantageously sown on lawns kept under scythe; forms a close turf, remaining green a long time; valuable for sheep pastures; succeeds on dry, hard and gravelly soil. Height 1 to 1½ ft. Sow 25 lbs. per acre. Per lb., 35c.; postpaid, 40c.

Creeping Bent Grass (*Agrostis stolonifera*). An excellent variety for pasture when mixed with other grasses; succeeding well in most situations, and thrives in moist land. Sow 40 lbs per acre. Per lb., 20c.; post paid, 25c.

Evergreen Meadow Grass (*Poa sempervivens*). Noted for perpetual greenness, earliness in spring, and the rapidity with which it reproduces leaves after being eaten or cut; its thick growth, fineness of foliage and capability of growing under the shade of trees render it a most desirable grass for lawns and parks or pasture. Sow 40 lbs. per acre. Per lb., 30c.; post paid, 35c.

Hard Fescue (*Festuca duriuscula*). Thrives in a great variety of soils. One of the best grasses for general purposes, and resists the effect of drought well. It grows easily; the foliage is fine and nutritive. Height, 1½ feet. Sow 30 lbs. per acre. Per lb., 20c.; postpaid, 25c.

Italian Rye Grass (*Lolium italicum*). One of the best. Yields crop first season, then disappears, as it will not stand our winter frost. It should only enter into mixtures for one year's crop. Sow 40 lbs. per acre. Per lb., 10c.; post paid, 15c.

True Kentucky Blue Grass (*Poa pratensis*). Also known as "Green Grass," "June Grass," etc.; does best in rich land, but will thrive in dry and somewhat shady locations; it stands the hottest summers. Sow 40 lbs per acre. Per lb., 15c.; post paid, 20c.

Canadian Blue Grass (*Poa compressa*). Somewhat like Kentucky—and as price is lower than above, may be used as a substitute. The hay, although short, is very heavy and rich. Per lb., 10c.; postpaid, 15c.

Meadow Fescue or Sweet Grass (*Festuca pratensis*). One of the most valuable grasses we have, thriving in almost all soils, and is used in all good mixtures. Makes excellent hay, early and nutritious, abundantly productive and tender. Height, from 2 to 3 feet. Sow 40 lbs. per acre. Per lb., 18c.; postpaid, 23c.

Meadow Foxtail (*Alopecurus pratensis*). A favorite grass in England, both for meadows and pasture. It grows early and abundantly, and gives a large quantity of aftermath. It is best suited to a moist soil, bog, clay or loam. Sow 30 lbs. per acre. Per lb., 35c.; postpaid, 40c.

Orchard Grass (*Dactylis glomerata*). One of the most valuable grasses. Its rapidity of growth, and its power of enduring the cropping of cattle, commend it highly as a pasture grass. It blooms earlier than Timothy, and about the same time as common red clover, making an admirable mixture for meadows to cut and cure for hay. Stands drouth better than most grasses. Sow 28 lbs. per acre. Per bushel, price variable; per lb., 15c.; postpaid, 20c.

Perennial Rye Grass, English (*Lolium perenne*). Suitable to a great variety of soils, yields an abundance of foliage, valuable for hay, for which purpose it requires cutting when in bloom. Stands Canadian climate two seasons; good in mixture for two years' crop. Sow 48 lbs per acre. Per lb., 10c.; postpaid, 15c.

Red Top (*Agrostis vulgaris*). Thrives best on low ground, where it cuts a good crop of rather light hay of fair quality. Suitable for low pastures. Sow 28 lbs. per acre. Per lb., 15c.; postpaid, 20c.

Rough Stalked Meadow Grass (*Poa trivialis*). Of close, quick growth, productive and nutritious; valuable in all permanent pastures on good soil, particularly those of a moist description, but does not thrive on dry soils. Prices variable. Per lb., 25c.; postpaid, 30c.

Shrader's Brome Grass (*Bromus Schraderi*). A free growing annual, which produces a large amount of succulent fodder of rich quality. It starts up quickly after cutting, and continues growing until killed by winter. Adapted for one year's hay or pasture. Prices variable. Per lb., 30c.; postpaid, 35c.

Sweet Vernal (*Anthoxanthum odoratum*) (*True Perennial*). Its chief merits are its early growth, and continuing to throw up its root foliage until late in autumn. The fragrant odor which the leaves emit when drying improves and sweetens the hay. Height from 1 to 2 feet. Sow 30 lbs per acre. Per lb., 35c.; postpaid, 40c.

Sheep Fescue (*Festuca ovina*). This grass grows naturally on light, dry and sandy soils; smaller than the other Fescues, but from being very nutritious it should always enter into the composition of sheep pastures, as they are very fond of it, and mutton from such pastures is of the finest flavor. Average height, 15 inches. Sow 30 lbs. per acre. Per lb., 20c.; postpaid, 25c.

Tall Meadow Oat Grass (*Avena elatior*). This grass will be found useful for sowing in mixtures upon lands when a coarse herbage is required, or on inferior soils. It is early, pro luctive, and makes good hay when cut early. Well adapted for dry soils. Sow 36 lbs. to the acre. Per lb., 25c.; postpaid, 30c.

Timothy, Herd's Grass or Catstail (*Phleum pratense*). A grass so well known needs no description. Sow 15 lbs. per acre. Per bush., price variable; per lb., 10c.; postpaid, 15c. Samples and prices on application.

Wood Meadow Grass (*Poa nemoralis*). There is no grass better adapted for pleasure grounds, particularly under trees, as it will not only grow in such places, but succeeds where few other grasses can exist. Very early; of a bright, rich green. Sow 25 lbs. to the acre. Per lb., 30c.; postpaid, 35c.

Yellow Oat Grass (*Avena flavescens*). Grows naturally in dry pasture on light and good soil. It yields a considerable bulk of fine herbage; arrives early at maturity. Sow 28 lbs. to the acre. Per lb., 80c.; postpaid, 85c.

Hungarian Grass. Sow 24 to 36 lbs. to the acre. Per lb., 10c.; postpaid, 15c. Price variable; furnished on application.

Common Millet. Sow 24 to 36 lbs. to the acre. Per lb., 10c.; postpaid, 15c.

German or Golden Millet. Sow 24 to 36 lbs. per acre. Per lb., 10c.; postpaid, 15c.

CLOVER SEED

Prices per bushel and 100 lbs.
given on application

Lucerne, or Alfalfa (*Medicago Sativa*). The great value of Lucerne is in its enormous yield of sweet and nutritious foliage, which is highly relished by stock, either when green or cured into hay. It will grow and yield abundantly in hot, dry sections, and on poor, light and sandy soil, where no other grasses can be grown, for it sends its roots down to enormous depths, consequently it consumes food, moisture and the leach of fertilizers which have been for years beyond the reach of ordinary plants. The best method is to sow broadcast 15 lbs. per acre where the land is in good condition. Cut when in full bloom. Try to cure without getting it wet. Do not let hungry cattle get it when green, especially if wet. If you wish to pasture them on it, first feed them all they can eat, and then turn them on the green Lucerne, and no harm will come to them. It is the best thing to renew old worn-out lands that we ever saw, and there is not a weed in this country that can stand before it. By mail, postpaid, 5 lbs., \$1; 1 lb., 20c.

Clover, Crimson or Scarlet (*Trifolium incarnatum*). An annual variety. The yield of fodder is great, and after cutting it at once commences growing again, and continues until destroyed by frost. It can be sown in April or May, and produce an abundant crop in fall for feeding green or for hay, and is very highly recommended as a soiling crop for plowing under. It is being extensively tried in many sections of Canada, and while it is not yet an established fact that it will readily self-seed the same as in more southern latitudes, it is highly spoken of as a fine crop for spring sowing, when pasture is likely to be short. Sow 10 lbs. per acre, or even more on poorer lands. Per lb., 15c.; by mail, postpaid, 20c. Special prices on application for large quantities.

Bokhara (*Melilotus alba*). Grows 2 feet high; has a white and very sweet-scented blossom, most valuable for bees; sow in spring. Per lb., 15c.; postpaid, 20c.

White Dutch (*Trifolium repens*). Most valuable in mixtures for permanent pastures, forming, in conjunction with natural grasses, the finest and most nutritious food for cattle or sheep. Price variable. Per lb., 25c.; postpaid, 30c.

Yellow Trefoil or Hop Clover (*Medicago lupulina*). A prolific and hardy variety, and found to be extremely well adapted for dry pastures, but should not be sown alone. Per lb., 15c.; postpaid, 20c.

Red Clover (*Trifolium pratense*). The leading variety of clover for pastures or meadows. The seed we offer is re-cleaned and very true. Per lb., 15c.; postpaid, 20c. Samples and prices on application.

Clover, Mammoth, Late Large Cow Grass, or Pea Vine Clover (*Trifolium pratense perenne*). Of great value if sown upon exhausted lands; grown from 5 to 6 feet, and highly recommended for plowing under for manure. Price variable. Per lb., 15c.; postpaid, 20c.

Alsike (*Trifolium hybridum*). It is deservedly in repute as one of the best perennial clovers, is well adapted to this country, and is now generally approved of in all mixtures of grasses and clovers. Market price variable. Per lb., 15c.; post paid, 20c. Samples and prices on application.

No. 1 Grasses or Clover for One Year's Hay

Grasses.—Timothy, Italian Rye, Perennial Rye, Orchard, Schrader's Brome Grass.

Clovers.—Red, Scarlet, Alsike, Lucerne.

a. On light soils, per acre, \$2.60; per lb., 15 cents.	Allowing 22 pounds per acre.
b. On medium soils, " \$2.60; per lb., 15 "	
c. On heavy soils, " \$2.50; per lb., 15 "	

No. 2 For Two Years' Mowing or Grazing

Grasses.—Italian Rye, Perennial Rye, Kentucky Blue, Orchard, Meadow Fescue, Timothy.

Clovers.—Red, Scarlet, Alsike, Trefoil, White.

a. On light soils, per acre, \$3.25; per lb., 16 cents.	Allowing 25 pounds per acre.
b. On medium soils, " \$3.25; per lb., 16 "	
c. On heavy soils " \$3.20; per lb., 16 "	

No. 3 For One Year's Hay and Two Years' Pasture

Grasses.—Italian Rye, Perennial Rye, Kentucky Blue, Orchard, Meadow Fescue, Hard Fescue, Timothy, Tall Oat.

Clovers.—Red, Scarlet, Alsike, Lucerne, White.

a. On light soils, per acre, \$3.50; per lb., 16 cents.	Allowing 26 pounds per acre.
b. On medium soils, " 3.55; per lb., 16 "	
c. On heavy soils, " 3.55; per lb., 16 "	

No. 4 For Three Years' Mowing, Grazing in Orchards and Shade

Grasses.—Evergreen Meadow, Hard Fescue, Italian Rye, Meadow Foxtail, Perennial Rye, Orchard, Tall Meadow Oat, Timothy, Wood Meadow.

Clovers.—Alsike, Mammoth, White.

Allowing 25 lbs. per acre. Price, per acre, \$4; per lb., 20c.

PERMANENT PASTURE MIXTURES

No. 5 For Pastures on Light or Medium Soils

Grasses.—Hard Fescue, Kentucky Blue, Meadow Fescue, Meadow Foxtail, Orchard, Perennial Rye, Timothy, Sheep's Fescue, Red Top, Yellow Oat.

Clovers.—Alsike, Lucerne, Red, White, Mammoth.

Allowing 28 pounds per acre. Price, per acre, \$4.50; per lb., 20c.

No. 6 For Sandy and Gravelly Soils

Grasses.—Crested Dogtail, Hard Fescue, Kentucky Blue, Perennial Rye, Red Top, Sheep's Fescue, Tall Oat.

Clovers.—Trefoil, Lucerne.

Allowing 30 pounds per acre. Price, per acre, \$4.50; per lb., 18c.

No. 7 For Moist Lands and Those Occasionally Overflowed

Grasses.—Creeping Bent, Kentucky Blue, Meadow Foxtail, Orchard, Red Top, Rough-stalk Meadow, Timothy.

Clovers.—Alsike, White.

Allowing 28 pounds per acre. Price per acre, \$4.50; per lb., 20c.

No. 8 For Pastures and Well Drained Soils

Grasses.—Meadow Fescue, Meadow Foxtail, Orchard, Kentucky Blue, Perennial Rye, Red Top, Timothy, Yellow Oat.

Clovers.—Lucerne, Alsike, Red, White, Yellow.

Allowing 28 pounds per acre. Price per acre, \$4.25; per lb., 20c.

No. 9 For Pastures in Orchards and Shaded Places

Grasses.—Evergreen Meadow, Kentucky Blue, Italian Rye, Hard Fescue, Perennial Rye, Orchard, Sweet Vernal, Timothy, Wood Meadow.

Clovers.—Red, Trefoil, White.

Allowing 28 pounds per acre. Price per acre, \$4.20; per lb., 20c.

No. 10 Mixture for Renovating Old Pastures

Grass lands, which have been frequently mown without receiving a proportionate supply of manure, always become deficient in the most valuable and nutritive grasses. By sowing about fourteen pounds of Renovating Mixture per acre the sward will be wonderfully improved both as regards quantity and quality of produce. Sow in April or May, or after the hay is taken off, and previous to rain if possible. 25 lbs. or over, 17c. per lb.; less quantity, 20c. per lb.

Quotations are for the price of seed for an acre; for less than will seed one acre, the pound prices are charged. Light and heavy seeds will be sent separately. Add 4c. per lb. to prepay postage.

DR. HESS' POULTRY PAN-A-CE-A.**POSITIVELY GUARANTEED**

DR. HESS' POULTRY PAN-A-CE-A MAKES HENS LAY

Prevents all Diseases and cures Roup, Cholera, Gapes, Leg Weakness, etc.

For chickens, turkeys, ducks and geese—something every poultry man needs to have success in the business. It promotes the general good health of the fowl, greatly quickening digestion, and being a tonic works all the various organs like a piece of machinery.

Use Pan-a-ce-a and make your hens lay when eggs are a high price. It is very valuable for young chickens when they are growing; it aids plumage and gives them a vigorous foundation.

GOOD FOR MOULTING HENS.

**GOOD FOR TURKEYS YOUNG AND OLD.
A POSITIVE PREVENTIVE AGAINST ALL
DISEASES IN POULTRY.**

Price, 24 oz. package..... 35c.; by mail, postpaid, 40c.
" 5 lb. " 85c.; " " \$1.10

DR. HESS' PRACTICAL POINTS

This book will form a complete veterinary work for farmers, horsemen, dairymen and poultrymen.

(Mailed free on application).

POULTRY SUPPLIES

CRUSHED OYSTER SHELL

This is the most important article for the poultry yard through the winter, and should be liberally supplied to the fowls. In summer, when left to run at large, they can find their own shell-making material; but when everything is frozen over or covered with snow, they must be helped out if eggs are wanted.

Price, No. 1, Coarse Crushed,	25 lbs., 25c.; 100 lbs., 60c.
" No. 2, Medium "	20 " 25c.; 100 " 75c.
" No. 3, Fine "	20 " 25c.; 100 " 75c.
" No. 4, for pigeons, "	20 " 25c.; 100 " 75c.

(Samples mailed free to intending buyers).

MICA CRYSTAL GRIT

One of the principal reasons why so many persons do not have success in raising poultry, is that the poultry cannot obtain sufficient grit to enable them to masticate their food in a proper manner, and strange to say, this is greatly neglected by a great many. It is necessary to feed some gritty material. There is nothing better than our Grit to supply this want. 20 lbs., 25c.; 100 lbs., \$1.

GRANULATED POULTRY BONE

Is about the size of wheat, and can be fed like any other food in grain, about one handful to every five fowls daily, or every other day. In either manner it furnishes valuable food for poultry at all seasons of the year. 12 lbs., 25c.; 100 lbs., \$1.75.

**"AN EGG FARM"
(Stoddard).**

On the Management of
Poultry (Paper Cover)
50 Cents.

**PRATT'S POULTRY FOOD**

Absolutely pure and free from poisons and all other injurious ingredients.

One ounce of Pratt's Poultry Food equal to two tablespoonfuls. Positively cures and prevents Chicken Cholera, Roup, Gapes, and all diseases of the flock. It regulates the bowels, blood and digestive organs, and produces bone, muscle, feathers and a larger Fowl. Young chicks grow quickly and free from disease. Sickly broods are never seen when Pratt's Poultry Food is used according to directions. Hens lay regularly when Pratt's Poultry Food is fed. Turkeys, Ducks and Geese grow larger, and are healthier, and pigeons flourish on Pratt's Poultry Food.

DIRECTIONS.—For young Chickens, Turkeys, Ducks or Geese, mix one ounce with the feed of fifteen or twenty every other day. Large Chickens, Turkeys, Ducks, or Geese, mix one ounce with the feed of fifteen or twenty every day. Pigeons same as young Chicks. In case of disease double the dose, or should the fowl be unable to eat, make a gruel of Pratt's Poultry Food, and pour it down the throat with a spoon. Per package containing 26 ozs., 25c., or 35c., postpaid.

RUST'S EGG PRODUCER

TRADE (THE HEN PERSUADER) MARK

Makes Hens Lay when Eggs are High Priced.

(Circulars on application).

A scientific combination of substances, which when assimilated by fowls, produce eggs, plumage, growth and

development, exactly as certain foods produce milk in cows, or fertilizers increase crops. It contains in addition valuable tonics and remedial agents which insure perfect assimilation and robust health, without which the best results cannot be attained. It makes hens lay in summer and winter. Lb. pkts., 25c. (by mail, postpaid, 30c.); 2½ lb. box, 50c. (by mail, postpaid, 60c.); 6 lb. box, \$1; 10 lb. box, \$1.50, by express or freight only at purchaser's expense.

RUST'S HAVENS' CONDITION POWDERS

The only positive Preventive and Cure for Gapes and Poultry Cholera, and the best Medicine for Horses, Cattle, Sheep and Hogs.

We warrant Havens' Climax Condition Powders to be free from Antimony, Arsenic, Alum, Resin, Saltpetre and all harmful ingredients, and to be entirely unlike any other preparation. It is not a feed, but an honest medicine at an honest price. Liberal packages, weighing 14 oz., 25c. (by mail, postpaid, 30c.); 5 lb. box (equal to six 25c. packages), \$1, by express or freight.

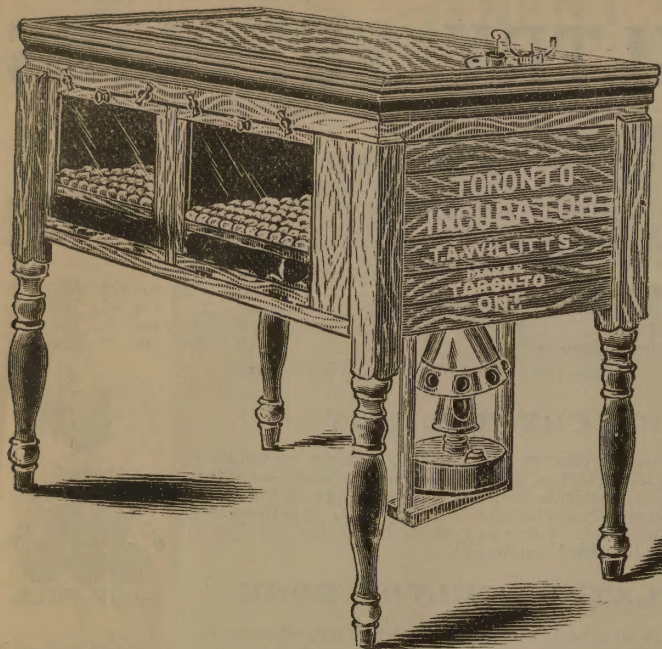

Try it once and you will always use it.

RUST'S HAVENS' ROUP PILLS

These pills act directly on the glands and mucous membrane, allay all tendency to fever, and carry off all morbid matter from the system. They are entirely free from everything harmful, and are believed to be the best remedy ever discovered for Roup, Catarrh, Colds and Distemper. They are unlike any other medicine, and being composed of medicines in concentrated form, they are of moderate size, and are therefore easy to give to fowls. Price, per box of 48 pills, postpaid, 25c.; box of 250 pills for \$1.

Mann's Bone Cutters are the best. Do not be humbugged into buying a cheap machine.

THE TORONTO INCUBATOR

Best machine manufactured for hatching chickens, ducks, turkeys, or geese. No incubator has as good a record in the hands of Canadian customers; we have numerous testimonials of hatches ranging from 90 to 100 per cent. of the fertile eggs. These machines have won two silver medals, a bronze medal, and two diplomas at Toronto Industrial Exhibition, defeating all competitors. Price, 100-egg capacity, \$20; 200-egg capacity, \$30; 300-egg capacity, \$38.

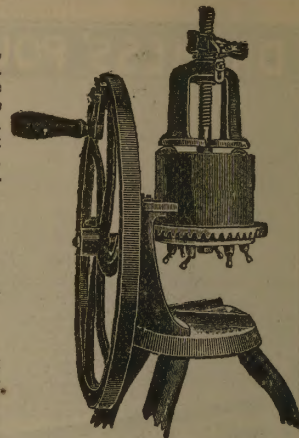

MANN'S BONE CUTTER No. 4

(An outgrowth of, and improvement upon, the old No. 3).

IT IS THE MOST PERFECT BONE CUTTER EVER MADE

It surpasses all others in easy and rapid cutting. It feeds automatically, leaves both hands free to operate, and cannot run hard or clog. The cylinder has been greatly enlarged, and bones do not have to be cut so small as before. The feed screw is larger, with a square, coarse thread which will not break, wear out or crush down. The cutter plate has been enlarged, has six specially improved steel knives in place of three, with a rim to guard the gears, which prevents the bone or meat getting into them and clogging. All parts are strongly built; weight, 100 lbs.

The Automatic Governing Spring Feed is protected by patent, and is found only on Mann's Bone Cutters. The value of this attachment cannot be too highly estimated. It is the only feed ever made that actually controls the power required in turning, so that any and all kinds of bone, either hard or soft, cut equally easy. This No. 4 cuts finer than any machine we ever produced, fine enough for the smallest chicks. Price, with stand, each, \$15; without stand, each, \$12.50.

No. 4.

Instant Louse Killer

**KILLS LICE, TICKS, FLEAS, MOTHS,
ANTS, and all kinds of VERMIN**

A GREAT DEODORIZER & DISINFECTANT

SURE DEATH TO LICE. Probably no single enemy is so universal among stock and poultry as lice. Realizing these facts we have been prompted to formulate our **INSTANT LOUSE KILLER**. It is not a poison, but lasting, effectual, convenient to use, and the cheapest article that can be had. It is put up in round cans, with perforated lids, ready for use.

IT PREVENTS DISEASES. As a **DEODORIZER** and **DISINFECTANT** it is entirely reliable for poultry houses, stables, pigeon lofts, pig pens, sheep stables, sinks, water-closets, vaults, cesspools, garbage boxes, kennels, etc. It serves as an absolute preventive of diseases, and will speedily destroy all parasites that inhabit such places.

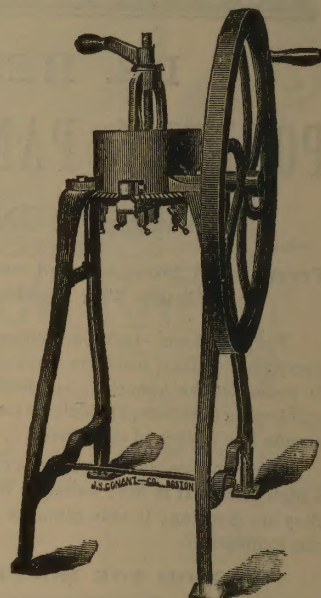

DIPPING OF SHEEP UNNECESSARY. It is especially adapted for the destruction of sheep ticks, a powder and easy to apply, overcoming the great disadvantage of dipping, and can be applied in cold weather when the wool is long and the ticks are most numerous. This Louse Killer is positively guaranteed to give satisfaction, or money refunded.

Price per package, 35c., by mail (postpaid) 40c.

DR. HESS' STOCK FOOD

For Horses, Cattle, Hogs and Sheep.

7 pound sack, 65c. - - - 12 pound sack, \$1.

No. 2.

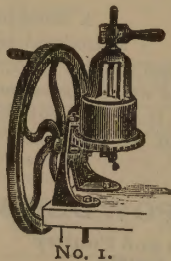

MANN'S STANDARD BONE CUTTER

MANN'S BONE CUTTER

No. 1. Weight, 55 lbs.

Its working parts are similar to Nos. 2 and 6, but of smaller size and capacity. Can be readily attached to a table, bench or stand, and will be found profitable and convenient for cutting bones for poultry, where sixty hens or less are kept.

Price, American make, \$8.50; Canadian make, \$6.50.

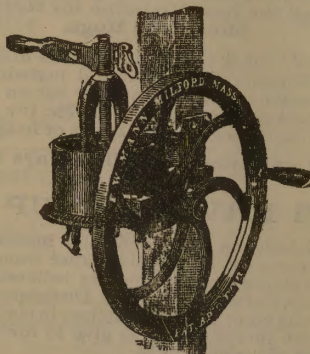

No. 1.

MANN'S POST BONE CUTTER

No. 6. Weight, 98 lbs. (See Fig. No. 6).

This machine is fully perfected, and its working parts are the same in size and form as the Standard No. 2. They have been made stronger so many times that they cannot break, and with proper care will last a lifetime.

Price, each, \$17.50.

No. 6.

MANN'S STANDARD BONE CUTTER

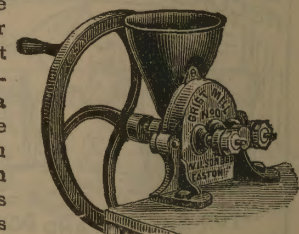

No. 2. Weight, 142 lbs. (See Fig. No. 2).

Capacity 1/2 lb. to 1 lb. per minute. The cut represents the latest improved hand machine. We recommend this size and style for all who have a limited number of fowl, believing it to be the simplest and most economical machine that can be made for converting green bones, with the meat and gristle attached, into poultry food. The knives are made of the finest tool steel, and can be easily removed and sharpened when necessary. This machine is fitted with automatic feed handle. Price, each, \$21.

FAMILY GRIST MILL No. 0

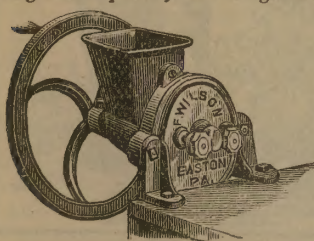

This Mill is specially made for grinding Graham Flour or Corn-meal for table use. It can also be adjusted for cracking the grain if desired. It is a valuable machine to have in the kitchen, as you can have fresh Graham or Corn-meal when wanted. The grinding surfaces are very hard, made for this purpose. Weight, 30 lbs.

Price, without legs, \$6; with legs, \$8. Circulars for larger on application.

WILSON'S LITTLE GIANT MILL

This mill is specially adapted for grinding dry bones, shells or grain for poultry. It will grind the whole jaw-bone of a horse in three minutes; the leg-bone of a beef, eight inches long and two inches in diameter, by being once split lengthwise, in two minutes, if bones are perfectly dry. It will crack a peck of corn in twenty minutes. If it is desired to grind corn fine run through twice.

Price, without legs, \$6; with legs, \$8.

Little Giant Hand.... Broadcast Seed Sower

This machine does perfect work in the easiest and simplest manner. It is strong and light, weighs 3 lbs. It will distribute to the round—wheat, 50 feet; flax seed, clover and oats, 36 feet; timothy, 27 feet—and will sow 20 acres per day. We highly recommend this labor saving machine, and are sure they will prove entirely satisfactory.

Price, Fiddle Bow, per mail, postpaid. \$2.50; Cranks, by mail, \$3.00.

POTATO EYE CUTTER

Practical Potato Grower, given with each cutter. Price, 30c., by mail, postpaid.

Flower Pot Brackets

Highly painted and ornamented. For attaching to the sides of windows, walls, etc. When filled with ornamental pots of nicely grown plants, the effect is charming. 2-cup brackets, \$1.25 each; 5-cup brackets, \$2 each. Cannot be sent by mail.

The Lightning Potato Eye Cutter

Does the work many times faster and is more accurate than the knife. No matter how small crop you intend to plant, you should use this cutter. Full directions "How to Plant Potatoes Cut to One Eye," and valuable points in Potato Culture "By a

CRANK SEEDER

FIDDLE BOW SEEDER

ROSE AND RUBBER VALVE

KNAPSACK SPRAYER

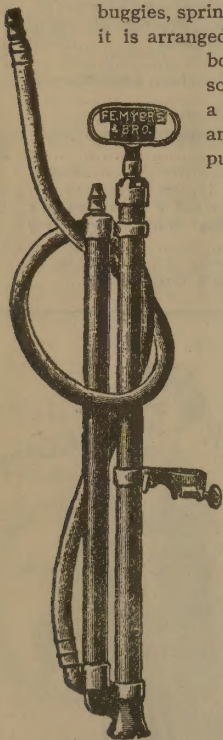

Made of the best galvanized tin; will not rust, and is just what is required for ordinary use, being efficient and reasonable in price. The straps are adjustable, and it has an agitator, easily worked with left hand for stirring mixture. No waste whatever. Less water, less poison, less labor, for every drop tells, and is put just where you want it. It is the most economical and perfect working apparatus in the market, and we can confidently recommend it to our customers. Each, \$3.75.

ROSE and RUBBER VALVE

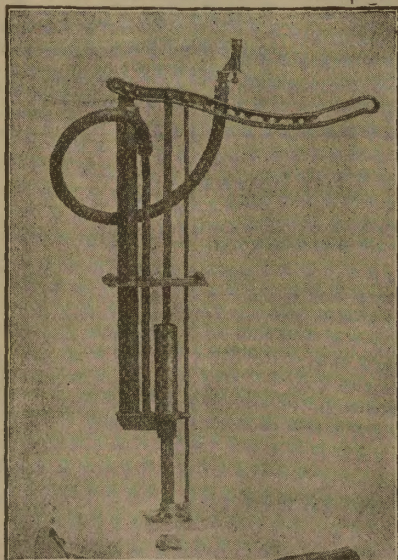

For long distances, when the expressage on the above Pail Sprayers would cost too much, we can furnish our Rose with valve and bulb, with 3 feet of $\frac{1}{4}$ -inch tubing, with connection, exactly as shown in cut, ready to attach to any pail. Price, each, \$1.25; by mail, \$1.35.

BUCKET BRASS SPRAY PUMP

The spray pump is constructed entirely of brass, a material that is not affected by the poisonous arsenics used in different formulas for spraying fruit trees, vines and shrubbery. It is so arranged that the labor of pumping is all done on the downward stroke of the piston and nothing on the up. The operator is enabled to keep a constant pressure on the nozzle of from 50 to 100 lbs. with but very ordinary exertion. It will throw a solid stream 50 ft., and is of unusual value for washing windows, buggies, sprinkling lawns, flowers, etc. For spraying it is arranged so as to discharge a fine jet in the bottom of the bucket and keep the solution thoroughly mixed and agitated, a feature peculiar to this pump only, and a very necessary feature to a spray pump. Price, each, \$3.50.

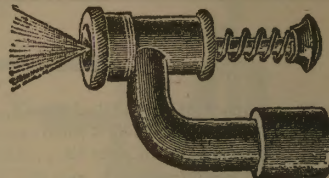

BUCKET SPRAY PUMP

THE SPRAMOTOR JR.

SPRAYING NOZZLES

Gould's Improved Vermorel. The special requirements of a Spray Nozzle are as follows: 1, Fineness of spray; 2, Durability; 3, Simplicity of construction; 4, Adaptability to various kinds of work; 5, Cheapness. **Gould's Vermorel Nozzle** fills all these requirements. There is nothing to wear out but the pins and caps, which are easily replaced. It is simple in construction, and can be used for anything from a thick paste to the thinnest liquid. The difficulty with most Nozzles is that they do not throw a real spray, which is absolutely indispensable in order to do work well and economically. We can confidently recommend this as a good article at a fair price. Each, 75c.

VERMOREL NOZZLE

McGowan Nozzle. These Nozzles are the result of several years' experimental work in the construction of one which would be free from defects. In spraying an apple orchard it was found that one of the worst features of spraying nozzles is their liability to clog, unless the liquid thrown is more carefully strained than is practicable in field work. In addition to this, nozzles which throw a fine spray do not concentrate sufficiently upon a given point, but cover too much area, wasting much liquid. Nor is the spray thrown with sufficient force to reach all parts of trees of bearing size, or even smaller ones, unless the nozzle is fastened at the end of a pole, as is so commonly done. Now all these difficulties are overcome in the McGowan, and there is no exaggeration in saying that the nozzles here described will save no end of time, patience and money to the fruit growers who avail themselves of their advantages. The Cornell Experiment Station has used these nozzles exclusively during the past two years, and it is largely due to the fact that the earlier forms were improved under the direction of the Station that the present perfection has been attained. These nozzles are the most practicable, most efficient, and the best constructed of any made. They are not cheap affairs made to sell, but are built for service, and are of fine workmanship. Price, \$1.25 each.

OUTFIT F.

THE SPRAMOTOR Jr.

The Spramotor Jr. is a brass spraying and painting machine which is intended to fill the requirements and supply the demand for a good, durable and serviceable machine that will do the necessary spraying in small places, and also one that can be used for pail or barrel. It has been thoroughly tested and warranted the same as all the Spramotor goods.

The strainer is brass and can be taken apart without tools. The agitator is mechanical, being made in brass and operating around the suction tube and actuated from the handle, admits of it being used independently of the pump, a vital feature. The valves are of bronze metal, and are controlled by patent detachable bronze metal seat and cage combined. The plunger is the latest patent and is a revelation. It can be repacked in a moment without the use of tools and at no cost. It is automatic, using up all the packing, and is frictionless. The whole pump is brass, except the air chamber and handle. The mechanical construction of the entire outfit is strictly high grade and up-to-date, giving the greatest durability at the lowest possible price.

Price, complete with $2\frac{1}{2}$ ft. of heavy hose and Spramotor or Vermorel Nozzle, \$6; five gallon extra heavy galvanized can, extra, \$1.50.

THE SPRAMOTOR PUMP

We offer to our customers this year the best spraying and planting apparatus yet manufactured. This is the pump awarded first place at the Government Spraying Contest, and is in every way a genuine appliance, having been thoroughly tested. This year new improvements have been added without advance in price. It is made in two sizes, No. 1, for one, two or three nozzles, and No. 2 for two to eight nozzles, as desired. The valves and plunger are especially well constructed, being practically indestructible. The plunger, tubing and air chamber are made from heavy seamless drawn brass; the valves are of bronze metal with patent detachable seat and cage combined. The plunger is automatically compensating, and can be repacked in a moment at practically no cost. It has been tested to 500 lbs. pressure in actual work without leaking, and yet is frictionless. It has been a revelation to users. The agitator is a mechanical dasher operating around the suction tube from the handle of the pump, is independent, and can be used before commencing spraying or whitewashing, a great advantage. The Spramotor is all brass except the suction tube and the agitator, which are only made in brass when so ordered. Price, No. 1, Spramotor, arranged for one line of hose, \$9; No. 2, Spramotor, for two lines of hose, \$12. Accessories extra.

SPRAMOTOR Jr. OUTFIT F.

This outfit is complete in every respect, and with it any kind of work can be done that can be accomplished with one nozzle. When attached to our patent five gallon can, it is a most portable device; can be carried about by one hand or by means of the handles provided. The can has a raised bottom and heavy flanged rim, on which the can rests. Our patent catches allow the lid to be instantly removed, as shown in outfit D. It effectually prevents any splashing, and a lady can use the apparatus at any class of work or with any kind of mixture and not soil her dress. They can be re-filled (without removing the Spramotor), through the hand-hole provided with cover for that purpose. As all the work of pumping is done on the down stroke, there is no tendency to lift the can in raising the handle of the pump. The stroke of Spramotor Jr. is four inches, and the diameter of plunger is $1\frac{3}{4}$ inches, and a vapor spray can be developed easily with two nozzles. One operator is all that is required to properly use it. Price, complete, including can and bamboo rod, \$10.80.

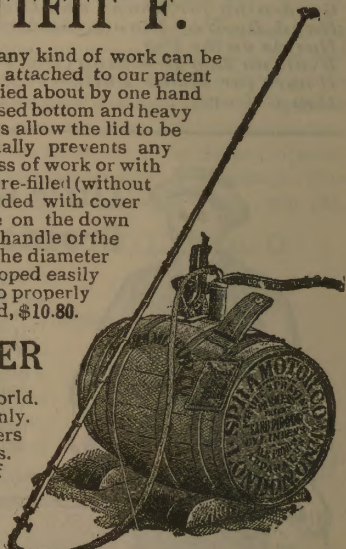

ATOMIZER AND SPRINKLER

Spray appears like fog. Best clothes sprinkler in the world.

own merits. 40c. each, postpaid.

Sprinkles so evenly. Excellent for flowers and house plants. Moistens them as if by a fog. Fills instantly. Uses impossible to describe. Sells on its own merits. 40c. each, postpaid.

THE SPRAMOTOR PUMP

See our list of Small Fruits, Pages 70, 71, 72 and 73.

INSECTICIDES

- Tobacco Soap.**—Makes an excellent wash for plants and trees infested with insects, and is particularly effective in killing green and black fly aphides, turnip and cabbage fleas, rose slugs and bark lice. Dissolve 2 oz. in a gallon of water, apply with spraying pump, etc., or dipping plants into solution. Per pkg., 25c.; by mail, 30c.
- Fir Tree Oil.**—Soluble insecticide, effectually destroying all kinds of pests to which plants are subject. Equally effective on animals, and is harmless to the skin and hands when used as a wash. Full directions with each bottle. Cannot be mailed. Per bottle, 4 sizes, 25c., 50c., 75c. and \$3.
- Mealy Bug Destroyer.**—A safe preparation for the complete eradication of the bug, scale, and other insects on plants and trees. Cannot be mailed. Per bottle, 40c.
- Whale Oil Soap.**—One of the most effective and cheapest remedies to destroy slugs, worms and other insects on trees, shrubs, garden and house plants. One pound of soap to seven gallons of water is used for applying to foliage. Use two ounces to one gallon of water for spraying rose bushes, etc. Lb., 25c.; 5 lbs. for \$1; 10 mail, add 5c. per lb.
- Peroxide of Silicate.**—The farmer's and gardener's best friend, and a sure protection against the ravages of all insect pests. It kills the Colorado Beetle or Potato Bug, the Cabbage Worm, etc., etc. Price, per lb., 20c., post paid.
- Little's Antipest.**—This invaluable preparation may be freely used in conservatories, greenhouses and in the garden. It is non-poisonous and harmless to vegetation when diluted according to the accompanying directions. Gardeners will find this a simple, hardy and cheap remedy against the attacks of insect pests. It mixes instantly with cold water in all preparations. Price, ½ pint bottles, 50c.; 1 pint bottles, 75c. Cannot be mailed.
- Gardener's Insecticide.**—This fluid destroys all insect pests on plants and trees, and prevents blight and mildew. Cannot be mailed. Price, per bottle, \$1.25.
- Hammond's Thrip Juice.** This fluid is death to Mealy Bugs and all kinds of scale insects, which infest rose bushes, etc. It is highly recommended. Price, ½ pint can, 30c.; pint, 50c.; quart, 75c.; gallon, \$1.75. Cannot be mailed.
- Persian Insect Powder.**—For destroying Roaches, Ants, Fleas, and all other noxious insects. Per lb., 65c., post paid.
- Gishurst's Compound.**—For destroying Green Fly, Mealy Bug, Thrip, Mildew, etc. Per pkt., 50c., post paid.
- Slug Shot.**—For destroying Potato Bugs and those on Tomato and Egg Plants, Currant Worms, Cabbage Lice and Worms, Beetles, Striped Bugs on Melons, Squashes, Turnips, Beets, Canker Worms and Caterpillars on Fruit and Ornamental Trees, Rose Bugs, Cut Worms, etc. Price, 5 and 10 lb. pkgs., 6c. per lb.; by mail, 10c. post paid.
- Flower of Sulphur.**—For the prevention and destruction of mildew on plants, blow it over and through the foliage when the dew is on or after a thorough syringing. Price, per lb., 15c.; 12 lbs., \$1, by express or freight at purchaser's expense.

USEFUL FORMULÆ FOR SPRAYING

PLANT.	FIRST APPLICATION	SECOND APPLICATION.	THIRD APPLICATION.	FOURTH APPLICATION.
Apple	When buds are swelling, Bordeaux mixture and Paris Green.	Just before blossoms open, Bordeaux and Paris Green.	When blossoms have fallen, Bordeaux and Paris Green.	8-12 days later, Bordeaux and Paris Green. Repeat 14 days later if necessary.
Cherry	As buds are breaking, Bordeaux; when aphids appears, Kerosene emulsion.	When fruit has set, Bordeaux and Paris Green.	10-15 days, Bordeaux and Paris Green.	
Current	At first sign of worms or mildew, Bordeaux and Paris Green.	10-15 days later, Bordeaux and Paris Green.	If worms persist, Hellebore or Paris Green	10-14 days repeat if necessary.
Gooseberry.....				
Grape	When leaves are one inch in diameter, Bordeaux mixture and Paris Green.	When flowers have fallen, Bordeaux and Paris Green.	Bordeaux mixture at intervals of 10-15 days.	
Peach, Nectarine	Before the flower buds open, Bordeaux mixture.	As soon as petals have fallen, Bordeaux mixture and Paris Green.	When fruit is grown, Bordeaux and Paris Green.	10-15 days later, Bordeaux.
Pear.....	Same treatment as Apple.			
Plum	Same treatment as Pear.		10-14 days later, Bordeaux.	10-20 days later, Bordeaux.
Potato.....	When beetles first appear, Paris Green, 1 lb. to 100 gallons of water.	When vines are grown, Bordeaux and Paris Green, at intervals of 10-15 days if necessary.		

BORDEAUX MIXTURE

Copper sulphate.....	4 pounds
Lime (fresh).....	4 "
Water.....	40 gallons

Bordeaux Mixture is made by dissolving six pounds of copper sulphate in say five gallons of hot water. Take four pounds of fresh caustic lime, adding water enough to make a thin white-wash; fasten a piece of coarse sacking over the barrel containing the solution of blue-stone, and strain the thin white-wash into it. When this is done add enough water to bring the whole up to forty gallons. The cost of this will not exceed one and a half cents per gallon. It is necessary to add the lime in order to prevent the copper sulphate from injuring the foliage. In order to kill the apple worms before they have time to eat their way into the apples it is necessary to add Paris green to poison the worms. The proportion that is advised is at the rate of one pound of Paris green to two hundred gallons of water. This would require six and two-fifths ounces of Paris green to be added to the forty gallons of Bordeaux mixture. Six ounces, however, will be found to be sufficient. By thus combining the poisonous Paris green with the copper sulphate, we are able to kill two birds with one stone: to prevent the fungus from making the apple scabby and the young worms of the codling moth from spoiling the fruit.

AMMONIACAL COPPER CARBONATE

Copper carbonate.....	1 ounce
Ammonia.....	enough to dissolve the copper
Water	10 gallons

The copper carbonate is best dissolved in large bottles, where it will keep indefinitely, and it should be diluted with water as required. For same purpose as Bordeaux.

HELLEBORE

Fresh white Hellebore.....	1 ounce
Water	3 gallons

Apply when thoroughly mixed. For insects which chew.

KEROSENE EMULSION

Hard soap.....	½ pound
Boiling water (soft)	1 gallon
Kerosene	2 gallons

Dissolve the soap in the water, add the kerosene, and churn with a pump for 5-10 minutes. Dilute ten times before applying. For insects which suck, cabbage worms, and all insects which have soft bodies.

PYRETHRUM

Pyrethrum powder (fresh).....	1 ounce
Water.....	4 gallons

Apply when thoroughly mixed.

PARIS GREEN

Paris green.....	1 pound
Water	250 gallons

If this mixture is to be used upon peach trees, 1 pound quicklime should be added. Repeated applications will injure most foliage, unless lime is added. Paris green and Bordeaux can be applied together with perfect safety. The action of neither is weakened, and the Paris green loses all caustic properties. For insects which chew.

EARTHENWARE FLOWER POTS AND HANGING BASKETS

The measurement is from inside to outside. Packing charges extra when ordered. Pots are carefully packed, but we do not assume any risk of Breakage.

CHAMPION LAWN MOWER SHARPENER

Cut showing position of hands and Sharpener in use. Read directions for using and notice cut

Place Mower inverted (or shear plate up) on a box or anything so the knives may be revolved freely. Place the Sharpener on the shear plate (as per cut) so the emery comes in front and the edge of emery rests against the edge of shear plate. Revolve the knives rapidly forward, at the same time tipping the Sharpener forward until the knives and emery come in contact lightly, producing the exact effect of an emery wheel. Move the Sharpener back and forth on shear plate touching all parts of knives. When placed in position it becomes a lathe in action, grinding each knife alike or perfectly true, giving a shear level to each knife. The Sharpener has been tried upon every make of mowers, and as yet has not failed to do the work satisfactorily. Will last about ten years. Thumb screws are for adjusting the emery to the different thicknesses of shear plates, and also as the emery wears away should be even with lower edge of plate. A little practice and

no especial skill is required to produce the very best of results. All or nearly all mowers are now provided with hole in wheel and crank (or tip on end of wrench) for operating this Sharpener. Price, each, \$1, by mail (postpaid).

THE DOOLITTLE PATENT HOSE COUPLER

DESCRIPTION.—Nos. 1 and 2 for new Hose to connect two lengths of Hose, and with No. 3 placed on tap, which has the same working part as No. 2, makes a complete outfit for new hose. Price, ½ in. or ¾ in.; No. 1, each, 20c.; No. 2, 15c.; by mail, 5c. extra.

No. 3 is for the tap. It has two bars cast on its sides to make a wrench seat to screw on with. Put in a washer and screw one on each tap and leave it there permanently. Prices, ½ in. or ¾ in., each, 15c.; by mail, 5c. extra.

No. 4 is for screwing into nozzle where it stays, so as to make the connection to No. 2 outer end of hose. It is also used to put in Hydrant end of Hose, where Hose is already fitted up with the old screw coupler along with No. 3 screwed on at the other end, which has the ordinary screw coupler. Price, ½ in. or ¾ in., each, 20c.; by mail, 5c. extra.

Nos. 3 and 4 will give the use of the Doolittle Couplers, where people have hose in use, fitted with the old screw couplers, without removing them, thus giving the use of those handy couplers at once without upset or disturbance. Anyone can apply them with an ordinary wrench.

STANDARD THERMOMETERS—Warranted Correct

STANDARD GRADE "Air Scale"

Made with seasoned tubes, graduated in single degrees, tubes mounted by clasps on heavy metal, very accurate. No. 105—8-inch Thermometers, each, 80c.; 10-inch, \$1.05; 12-inch, \$1.20, postpaid.

HOUSEHOLD THERMOMETERS—STANDARD GRADE

Standard Grade Household Thermometers are made with thoroughly seasoned and carefully tested extra heavy tubes, mounted with screw clasps, the scales are of heavy metal, finely finished.

No. 613—8-inch Thermometer, round bulbs, polished antique oak or ebonized cases. Price, each, \$1.10; 10-inch, \$1.30, postpaid.

SELF REGISTERING THERMOMETERS

No. 161—12-inch Standard Maximum and Minimum Registering tubes mounted together on same plate, oak back. Price, each, \$3.75, postpaid.

Registering (No. 1). Specially made for Greenhouse use. Each, \$3.

INCUBATING THERMOMETERS—STANDARD GRADE

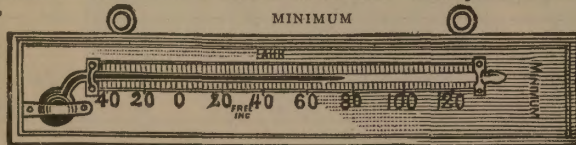

Thermometers for this purpose should have thoroughly seasoned tubes and be specially tested. No ordinary Thermometer will answer the purpose.

No. 247—6-inch Flanged Metal Scale, specially tested and very accurate. Price, each, 55c. postpaid.

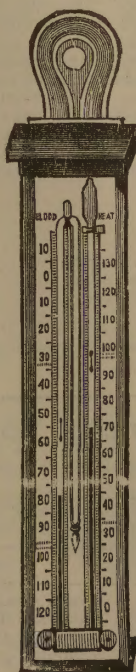

HOT-BED THERMOMETERS

No. 663—10-inch Thermometer, in round turned wood case with pointed brass bottom. Each, \$1, postpaid.

No. 355—Imported German, all glass, for propagating beds and hot-beds, valuable for dairy work. Each, 25c.

Minimum, on boxwood cabinet. Each, 75c.

No. 1

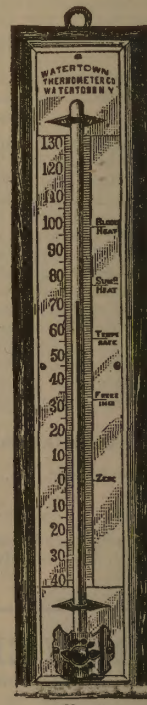

No. 247.

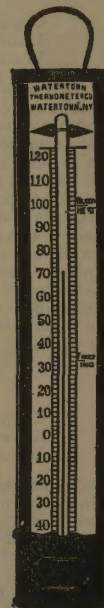

No. 663.

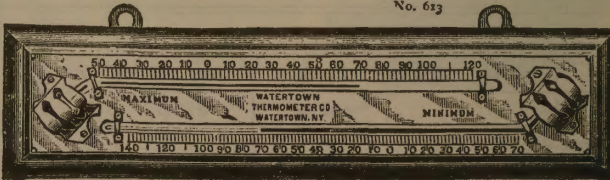

No. 355.

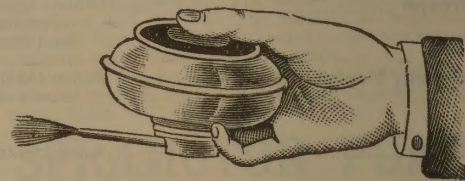

No. 613

No. 105.

No. 161.

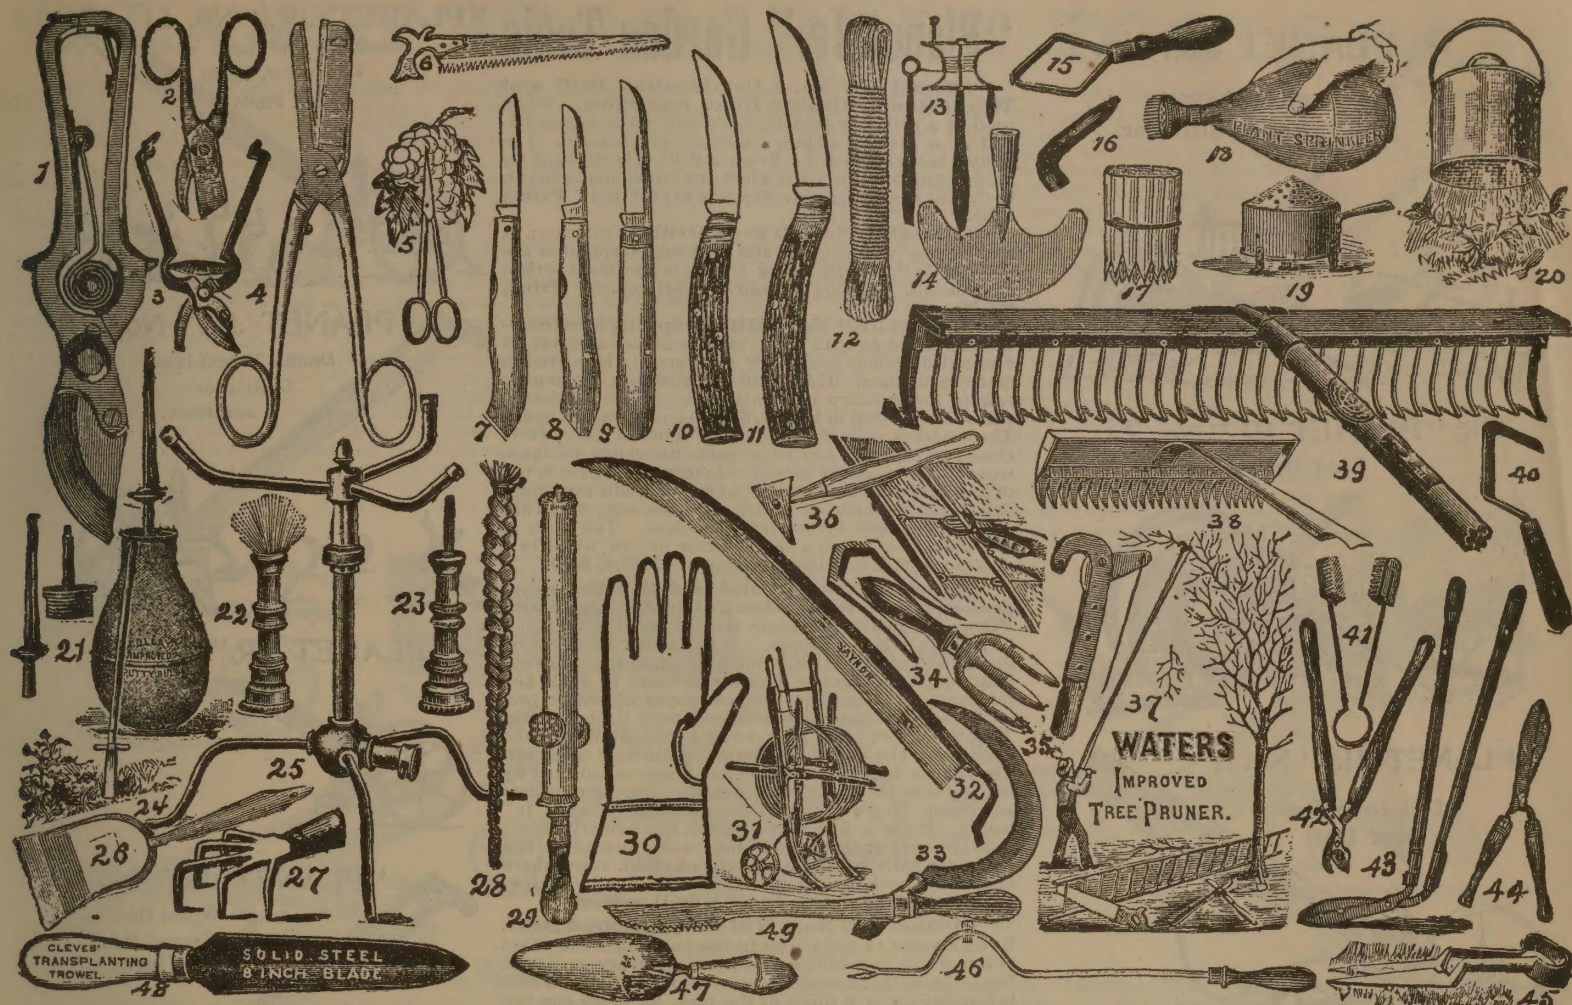

POWDER GUN FOR INSECTICIDES

Large size, 50 cents. Small size, 25 cents.

FLOWER STANDS

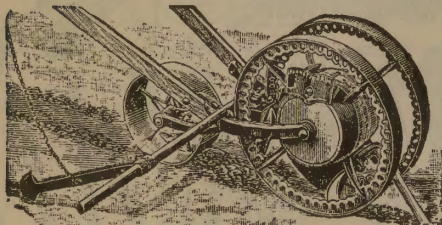

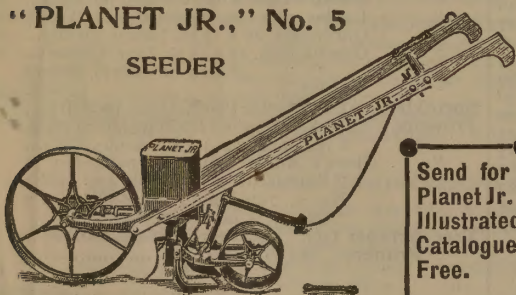

These we carry in stock of various sizes, 36 inches in width, 6 feet 3 inches high. Price, \$5 each. 42 inches in width, 6 feet 3 inches high. Price, \$5.50. The style shown is half round.

NOTE.—The figures in parenthesis, thus (1), denote the number of cut on the above.

PLANET JR. No. 1**Combined Drill
and Cultivator****The "PLANET JR." No. 2
Seed Drill****"PLANET JR." No. 3****Hill Dropping
Seed Drill****The "PLANET JR." No. 4****Combined Hill Dropping Seeder
and Single Wheel Hoe****"PLANET JR.," No. 5****SEEDER****The "PLANET JR."****No. 6****FERTILIZER AND
PEA DRILL.****"Planet Jr." Garden Tools**

"Planet Jr." No. 1 Combination Drill and Wheel Hoe Cultivator, Rake and Plow.—When used as a drill the seed is sown with great regularity, and at a uniform depth, regulated at pleasure. The hopper holds one quart. From a drill it is changed by unscrewing but two bolts, when any attachments shown in the cut can be quickly made ready for use. Price, \$10.

"Planet Jr." No. 2 Seed Drill.—THIS TOOL IS KNOWN THE WORLD OVER, and with the exception of the "Planet Jr." Hill Dropping Drills, is the most perfect drill known. It holds two and one half quarts. Price, \$7.50.

"Planet Jr." No. 3 Hill Dropping Seeder.—SOWS EITHER IN HILLS OR IN CONTINUOUS ROWS. A fine hill dropping seeder for 1899, greatly improved in many particulars. This Drill will sow in a continuous row, in the ordinary way, with the greatest regularity, and will also drop in hills, 4, 6, 8, 12 and 24 inches apart. The wheel is 15 inches high with a broad face. It is CHANGED IN A MOMENT FROM HILL DROPPING TO DRILL WORK. Sows equally as well whether the hopper is full or contains ONLY A PAPER OF SEED, and will not injure delicate seeds, such as radish, cabbage, etc., which are so often crushed by imperfect seeders. The plow is adjustable, and opens a very narrow furrow, which is a great advantage for after cultivation. Price, \$10.

Planet Jr." No. 4, Combined Hill Dropping Seeder, Single Wheel Hoe Cultivator, Rake and Plow. Exactly the same style of Seeder as No. 3 "Planet Jr." Hill Dropper. It is smaller in capacity, though still of good size, holding two quarts. It drops in hills, 4, 6, 8, 12 and 24 inches apart, and in drills any thickness, handling the smallest paper of seeds perfectly, and is simple, durable and very light running. THROWS OUT OF GEAR INSTANTLY by simply raising the handles. The index is accurate, plain and easily set. The Drill is detached, and the tool frame substituted by moving one bolt. It then becomes one of the most admirable Single Wheel Hoes of the "Planet Jr." family. It has a fine garden plow, two new style hoes, PERFECT SHAPE; three cultivating rakes, NEW FORM, and made specially to fit 6, 9, 12, 14 and 16 in. rows, three cultivator teeth and a practical leaf guard. Price, complete, \$11. No. 4a as a drill only, \$8.

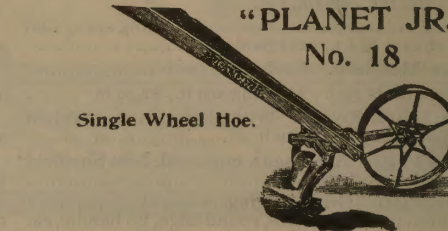

"Planet Jr." No. 5 Hill Dropping Seed Drill. SOWS EITHER IN HILLS OR IN CONTINUOUS ROW. This new tool will be a delightful surprise to every gardener. We all know that a seed sower that does not drop in hills is fast becoming a thing of the past, for there are few who do not wish to plant beans, spinach and salsify, carrots and turnips, parsnips and beets, in hills. Why? Because all crops that are to be grown from seed and thinned to a regular stand should be planted in hills at just the distance apart the plants are desired; for in drilling, unless the seed is sown unnecessarily thick, there will not always be a plant at the proper spot, and the crop is therefore irregular. The new No. 5 "Planet Jr." drops at 4, 6, 8, 12 and 24 inches apart, and also in a continuous row, without injury to the seed, and can be changed from hill to drill instantly, or from one distance to another very quickly. Its capacity is four quarts. It has a 16½ inch wheel, with broad face, is very light running, is large, yet will sow a single paper of seed perfectly, or drop it accurately in hills. In a word, no seeder has ever been made that equals this newly perfected "Planet Jr." No. 5. Price, \$13.50.

"Planet Jr." No. 6 Fertilizer, Pea and Bean Drill. It has a 20-in. carrying wheel, with a 2-in. face, a large wheel because it carries a large load, half a bushel of seed or fertilizer. These it sows in the furrow in a most admirable and regular manner at the thickness wanted, and without clogging or trouble of any kind. The feed rod is used to throw in or out of gear. It is thoroughly galvanized, is extremely simple and durable, perfectly easy to understand and very light running. Price, \$13.50.

"Planet Jr." No. 7 Double Wheel Hill Dropping and Fertilizing Drill. To meet the pressing demand for a drill which will sow seed and fertilizers both at the same time, this combined machine is made. In addition to planting all garden seeds in rows and in hills, 4, 6, 8, 12 or 24 inches apart, it also sows the fertilizer at the same operation, and with the same regularity and economy. The seed hopper holds two quarts and the fertilizer hopper four quarts. Price, \$18.50.

"Planet Jr." No. 11 Double Wheel Hoe, Cultivator, Rake and Plow. This tool combines in itself the good points of its predecessors with valuable new ideas. It has 11 in. wheels, which can be set at four different distances apart; the frame is malleable, with ample room for tool adjustment, and can be set at three different heights. The handles are adjustable, and being attached to the arch are entirely undisturbed in making changes of the height of frame, width of wheels, or in the adjustment of the tools themselves. The arch is of stiff steel, unusually high. The design of the frame allows all changes of tools to be made without removal of the nuts from the standards. A pair of model rakes and a pair of new style hoes are added to the usual equipment—seven pairs of tools in all. The whole set shown in the cut goes with the complete tool. The variety of work possible with this machine, covers the whole range of wheel hoe work, both on farm and garden. Price, \$9.

"PLANET JR." GARDEN TOOLS FOR 1899

The "Planet Jr." No. 12, Double Wheel Hoe, Cultivator and Plow. This tool is identical with No. 11, except that it has a less complete equipment, as shown in the cut, but at a correspondingly less price. The set of tools with No. 12 is what gardeners need most, and the rest can be added as wanted. Price, \$6.75.

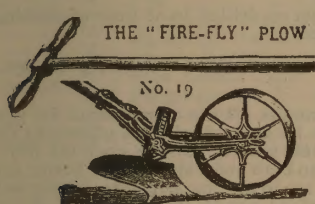

The "Planet Jr." No. 13, Double Wheel Hoe. This tool is the No. 11 with 6-inch hoes only, this pair of tools being most generally useful at all seasons. Any or all of the No. 11 tools may be added at any time, and are sure to fit. Price, \$4.50.

"Planet Jr." No. 15, Single Wheel Hoe, Cultivator, Rake and Plow. This latest and best Single Wheel Hoe, improved for 1899, has an 11-inch wheel, with broad face, and a conveniently arranged and a very full set of tools, several of them being of new, special design, such as have been found to perform Wheel Hoe work in the very best manner. It is very light and strong and easy running; has three more tools than the old Planet Jr., and does a much greater variety of work and does it better. Has adjustable handles and frame, especially adapted for quick changing of teeth. It is a most perfect Wheel Hoe for market gardeners or for private places. The tools are: a well-shaped plow for plowing, marking out, covering and late cultivation; a pair of neat 4-inch shield hoes, just right for hoeing in rows from 9 to 12 inches; and a large pair for wider work, and three cultivator teeth. Also a set of three rakes, just right for 6, 9, 12 and up to 16-inch rows, with two arranged side by side. The rakes are just the thing for preparing ground for the Seed Drill. A practical leaf guard completes the equipment. The frame changes in height, and the wheel to the other side of the frame, when both sides of the row can be hoed at one passage. Price, \$6.75.

The "Planet Jr." No. 20 Grass Edger. Most convenient and perfect for trimming the edges of walks and drives. It will trim straight or curved edges as fast as the operator can walk, and should be the companion of the lawn mower. Strawberry growers will find the Grass Edger, with the hoe removed, a rapid and perfect tool for cutting off surplus runners. Price, \$6.25.

The "Planet Jr." No. 6 Horse Hoe. Probably no other cultivating machine is so widely known as the "Planet Jr." Combined Horse Hoe and Cultivator, for it is in use throughout the civilized world and gives the highest satisfaction everywhere. It has the high frame, patent hollow steel standards, patent lever Star wheel and lever expander, and is the best horse hoe known, except the No. 8. Price, \$9.

The "Planet Jr." No. 8 Horse Hoe. It is so strongly built as to withstand incredible strain, yet it is light and easy to handle. For 1899 we offer important improvements in the No. 8 "Planet Jr." Horse Hoe and Cultivator, as described below: **The Frame** is longer than usual and about one-and-a-half inches higher, making a tool that will not clog easily. **The Standards** are formed up hollow with round throats of stiff steel; they polish quickly and free themselves readily from obstructions, and they clasp the frame and strengthen it. **The Depth** is under perfect control by means of a new lever wheel and the new patented depth regulator, which are moved instantly in unison by a single lever, making exact work, steadying the machine and relieving the operator. **The Expander**—This is an entirely new pattern, superior to all other forms; exceedingly strong, simple, accurate and positive in all positions. **Handle and Braces**—These are also absolutely new and the most effective and stiffest combination known, at once making the tool rigid, yet

THE "FIRE-FLY" PLOW

No. 19

THE "PLANET JR." GRASS EDGER

No. 20

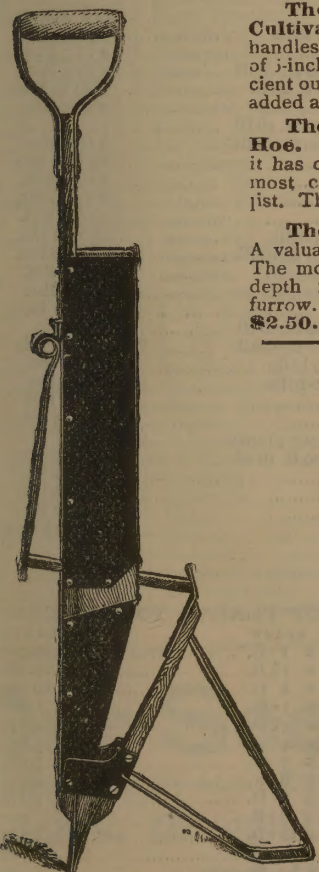

THE "PLANET JR." No. 6 HORSE HOE AND CULTIVATOR

The "Planet Jr." No. 16 Single Wheel Hoe, Cultivator, Rake and Plow. This Wheel Hoe is identical with No. 15, except that it has fewer tools, but the price is proportionately lower, and the remaining tools may all be added as wanted. Price, \$5.75.

The "Planet Jr." No. 17, Single Wheel Hoe, Cultivator and Plow. This also has the same frame, handles, etc., as No. 15, but is supplied only with a pair of 5-inch hoes, a set of cultivator teeth and a plow, a sufficient outfit for most gardening work. The others can be added at any time. Price, \$4.50.

The "Planet Jr." No. 18, Single Wheel Hoe. With the same frame and handles as No. 15; it has one pair of 6-inch hoes only, but they are the most constantly useful through the season of all the lot. The remainder you buy as wanted. Price, \$3.50.

The "Fire-Fly" No. 19 Wheel Garden Plow. A valuable tool for those who have a small garden. The mould-board is tempered and polished steel; the depth is perfectly regulated and turns a complete furrow. The price is within the reach of all. Price, \$2.50.

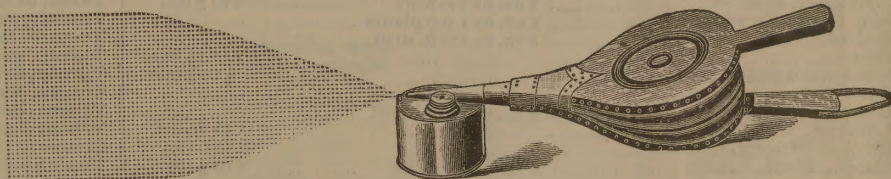

THE PARAGON CORN PLANTER

THE PARAGON CORN PLANTER

The Paragon is the cheapest and best corn planter on earth. It will pay you to buy one. As a labor saver in a corn planter it stands unrivalled. The working parts are simple and durable. It has been used for a number of years and has given the best possible satisfaction.

DIRECTIONS.—To regulate the number of grains to be dropped in each hill, remove the slide that passes through the planter and you will see a piece of brass that is held by a small screw, by loosening this you can set for any number you wish. After regulating try it on the floor. The planter is used as a walking stick with the automatic foot forward, and as the man steps ahead it will strip the planter. Price, \$1.25 each.

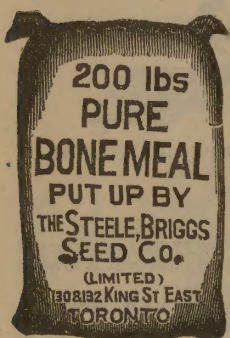

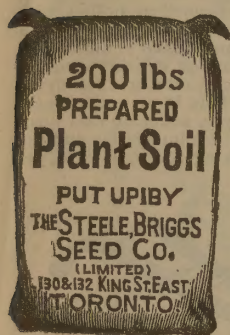

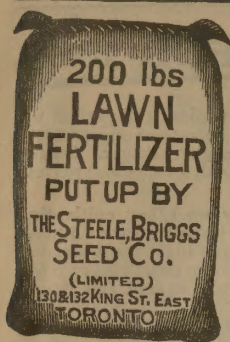

EXCELSIOR BELLOWS SPRAYER

This is without doubt the best and cheapest instrument on the market for spraying cattle, sheep, pigs, poultry houses, small fruits, house plants, etc. It throws a spray as fine as mist, rendering the use of strong solutions perfectly safe, and uses half the quantity a syringe does. You can spray sideways, upward or downward as occasion may demand. It is one of the best sprayers for putting on Paris Green ever known, and for spraying house plants it has no equal. Price, large size, \$1.50; small size, 75c. An attachment for blowing powder, such as Hellebore, etc., on small fruits, can be had for 25c. extra.

THE AUTOMATIC LAWN RAKE

The only Rake in the market that will clear itself from grass without any annoyance to the operator. It is light and easily handled. A backward motion of the Rake from the operator will clean all the teeth at once, thus avoiding the disagreeable task of cleaning the teeth with the fingers, as is the case with all other lawn rakes. The teeth are made of the best hickory, that will not tear up the sod as most rakes do. It has been thoroughly tested, and is, without doubt, the best Lawn Rake made. The Rake is elegantly finished, and presents a very attractive appearance. 20 inches, each, 90c.; 24 inches, each, \$1.

FERTILIZERS

USED BY PRUDENT GROWERS BECAUSE IT PAYS

Albert's Concentrated Soluble Horticultural Manure

A.G. BRAND

Brings Flowers to Their Fullest Development in the Shortest Time

Do not put the Manure, dry or dissolved, on the leaves, and do not overdose, as plant roots take it up very greedily, and if overfed suffer from the results of overfeeding.

FOR POT PLANTS. For all pot plants, this concentrated manure is unsurpassed. It is best dissolved in water in the proportion of $\frac{1}{2}$ to 1 oz. to a gallon, and this solution used for watering, taking care not to let any of the solution come into contact with the leaves. Quick growing plants, such as Begonias, should be watered once a week, and Palms, Rubbers, etc., once every two weeks. By such applications the plants develop more rapidly, and produce an increase of bloom to an extent hitherto unknown. It can also be mixed with the soil before potting, at the rate of one spoonful manure to one gallon of earth. Full directions on each package. Price, 1 lb. tin, 25c.; by mail, postpaid, 30c.

NITRATE OF SODA. When applied with farm yard manure at the rate of 300 to 500 pounds per acre, it gives astonishing effect. Market gardeners can use it profitably for cabbage, cauliflower and other brassy crops. It improves and hastens the strawberry crop. For farm crops, such as wheat, barley, oats and corn, a moderate quantity applied broadcast on the land is excellent. (Buy and read "Talks on Manures," by Joseph Harris; it will pay you). Price, 25 lbs., \$1; 50 lbs., \$1.65; 100 lbs., \$3.

PURE BONE MEAL. A standard and profitable fertilizer for most crops; can be sown broadcast or drilled in at time of seeding, using from 200 to 300 pounds per acre. Price, per 100 lbs., \$2; 500 lbs. for \$8.50; per ton, \$33, on cars, Toronto.

PURE FINE GROUND BONE. For florists' and gardeners' use, where quick results are required. Per lb., 10c.; 5 lbs., 25c.; 10 lbs., 40c.; 25 lbs., 75c.; 50 lbs., \$1.25; 100 lbs., \$2.25.

QUEEN CITY LAWN FERTILIZER. Especially prepared for use upon lawns, and contains all the constituents for promoting a quick, luxuriant growth, and a rich green color. It is absolutely odorless, and so clean that it can be applied with no offence to the organs of sight or smell. It is quick in stimulating the grass roots to greater activity, thereby inducing a thick, velvety surface upon the lawn. The common habit of applying coarse stable manure upon lawns causes weeds to grow, and is very offensive to both sight and smell. Better and cleaner results are secured by using "Queen City" Lawn Fertilizer. When making a new lawn apply from 150 to 200 lbs. per acre, raking well into the soil. For improving the lawn about one pound for each sixteen feet square. Care should be exercised not to apply too much at one time, as it is strong and liable to injure the grass when carelessly applied. Apply when the grass is dry, and if possible just before a shower. It is exceedingly valuable as a garden fertilizer, and can be applied at the rate of one pound to ten feet square. Price, 1 lb., 15c.; 5 lbs., 50c.; 10 lbs., 75c.; 25 lbs., \$1.25; 50 lbs., \$2; 100 lbs., \$3.50.

STANDARD PLANT FOOD. A preparation made expressly for plants grown in the house, conservatory or garden, and cannot be recommended too highly. It is free from odor, clean to handle, and materially promotes a strong healthy growth, a profusion of bloom, and aids in keeping plants free from insect pests. Directions for use on each package. By mail (postpaid), small package, 15c.; large package, 30c.; by express or freight, purchaser paying carriage, 5 lbs. for 75c.; 10 lbs. for \$1.00.

PREPARED PLANT SOIL. It is very inconvenient for those living in cities and towns to obtain suitable soil for re-potting plants. To meet such want we put a specially prepared soil, properly fertilized, and containing all the elements of plant food. Prices, 25 lbs. for 30c.; 50 lbs. for 50c.; 100 lbs. for \$1; 200 lbs. for \$1.75. At prices quoted purchasers must pay charges for carriage.

PEAT. To supply a necessity with florists and amateurs for growing Exotics, Azaleas and many varieties of plants requiring peat, we import Hampshire Brown Fibrous Peat, and for Orchids a special high grade of Bedfordshire peat. The peat is put up in compressed form, in bushel quantities or in sacks of four bushels each. Prices, Brown Peat, per bush., \$1; Orchid Peat, \$1.50 per bush.
